HISTORY OF THE DISCOVERY.

Signor D'Alvear went out to California, nearly two years ago, in consequence of certain information which he had received of the geological character of that country, with the firm belief that vast mines of precious metals would be revealed there apon careful investigation. He was encouraged to this enterprise, also, by the powers of a certain Magnetic instrument which he had invented, called Magnetic instrument which he had invented, called the "Goldometer," by whose aid, he expected to be directed at once to the "Gold Placers," if any such existed. Nor were his expectations disappointed. His scientific calculations, proved to the control of the GOLDOMETER, when held within the magnetic influence of the precious metal, and the unerring manner in which it indicates the presence of that and other metalic substances. 29 pointed. His scientific calculations, proved to be founded in truth and profound wisdom, and his new instrument, the "Goldometer," fulfilled his highest hopes. In less than two months after reaching California, he struck upon an obscure branch of the Sacramento river, in a gorge of hills ex-tremely difficult of access and seldom visited by the native Californians. Disguising his object un-der the pretence of purely scientific research, he obtained the aid of some fineen or twenty simple and faithful Indians, and steadily pursued his task, collecting often more than \$3000 worth of gold in a single day, which he concealed in a deep ravine, without exciting any suspicion whatever, until the discovery of Gold at Capt. Sutter's Mill, when the mountains were ransacked by gold seekers, and Signor D'Alvear's "gold placer," the richest in all California, was beset by greedy adventurers. It is now found that the real mines or sources of the gold, lie in the gorges of the mountains, and not in the beds or sands of the rivers. Previous to leaving California, Signor D'Alvear sold his instru-

ing California, Signor D'Alvear sold his instru-ment, the Goldometer, a very imperfect one, for \$3000. The person who purchased it confidently expected to make a handsome fortune, by simply finding "gold placers," and selling out the right of ligging to the gold workers. Manufacture of the Goldometer, and the Pub-

lication of the Guide. or D'Alvear, in compliance with the reques of numerous scientific gentlemen, has commenced the manufacture of his new Magnetic Instrument the 1's Goldometer, 1 which he now offers for sale in the United States, at the remarkably low price of THREE DOLLARS each, accompanied by full instructions for use, and a variety of philosophical hints, drawn from the ancient and

GOLD. SEEKER'S GUIDE.

This new work, and the GOLDOMETER are both ready for sale. The GOLDOMETER is so simple an instrument that a child may learn operatg with it in five minutes. It is not affected by climate, moisture, or any other known cause, (except the natural magnet,) and will retain its power of pointing out the mineral riches of the earth, for any number o years. By the aid of the Guide, any person may use the instrument at once with perfect success.

FARMERS AND LAND OWN-ERS!

Farmers and Land Owners throughout the United States, who have any reason to suspect the existence of any kind of mineral riches upon their lands, should avail themselves of this opportunity to test that fact. by the surest of all known tests, before the abundance of discoveries in all parts of the country, shall have lessened this source o wealth in their estate.

Adventurers to California.

Persons going to California, cannot make a better investment than by purchasing one of the instruments, which will not only be worth fifty times its value there, to sell again, but will be of estimable worth to those who go in search of Gold as it has been proved by the most abundant experment both in California and the United States.

TESTIMONIALS.

Signor D'Alvear does not deem it necessary to encumber this notice with a long list of testimon als, in proof of the value of his GOLDOME-TER, and GOLD SEEKER'S GUIDE. The brilliant results of his labors in California, and the discovery, this very week, of fresh veius of Gold in Virginia, and beds of Coal in Rhode Island, by its use are alone sufficient to stamp it as the great-est discovery of the age. Nothing but the extreme cheapness of the instrument, and his desire to see it used for the benefit of mankind induces him to dispose of it at the low price for which he offers it. Besides this, his own desire for wealth is

BY JAMES H. DANA.

ed by a set of desperadoes, passing under the name of refugees, who, in the absence of the Americans in camp, plundered and insulted their defenceless iamilies. A band of these men became particularly notorious on the little Egg River, and that section of the country is yet rife with legends of their misdeeds. A party, equally numerous and more lawless, for a long time devastated the settlements along the Maurice river.— Our story relates to this latter.

