THE SEAL AND COD FISHERIES OF LABRADOR.

From the leading article of Harper's Magazine for April, entitled "Three Months in Labrador," we gather the following information respecting two of the most important industrial pursuits of the north country:

The seal-fishery of Labrador is valued at

\$1,500,000 per annum, and is wholly outed by Newfoundland vessels, with ception of perhaps a dozen that sail from Cana la and other Provinces. The hunting ground lies between the 49th and 52d pe of latitude, and the season of catching ex from March to May, inclusive. The average fare of successful vessels is two thousand seals, though as many as eight thousand have been taken; but of upward of four hundred vessels that yearly engage in see not more than sixty make remunerative ages, and many suffer heavy losses. the business is altogether a lottery. Nevertheless the chances of large gains are so seductive that sealers' berths, in vessels "up for the ice," command a premium of from \$8 to \$20. The men so engaged obtain their out-fit—which includes clothing, guns, ammunition, &c.,—on credit, the cost of which is detion, &c.,—on credit, the cost of which is de-ducted from their earnings at the end of their voyage; and they not unfrequently find a balance of \$125 in their favor at the close of the season. Yet they are fortunate if, after their accounts are squared, they do not find themselves in debt to the vessel, or at least with empty pockets. The expense of the outfit is borne by the owners of the vessel.— The captain receives no wages, but is allowed The captain receives no wages, but is allowed The captain receives no wages, out is showed a fare of ten cents on every seal caught. When this is deducted, one half of the fare is divided among the crew, and the other half falls to the owners. The average price per seal is \$3 50. Consequently, a fare of two thousand seals, worth \$7000, yields to the owners and crew \$3,325 each, and to the centain \$350.

Sealing vessels are sheathed with iron, and extra planked about the bows to pretect them from the ice. On reaching the ground they are warped into channels cut through the ice, where they lie snugly moored until warm weather breaks it up. Then the scalars, singly and in small parties, each man armed with a heavy iron-spiked bat and muffled to his eyes in furs, go forth in quest of victims. These lie, quietly sunning themselves near their breathing holes, often a hundred to gether, uttering doleful cries and frog-like croaks. Upon some hummock a sentinel is ever on the alert to warn of approaching ever on the alert to warn of approaching danger. But the hunters, creeping stealthing, and taking advantage of the wind and in equalities of surface, rush upon them at first alarm, dealing death-blows right and among the affrighted herd, who wright and riedly over the ice, and tumble flounder into their holes. The old scale generally care at their powerents are wonder. into their holes. The old seals generally eacape, as their movements are wonderfully quick, but many of the young are killed. These are now dexterously "sculped." stripped of their blubber and pelts, which come off entire; the bloody carcasses are left to glut the starveling bears and are infoxes, and the pelts rolled up and dragged away to the vessel. the seals are shot from boats in the open water, where they are found disporting. There are various kinds of seals, among which are the harbor, ranger, jar head, dotar, bed-lamer, harpe, blue, and square flipper; differing as greatly in size and physiognomy as members of the human family. There are canine and feline looking seals; seals with canine and feline looking seals; seals with round smooth heads cropped like a prize fighter's, and seals with patriarchal beards and long flowing looks; meek pensive-looking seals and fierce and long tasked; little seals three feet long, and monsters upward of eight feet in length, weighing a thousand pounds. they migrate to more northern regions, returning in December. In early summer they are caught in strong, large meshed nets. They constitute an important article of food to the settlers and Esquimanz, and to the latter are indispensable. The blubber is exceedingly fat, and being cut into strips and thrown into vats, a large quantity of oil is obtained by natural dramage. The residue is tried out by heat. It is extensively used for machinery, both in Europe and the United States, but is sold under a different name. Its value is about fifty cents per gallon.

Its value is about fifty cents per gallon.

After their sealling voyages vessels commonly pass the summer in codfishing. This fishery is perhaps about equally divided between the Provinces and the States, though the number of men and vessels employed by the former is much the largest in proportion to population. The outfit of a fishing vessel comprises a cargo of salt, cod and bait seines, a supply of lines and hooks, averal empty puncheous for oit, and from two to eight boats. The crew is either hired for empty puncheons for oil, and from two

At such a time it is not for us to seek to perpetuate platforms. This is not the time for politi-cal tricks. This is the time when every man should be for his country—for his common land. I do not come here to discuss the affairs of the country, however, but to say that something should be done for the salvation of our glorious Union. We must make concessions for the sake of reconciliation and peace. What can we do without the towards the restoration of peace and Union? That's the question that principally interests us. I did not come here to inquire the cause of our troubles, but to direct your attention to the reme dies and ask you to be prepared to meet the diffi-culties that surround us. I ask you, one and all every one here and elsewhere—to make prepara-tions for the advent of trouble. I ask you to call each one on his neighbor to rally with him in behalf of our common country—to avert the horrors of civil war and to sustain the stars and stripes, that they shall remain the common emblem of whole Nation's Liberty!

