EXCURSIONS AMONG THE GREAT GLACIERS.

Lengman & Co., of London, have published an interesting volume from Alfred Willis, who has earned the reputation of an experienced traveler over some of the most dangerous passes of the Alps. Below, are a tew brief extracts. The "bergschrund" is described as a great crevasse or chasm in the glacier, where the curtain of the glacier comes n contact with a face of rock, comm almost as soon as the cliffs begin, and extending nearly the whole subsequent length of the glacier. Mr. Willis says: We left the Col at half-past eleven, and

turning very sharp to the left began our decent by passing diagonally down a snow-slope, just under the low ridge we had skirted so long before we reached the Col. Here we saw one of the most wonderful sights the ice world can offer. The upper part of the snow-slopes consisted of five successive beds of snow piled one on the top of the other, each overhanging the one beneath, and each fringed with a thick bodder of long ice-pendants. Picture to yourselves this scene sparkling in a mid-day sun. Can anything be imagined more fantastically beautiful?—the soft white snow-bank curling over as it rose gently from the northern side of the ridge and breaking into a surge of lighter ridge, and breaking into a surge of icicles, bound together at their bases by a thick mscrustation of fresh fallen snow—this wintry fringe repeated in five successive terraces, till the lowest ones were fairly in the shade of the upper—and we passed so close beneath the overhanging mass that my shoulder brushed off some of the icicle."

shoulder brushed off some of the icicle."

Just underneath this spot we scrambled down some rocks, and working diagonally downwards approached the bergschrund. We were all four tied together. The bergschrund was arched over with soft snow. Bellin was first, I second, H. third, and Cachat brought up the rear. Bellin slid over the bridge. He had not waited for H., who was third, to come close enough to him, and H. misunderstood something that Cachat said, and shortened my rope instead of slackening it. The consequence was that I was thrown down on my face in the middle of the snoworidge, and was detained there some seco Each of my arms went through in one place, and one of my knees in another, and I saw that the crevasse was seven or eight feet wide, and of great depth. I knew that if I did not lie still I should go through, and so I kept perfectly quiet till the misapprehension was removed. H. gave me rope enough and Rellin handed me access after which H. and Bellin hauled me across, after which H. and Cachat, each in his turn, lay down at full length, and were drawn across the same-way, and we all stood safe below this formidable

obstacle." That the pursuits of science are not without risk to their followers may readily be Dr. Tyndall's ascent to the summit of Mount Blanc, for the purpose of burying registering thermometers in the snow, for making phi-losophical observations.

osophical observations.

"At last, when we had endured for nearly a whole hour the combined attack of wind and whole hour the combined attack or wind and mist and snow-drift, I began to get uneasy as to consequences. My hands and feet were almost without feeling, and one of Dr. Tyndall's feet was quite seaseless, and on getting up from the snow, where a bursting headache had made me glad to lie as still as I could. had made me glad to he as still as I could, I was so alarmed at the aspect of our party, that I called Dr. Tyndall's attention to it, and, abandoning all further attempts to boil water we resolved instantly to depart. Our men looked like animated corpses; the livid hue of their faces had deepened almost into black; they were shriveled and shrunk and their facety ware shriveled and shrunk and their anxiety. The wind was an icicle. Dr. Tyndall's beard and mustache were white, scarce-ly a vestige of their proper color being observable. He told me my eyelashes even were all coated with ice. The wind was howling round us, as if in an unholy triumph over our wretchedness. Balmat, I thought, looked particularly ill; but with indefatigable zeal, he was still busy trampling down the snow into the hole where the thermometer now lay nearly four feet below the surface. The iron bar was sunk seven feet deep, leaving about three feet above the ice, to guide those who might seek it the next autumn to those who might seek it the next autumn to the spot. I asked the men some questions, but every one seemed unwilling to open his mouth, and answered only with a gesture.— "Let us be off at once," I exclaimed, "or we shall have some serious accident." \$22,90—For a beautiful NEW GOLD WATCH, Ladles size, warranted a perfect

