LOCAL AFFAIRS. The Railroad. Up to 8 o'clock to-day no train had arrived in this city from the north.

A Good Catch. Detective Chamberlin, of Hartford, Chief-Police there, and one of the best detective officers in the country, went to New York yesterday and brought back one Phillip Moses, of Hartford, who stole from his employer, Henry Sells, on Saturday night, the 18th, a gold watch and chain, valued at \$87, a silver watch and gold chain valued at \$40, and \$2 in money.

Presentations. The employees of the "Fair Haven and Westville Railroad Company," had a splendid time last evening at the "Phoenix House," in the village of Fair Haven. Mr. Nettleton, the host of the establishment, prepared a most excellent supper. The occasion was designed, more especially, as affording an opportunity for those connected with the road, to present some suitable testimonial to the President of the road, the Hon. N. D. Sperry, whose services and kind deportment toward them, merited their respect and esteem.

English Perfidy. Our recent advisers in England, although they indicate the breaking away of the cloud of war, yet show a spirit of hostility to this nation, which seems incredible when we recollect how recently our whole people with outstretched hands and loving hearts welcomed to our shores the Prince, her future King. How bitterly have we been disappointed. To the nation that has been for years telling us of our guilt in permitting the existence of slavery, we looked for sympathy and encouragement in the strife to maintain our existence against its foul domination; but we have received instead evil prophecies, sneering criticisms, advice to yield up the heritage of our fathers, and permit the shadows of slavery to obliterate the sunshine of freedom.

It has seemed nothing to the people who are ever boasting of their philanthropy and enlightenment, that they are struggling against the shame and curse which they have fastened upon us. The titled Nobles, whose voices were heard in Exter Hall, disclaiming against our inhumanity and barbarism, are heard no longer. A great part of those who were continually horrified at the magnitude of our national sins, have bowed themselves in silent worship of the Southern yoke.

The Government that proclaimed its strict neutrality in the contest, has winked at the fitting out of armed vessels, and the supplying of material for war to our enemies; has permitted her mail steamers to transport rebel emissaries and dispatches, and in many other ways has given material and moral aid and comfort to this wicked rebellion.

But this is not all; there is another grievance far greater. A slight mistake, a mistake which naturally arose under peculiar circumstances, has been eagerly seized upon as a casus belli. The Government, the press, the people in public assemblies, with a few honorable exceptions, have joined in a fierce cry for war, instant war, while we were battling with rebels for freedom and for life. Indecent haste has been made to send forth mighty navies and powerful armies to cover our waters and hover upon our borders. The British cross has quitted with the banner of slavery, giving hope to our enemies that the glorious temple of liberty would be destroyed, and a structure, with slavery for its corner stone, would be reared in its place.

For these things "perfidious Albion," with all your strength and riches, with all your mighty navies and vast armies, you are a despised and hated nation; to us and our children your name will be by-word and a reproach. From your national emblem you should read the form of the king of beasts, and place thereon the form of the crouching hyena as a fitter type of the rapacity which would seize upon a wounded victim. We have removed what you in your wrath deemed a cause of war.

We have given to your waiting arms the hoary high priests of slavery. We expect that as suddenly as your abhorrence of the accursed institution has vanished, as suddenly you will learn to bow your hearts to the author of the law which is its bulwark and protection. We believe, judging from what you have already done, that you will seek other causes of war.

MRS. STIRLING'S RECEPTION. "When thou makest a dinner, or supper, call not thy friends, nor thy brethren, neither thy kinsmen, nor thy rich neighbors." "And so we are really settled in our own house! It seems too good to be true, don't it?" As John Stirling's pretty wife was speaking, she lay down the soft, heavy falling brocade curtains of the handsome room, half parlor, half library, where she sat with her husband; turned on a little more gas, so that the Italian man, on the alabaster shade of the drop-light, might display their beauties yet more glowingly; and then seated herself in a little easy chair, beside the lounge, where her husband lay stretched out in the enjoyment of the masculine comforts, evening ease and household sovereignty. Taking up a dainty bit of bright-colored knitting, she went on:

"It was very nice, but the sure, boarding at mother's, but it was a sort of vacant life after all. This is so much better. I have something to do now." John Stirling smiled.

"And something to govern. After all, I believe it is the love of power that makes you women so delight in homes of your own. I don't doubt gentle as you women seem, that you servants find you as austere as the Great Mogul." "I declare, John, you are too bad. I never scold, and I'm sure everything has gone on so nicely since we have been here—"

"A whole week, and all the brooms new. But don't look so sober. I have every confidence in your ability to keep wheels moving." She sat silent a while, until her husband began to want to hear her voice again, and rallied her for her abstraction.

"What is the matter with you? You seem in a brown study about something. Remember, I'm your prime minister, and must know all the state secrets and cares of government." "I was only wondering, John, whether you would see a certain matter as I do. Do you realize how many parties we went to while we were at mother's? There were the Hurlbuts asked us three times, and the Graytons twice, and you know we went everywhere."