"No man can be a true patriot without first be-coming an abolitionist."—Greeley's Helper Republi-can Text Book, endorsed by Sixty-Eight Republican members of Congress, and 100,000 copies printed or gratuitous distribution.

The Senators from Pennsylvania said they were willing to make concessions. The Southern States had not asked concession in any form. The South had no complaint to make against the Constitu-tion, but that the Constitution had been violated and her rights disregarded, but she never asked concessions. She only asked that the Constitution be carried out. She would be humiliated if she asked anything else, and the North would be hu iated if it granted it. The South only asked for -Senator Mason.

The next General Assembly of Connecti cut will in all probability be one of the most important that has been chosen for some time; and it will be well for the Democracy in every town in the State to see that national, conservative, Union loving men are elected. What gives it this importance is the fact that it will be called upon to vote upon the proposed amendment to the Constitution which requires three-fourths of the Legislatures of the States to ratify it. The proposed amendment is as follows:

No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere within any State with the domestic institutions thereof, including that of persons held to labor or service by the laws of said States.

This amendment is what is called the Corwin resolution, and passed both houses of Congress at the last session. It was passed ginia at any day." by the votes of Democrats and conservative Republicans, both in the House and Senate. The Connecticut delegation, however, voted against it in a body-notwithstanding the assertions that they have made that they do not wish to interfere with slavery where it

An opportunity will be presented on the first Monday in April for Connecticut to put herself on the side of the Union. Not only should the Democrats and conservative men of the State use their efforts to defeat those who have misrepresented us in Congress, but also to elect men to the Legislature who will vote for an amendment to the Constitution which will tend much to allay the present excitement. The amendment is nothing more than what every true lover of his country should be willing to advocate; and every conservative and Union man ought to strive to elect those to the Legislature who will vote for the amendment when it is brought before that body for ratification and approval -thus showing that there is one State at least at the North that does not wish to interfere with the domestic institutions of the

THE FEELING IN VIRGINIA. The Republican presses and orators are endeavoring to make the masses believe that Virginia will not join the Southern Confed

eracy. They do not lay before the people the true condition of things in that State, well knowing if they did so that it would drive thousands of conservative men from their ranks. A gentleman of Petersburgh who is well acquainted with the condition of things in every section of that State, writes as follows to a friend in this city. His letter shows how the people of Virginia feel on the questions which are now agitating the country; and it also shows clearly that unless something is done by the conservative men Southern Confederacy. "As to the effect of Lincoln's inaugural message in Virginia and the South, I would say that it is eminently adverse to the peaceful solution of our political embarrassments. The moderate language of the address is evidently the result of careful study and of the non-committal policy which Mr. Lincoln has persistently adhered to since his election. The disguise, however, is thoroughly penetrated by the people of the South, who do not fail to see in spite of the mask, the dogged obstinacy with which he purposes to carry out the radical and disunion measures of the sectional party who have placed him in power. When his interrogatories, hypoth. eses, and innuendoes have been fairly analyzed, the inaugural will be found to advocate all that was ever intended by the " irrepressible conflict"-to wit; that slavery is a moral and political wrong; that it is to be confined down upon it in this fashion: within its present limits and doomed to a speedy extermination; Northern nullification laws are to be tolerated, which will defraud the South of slaves to the value of \$1,000,000 per year; the constitutional doctrine that slaves are property is to be repudiated; the decisions of the Supreme Court are to be modified and set aside the Slave states are to be excluded from all participation in the territorial domain; United States duties are to be collected of the seceded states; and, in a word, the entire force of army and navy under the control of the President is to be employed to coerce and subjugate or bring back the seceded States into the American Union. The only offset to all this high party policy, which Lincoln offers to the South is-wonderful generosity ! -that he will not perjure himself and nullify the constitution by attempting to abolish slavery in the States. These are the views generally entertained in Virginia, of the late inaugural, and the effect of their announcement has been to develop a mighty resistant of the State which have given an enthusiastic expression of this feeling, and in several instances have instructed their delegates in convention to vote for immediate secession. There is in the old dominion an immense conservative feeling and love for the Union. With dignified and calm deliberation our convention will try every expedient to restore the Union and secure the equal and just rights of all the South in it. Their demands for this will not be less than the Crittenden Resolutions-which are virtually an abandonment of the distinctive features and claims of the Republican party. If, in a reasonable time, these demands are not met, Virginia, and with her, all the remaining States South, are certain to resume their rights and complete the organization of the Southern Confederacy. This step may be taken by Vir-

