

Tuesday, October 16th, 1894.

Published every Tuesday at Niantic, Conn.

CHARLES A. KIRTLAND, Proprietor. JOHN C. PEABODY, Agent.

TERMS: \$1 per Year; 3 Cents a Copy.

RULES OF THE OFFICE.

Communications upon all matters of local interest solicited, but such communications must be accompanied by the name of the writer, not necessarily for publication but as a guarantee of good faith.

Short advertisements, such as "Wanted," "To Rent," etc., 2 cents for each insertion. Advertising rates on application.

Notices of Births, Marriages and Deaths inserted free.

Advertisements wishing to change their advertisements should send in copy for same not later than Friday night to insure insertion for the next week.

This paper will be delivered by newsboys or can be had at news-stands at 3 cents a copy, or will be sent through the mail to subscribers at the regular yearly rate.

JOB PRINTING.

All kinds of Job Printing furnished at short notice and a reasonable price. Correspondence solicited or orders may be left at the News Office.

SUBSCRIPTION NOTICE.

We are gaining fresh additions to our subscription list every week, but we want more of them. To that end we make the following very liberal offer: To every person sending us \$1 for a year's subscription to THE NEWS we will send the paper until Jan. 1st, 1896, a period of from fourteen to fifteen months.

COMMUNICATED

Editor of the CONN. EASTERN NEWS:

I have read every number of THE NEWS since its first appearance and must say that I am well pleased with it.

I don't think that Niantic people realize the benefit to a town of a good newspaper until we had one published in the town and for its interests.

Success which they deserve. A READER.

Niantic, Oct. 13, 1894.

More Golden Opinions.

"An Entertaining Paper for an Entertaining People" is the motto adopted for a new paper the "Connecticut Eastern News," published by Charles A. Kirtland at Niantic, Conn.

The Connecticut Eastern News, published at Niantic, is a new paper which announces that "it has come to stay."

The Scott Social.

The Scott social, which was postponed from last Thursday evening, was held Monday evening, Oct. 8, at the home of Capt. Ed. Luce.

Miss Nettie J. Luce as the Mystic White Lady of Avenal was very pleasing.

Miss Clara Morgan represented Effie Deans and Geo. D. Adamson Effie Robertson in a scene from the Heart of Midlothian.

Abram M. Darrow died Thursday afternoon from an illness of two or three days from heart disease.

Several spirited readings were given by Messrs. Paul and Adamson which were very much enjoyed.

"Fervent Sooths."

A new society had, and one that is a good money maker, is going the rounds this fall, and is described by an exchange as follows: An invitation is sent out announcing the time and place of the entertainment, and contains instructions for the participants.

Miss Effie Crawford of this place, and Dr. M. E. Fox of Montville, were married Sunday Oct. 7th, at the home of the bride.

James S. Beckwith of Jordan, has sold his farm to A. Lester Geyer of New York, possession to be given April 1, 1895.

The twenty-first state convention of the Women's Christian Temperance union will be held in Waterbury, Oct. 23-25.

SOMETHING ABOUT COREA.

A Niantic Country Who is Acquainted With the Country and People.

The last issue of THE NEWS contained a very interesting article entitled "Korean Customs," telling about the people, their mode of living, etc.

Under date of July 28, a letter was read from Mrs. M. F. Scanton, Mr. Benton's sister, who resides in Seoul, the capital of Corea.

Large quantities of ties and timber are being carted to the railroad for shipment and many teams employed.

Mrs. Abel Hall died quite suddenly at her home Wednesday.

John C. Davison and family moved to the Dickey place in Laysville Friday.

Geo. Appleby and wife are rejoicing over the arrival of a baby boy, born Tuesday.

Mrs. Thomas McCabe left for Brooklyn Monday to spend a week with her brother, Mr. Dunn.

George Cone, clerk for J. A. Rowland, has gone on a week's vacation.

Mr. Harris Appleby and wife gave a dance Wednesday evening to a few friends.

Henry Pierson and son have been at work the past week building a new foundation for a horse barn at Mrs. R. Noyes.

Walter Nelson who has been spending a two weeks vacation in New York, returned to his labors at the hotel Tuesday.

