State Prison.

The examination of the affairs of the Connecticut State Prison by the Legislative Committee, we presume, was satisfactory, and that they will report accordingly. It would appear that the prisoners are generally treated with kindness, although the discipline is conceded to be \$80 00 exact and very strict as it should be. We hope, however, that the Committee or directors will bath. When whipping is necessary, a single Parker, John B. Porter, Miss M. H. Cummings, lash, instead of nine, at one blow, and these pointed with lead or iron, or hardened with knots, is sufficient. The "cat" is a relic of

We have always thought that a shortening of the term of imprisonment by authority of law of all those whose conduct in prison should be unexceptionable, would have an excellent effect upon a class of convicts, and that their example upon the more obdurate would be very peneficial. Besides, it would discourage appli eations for pardons, and prevent some from be ng granted which may not always be deserved.

We are glad to get so good an account, or he whole, of the Connecticut Prison management, and hope that in time that institution may be regarded as a model for all the States.

State Reform School West Meriden. The Legislative Committee on Humane Institutions, on Thursday, visited the State Reform School. The gentlemen were Mr. Avery of Groton, Chairman of the Committee, on the part of the Senate; Mr. Adams of Norwich, Chairman on the part of the House, and Messrs. Pease of Ellington, Freeman of Canton, Strong of Portland, Dixon of Voluntown, Hoyt of New Canaan, and Lewis of Meriden. Dr. E. W. Hatch, the Superintendent, met the party at the Depot and escorted them to the Institution. After dinner a survey of the farm came in order and the party expressed themselves gratified with an inspection of the model barn and 160 acres of fine land appertaining to the School. The latter receives a thorough farming attenion being as advertisements usually say, 'suitably divided into meadow, plow and woodland." The stock of the place is excellent of the kind. The swine looked like the right kind rightly fatted; a short horn, thorough WILLOW CHAIRS, bred bull named Humboldt, three years old and Haven. weighing 2,030 pounds, would have drawn a premium from any Agricultural Committee at light, and a handsome heifer calf, some nine months old, weighing 600 pounds, attested the idea of what Alfred Burr, Esq., of the Hartford Times, thought a suitable present for a fine farm. The building is located on a beautiful elevation commanding a splendid view of the thickly settled portion of the town of Meriden, and the very air of the place with its surround-

ings, causes the citizen to feel an honest pride in this flourishing State Institution. The various workshops were visited with interest. The busy hands of the inmates manipulated the work as though it were a pleasing task to them while it is a certain profit to the State. The apportionment of labor, school exercises, recreation and repose seem harmoniously adjusted for the best mental and physical development of the boys. The interior apartments are kept with excellent care and the whole establishment wore a homelike and attractive appearance that many boarding schools would be

proud to boast. The school room being filled, Messrs. Avery, Secretary.

Adams and Pease addressed the boys in encouraging language with much feeling and earnestness. Subsequently the lads performed a military drill in the spacious rear yard where their evolutions were manly and indicative of much spirit and pleasure in the exercise. We understand it is the intention of the Superin-

# Semi-Elastic Pipe.

WE have, during the last two years. manufactured and introduced into market 100,000 feet of all sizes, from 1/2 inch to 3 inches diameter, and have no hesitation in saying that, for the purpose of conducting water, it is superior, in every respect, to any other article yet brought into use. It possesses the following properties.

BEAUTIFUL GINGHAM GOODS, SUPERB QUALITY

It will not burst if water is frozen in it.

It is not injured by exposure to she atmosphere or sun.

It may be coiled and transported in almost any way, and (if handled with care) innumerable times, and from its elasticity cannot be easily made to collapse.

Its durability must be great. Samples can be shown which have been in constant use exposed to the atmosphere for five years, and also some that have been attached to a common house pump and buried in the earth for three years, none of which show any sign of decay. In short, the Pipe is composed of ingredients which are indestructible except by fire.

The price at which this article is offered, must, together with its invaluable properties, commend it to all who are in want of pipe for conducting water.

It can be made of any size, from % inch to 3 inches or more. more.
Couplings and suitable connections are prepared and can be furnished with it, made of a compound metal which will not co:rode.

In consequence of frequent violation of the orders prohibiting trade with Norfolk and Portsmouth, new and more stringent orders have been issued. There was a disturbance at Norfolk last night, said to have been occasioned by a negro shooting a corporal—John Burke of the 99th N. Y. The disturbance was general and the greater part of Co. C. was engaged. Three negroes were killed and two or three wounded. Six of the ringleaders were sent to the Rip Raps to-day. Many others were arrested but re

leased; all quiet now. Congress To-day.

For all of which it is a speedy and certain remedy, and never fails. This Liminent is prepared from the recipe of Dr. Sterhen Sweet of Connecticut, the tamous bone setter, and has been used in his practice for more than twenty preparation before the pub ic, of which the most skeptica may be convinced by a single trial.

A serious fire occurred in the eastern district of Brooklyn on Thursday afternoon, involving a loss of property to the amount of \$340,000. It originated from a lighted cigar coming in contact with some oil from a cask which fell and burst while unloading from a lighter, between the piers of the foot of North 2d and North 3d streets. Several large oil storehouses were consumed, and some sheds of lumber. The bark Silver Cloud was destroyed lying alongside a pier. Patrick McLaughlin, employed on the lighter, was badly burned, and taken to the hospital in a dying condition. The

It will not burst if water is frozen in it.

It is not injured by exposure to the atmosphere or sun. It may be colled and transported in almost any way, and (if handled with care) innumerable times, and from its elasticity cannot be easily made to collapse.

Its durability must be great. Samples can be shown which have been in constant use exposed to the atmosphere for five years, and also some that have been attached to a common house pump and buried in the earth for three years, none of which show any sign of decay. In short, the Pipe is composed of ingredients which are indestructible except by fire.

The price at which this article is offered, must, together with its invaluable properties, commend it to all who are in want of pipe for conducting water.