No wonder that a single pair of woolen gloves were not stout enough to resist the protracted action of such fearful cold. We gathered our traps together with all the haste we could, and in two minutes were out of sight of the sumit, hurrying down the trackless waste of ice which forms the Calotte. We cound not see thirty yards before us, and every trace of our ascending footsteps was completely ob-literated; but guided by the unerring sagaci-ty of Balmat, we had no fear of losing the ty of Balmat, we had no fear of losing the direction, even in that dreary mist. We had not gone many hundred yards, however; before Balmat again turned to me and said, "I feel a something; I think I shall look at my hands." And pulling of his gloves he found, to our horror, that form the said of the said fingers to the knuckles, they were perfectly black. He said quietly, "There is no time to lose;" and casting down his traps, began to rub his hand violently with the snow; then as no trace of sensation appeared, he began to get alarmed, and begged us to beat his hands. "Frappez," he said, "frappez for tement; n'ayez pas peur; fortenent, forto our horror, that from the ends off the tement; n'ayez pas peur; fortement, for-tement, fortement!" THE LATE ELECTIONS. The gain of two Democratic Congressme n Connecticut, and the total defeat of the Republicans in Rhode Island will gladden the hearts of Union and conservative men everywhere. The news from Connecticut and Rhode Island will come upon the Abolitionists at Washington in the shape of a staggering blow between the eyes.

The black line in New England is broken never to form again! Two National men from Connecticut-one from Massachusettsand two from Rhode Island! This is the beginning, and a short time will complete the good work of the total defeat and pulveriza tion of the Ab. ii on Republican party.

The results of the late elections in Connectiont and Rhode Island are significant of the impending downfall of Abolition Repub licanism, which is about to fall to rise no more! It has been tried in the balance and found wanting; and the people everywhere are putting upon its black and ugly front the naval armament now fitting out. seal of their disapprobation. A party who are led by such Garrisonian Disunionists as Greeley, Giddings, Samner, Lovejoy and Ferry, must expect nothing but defeat and rebuke at the hands of the people; and, thank God ! they are getting-we hope, not too late-their deserts !

In 1822 he was appointed commissioner of the general land office by President Monroe; and in 1823 he became Postmaster General. In the 1829 he was appointed by President Jackson a justice of the United States Supreme Court, after he | compliment : had refused the offer of the war and navy departments. He entered upon the discharge of his duties at the January term of 1830, and has performed the duties of that station for a period of thirty-one years.

There are now two vacancies in the Supreme Bench, caused by the death of Judges Daniel, of Virginia, and McLean, of Ohio.

THROWING OFF THE MASK.

The Standard now threws off its mask and tells its readers quite plainly that the Aboli tion Republican leaders design to prevent a re-establishment of the Union. This has been apparent enough to a majority of the people in this part of the State, ever since the dict issued in December by Mr. Gillette, at Hartford, tollowed by the manifesto of Mr. Ferry at Washington. They are consequently not surprised at the Standard's present comewhat formal announcement. The Tribune shadowed forth this in its appeal to make no compromise, but let secession go on; saying it is a good thing; it will clear away the clouds, bring sunshine, &c. Acage for each man, woman and child. It is often said that figures will not lie. However this may be, people in this quarter are not yet prepared to believe that the Tribune's figures, on this subject, tell the truth.

VIRGINIA UNION CONVENTION. We see it stated that the Virginia Union

Convention have unanimously adopted a report in favor of a series of amendments to the Constitution, similar to those recommended by the recent Convention held in Washington. The substance of them is: 1st-That the Missouri restriction of 36.30 shall be extended to the Pacific. 2d-That slaveholders shall have the right of passing through any of the States with their slaves. 3d-That fugitive slaves not given up shall be paid for. 4th-That the elective franchise and the right to hold office, whether Federal or Territorial. shall not be exercised by persons who are of the African race. The Tribune, true to its Disunion purposes, says these amendments cannot be accepted by the North, and if Virginia insists upon them as a condition for remaining in the Union, it says, "We hope she will secede without delay." We see nothing in them that any white man, who regards the Union as of any value, can reasonably ob-

NEWS SUMMARY.

Edward Payson Weston, the pedestrian, has issued another bulletin. He says the reason he didn't walk-from Boston to Washington inside of ten days, as he proposed, was owing to delays occasioned by malicious persons, and by the ferry boat at Port Deposit So he is going to "try, try again," and will start from the Capitol at Washington at noon April 23d, and do it or "break a leg." Good spunk, but unprofitable business.