It was at the close of a beautiful day in the early part of October, that an athletic young man, whose frank and good humored countenance was a passport to the acquaintance of strangers, approached a clearing not far from the present decayed village of Rochester. The house was of but one story, built of thick, hewn logs, and surrounded by scanty fields, in which the stumps of the original forest trees were vet visible. But every thing about the place had an air of neatness, which was increased, when pushing open the door, he entered the large, comfortable kitchen, with its nicely scoured floor, and its dresser on which were arrayed in bright rows the pewter plates. His footsteps had scarcely sounded on the floor, before a light figure sprang towards him, and the next instant was locked in his arms.

God bless you, Mary, he said, as he parted the hair fondly from her forehead, and stooping, kissed the fair brow.

The girl looked up into his face, and said, half inquiring, half positively-'You have come to stay-have you not?

Do now, give up running your sloop until things become more settled. 'You will be captured yet,' she continued, as her lover shook his head, 'and then, if thrown into those dread prison ships at New York, you will never get back.'

Notwithstanding the imploring tone in which she spoke, her lover still shook his

'Nay, dearest, your woman's fears alarm you without cause. There is no danger. The English ships have left the Delaware, and I must make the old sloop pay me now, for your sake.'

She buried her face in his bosom to hide the blushes at this allusion. He continued. cheerfully.

'Now, can you mind me a supper?-You boast of your housekeeping, you know; and yet I'll bet we're almost as good cooks on board. At any rate we are itor who had come miles to see us, and walked all the way.'

All was still around, and she meal were going on. At length the other did not wake the inhabitants, for they were members of the family came in, and the suspected of being unfriendly to the whigs, conversation became general.

It was yet early, however. when the young man rose to go. The girl followed him-out to the door.

Why so soon?' she said. 'It is high tide, and I have already overstaid my time,' he said. 'But in a few days I shall be back, and it may be I will be so successful that there will be no necessity of going again.'

'God grant it may be so,' she said fervently. 'I feel a presentiment of some danger impending over you. There is Hogan, the refugee.

'He owes me ill-will, I know,' said the lover, 'ever since you preferred me to him. But he has left this part of the country, and I should never fear him in a

Ellen turned pale at this intelligence, for her woman's quick wit perceived at once, by the meaning tone of her visitor, that Hogan had determined to way-lay her lover, and that her informant, from a feeling of base revenge, had come to apprise her of it. after he thought it would be too late for any notice of the attack to be conveyed to Briggs. She had the presence of mind not to show her agitation, nor did she undeceive the speaker as to the time when her lover sailed. She adroitly turned the conversation.

'Won't you walk in?' she said, 'the nights are getting chilly. Father and mother are yet up. I believe.'
'No, thank you,' said the young man,

His anxious tone recovered for Ellen her confidence, and she hastened to tell him what she had heard.

'I could not,' she said, with her face hidden on his broad breast, 'stay at home, and leave you in this peril. Father is old, and I was afraid he could not be here in time—'
'God in heaven bless you. How can I ever repay you for this? But I must find a shelter for you in the cabin, for no time is to be lost. We are already in sight of Hogen's place, and it is too late to retreat

Hogan's place, and it is too late to retreat. Even if we anchor they will come after us; but now that I know their intentions, there is nothing to fear, and our best course is to disarm suspicion by going on.'

El'en would have remonstrated, but, at that instant, the moon broke forth, and a large boat was seen pulling out into the stream some distance down the river. She suffered herself therefore, to be led into the cabin, where she waited with a breathless heart, the termination of the contest.

Tradition tells how, in a few words, their leader informed the crew of the approaching attack, and of the vigorous measures taken to defeat it. The sloop's course was retarded as much as possible, while the wood, which formed a part of her cargo, was hastily arrranged in piles around the the quarter-deck as well as forward, so as completely to barricade every side of the vessel. Fortunately, there was a double the door of her little room. The family all retired. Quick and sharp came the rollicking of the oars, to their ears, and even those manly hearts beat faster, as they counted the fearful odds against them, and recognized the burly figures of Hogan, and one or two of his more desperate associates.