THAT BELL AGAIN! A gentleman who resides in Middletown writes as follows to the Hartford Times, concerning Mr. Douglass, the John Brown-belltolling Republican nominee for Lieutenant

I see the Republican papers attempt a denial of the fact that Mr. Douglass of this city, their candidate for Lieutenant Governor, caused his factory bell to be tolled on the day old Brown was hung. It will not de. The fact was so. Everybody here knows it, and Mr. Douglass will not deny it. Instead of being "at dinner," and "not knowing about it," &c., the truth is, he was sitting in his factory, and it was with his knowledge and consent the bell was tolled. It is well known here that it was by his influence that not only his own factory bell was tolled, but the bells on the South Church and the Baptist Church—both within a stone's throw of his factory. Indeed some

The Republican papers, in order to mislead conservative voters, have strenuously asserted that "Mr. Douglass was at dinner when the bells were tolled, and knew nothing about the affair until it was over. It is now proved that he was in his factory at the time, and knew all about it when it was done. Can a party lay any claim to conservatism with such an Abolitionist upon their ticket? A vote for the Republican ticket this spring is a vote endorsing treason, disunionism sectionalism, and Abolitionism.

Let it be remembered that a vote for Wm. A. Buckingham is a vote to bind the chains of fanaticism around us still more strongly, and to give the government of the State to those who will plunge the country into civil war and destroy the Union.

Let it also be remembered that a vote for James C. Loomis is a vote for a patriot whose record personally and politically is beyond reproach, and for a policy that by kindness

THE NEW TARIFF.

The new Tariff, passed by the last Congress, appears to have few friends in any quarter. The New York Times, of March 22d, (good Republican authority,) comes

The enactment of a highly protective Tarist on the heel of the last session of Congress, without the slightest provision made for its enforcement, and at the very time when secession was so fully matured as to indicate its character and purpose, was an act of reckless folly uparalleled in our legislative history. The measure equally bad in every point on which in can be viewed.

The New York Evening Post, another Re publican organ, calls upon the President to convene an extra session of Congress, for the purpose of revising and correcting the blunders made in this new financial measure What else but "an unparalleled act of reckless folly." on this as well as other subjects, could be expected of a Congress whose maority was made up of such reckless, inconsiderate, violent men as O. S. Ferry.

densed than Dr. Van Dye's Sermon, and yet gives more Scriptural proofs on the subject. We will supply orders at fifty cents per sincents. Fifty copies for thirty cents. Circulate the documents.

On all sides, says the Norwich Anrora, we hear of men coming out from the Republican ranks, and declaring that they will have nothing to do with a party which has become abolitionized. They did not enlist in that party as Abolitionists, and will not vote for such men as Burnham, Ferry & Co., who are in favor of opening a direct war upon slavery in the States. The open desertions from their ranks have frightened the leaders of the Republican party, and they have no resort but to appeal to the office-seekers for help.

Let it be remembered that O. S. Ferry, the Republican candidate for Congress in this district, stands pledged to the civil war policy-having voted against every measure of peace, and refused even to vote for a measure calculated simply to secure the South from any interference with its institutions from the North. Let the people throw overboard this demagogue who has done all in his power to keep up the present excitement; and who advocates measures that will, if carried out, deluge the country with blood.

When Hon. Wm. D. Bishop was in Congress he was denounced and abused by O. S. Ferry for using the franking privilege. Ferry in his speeches announced that he did not intend to use the franking privilege, if tant, they assert that by its adoption the elected,-not he. He was going to have such things done away with at once. Now our mails are loaded down with documents franked by this same Ferry. This demagogue's consistency consists in being as inconsistent as shed, are looked upon as fanatical disunion possible.

The decision of the Administration at Washington to exclude "all foreign-born" citizens in the distribution of fat offices. creates much indignation among those German voters who have gone with the Abolition party, and naturally expected their share of the spoils. Some of them declare they will never vete with the Lincoln party again.