The lower mill shut down Monday on account of the water.

An accident caused by reckless driving at night, happened on the ferry road one night last week.

The cooking and eating utensils are nearly all of brass and very queer in appearance.

Bluefish are reported as biting with great fierceness in the vicinity of the Race.

In the first game of the Inter-Scholastic Foot Ball League between Hillhouse High school of New Haven, and Middletown High school, which took place on the Wesleyan field last Saturday.

Herbert C. Stannard began teaching in West Haddam, a northern suburb near Killingworth, last Monday.

Hon. Chas. A. Elliot, who received the nomination for Democratic Senator from this District by acclamation from the delegates representing his party assembled at the Coulter House in Saybrook last week.

SOUTH LYME.

Episcopal services were held here last Sunday at 3 o'clock.

John Huntley, the Laysville stage driver, was in this place one day last week.

Miss M. Willard, of Wethersfield, is teaching the fall term of the school in this place.

Arrangements have been made to have THE NEWS on sale at South Lyme post-office every Tuesday night.

Despite the fact that many people insist that South Lyme is "dead" there are many things going on here which speak to the contrary.

W. D. Chapin spent Thursday in Pine Orchard on business.

Mrs. J. P. VanBergen spent Sunday at his home in Cricket Lawn.

Miss Susie Roche left for Brooklyn Monday for a month's stay.

Miss Etta Banta left for Sag Harbor Saturday for a three weeks visit.

John C. Davison and family moved to the Dickey place in Laysville Friday.

R. S. Griswold and wife and Miss S. J. Brown spent Thursday in New London.

Mr. Harris Appleby and wife gave a dance Wednesday evening to a few friends.

Henry Pierson and son have been at work the past week building a new foundation for a horse barn at Mrs. R. Noyes.

Walter Nelson who has been spending a two weeks vacation in New York, returned to his labors at the hotel Tuesday.

The lower mill shut down Monday on account of the water.

An accident caused by reckless driving at night, happened on the ferry road one night last week.

The cooking and eating utensils are nearly all of brass and very queer in appearance.

Bluefish are reported as biting with great fierceness in the vicinity of the Race.

In the first game of the Inter-Scholastic Foot Ball League between Hillhouse High school of New Haven, and Middletown High school, which took place on the Wesleyan field last Saturday.

Herbert C. Stannard began teaching in West Haddam, a northern suburb near Killingworth, last Monday.

Hon. Chas. A. Elliot, who received the nomination for Democratic Senator from this District by acclamation from the delegates representing his party assembled at the Coulter House in Saybrook last week.

The following unclaimed letters remain in the Westbrook postoffice Oct. 11: Mrs. H. W. Archer, Mrs. R. Barnes, Mrs. H. P. Redfield, Mrs. George Stevens, M. Casey, John M. Cronin, Frank W. Millard, J. Leslie Welles, Charles F. Hill, D. A. Salmon & Co., Mary L. Beecham.

CENTERBROOK.

The King's Daughters met with Mrs. Harry N. Prann last Monday evening.

Cyrus Williams and his young bride were agreeably surprised last Wednesday evening by the Ivoryton Drum Corps.

There were guests from New London at Gilbert Kelsey's over the Sabbath.

E. H. WHEELER, No. 5 Main St., NEW LONDON. A few of those Women's Kid Button at 75c still left.

FURNITURE. Ralph S. Smith & Son 73 State St., NEW LONDON.

Signaling at Sea. The British Government is testing a new plan for signaling at sea, which has already yielded considerable results. It consists merely of an ordinary gong fastened to the bow of the ship below the water line. This acts as a transmitter, and the receivers are gongs of exactly similar tone and rate of vibration, one on each side of the ship below the water line. The receiving gong will take up and reproduce the sound of the sending gong from a long distance. Signals have been tested and transmitted ten miles.—Chicago Herald.

ODD ACCIDENTS.

STRANGE RECORDS OF FATALITIES AND CASUALTIES.

What an Examination of the Vital Statistics Issued by the New York Board of Health Discloses.