"No, I don't want it. I want it. Some what reserved of nature, save to those of his own household, and not fond of general society, going to a continual round of parties had been one of the sacrifices he made, during the first winter of his marriage, to please his gay little wife. The idea crossed his mind, as she spoke, that she too had wearied of so much excitement, and was going to propose, for the future, a quieter life."

"Yes, I liked it," she said, with a little embarrassment, for her woman's intuition divined the course his thoughts had taken. "I was only thinking, John, that, having accepted so many invitations, every one would say we were mean if we did not give at least one large party in return. It would be just the best time now, don't you see? Everything we have is so fresh and new, and our drawing-room is so elegant, and I should so like to gather our friends round us, and give a sort of house-warming!"

"That's a primitive, comfortable sounding term, Nellie. How much would this friendly little affair cost you?" "Oh I've thought that all over. We should have to ask every one we know. It wouldn't do to slight any. Besides, the more the merrier, you know. We could have Smith get up the supper, and furnish the decorations, and I should be about three hundred and fifty—say fifty more for music; and a new dress for me."

"Five hundred dollars, eh, Nellie?" "Yes, I am sure I could make five hundred do it handsomely. I could send out the invitations for week after next."

"Well, child, you must have some luncheon, and then I will go with you to see your sister. I had better speak to her about the work." "Ain't it right? Can't you pay her?" The child gave a start of alarm, and spoke with the premature womanliness and the natural apprehension of misfortune which are among the ready fruits of poverty.

Mrs. Stirling relieved her with ready sympathy. "Yes, indeed, the work is all right. It's done beautifully; but I wanted to see your sister about some more, and perhaps I can do her some good."

It would have made the kind lady's heart ache could she have seen the eagerness with which the half-finished child devoured the lunch which was set before her in the kitchen. A few moments they were ready to start. Mrs. Stirling had replaced her velvet mantle with a Scotch shawl, her French hat by a simple straw; and with a casket in her hand, containing a few dainties with which she hoped to tempt the sick girl's palate, she followed the child across the city toward C—street, a locality hitherto terra incognita to her.

In a half-dilapidated wooden house, in a narrow court, she found the object of her search. She went up two flights of stairs, and entered a back room lighted by one window. The apartment struck her, in spite of her warm attire, with a sudden chill. Evidently the sun never came there. The dampness on the walls, the general aspect of gloom and cheerlessness, was only relieved by an air of scrupulous neatness, which prevailed everywhere. Mrs. Stirling had already noticed this quality in the attire of the child, which, as was immaculate in its cleanliness as her own.

"At the window attempting to sew, the older sister sat, but she was evidently very ill. Every now and then a spasm of coughing seized her, which compelled her to lay down her work, and clasp both her hands on her side, while the paleness of her thin cheek flushed into hectic. Mrs. Stirling could not see to her before she sprang to her feet, and returned that morning having been sent to her by a servant. She stood up to her and sat down in a chair which she went near."

"Your sister said you were sick, and so I came to see if I could be of any use to you," she said, in gentle tones, which of themselves carried a certain comfort with them. "You have changed terribly since spring. I must have been ill, but I don't know what I have brought you—here are some wine jelly, and a bit of cold chicken—they will do you good."

"The poor girl looked at the viands with the involuntary greediness of hunger. Then she blushed deeply, and said in a low voice: "I am very grateful, Madam, but if you please, I will wait until you leave. Allow me to present to attend to you." "No, I don't want it. I want it. Some what reserved of nature, save to those of his own household, and not fond of general society, going to a continual round of parties had been one of the sacrifices he made, during the first winter of his marriage, to please his gay little wife. The idea crossed his mind, as she spoke, that she too had wearied of so much excitement, and was going to propose, for the future, a quieter life."

Was this little thing actually suffering for bread, and she going to spend five hundred dollars in one evening, feasting those who never felt a want even of dainties? She knew now what thoughts had been in her husband's mind when he spoke of suffering among the poor. She said, in a low voice:

"Well, child, you must have some luncheon, and then I will go with you to see your sister. I had better speak to her about the work." "Ain't it right? Can't you pay her?" "The poor girl looked at the viands with the involuntary greediness of hunger. Then she blushed deeply, and said in a low voice: "I am very grateful, Madam, but if you please, I will wait until you leave. Allow me to present to attend to you." "No, I don't want it. I want it. Some what reserved of nature, save to those of his own household, and not fond of general society, going to a continual round of parties had been one of the sacrifices he made, during the first winter of his marriage, to please his gay little wife. The idea crossed his mind, as she spoke, that she too had wearied of so much excitement, and was going to propose, for the future, a quieter life."

THE BURNSIDE EXPEDITION. THE TROOPS, BATTERIES, PONTOON BRIDGES AND SIGNAL CORPS.