It is said that, by actual measurement.

NEW BOOKS, &c. THE NATIONAL CONTROVERSY; or The Voice of the Fathers upon the State of the Country; by Joseph C. Stiles; New York: Rudd & Carleton.

This is a book of about one hundred pages and in our opinion is just the book for the times. It is written in the spirit of a truly tune with the Southern Confederacy. Their earnest and devoted Christain minister, while its logic is unsurpassed by anything we have seen on the subject. The argument on the 'expectation of the fathers," showing that the framers of the Constitution, not only had no reason to expect the speedy overthrow of slavery, but that they actually did not expect it, is one of the most logical and convincing we ever read. The Rev. Doctor has discussed the constitutional question of "slavery" better than it has yet been discussed by any layman or lawyer. Clergymen seldom do this sort of discussion wellbut Dr. Styles has fairly hit the nail on the put, and we could wish the book were in the hands of every Northern man. Our advice to all is, get the book, read it carefully, think of it, and do all you can to make every body strike a severe blow upon the "Diestical and fanatical anti-slavery" sentiment of our times and section of the country. The work can he had at Sanford's

PAMPINEA AND OTHER PORMS, by Thomas Balley Aldrich; New York; Rudd & Carleton.

These poems have been written and published from time to time by Aldrich, and are now collected and issued somewhat after the manner of an annual, under the cantion of "Poems of a Year." The author has acquired an extensive reputation as a writer of idylls, and this neat little volume contains a young, eloquent, and glowing poet. If he efit of the poor in Belleville, N. J. continues to string together his silvery bells with the musical skill which has increased in him year by year, he will soon find himself Republicans, finding themselves in a bad fix, among the justly famous. The work is printed on tinted paper and is handsomely bound. It can be had of Sanford.

> THE ATLANTIC MONTHLY, for April, contains the following articles : "April Days ;" "The Professor's Story;" "Bubbles ;"-"Cities and Parks;" "Life in the Iron Mill;" "The Reign of King Cotton;" "Glimpses of Garribaldi;" Two or Three Troubles;" "Marion Dale;" "Charleston under Arms; "and Reviews and Literary Notices." Sanford has it.

THE REAL DISUNIONISTS.

MESSRS. EDITORS :- At the present time, when the Republican papers of the State are accusing the Democrats of justifying secession, perhaps it would not be out of place to go back some ten years, and see how some of the now leading Republicans then stood as regards disunion. We find, by reference to the Congressional Globe, that on the 11th of February, 1850, John P. Hale, now a prominent leader in the Republican camp, presented a petition praying "for such action on the part of Congress as will tend to the speedy dissolution of the Federal Union." Objection was at once made to the reception of the petition by Senators Webster, Cass, Douglas, Ciay and others, on the ground of its tion was as follows; aves three-Hale.Chase and Seward; two of whom were candidates before the Chicago Convention, and are now We have printed Bishop Hopkins' Letter | Cabinet officers. A full report of the speeches on of Christ and the Apostles. It is more con- the petition may be found in the Congression-

Would it not be well for the Republican presses and leaders in this State, before gle hundred; two hundred for seventy-five they talk about the Democrats favoring disunion, to "cast the beam out of their own eye?" The records show that the only disunion party is the sectional radical Republican party which is now under the leadership of the blood-letting Abolitionists, Hale, Chase, Ferry & Co. VERITAS.

One, and we think two, candidates for government offices in this city, not more than two weeks since, avowed that they would not stir one inch in the present campaign, unless they could have pledges from O. S. Ferry that he would recommend them to be appointed to the respective offices that they desired. As they are "going to be stirring" all this week, not omitting Fast Day night, are we not safe in drawing the inference that they are in possession of the pledges they desired from Mr. Ferry? We learn that they have also entered into an alliance with two candidates already nominated in this city for State and local offices, also with a prospective candidate, for the purpose of aiding each other to obtain the offices they covet.

A dispatch to the Herald, from Washington, states that there is a rapidly growing sentiment in that city among conservative men favorable to the adoption of the const tution of the Confederate States. They re gard that instrument as a great improvemen upon the old one, and what is more impor Union is again restored and peace and fra ternal feeling between the sections irrevoca bly cemented. Politicians of the Ferry strip who advocate eoercion, civil war, and blood ists by all who are endeavoring to settle ou present difficulties peaceably.