ANY person interested in the subject of accidents in this city will be repaid by studying the vital statistics prepared by the Board of Health. These extend back for many years. Formerly they were printed annually. In 1880, however, there came a break in the publication, and it was not until recently that the omitted years were put into type, and the valuable records carried forward to 1892.

In glancing over the tables one finds many features of interest. It is a remarkable fact, for instance, that homicides in the city are not only relatively but actually on the decrease. In 1892 but thirty-eight persons came to homicidal deaths. This is but 2.39 persons to the 100,000, the lowest ratio ever known. The proportion has been as high as 7.44 to the 100,000. This was in 1873, when seventy-three persons were murdered during the year. The lowest actual number of deaths in twenty-four years was in 1869, when thirty-seven persons were killed. The ratio at that time per 100,000 of population was 4.13.

Turning from this record of decreased murders, which, oddly enough, coincides with the introduction of electrocution, one is horrified to learn that deaths from accident and negligence are increasing steadily. In 1891 they numbered 1597; in 1892 they had risen to 1900, an increase of 351. The total deaths are subdivided and classified with great care.

According to the subdivision the greatest cause of fatality from accidents are fractures and contusions. Of these in 1892 there were 835. The other causes follow in this order: Burns and scalds, 179; surgical operations, 151; suffocation, ninety-nine; wounds, fifty-six; poison, fifty-six; other causes, seventeen. As against the increase in accidental deaths it is interesting to note that the number of suicides is decreasing, or, at least, remains about stationary. In 1892, 241 persons took their own lives, as against 300 in 1891 and 239 in 1890.

Recent experiments for determining the effect of massage upon the blood show that it increases the number of red blood corpuscles enormously, and also the hemoglobin, though to a less extent. In some cases there was an even greater increase in the white blood corpuscles. Dr. S. Weir Mitchell suggests that the increase is due to the bringing into the general circulation of corpuscles which have been previously accumulated in the smaller vessels of the larger viscera. Dr. Reynolds suggests that the increase may be only relative, and due to the withdrawal of a portion of the fluid elements of the blood into the tissues. The effects of massage seem to be identical with those of cold bathing and exercise.—Washington Star.

They Suffer and Are Strong. There are wives who bear the brunt of ill-fortune without a murmur, husbands who struggle with poverty, or impending poverty, with a calm fortitude which excites the pity of the "cloud of witnesses" in the upper air; both men and women who have secret sufferings so great that their hearts are beating a dead march to the grave, but from whose lips no word of complaint escapes; and girls by the score who keep themselves unspotted in spite of fate, preferring the loneliness of a dingy room, with honesty for company, to the gaudy surroundings which are brought with impurity of life.—Detroit Free Press.

Retribution. Mamie—"I had a dreadful experience the other night." Maud—"What was it?" Mamie—"I was trying to pose as an intellectual girl and told young Rimer that I had a perfect passion for poetry." Maud—"Well?" Mamie—"As soon as I said so, he read me one of his long poems."—New York Press.

FARM AND HOUSEHOLD. TO KILL THE BORER. The owner of a quince orchard of 6000 trees keeps the borer from them by going through the orchard and killing the borers with a sharp wire. He claims complete exemption can be had by protecting the trunk from an inch or two below the surface to the height of twenty inches or two feet. The main thing, he says, is to prevent the beetle from depositing its eggs. For this purpose he procured stout cloth and had it cut in fifteen-inch squares. These he dipped in hot gas tar and pitch mixed, and when cooled he wrapped a piece around the trunk of each tree. The prevention was perfect. He found afterward that paper would do as well. He explained that the borer, which enters some distance above the ground, differs from the ordinary variety. It is called the flat-headed borer, which does its mischief near the ground, even below the surface in the roots of trees.—Chicago Times.

The Cure for Hiccoughing. "Why don't you stop that hiccoughing?" asked a man of a friend who was convulsed with the annoying convulsions in the street near the Astor House the other day. "Stop them," gulped the other, "I—I wish I could. Held my breath fifteen minutes drank nine swallows—water; nine times. Tried to scare myself; made believe—lost my watch. No good. They won't go."