'Pull away—around by the stern, my lads,' shouted the refugee leader, rocking in prayer, she would recover confidence, and the stern sheets with the motion of the boat. Three of the men in the boat fell, but almost immediately she struck the sides of the vessel, and her crew began to scramble over the barricades erected between them A quarter of an hour passed, which seemed an age, and yet no signs of the vessel sible; the conflict was hand to hand. It was then that Briggs remembered Ellen, with each blow of his sturdy arm. Hay, Grain, Farming Implements, Household stuff, insured for the full amount, at the same rate of the buildings.

A note is only required (say on \$1000 at 1 per cent,) for Ten Dollars; and the Cash Payment is only 33 1-3 per cent on the Note, which is 3 33 1-3 Policy and Survey, 1 50 making the Whole Cash payment, only \$4 83 1-3-----

This Company is prohibited by their By-Laws from insuring in Blocks, or exposed parts of villages, or from taking over \$2000 upon one risk. The policies of this company are free from the objectionable conditions found in the policies of many other companies, out of which so much litigation arises. In this the Agents, are the Agents of the Company; and their policies provide that the company shall be responsible for the correctness of all surveys made by its Agents; that all matters of difference may be settled by arbitration in the county where the loss happens, and that any one insured, may at any time withdraw from the company by paying his proportion of the losses while his policy is in force. It appears from the rapid increase of business and unparalleled success of this Company, that they are destined to supercede all other institutions of the kind; and it is a fact worthy of notice, that they have issued during the last year a greater number of Policies than any other Mutual Insurance Company in the United States have members. With this extensive patronage, the flourishing and prosperous condition of the Company, and their large accumulated cash fund, the Directors feel confident that their plan of taking none but small risks of the safest kind, is decidedly the most popular and only plan upon which a Farmers' Company can succeed.

The first year they issued only 2,327 Policies; the second 6,181; the third 11,796; the fourth (from 15th of May to 1st of January, seven and half months) 17,692; and the Directors feel confident of issuing about 30,000 policies during the fifth year, and of adding from twelve to fifteen thousand dollars to their present large cash fund. The increasing business and increasing cash fund warrant the belief that no tax upon their premium notes will be necessary for a long term of years, and the Directors assure the public that all losses will be settled with promptness and liberality.

## NOTICES OF THE PRESS.

"Mutual Insurance:—We notice in the advertisement of the Washington County Mutual Insurance Company, published in our columns, among the Directors, the names of the Hon. David Russel, late member of Congress, Hon. Solomon S. Cowen, late Judge of Washington Common Pleas, Hon. Cornelius L. Allen, late District Attorney of Washington County, L. W. Bishop, Esq., late Supreme Court Commissioner, Henry Holines, President of the Washington County Bank, Geo. Clements, Esq., Postmaster, Fort Ann, Joseph U. Orvis, of the firm of Lockwood & Orvis, Troy, New York. Under the direction of such men, this flourishing Institution seems destined to extend itself to all parts of the state. It appears they have issued 2,595 policies during the last three months, which, we believe is the largest number ever issued by a Mutual Company, in the same time. Their plan of insuring none but detached buildings of the safest kind, is at once popular and advantageous, and seems to be decidedly the most popular plan ever adopted by a Mutual Insurance Company.—This Mammoth Company, after having beaten the world in Insurance Company, last year, 4,000 Policies more than was ever before issued by a Mutual Insurance Company in one year, appear to be beating themselves this year, as they have issued 4,920 Policies during the last three months. Comment appears to be unnecessary upon the business of this Company, as it is the largest, and most flourishing institution of the kind in the United States."—Washington Telegraph, July 15, 1848.

H. NEWCOMB GRAVES, General Agent for New England.

The undersigned having been appointed Agent for the above Company, would respectfully call the attention of those not insured in Connecticut, and well be happy to receive applications from those who wish to have their property insured, and give such information as they may wish. They insure none but the safest kind of property, and take no risk over \$2,000.

Their Policies are made on fair and equitable principles, giving those insured an equal chance with the Company, being entitled to the full amount of damages, not exceeding the amount insured without deducting one third, as is customary with some other companies.