WHAT WILL A GLASS OF WATER HOLD? is full of water, any solid substance immersed in it will cause it to overflow, and such will be the case if the substance is not soluble in the water: but the philosophic truth that in dissolving a body you do not increase the volume of the solvent, may be proved by a simple and interesting experiment. Saturate certain quantity of water, at a moderate heat, with three ounces of sugar, and when it will no longer receive, there is room in it for two ounces of salt of tartar, and after that for an ounce and a drachm of tartar, and a drachm of green vitriol, nearly six drachms of nitre. the same quantity of sal ammoniac or smelling salts, and two drachms and a scruple of alum and a drachm and a half of borax; when all of these are dissolved in it, it will not have increased in volume.

CURE FOR HYDROPHOBIA.-A Saxon forester, named Gastell, now of the venerable age of eighty-two, unwilling to take to the grave with him a secret of so much value and mportance, has made public in the Leipsic Journal, the means which he has used for fifty years, and wherewith he affirms he has rescued many human beings and cattle from the fearful death of hydrophobia. Take immediately warm vinegar or tepid water, wash the wound clean therewith, then dry it: pour upon the wound a few drops of hydrochloric acid, because mineral acids destroy the poison of the saliva, by which means the latter is neutralized.

A GOOD STORY .- We have a good story of an occurance that recently took place in Newburyport, Mass. A servant girl in that town ailment to be a pain in the bowels. The doctor gave her a cathartic, and requested her to call again in a few days, which she did. He asked her if she had taken the medicine, to which she replied in the affirmative He then asked her "did anything pass you after taking it ?" "Yes sir," said she "a horse and wagon and a drove of pigs." The doctor collapsed, remaaking, "I think you must be better."

RATHER SHARP. There is a good deal of sound sense at times in the remarks of insane persons. At a lunatic asylum, a few days since, a patient was asked if he was fond of riding horseback. "No, sir, I ride a hobby. "There's not much difference between the two," carelessly remarked the gentleman "Oh! yer there is," said the patient, "and it is this: if you ride a horse, you can stop him and get off, but when you mount a hobby you can't stop and you can't get off.'

SPECIAL NOTICES. INTERESTING TO THOSE SUFFERING FROM

HEADACHE. A CERTAIN REMEDY FOUND IN DR. M'LANE'S CELEBRATED LIVER PILLS, PREPARED BY

FLEMING BROS. OF PITTSBURGH. wing is a sample of certificates received daily from our own citizens:

NEW YORK, AUGUST 1, 1852.—This is to certify that I have been subject at times to severe headache; sometimes the pain would be so severe I could rest neither day or night. Hearing of Dr. M'IAMP'S GELLERATED LIVER PILLS, prepared by FLEMING BROS., I sent and got abox, of which I took two pills on going to bed, for two nights. They relievely me entirely. Some time has now elspaed, and I have had no more trouble from sick headache.

M. JOHNSTON, 113 Lewis street.

Purchasers will be careful to ask for DR. M'LANE'S CELEBRATED LIVER PILLS, manufactured by FLEMING BROS. of Pittsburgh, Pa. There are other Pills purporting to be Liver Pills, now before the public. Dr. M'Lane's genuine Liver Pills, also his celebrated Vermifuge, can now be had at all respectable drug stores. None genuine without the sig-nature of [mch 30 6dtc&lwtc5] FLEMING BROS.

CANCER CURED WITHOUT PAIN

AND WITHOUT THE USE OF THE KNIFE.—
I have devoted many years of time and close investigation to the cure of Cancers, and have at last an unmistakable remedy for this most distressing and dangerous form of Scrofula. So successful have I been in my mode of treatment, and so certain am I of my ability to do what I promise, that in all cases where I undertake a cure, I do not hesitate to warrant that it shall be effected.

REMEMBER THAT YOUR CANCERS CAN BE CURED, AND THAT I CAN CURE YOU.

DR. BABGOCK is, the original Cancer Doctor of New England, and the only one who removes Cancers without pain.—All others are but imitators, induced by his success to profess themselves Cancer Doctors. Plenty of references to those 4 ho have been cured can be seen at my office.

Orders from abroad promptly attended to. A fee of \$1 must accompany each order, or no notice will be taken of it. White Swellings, HTp Diseases, Birth Marks, Scrofulous and Malignant Ulcers, Diseases of the Mouth and Throst, Ulceration of the Bones, Tetter, Scald Head, and all Diseases of the Skin, PERMANENTLY CURED.