FARMING WITH PLANT FOODS. Manures or fertilizers should be substances which, when applied to the soil, will increase productivity by virtue of the plant food which they either contain, or dissolve from the soil particles. The value of this plant food has a double meaning, according to P. Schwetzer, of the Missouri station, as it both feeds the growing crops and restores soluble fertility formerly taken from the field. All crops demand soluble plant food in proper amounts. The plant foods most deficient in used soils are potash, phosphoric acid, and nitrogen. All plants respond readily to applications of potash and phosphoric acid, and all but the leguminous plants to fertilizing with nitrogen. These leguminous plants are able to gather and appropriate nitrogen in abundance from the air enclosed in the soil through the microbes in their root tubercles. Large crops on poor soils mean the buying of potash and soluble phosphoric acid fertilizers, and unless a proper rotation is adopted that of nitrate or other nitrogenous manures. Potash salts may be applied either in the fall or in spring, but soluble phosphoric acids and nitrates should be applied only during spring months. For deep plants, deeply plow under the potash and phosphoric acid, and also top-dress the fields. Indirect fertilizers, such as lime, salt, or land plaster, often give beneficial results. To make farming a profitable and satisfactory occupation, a vital measure is a continuous and well planned rotation of crops.

SOFT SHOULDERS. It behooves every owner and worker of a horse, says a good veterinary authority, to see that collars fit properly at neck and shoulder and that the lining is in proper condition. It is his duty also to keep the collar clean and sweet by careful brushing and drying in the sun, and should the neck or shoulder become sore in spite of all precaution regarding the harness, he must do his best to prevent his horse from suffering pain. The moment a sign of soreness appears at the point of the neck upon which the collar rides the trouble should, if possible, be remedied. A zinc pad sometimes does all that is required, as it is healing in nature and at the same time smooth and cooling. Often the simple application of a little lard over the abraded surface will prevent the harness from doing further damage, but where there is considerable wound of the skin it is well to apply an ointment composed of sugar of lead, eight ounces; thoroughly mixed together. We object to this application somewhat on account of the fact that, being greasy, it is apt to cause filthy harness, and so can more confidently recommend the use of an astringent lotion for the galled shoulders and necks—viz., sugar of lead, six drams; soft water, one pint. Label poison and shake well frequently. Apply to sore shoulders and necks with a sponge three times a day. It will be found admirable for treatment of all shallow wounds.—Connecticut Farmer.

FARM AND GARDEN NOTES. An improved farm invites industry and the love of agriculture, while money invites expenditures and bad habits. A bushel of rye ground with a barrel of ear corn and fed with chopped and moistened hay or straw, makes an excellent feed for horse work. If fowls have plenty of good, sharp grit their food will not sour and they will get on very well without charcoal. Grit is prevention, charcoal is cure. Fill your hotbeds with litter in the fall so that the ground will not freeze. Replace this with manure in the spring and the planting can proceed without delay. Do not forget the dust bath. This is to poultry what the bath is to persons. With dust the fowls clean their bodies, drive away vermin and exercise themselves. Cattle will eat almost any amount of grain if given a chance, but there is a limit to the amount they can digest, and this marks the limit of profit in grain feeding. The manuscript record of the great dairy test consists of about twenty-four thousand columns, containing two and one-half millions of figures, according to Alvord. The producer should carefully study just what the market demands and try to excel in conforming to that demand and put the product on the market with the most attractive appearance. It is authoritatively stated that the white pine of the Northwest is so

nearly exhausted that there is practically no further supply for timber. We have certainly reached the point where timber culture holds out a fair promise of profit. HOUSEHOLD HINTS. The following is a good way to sharpen a carving knife: The carver must be held at an angle of twenty to twenty-five degrees on the steel from heel to point against the edge, only a very slight pressure being required. The chimney of a lamp is less liable to break if never touched with water. A few drops of alcohol, or even paraffin oil, will remove the dim, smoky effect and make the chimney bright when it is polished with soft flannel or chamois skin. Ribbons and silks should be put away for preservation in brown paper. The chloride of lime in white paper discolors them. A white satin dress should be pinned up in blue paper, with brown paper outside, sewn together at the edges. To prepare a new iron kettle for use fill it with clean potato peelings and boil them an hour or so; then wash the kettle well, rinse with hot water and rub it with a little lard; repeat the rubbing several times after using it. This will prevent rust and other annoyances apt to occur in first using a new kettle.