They are prohibited from insuring in blocks or exposed parts of villages, or taking risks on Mills, Shops or Machinery. They are responsible for the correctness of all surveys made by their Agents, and agree to arbitrate all matters of difference in the County where the loss happens. All losses have been paid to the satisfaction of the claimant, and before due. The above Company offer inducements to those not insured, that no other company in existence can offer.

The Premium Note, is only about one fifth as much as other Companies require; and the Cash Payment does not exceed on 1st and 2d class property, five dollars on one thousand for five

## The Closing Administration.

The time is near at hand, when President Polk will retire from his august station, and be succeed by General Taylor, the prominent hero of the Mexican War.

It is truly exacerbating to the feelings of candid and honest-hearted men, to see with what pertinacity, almost the whole junto of Whig Editors pursue this dignified and patriotic Chief Magistrate, even to his retirement, in a spirit of persecuting malevolence. They are unwilling to admit, that he possesses one good quality-one redeeming characteristic.

The National Intelligencer, that chief organ of the Federal party, which is indebted to the misplaced patronage and magnanimity of the Democratic party, for its prosperity and success, is more bitter against Mr. Polk, than all the other Whig presses combined. This paper says :- " It is vain to weave fresh webs, however wide of apology for such an Administration."-Other papers of the same blue stamp, have called him "a small potato"—"an accident"— "a small man." &c .- and have ungenerously cast the most contemptuous sneers at him and his administration. Thus have little, narrow, contracted souls made it a point to sneer at the good and great, in all ages of the world.

The friends of Mr. Polk have this importan truth for their solace :- That, with all the berking, and hissing, and sneering of these calumniators, history will record his deeds in letters more durable than brass and marble. It will tell to all succeeding posterity, that when James K Polk came into office, he found his country with a territory of one million of square miles, and retired from office, leaving it an adequate remedy for the alarming evils that in possession of an area of two millions. This can be said of no other President of the Unised States not even of Mr. Jefferson himself. He has succeeded in every thing he has undertaken. His powers of negotiation have been unrivalled. Consequently, his little, mean, narrow-minded, and soul-contracted defamers have not a word of truth on which to base their accusations How would they have managed had they been placed at the head of the nation, under the same difficult and perplexing circumstances that have attended Mr. Polk's administration? They would have ruined their country. Alas for their baseness ! alas for their ingratitude!

in our paper, headed "Farmers' Company," of which Curtiss L. North, Esq., has the General Agency. In the language of the Waterbury American-"The Company is said to be safe and highly popular, and is doing a large business in the State. Their terms are less than those of similar associations, and the payments to losers prompt and just. The Meriden Messenger says-" The insurance upon Mr. Pomeroy's barn was fully paid in less than six hours after the fire. We have heard of what are called prompt payments of losses, but doubt whether this has a paralle! in the history of Fire Insurance in this country, and we understand that their whole policy is to pursue a very prompt system of payments. It speaks well of the solvency and efficient management of this Company, which takes no single risk over \$2,000. We understand that the Agent in this place has over two thousand dollars on hand to meet any case of loss, and that the Company have over twenty thousand dollars in cash, to meet any sudden demands."

#### Attempt to Murder.

Henry Bower, a German, working as Agent for a sub-contractor on the Rail-Road between Wolcottville and Winstead, was arrested on Sunday evening last, for shooting with a revolving pistol, McMahon, an Irishman, working on the same road. The circumstances are as follows:

A company of some four or five Irishmen had collected about the house of Bower, on their return from church, when some dispute arose, and Bower discharged a revolver which took effect in the head of McMahon, just above the eye. A German by the name of Schoolmaker, supposed to have been engaged with Bower in the assault, has bave been disposed of by the Irish, who assembled in great numbers, soon after the occurrence and who were greatly encaged.

By our latest advices, we learn that McMahon was sieve, but that fittle hopes were entertained

California.

As we anticipated, affairs have reached an alarm ng crisis in the Gold Regions of California. Murders and robberies are continally occurring .-It is now time for Government to interpose the strong arm of her legitimate authority, and put an effectual stop to such herrid scenes. #### The Prize Fight.

We publish the following extract, not because we approve of the brutal exhibitions of prizefighting, but simply to show with what systematic coolness the bullies are trained up to pound, mangie, and even kill each other, like ancient gladiators, for the public amusement—thus evincing the most deep-rooted depravity of heart.