Border State Propositions," the Union eeling in those States is still hopeful-waiting to see what will be the course of the Eastern States. Connecticut speaks in a few days; and much depends on her action. If Republicanism is endorsed, it will probably send the Border States to despair of preservand elect a Legislature that will acknowledge and conciliation will prevent a further distance to despair of preserving their actions towards other States the ruption of the Union, and pave the way for partment, in Washington, one cord and a half of applications for office! What patriotism!

Notwithstanding the rejection of the

Connecticut must be redeemed from Abolitionism! She must show, by her vote that she is opposed to driving off half the Union, by the practice of injustice. She must demon strate the desire to extend equal rights to all -and win back those who have abandoned the Union, by the exercise of a national spirit. All who are opposed to the crazy notions of the Abolitionists should leave no honorable means untried to swell the Democratic vote at the coming election. Democrats! Union men! Conservative men!work with a will during the short time that is left. It may the last time such service will be of any avail! Let not the golden opportunity be lost!

In the Standard, a Know Nothing paper, we find notices that S. B. Beardsley James E. Dunham, and A. J. Jacques, all prominent Know Nothings whea that order was in full blast, are now stumping this Senatorial District for O. S. Ferry, who was one of the great leaders of the Know Nothing party. We think that when they get through and the vote is taken, they will know nothing of the whereabouts of their candidates

O. S. Ferry says he is not an Abolitionist, and he is now endeavoring to smooth over his sectional course in the late Congress, in order to induce conservative men to vote for him. His vote against the Corwin resolution-which shows that he wants to have Congress interfere with slavery in the states where it exists-proves that he is an Abolitionist of the rankest kind.

HAIR RESTORATIVE.

DISTINGUISHED ST. MOUIS PHYSICIAN WRITES

ST. Louis, July leth, 1850.

O. J. Wood, Esq:—Dean Sir.—Allow me the pleasure and satisfaction to transmit to you the beneficial effects of your HAIR RESTORATIVE, after a trial of 5 years. Toommende using your Restorative of January, 1855, since which itme! have not been without a bottle on hand. When I commended the use, my hair was quite thin, and at least one-third gray. A few applications stopped its falling, and in three weeks time there was not a gray hair to be found, neither has there been up to this time.

After my hair was completely restored, I continued its use by applying two or three times per month. My lair has ever continued healthy, soft and glossy, and my scalp perfectly free from dandruff. I do not imagine the facts above mentioned will be of any particular advantage to you, or even fatter your vanity at this late day, as I am well aware they are all well known already, and even more wonderful ones throughout the Union. I have occupied my time in traveling the greater part of the time the past three years, and have taken pride and pleasure in recommending your Restorative, and exhibiting its effects in my own case. In several instances I have met with people that have pronounced it a humbug; saying they had used it and without effect. In the every instance, however, it proved, by probling the matter, that they had not used your article at all, but had used some new article, said to be as good as yours, and selling at about half the price. I have noticed two or three articles myself advertised as above, which I have no doubt are humbugs. It is astonishing that people will patronize an article of no reputation, when there is one at hand that has been proved beyond a doubt.

Apparently, some of those charlatans have not brains.

are subject to.

I called to see you personally, at your original place of business here, but learned you were now living in New York.

You are at liberty to publish this or to refer parties to many communication addressed to me, care box No. 1,22, will be promptly answered. Yours truly JAN, WAITE M. D.

WARREN SPRINGS, Perry Co., Penn., June 7, 1860.
PROF. WOOD—DEAR SIR:—I was induced more than a year ago to try your valuable HAIR RESTORATIVE, for the purpose of cleansing my head of dandruft. I had suffered with it upon my head for vears, and had never been able to get anything to do me any good in removing it, although I had tried many preparations, until I saw your advertisement in a Harrisburg paper. Being there at the time, I called at Gloss & Kunkle's drug store, and bought a bottle, and now am prepared to recommend it to universal use, for it has completely removed all dandruff from my head, and an application once in two weeks keeps it free from any itching or other unpleasantness. I must also state that my hair had become quite white in places, and, by the use of your preparation, has been restored to its original color. I am now so years of age, and although I have used two bottles of the become quite white in places, and, riginal color. I am acceparation, has been restored to its original color. I am acceparation, has been restored to its original color. I am acceparation, has been restored to its original color. I am accept the second of the Restorative, no one has any knowledge of it, as I allow a few gray hairs to remain, in order to have my appearance comport with my age. My head is now of less trouble to me, in keeping it clean, &c., than at any time since I was a child. I consider your preparation of great value, and, although I do not like to expose myself, I consider it my duy to say so. You can use this or any part of it in any shape you think proper, if it is worth anything to you.