Life on an Iron-Clad at Sea. Admiral von Werner, a high authority in naval matters, describes in a work recently published, the behavior of armor plated men-of-war in a heavy sea. He says: "Even with a moderate gale and sea, an armor plated cruiser, if going against the wind, will find herself in conditions similar to those of a storm—at least, the crew will have that impression. The movements of the stern of the ship are violent and exceedingly disagreeable. The waves pushed by the advancing prow sweep continually over the ship from bow to stern. All windows and port holes must be closed, and air reaches the lower decks, where the heat increases unbearably, only through the artificial ventilators. With the exception of the specially protected command bridge, all the uncovered portions of the ship are impassable; thus the whole crew must bear as well as they can the closed decks. On such a ship no one can feel comfortable; and when there is a storm in which a sailing ship would feel comparatively at ease, the crew of an armor plated ship imagines itself to be in a heavy hurricane which threatens destruction at every minute. The long, narrow forepart of the ship, which is not borne lightly by the water, and is rendered extremely heavy by the mighty ram and the armored deck and the cannon and portoloes, forces the ship in a high sea to pitchings and rollings of such an extraordinary kind that they cannot be described. The crew of such a ship is not only exposed to mortal dangers, but the voyages they make render them physically, extremely and dangerously nervous; the mental impressions they receive wear them out and make the profession hateful."—St. James's Gazette.

FASHION NOTES. Iry leaves are a late and unique idea in millinery devising. Fashionable women should never wear anything but suede gloves. Umbrellas were never cheaper. Dresden and natural woods are the prevailing styles in handles. The hair of every woman, whatever her age, contour of complexion, must be parted to be fashionable. One of the features of hair-dressing just now are the flat pointed curls set in the middle of the forehead. The ribbons used upon the new hats are very wide and a great deal is required to fashion the new bows. Along with the red browns are seen the familiar dull lead shades, deepened and melted into indistinct greens. Red currants are being used for dress trimmings for evening wear, and make a most brilliant trimming. Most of the ultra-fashionable veils, whether of coarse or fine mesh, show widely scattered black chenille spots. Deep collars of handsome lace, in white, ecru and beige shades, will be worn with fall and winter house gowns. Gray serge of the black and white mixture wears well and is a welcome change from the blue and black serges so long worn. Little girls' dresses, with velvet yokes, shirred waists, full sleeves and velvet collars and cuffs are preferred for ordinary wear. Among the new materials of the season is the shot Chine grenadine, usually on a dark ground, and made up over shot glaze. The enormous collars in the various kinds of heavy lace are very stylish, but need to be worn with very large sleeves to really look well. Old-fashioned bandes silk made in India, thirty-six inches wide, are waiting novelties, exactly like the handkerchiefs used by the old snuff-dippers. The dainty sets of side combs shown by jewelers are very expensive. These combs are of shell, entirely plain or ornamented with gold or silver filigree work. Black, in velvet, silk and ribbons, is selling very well; indeed, so well that it has been observed that "one might suppose our fashionable women on the verge of going into wholesale mourning." The old-fashioned snuff brown, so becoming to fair, high-colored complexions, will be much worn, and for this shade Persian embroidery or black Russian fur makes the handsomest trimming. A Misguided Companion. Mrs. Parker—"I was surprised to hear your husband say that he favors dress reform for women." Mrs. Barker—"He doesn't know what it means. In his mind the idea of reform is always associated with reduced appropriations."—Truth.

How Canton is Governed. The streets of Canton, China, are divided into sections of a few blocks each; and each section is shut off from all others by heavy gates, that are closed at nine o'clock in the evening. The populace is so turbulent that for many centuries the authorities have made it a practice to hold the people of any section responsible for any riot or tumult in that section. The result is that people have got in the habit of regulating affairs in their section without any reference to the powers that be. The election of the Canton plant had occasion to see the effect of this in an instance where a store wanted lights, but the wires could not be run, because one man objected to having a hole cut in his house for securing a pole. The man wanting lights informed his neighbors and a delegation waited on the individual and soon induced him to withdraw his objection.—New York Dispatch.