"Sullivan and Hyer had been undergoing a thorough training for this fight since December last, the former attended by Country McCleester and Tom O'Donnel, and the latter by G. Thompson

"Sullivan's mode of life was, to rise at daybreak. and run five or six miles on a race course, and re-turning to his room, exercise with dumb bells, stri-Cong. Convention king out six or seven hundred times. After a short rest, he exercised upon a heavy bag, hanging by a single cord from the ceiling, and stuffed to the weight of his antagonist. He then washed thoroughly his arms, chest, neck, and head with cold water, and adjourned to breakfast. His breakfast was a large beef-steak, cooked rare, and sea-soned only with old English ale. Instead of steak, he occasionally took broiled chicken. After an hour's repose, he walked or ran eight or ten miles, and returning in a slight perspiration, was thoroughly soused with cold water, several times, and was then rubbed with coarse towels. He then put on fresh flannel, (his daily practice,) and dined on rare steak, soused in old English ale. Another sparring, dumb bell exercise, and pounding the hag; a wash in cold water, and a walk of four or miles, when he retired about 9 P. M.

"Hyer's plan of training was nearly the same, with this difference, that he exercised considerably in climbing the hills, and in rowing, and occasionally dining on mutton. Salt, pepper, tobacco, ar-dent spirits, and stimulants were stricly forbidden. The only fluids permitted to be used have been slight thimbles full of ale or water. The most chaste and temperate course of life has been adopt-ed by both. Hyer has eaten three meals a day at 8, 12 and 4; while Sullivan has eaten only two meals, at 8 and 4. During the two weeks immediately preceding the fight, mutton was substituted

" Hyer is a stout man, six feet high, weighing 200 pounds. Sullivan is not so large; and weighs but 160 pounds. The present fight is said to have been brought about by the following circumstance: Several months ago, the parties met in a saloon in Broadway, New York, when Sullivan "put upon" Hyer, who speedily put his antago-nist's head "in chancery," i. e. under his arm.— Sullivan claimed that he was not in a fit condition and that the contest was unequal. A few weeks later they again met, with the like result; after which, cards from each of the pugilists appeared in succession, in one of the city papers, which resulted in a challenge to fight again for \$5000 a side, and the parties went into training, as above

Falls Village--Litchfield Co. We copy the following, from an able article re cently published in the American Cabinent, relative to this thriving and enterprising village:

" The business of the place is mostly in iron The deep, dull sound of the ponderous hammer is heard, measuring off the moments of days and nights, during which, men with tawny faces and glittering eyes, musculine frames and generous nearts, are stirring the fused metal, or adjusting it for the stroke, blasting. and puddling, and forging making huge bars and bolts, wheels and anchors, in all ways, shapes and sizes. Come to Canaan if you would be amazed at the genius of iron whose fires never become dim, and whose hammers never cease falling, will explain his new mode of welding and re-welding; by twisting the wrought iron rims of the cast iron driving wheels of locomotives, a device by which a defective place seems impossible; and Messrs. THE CINCINNATI MURDER.-Mrs. Marga ret Howard was committed on the 6th instant at Cincinnati, to take her trial for the murder of Mary Ellen Smith, alias Howard, on the night of the 2d. The evidence on the examination discloses a terrible picture of domestic misery. The immediate cause of the murder seems to have been a visit paid to Mrs. How-ard's children by the father, Captain John Mrs. Smith is in the State Prison. Mrs. Howard has worked long and hard for the support of her children, and the fear of losing them forever, drove her to madness. Are you the woman mentioned in the paper the other day as having a fuss about some children?" When the children were mentioned, it set my brain on fire. I worked hard all next day making shirts, and at night dressed myself to go out I could neither eat nor sleep till I knew wha had become of my children. I went down to the place where Capt. H. boarded. They told me that he was not in. I then asked for his la-dy, and said, I wished to see her. She came down stairs. I said, 'are you Mrs. Howard?' She said 'Yes:' I answered, 'You dare call yourself Mrs. Howard?" 'I am Mrs. Howard. With that, she, (deceased,) reached forward to

A Cincinnati paper details the case of Mr Edmund Strong, of that city, who died a couple of weeks since. A specimen gold dollar has been coined at the United States Mint. It is about the size of a sixpence, and the words "United States of America." outside of a wreath are on one side—on the other is the representation of a cap, with the word "Liberty," encircled by the sun's rays .- Danbury Times.