Yours, &c., H. H. ETTER.

BLOOMINGTON, Ind. July 30, 1839.

DEAR SIR:—I hereby send you a statement that I think you are entitled to the benefit of. I am a resident of Bloomington, and have been for over thirty years. I am now over 50 years of age. For about twenty years past my hair has been turning considerably gray, and was almost entirely white, and very stiff and unpliant. I have seen a number of certificates of the very wonderful effect of your HAIR RESTORATIVE, but supposed there was more fiction than truth in them; but entertaining a strong desife to have my hair, if them; but entertaining a strong desire to have my hair, if possib e, restored to its original color and fineness, as it was in my lyounger days a beautiful black, I concluded I would make the experiment commencing in a small way. I purchased one of your small bottles, at one dollar, and commenced using. following directions as nearly as I could. I soon discovered the dandruff removed, and my hair, that was failing off in large quantities, was considerably lightened, and a radical change taking place in the color. I have continued to use it till I have used three of your small bottle and just begun on the fourth. I have now as preity a head of dark brown, or light black hair as any man, or as I had in my youthful days, when a boy in the hills of western Virginia. My head is entirely clear of dandruff, and the hair ceased entirely falling off and is as soft and fine, and feels as olly, as though it was just from the hands of a French champooer. Many of my acquaintances frequently say to me, "Butler, where did you get that fine wig?" I tell them it was the effects of your Restorative. It is almost impossible to convince them that it is the original hair of the asme old gray head. Yours truly. FKED, T. BUTLER,

WOOD'S HAIR RESTORATIVE.—We are not in the habit of puffing every new discovery, for in nine cases of ten they are quack nostroms, but we take great pleasure in recommending Professor Wood's article to all whose had is falling off or turning gray. Our well-known contributor, Finley Johnson, Eaq., has experienced the benefit of its application, and joins with us in speaking of its virtues. Let all try it and bald heads will be as fare as snow in summer—

Religious Patriot.

WOOD'S HAIR RESTORATIVE.— Unlike most specifics this is proved, by unimpeachable evidence, to possess great efficacy as a restorer of the hair to its prestine vigor. Where the head had become almost bald because of sickness, the use of this article has produced a beautiful growth of this glossy that. It is therefore a valuable preparation for all classes. Its ingredients are such as to effectually eradicate dandruff and other impurities which operate so injuriously to the hair. It also has curative properties of another description. In many cases pimples and other disfigurements of the skin disappear wherever it is used. There is no hazard attaching to the trial of this remedy, and its effects can only be beneficial, as the compound, if it does not cause a manifest improvement, is is capable of doing harm, as its compount elements are perfectly innocuous. Hadon. Transcomment elements are perfectly innocuous.

A GENUINE BOON.—In our capacity as conductor of a public journal, we are called upon to advertise the curealls of the day, each of which claims to be unaduler ated in its composition and infallible in its curative effects, with what justice we leave our readers to determine. In one instance, however.—Prof. Wood's Hair Restorative—we are so well assured of the notable qualities of the article, that we give it our endorsement as all that its inventor and vender claims it one. Its effect upon a failing head of hair is universally known to be mugical. Like time or guano on exhausted land, it brings the crop wherever applied. Our own thatch is fortunately healthy, but we advise our friends with sparsely-growing hair to try the Restorative.— Columbia Spy

ALL HAIR DYES ABANDONED—WOOD'S GREAT ARTICLE HAS TAKEN THE FIELD.—Professor Wood stands on an eminence no chemist, whose attention has been turned to inventing a hair tonic has ever before reached. His fame is studen but world-wide, and thousands who have worn wige or been hald for years, are now, through the use of this preparation, wearing their own natural and luxuriant head covering. So much for chemistry, the chemistry of human life, and the laws which apply to the functions of the system. Prof. Wood studied out the human hair, its character, its properties, its diseases, and how to restore the decaying vitality of that ornament; he saw, as in his own case, that gray-hair is unnatural unless the age of the individual had reached four score, and he celleved that the hair could be naturally revitalized. He tried his own case—almost baid and quite gray at the age of thirty-saven, he restored his own hair in color, strength and luxuriance, and the article he did it with he gave to the world.