TO WHOM IT MAY CONCERN.—About two years ago, a spot made its appearance upon my nose, which, though at first I theught little of it, soon proved to be that creaded disease, called Cancer. Dreading to have it cur out, and also having little confidence in the knife treatment, it had been growing from one AND A HALP to two years, when soeing the advertisement of De. N. BARCOCK, of this city, and swo hearing him spoken of as being skillful in the removal of Co-cerc ame out, and the wound quickly healed over without difficuring my face. I am free to say, that the operation was entirely satisfactory, and that I feel myself entirely cured. I most cheerfully certify to the knowledge and skill of Dr. Barcock, in the treatment of my cancers, and do recommend him to all such as may be afflicted with this dreadful disease.

HAIR RESTORATIVE.

OTHERS SAY OF IT.

DISTINGUISHED ST. LOUIS PHYSICIAN WRITES

ST. LOUIS, July 10th, 1860.

O. J. WOOD, Esq.:—Dear Sir.—Allow me the pleasure and satisfaction to transmit to you the beneficial effects of your HAIR RESTORATIVE, after a trial of 5 years. I commenced using your Restorative in January, 1855, since which time! have not been without a bottle on hand. When I commenced the use, my hair was quite thin, and at least one-third gray. A few applications stopped its falling, and in three weeks time there was not a gray hair to be found, neither has there been up to this time.

After my hair was completely restered, I continued its use by applying two or three times per month. My hair has ever continued healthy, soft and glossy, and my scalp perfectly free from dandruff. I do not imagine the facts above mentioned will be of any particular advantage to you, or even flatter your vaulty at this late day, as I am well aware they are all well known already, and even more wonderful ones throughout the Union. I have occupied my time in traveling the greater part of the time the past three years, and have taken pride and pleasure in recommending your Restorative, and exhibiting its effects in my own case. In several instances I have met with people that have pronounced it a humbug; saying they had used it and without effect. In every Instance, however, it proved, by probing the matter, that they had not used your article at all, but had used some new article, said to be as good as yours, and selling at about half the price. I have noticed two or three articles mysoif advertised as above, which I have no doubt are humbugs. It is assonishing that people will patronize an article of no reputation, when there is one at hand that has been proved beyond a doubt.

Apparently, some of those charlatans have not brains

WARREN SPRINGS, Perry Co., Penn., June 7, 1860.

PROF. WOOD—DEAR Sir:—I was induced more than a year ago to try your vautable HAIR RESTORATIVE, for the purpose of cleansing my head of dandruff. I had suffered within upon my head for vears, and had never been able to get anything to do me any good in removing it, although I had tried many preparations, until I saw your advertisement in a Harrisburg paper. Selog there at the time, I called at Gloss & Kunkle's drug store, and bought a bottle, and now am prepared to recommend it to universal use, for it has completely removed all dandruff from my head, and an application once in two weeks keeps it free from any tiching or other unpleasantness. I must also state that my hair had become quite white in places, and, by the use of your preparation, has been restored to its original color. I am now 50 years of age, and although I have used two bottles of the Restorative, no one has any knowledge of it, as I allow a few gray hairs to remain, in order to have my appearance comport with my age. My head is now of less trouble to me, in keeping it clean, &c., than at any time sluce I was a child. I consider your preparation of great value, and, although I do not like to expose myself, I consider it my duy to say so. You can use this or any part of it in any shape you thisk proper, if it is worth anything to you.

Yours, &c., H. H. ETTER.

All Hair Dyes Arandoned—Wood's Great Article has Taken the Fireld.—Professor Wood stands on an eminence no chemist, whose attention has been turned to inventing a hair tonic has ever before reached. His fame is stidden but world-wide, and thousands who have worn wigs or been hald for years, are now, through the use of this preparation, wearing their own natural and luxuriant head covering. So much for chemistry, the chemistry of human life, and the laws which apply to the functions of the system. Prof. Wood studied out the human hair, its character, its properties, its diseases, and how to restore the decaying vitality of that ornament; he saw, as in his own case, that gray hair is unnatural unless the age of the individual had reached four score, and he believed that the hair could be naturally revitalized. He tried his own case—almost hald and quite gray at the age of thirty-seven, he restored his own hair in color, strength and huxuriance, and the article he did it with he gave to the world.