#### The Protocol.

The Courier-the leading Federal paper of New York, says of this great Whig dis-

"The whole thing seems to us, in truth, unworthy the noise that has been made about it. The protocol has no binding force whatever on the two nations, simply because it was not ratified by the treaty making power in either nation. The treaty itself was ratified by both nations, duly and fully; and all the protocols in the world, signed or not signed by the ministers, could not break its obligations or modify its stipulations. The treaty stands:- the protocol is simply waste paper. The talk, therefore, in which some have indulged, that we are remanded to a state of war,-that there is no treaty, &c.,—is idle and absurd."

Indian Pulmonary Batsam is administered:

Town of Ballston, Saratoga Co., N. Y—ss. ZIBA DYKEMAN, being duly sworn, says: That in the winter of 1845,
deponent's wife was believed by her physician and others to
be dying with a consumption of the lungs; and deponent
believing that to be the case, went to Mr. John Wait's store,
in the village of Bollston Spa, to purchase cloth for a shroud,
and other necessaries, to prepare his wife for burial after
she should die. Deponent further says, that while he was in
said Wait's store, he was possuaded by the Proprietor of
"BRANTS-INDIAN PULMONARY BÅLSAM," who was
then present, to take a bottle of said Medicine—he remarking that if the dying woman be now past recovery, yet, if
she be much oppessed and distressed, the said medicine
would soothe and relieve her, and make the pillow of
death more easy. Deponent took the said medicine home
with him, together with the cloth he had purchased preparatory to the anticipated death of his wife. Deponent
saned a portion of said medicine to be administered to
lis wife 'ind to his astonishment it soon relieved her saused a portion of said medicine to be administered to his wife, and to his astonishment it soon relicred her. She continued the use of said medicine until she recovered from her disease, and has been able since (it being now more than three years) to do the work, and attend to all her household affairs; and deponent verily believes that through the blessing of Providence, the restoration to health of his wife was the result of the curative and healing efficacy of Brant's Indian Pulmonary Balsam.

or debilitating the
Patient.
The great beauty and superiority of this Sarsaparilla
over all other medicines is, that while it eradicates the disase, it invigorates the body. It is one of the very best

SPRING AND SUMMER MEDICINES

Ever known; it not only purifies the whole system, and
strengthens the person, but it creates new, pure and rich
blood a power possessed by no other medicine. And in
this lies the grand secret of its wonderful success. It has
performed within the last two years, more than 100,000
curns of severe cases of disease; at least 15,000 were
considered incurable. It has saved the lives of more
than 10,000 children during the two past seasons.

10,000 cases of General Debility and want of Nervous Energy.

Dr. Townsend's Sarsaparilla invigorates the whole system permanently. To those who have lost their muscular energy by the effects of medicine or indiscretion committed in youth, or the excessive indulgence of the passions, and brought on a general physical prostration of the nervous system, lassitude, want of ambition, fainting sensations, premature decay and decline, hastening towards that fatal disease, Consumption, can be entirely restored by this pleasant remedy. This Sarsaparilla is far superior to any

BPITTING BLOOD.

New York, April 28, 1847.

Dr. Townsend—I verily believe that your Sarsaparilla has been the means, shrough Providence, of saving my life. I have for several years had a bad Cough. It became worse and worse. At last I raised large quantities of blood, had night Sweats, and was greatly debilitated and reduced, and did not expect to live. I have only used your Sarsaparilla a short time, and there has a wonderful change been wrought in me. I am now able to walk all over the city. I raise no blood, and my cough has left me. You can well imagine that I am thankful for these results.

Female Medicine.