The following from the N. Y. Evening Post is perhaps the most detailed account of this mammoth undertaking which has been published:

The expedition is composed of an army, army transport vessels and navy co-operating ships. The entire force is under the command of Acting Major-General Ambrose Burnside. The forces are divided into three brigades, composed as follows:

FIRST BRIGADE—GENERAL JOHN G. FOSTER. Massachusetts 23d, Colonel John Kirtz. Massachusetts 24th, Colonel Thomas G. Stevenson. Massachusetts 25th, Colonel Edwin Upton. Massachusetts 27th, Colonel Horatio C. Lee. Connecticut 10th, Colonel L. Russell. SECOND BRIGADE—GENERAL JESSE L. RENO. Massachusetts 21st, Colonel Augustus M. Wood. Pennsylvania 51st, Colonel John F. Hartnett. New York 5th, Colonel Edward Perrin. New Jersey 11th, Colonel Joseph W. Allen. New Hampshire 6th, Colonel Nelson Converse. THIRD BRIGADE—GENERAL JOHN G. PARKE. Connecticut 14th, Colonel T. H. Kingsbury. Rhode Island 5th, Colonel J. T. Lincoln (detached). Rhode Island 24th, Major J. W. Wright, (1st det.) New York 10th, Major S. Fairchild.

The following are the staff officers of General Burnside's army:

GENERAL BURNSIDE'S STAFF. Assistant Adjutant-General—Captain Lewis Richmond. Major—Lieutenant-Colonel James E. Cutting. Assistant Division Quartermaster—Captain E. G. Goodrich. Major—Lieutenant-Colonel F. B. Rowland. Major—Lieutenant-Colonel D. C. Peck. Major—Lieutenant-Colonel J. H. Easton. Major—Lieutenant-Colonel J. H. Easton. Major—Lieutenant-Colonel J. H. Easton.

The following is a partial list of the vessels which form the expeditionary fleet:

STEAM TRANSPORTS—Globe, Coosack, Eastern Queen, New York, Richmond, Westchester, Union, Sa-ane, Eastern Star, George Peabody. ARTILLERY—Major-General, R. T. Simpson, Union, Sa-ane, Eastern Star, George Peabody. BARRACKS—John Trucks, Guerilla, Voltaire, H. D. Brookman, Anns. REGIMENT—Major-General, R. T. Simpson, Union, Sa-ane, Eastern Star, George Peabody. COMPANY—Major-General, R. T. Simpson, Union, Sa-ane, Eastern Star, George Peabody.

The following transports have also one 12-pounder boat howitzer on each vessel, viz: the schooners Scot, Highlander, Skirmisher and Recruit, bark Guerilla and brig Dragon; making the following total armament in the fleet from Annapolis:

This battery will compare favorably with any which has been raised. The men are mostly from the country, are tough and muscular, most excellent material to make a serviceable and efficient corps. A new feature is to be introduced, which has heretofore been only partially carried out in Sherman's battery. The officers below sixth sergeant and the privates are to be armed with revolvers instead of sabres.

Major James Belger's Seventh Rhode Island battery also accompanies the expedition. It has 156 men and six guns, viz: four 12-pounder Parrotts, two 10-pounder howitzers.

THE SIGNAL CORPS OF THE EXPEDITION. This interesting and important part of the expedition our special correspondent writes:

Major A. J. Myers, of the United States Army, is the inventor of a complete and convenient, but by no means complicated code of army signals, and is in command of the Signal Camp of Instruction at Georgetown, District of Columbia. From that camp, Lieutenant Joseph Fricker and Thomas Foster, of the 8th Pennsylvania Reserve, and Lieut. Robeson, of the 2d Massachusetts Regiment, were sent to open a camp of instruction at Annapolis. The school has been in successful operation since December 26th, and twenty-two lieutenants with forty-four flag-men have been detailed from the different regiments in camp, who will accompany the Burnside Expedition as signal corps. A man of intelligence can learn to send a message and become a ready reader with ten days' study, as nothing more is required than patience, practice and relative mastery to make one of a good signal operator. With four hours' daily practice, the officers and men under instruction at this camp have already become proficient, and send signals with great rapidity and correctness.

The signal apparatus is very simple, consisting merely of a single flag, a dark center square on a light ground, or a light square on a dark ground, to be used as the horizon background is dark or light. The flags are four feet square on a twelve feet staff, or six feet square on a sixteen feet staff, and the signals are made by waving the flag to the right, left or front, using figures for letters, and thus spelling out the message to be sent. At night copper torches filled with turpentine are used instead of flags. The field of operations here is a ten-acre lot, while yet the young, and by his industry and off-hand manner, the present expedition, stood in the rank of captain in the revenue marine, and acquitted himself nobly, adding fresh laurels to those he had already won. He was also engaged in the merchant service. After being some years out of the service, he again returned to it, and before the present expedition, stood in the rank of captain in the revenue marine.

The following is a partial list of the vessels which form the expeditionary fleet:

A Remarkable Swindle in Iowa. The Lafayette (Indiana) Journal states that a gigantic swindle has been perpetrated in Iowa, upon the non-resident land owners. The plan of operations is stated to be as follows: To some six to twelve counties, in many instances, to be organized, elected trustees of county officers, principally exorbitant county taxes on the lands, levied by non-residents, collected and disbursed the money for their private advantage. With a county judge and county assessor elected from among themselves, it is an easy matter to make appropriations for services never rendered, work never done, &c.