An Escape. "I learned to-day that you are engaged to Miss Gargyle," said Gilgal to Pellican. "Let me offer my congratulations." "You are a trifle late, Gilgal. I was engaged to her some weeks ago, but the engagement has been broken off." "You don't say!" exclaimed Gilgal, enthusiastically. "Then I must still insist upon congratulating you."—Harper's Bazar.

LADIES' COLUMN. A GIRL CARPENTER. A lively young Danish woman, Miss Sophie Christensen, is anxious to get work in Chicago as a carpenter and joiner. In the city of Copenhagen she learned the trade, to which she was bound as an apprentice. When her apprenticeship was completed, a short time ago, she was admitted to full membership in the union. She displayed great aptitude and skill as a worker at the trade, and she is ready to display specimens of her handiwork. Among other things she has made a "self-closing book-case" which is serviceable, artistic and beautiful, and which is admired by everybody who sees it.—New York Journal.

"YES," SAID THE OLD JEWELER. "Very few women know how to put on their brooches and lace pins. Let me see how you would do it." So Aminta took it up by the setting, to oblige him, and proceeded to work it into the bit of velvet at her throat. "Yes, I thought so," he continued. "That's just the reason it will break soon again, and you will be bringing it back for repairs. It may be against my business, but I'll tell you how it should be done. Take hold of the brooch by the pin! Don't make a leverage by using the jeweled part as a handle. Take it up by the pin and put it in by the pin, handling the ornament only when you clamp it, so you will save your 'quarters' for renewing the pin."

FRENCH MARRIAGES. When a French bride marries she does not assume the hymeneal white satin, as is our custom, if her family or her husband's are in mourning, but goes to the altar in simple white muslin, as M. Ernest Carnot's wife did a few weeks ago. Though in view of the late President's tragic death it seemed somewhat somber for the wedding, Mm. Carnot wished that it should take place, as it accordingly did, but with so much privacy that not even a single relative, except those immediately connected with the young people, were informed. The bride's family wore costumes of pale gray and violet, while the Carnot ladies were, of course, in deepest mourning. The bridegroom's mother appeared deeply moved during the service, and an air of silence and sadness hung over the bridal. Mlle. Chirvis was an especial favorite with the late M. Carnot, and is extremely pretty. She had no ornaments, except a bouquet of white roses, with some fastened into her simple dress. The Lady Chapel of St. Pierre de Passy, in which the marriage took place, was adorned with similar flowers, but there were none in any part of the church.—New York Advertiser.

WOMAN'S ILLS. Mrs. W. R. Barrett of Cincinnati, Ohio, writes: "A few years ago I took the French Favorite Prescription, which has been a great benefit to me. I had a long illness, and being very old, I was very weak and nervous. The French Favorite Prescription has given me a new lease of life, and I feel much better than I have done for many years."—New York Journal.

Royal Baking Powder. Absolutely Pure. "I regard the Royal Baking Powder as the best manufactured and in the market." Marion Harland, Author of "Common Sense in the Household."

BUDS, Society buds, young women just entering the doors of society or womanhood, require the most beautiful and charming thing they can wear. It is especially sensitive, and many nervous troubles, through which life, have their origin at this time. If there be pain, headache, backache, and nervous disturbances, or the general health not good, the judicious use of medicine should be employed. Dr. Pierce's Favorite Prescription is the best restorative tonic and nerve tonic at one period or another. You'll find that the woman who has faithfully used the "Favorite Prescription" is the picture of health. In chronic inflammation, in chronic displacements common to women, where there are symptoms of backache, dizziness, disordered stomach, moodiness, fatigue, etc., the trouble is surely dispelled and the sufferer brought back to health and good spirits.

Dollars or Kicks for women, according to whether they do, or don't do, their washing in a sensible way. If they use Pearline, it means good, hard dollars saved. Pearline is economy. All that ruinous rubbing that makes you buy linens and flannels twice as often as you need to, is spared, to say nothing of your time and labor. See the troubles that women have to endure with other ways of washing. There's that hard, wearing-out rub, rub, rub, or the danger of ruining things with acids if you try to make it easy. Washing with Pearline is absolutely safe.