Dr. Townsend's Sarsaparilla is a sovereign and speedy eure for Incipient Consumption, Barrenness, Prolapsus Uteri, or Falling of the Womb, Costiveness, Pilos, Leucorrheza, or Whites, obstructed or difficult Menstruation. Incontinence of Urine, or involuatary discharge thereof, and for the general prostration of the systemno matter whether the result of inherent cause or causes, produced by irregularity, illness or accident. Nothing can be more surprising than its invigorating effects on the human frame. Persons all weakness and lassitude, from taking it, at once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the great cause of Barrenness. It will not be expected of us, in cases of so delicate a nature, to exhibit certificates of cures performed but we can assure the afflicted, that hundreds of cases have been reported to us. Thousands of cases where families have been without children, after using a few bottles of this invaluable medicine, have been blessed with fine, bealthy offspring.

To Mothers and Married Ladies.

To Mothers and Married Ladies. To Mothers and Married Ladies.

This Extract of Sarsaparilla has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that critical period. "The turn of life," should neglect to take it, as it is a certain preventine for any of the numerous and horrible diseases to which females are subject at this time of life. This period may be deayed for several years by using this medicine. Nor is it less valuable for those who are approaching womanhood, as it is calculated to assist nature, by quickening the blood and invigorating the system. Indeed, this medicine is invaluable for all the delicate diseases to which women are subject.

this medicine is invaluable for all the delicate diseases to which women are subject.

It braces the whole system, renews permanently the natural energies, by removing the impurities of the body, not so far stimulating as to produce subsequent relaxation, which is the case of most medicines taken for female weakness and disease. By using a few bottles of this medicine, many severe and painful surgical operations may be prevented.

Great Blessing to Mothers and Children.

It is the safest and most effectual medicine for purifying the system, and relieving the sufferings attendant upon child-birth ever discovered. It strengthens both the mother and child, prevents pain and disease, increases and enriches the food, those who have used it think it is indispensable. It is highly useful both before and after confinement, as it prevents diseases attendant apon childbirth—in Costiveness, Piles, Cramps, Swelling of the Fect, Despondency, Hearthurn, Vomiting, Pain in the Back and Loins, False Pains, Hemorrhage. apon chudurin—in Costweness, Piles, Cramps, Swelling of the Fect, Despondency, Hearthurn, Vomiting, Pain in the Back and Loins, False Pains, Hemornage, and in regulating the secretions and equalizing the circulation it has no equal. The great beauty of this medicine is, it is always safe, and the most delicate use it most successfully, very few cases require any other medicine, in some a little Castor Oil, or Magnesia, is useful. Exercise in the open air, and light food with this medicine, will always ensure a safe and easy confinement.

Beauty and Health.

Cosmetics, Chalk, and a variety of preparations generally in use, when applied to the face, very soon spoil it of its beauty. They close the pores of the skin, and check the circulation, which, when nature is not thwarted by disease or powder, or the skin inflamed by the alkalies use in soaps, beautifies its own production in the "human face Divine," as well as in the garden of rich and delicately tinted and variegated flowers. A free, active and healthy circulation of the fluids, or the coursing of the pure, rich blood to the extremities, is that which paints the countenance in the most exquisite beauty. It is that which imparts the indescribable shades and flashes of loveliness that all admire, but none can describe. This beauty is the offspring of xafure—not of powder or soap. If there is not a free and healthy circulation, there is no beauty. If the lady is fair as driven snow, if she paint, and use cosmetics, and the blood is thick, cold and impure, she is not beautiful. If he be brown or yellow, and there is pure and active blood, it gives a rich bloom to the cheek, and a brilliancy to their eyes that is fascinating.

This is why the southern, and especially the Spanish ladies, are so much admired. Ladies in the north who take but little exercise, or are confined in close boms, or have spoiled their complexion by the application of deleterious mixtures, if they wish to regain elasticity of step, buoyant spirits, sparkling eyes and beautiful complexions, they should use Dr. Townsend's Sarsaparilla. Thousands who have tried it, are more than satisfed, are delighted. Ladies of every station, crowd our office daily. Beauty and Health.

Notice to the Ludies.

Those that imitate Dr. Townsend's Saraparilla, have hvariably called their stuff a great Remedy for Females, &c., &c., and have copied our bills and circulars which relates to the complaints of women, word for word—other men who put up medicine, have, since the great success of Dr. Townsend's Sarsaparilla in complaints incident to females, recommended theirs, although previously they did not. A number of these Mixtures, Fills, &c., are injurious to females, as they aggravate disease, and undermine the constitution. Dr. Townsend's is the only and best remedy for the numerous female complaints—it rarely, if ever falls of effecting a permanen cure. It can be taken by the most delicate females, in any case, or by those expecting to become mothers, with the greatest advantages, as it prepares the system and prevents pain or danger, and strengthens both mother and child. Be careful to get the genuine.

DR. Townsznd—Dear Sir: I have the pleasure to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine They were afflicted very severely with bad Sores; have taken only four bottles; it took them away, for which I feel myself under great obligation.

Yours, respectfully,

Opinions of Physicians.

Dr. Townsend is almost dally receiving orders from Physicians in different parts of the Union.

This is to certify that we, the undersigned, Physicians of the City of Albany, have in numerous cases prescribed Dr. Townsend's Sarsaparilla, and believe it to be one of the mest valuable preparations in the market.

CAUTION.

Owing to the great auccess and immense sale of Dr. Townsend's Sarsaparilla, a number of men who were formerly our Agents, have commenced making Sarsaparilla Extracts, Elixirs, Bitters, Extracts of Yellow Dock, &c. They generally put it up in the same shaped botles, and some of them have stole and copied our advertisements—they are only worthless imitations, and should be avoided.

#### Prepare for the Sickly Season.

THE Rev. B. HIBBARD'S Vegetable Anti-Billions Family Pills, have for 25 years been administered with uniform success, as a preventive, and cure for the various maladies produced by indigestion, vitiated secretions, and impure blood. arge class of diseases is comprehended under their heads, among which are diarrhoea, cholera-morbus, inflammation of the stomach and intestincs and all other affections of those organs-billious complaints, nausea, loss of appetite, athropy, pleu risy, the different varieties of fever, and all inflama tory diseases. The operation of these pills is directly upon the radix of these disorders in the bile the blood, and other fluids of the body: Their effect is to disinfect, expel, restore, by their anti-putrescent, cathartic, and renovating properties. this season, when the vital system, exhausted by the heat of summer, but imperfectly performs its functions, they may be taken with advantage by the healthy, while to the weak and ailing they will prove a staff of life.

Compound Sarsaparrilla Pills, OSSESS an alternative Tonic, Diuretic, He petic, Stomachic, Nervine and Cathartic prorties, which cannot be surpassed by any know

medicine in the vegetable kingdom. Purify the Blood, and the Disease may be Cured!

Sarsaparrilla has been admitted and fully con firmed by the conjoined testimony of the most emi nent Physicians of the present age in Europe a well as on this continent, to be the most estimable and valuable medicine contained in the Materia Medica, and possessing very remarkable and pe-culiar properties. A combination having been ef-fected with the above named vegetable, of a mem-ber of the most efficient Medicines ever disclosed in the form of Pills, renders it a most valuable and salutary Medicine, far surpassing any heretofore

offered to the public.

The disease to which these Pills are peculiarly and with remarkable success adapted, are: 1st Cutaneous or Eruptive diseases; and as a Depurator or Purifier of the Blood, there does not exist their equal. 2d. All diseases affecting the Alimentary Canal, with its Viscera and Secretion, and re moves therefrom all inflammatory affections. 3d. Bilious affections of long duration. 4th. Dropsy, Liver Complaint, Dyspepsia, Neuralgia, Rheuma-tism, Worms, Headache, Female complaints, &c It is the best general Purgative known-power and mildness are combined. They can be administered to every age and sex; all offensive accumulations are removed without leaving the bowels in a con stipated state, so general an objection brought against all Pills. They stimulate every organ in the body to a healthy state. These Pills bring on a healthy state, or in other words, their remedial powers are disclosed by a different operation from sonable prices,

concentrated form and purity of extract, and while they eradicate the disease they invigorate and strengthen the body by their powerful alterative and tonic qualities, at the same time purifying the sys-tem and producing new and rich blood, without purging unnecessarily, which makes them peculiarly adapted to weak and enfeebled persons. These Pills are well suited to those who are inclined to be dropsical. They will speak their own merits after

a fair trial. Numerous certificates could be produced to prove the virtues of the Pill, but they are left with an enlightened public to test their virtues and merits, and bestow upon them the meed and praise which

they so justly deserve and merit.
