the ship, for I suppose you have seen it all in the papers. Yet allow me to say this much for her. She was one of the prettiest and fastest ships there was in our squadron. I showed some of them a little what she could do. One Sunday, when we ran up to cover the mortar flotilla with the Harriet Lane and the Onida, I let her out a little, when she jumped past the Onida and liked to run over the Harriet Lane. You know the Onida, and I suppose you know that she is called one of the fastest propellers in the navy; but, Boss, there is no use talking, the propeller did not float on the water that could beat the Varuna for speed or for beauty. She was called the yacht of the squadron. She died a glorious death. She was not struck in any part of her machinery, although the balls flew as thick as hail around it.

Great credit is due to the planner and constructor of her engines. The night she went down her machinery was as good as it was the day it was put into her. Oh! she was a noble little ship. She was the first to pass the forts and the first to engage the rebel gunboats, but she made six drinks the waters of the old Mississippi before she went down, which she did with guns a firing, crew cheering, and the flag and strips flying at her masthead—the flag that was never made to lower to a rebel.

There is no use of me telling you what part I took in the fight. I stood by the throttle till the engine stopped and the water was over the grating in the engine room. Then I reported myself to Captain Boggs on deck. I do not know what he thinks of the way I performed my duty that night, but I did the best I could. Capt. Boggs was a hero that night, and now know what he had to do better than himself. I shall have to refer you to Capt. Boggs for information on the subject of how I performed my duty while under his command on board of the Varuna. I am now on board of the rebel prize steamer Tennessee, running between New Orleans and Vicksburg, carrying coal and provisions. We expect to bombard Vicksburg in a few days.

Yours, respectfully,  
ROBT. HENRY,  
Chief Engineer U. S. Steamer Tennessee,  
Western Gulf Squadron.

**Obituary.**  
Died in the Hospital in this city, on Sunday, 20th, Norman Taylor of Co. D, 92d New York Regiment, wounded at the battle of Fair Oaks.

A soldier in the Hospital attempted to shuffle off his mortal coil by cutting his throat. Happily, he did not meet with success in that business, and with good care will probably recover.

**State Street Sewerage.**  
An adjourned meeting of the Sewerage Committee will be held at the Common Council Rooms this evening at 8 o'clock. Petitioners for and remonstrants against a sewer through State street are invited to attend.

**New Bounty.**  
The 2d Company New Haven Grays to-day offer \$10 extra bounty, above all other bounties, for new recruits. Several men enlisted this morning, and the Company is filling up finely.

**Going into Camp.**  
One company of the Lyon Regiment, numbering about seventy-five men, leaves Meriden this afternoon, and goes into camp on the Oyster Point Road. More companies will soon follow, and the regiment will by the last of this week get under full headway.

**Sermon.**  
"The Pre-eminence of Jesus Christ," or the order in things to be believed," is the title of a sermon preached by the Rev. Dr. Harwood, rector of Trinity Church, New Haven, before the Episcopal Convention at Bridgeport. It is an able discourse, worthy of perusal, and has been printed in a very handsome pamphlet by Tuttle, Morehouse & Taylor, of this city.

**The Entertainment at Music Hall.**  
The youths from the "House of the Angel Guardian," last evening gave great satisfaction to the audience with their varied programme. The Corcoran Zouave drill was a feature that a soldier would applaud to the echo. The playing of Mr. McCarthy was exceedingly fine; his "medley" and the imitation of martial music were excellent.

To-night the boys give their last entertainment.

Forever float that standard sheet!  
Where breezes the hot falls before us!  
The Freedom's bell beneath our feet,  
And Freedom's banner streaming o'er us!

**A Southern Calm.**  
There is silence in the land of Jeff. Davis. For seven days the rebel hordes were poured like the ocean waves upon our army. For three days more, voices of exultation were heard in the dominions of the Southern King. For one day the proclamation of the royal Davis was echoed through the land of the Palmetto and the Slave—and the King's subjects lifted up their voices and drank for joy. But now there is stillness in all the land. Is it the precursor of some terrible storm? Is it the treacherous calm which precedes the hurricane? Is it the rest which nature takes when she prepares for some strange exhibition of her power? Or is it the silence which falls upon the household when death has entered and borne away a son or brother? Has the Southern King discovered in counting up his losses that the angel of death has entered into every household and taken away the first-born? A faint wail from the Richmond Press crying "We must dig," "we must dig," "we must dig"—is the only answer. Dig what? Entrenchments to defend Richmond, or graves to bury the unnumbered dead? It may be either—we are still in doubt.

Where is the ubiquitous Jackson? Is he gathering in the rich crops of grain in the valleys of Virginia? Is he mustering his troops for another raid down the Shenandoah? Is he preparing to strike a sudden blow at Pope? Or is he inspiring the Southern soldiery with new whisky and fresh gunpowder, for another attack upon McClellan? We cannot tell.

But certain we are that the rebels are not idle. They do not calmly await for the hosts of the North to reinforce McClellan. Their time is now or never. Not yet has the blow been struck which will gain for them the recognition of Europe. The crisis of their fate has come. They know it, and will act accordingly. Whatever their plans may be it is our duty to be ready for them. Whether a new monster shall descend the James river, or Pope or McClellan shall be menaced, the enemy must not find us unprepared to receive him. And judging by the rising tide of enthusiasm in the West and in most of the Northern States, we think his conscription will hardly keep pace with our volunteering.

**Mr. Bushnell and the Congressional Investigating Committee.**  
The Investigating Committee, for examining into the purchase of vessels for the Government, has published a report severely reflecting upon our fellow-citizen, C. S. Bushnell, alleging gross fraud in the sale of the "Varuna." It charges that the vessel did not come up to contract, &c., &c. Mr. Bushnell was not heard on the investigation, and therefore makes the following reply to the charges.

New Haven, July 23, 1862.  
To the Committee on Government Contracts:  
My attention has just been called to your report which was published in the Evening Post of the 16th, in which my name is freely used in connection with the steamer Varuna, which vessel, under the command of the noble Boggs, has rendered the country such good service.

You have made use of my name as no man or committee of men have any right to use the name of another. You have, without giving me an opportunity to be heard, either ignorantly or maliciously published eleven false statements of facts in connection with the construction and sale of the vessel to the Government. If you had given me the slightest information that you had desired these facts it would have afforded me great satisfaction to give them to you, as there is nothing connected with the business that I have the slightest desire to conceal; but pride in having been, I believe, a just prize in the case of that vessel, being in just the right place at the right time, and at a less cost to Government than any other vessel of her speed and class.

Your statement that Government paid bills for compensation that I ought to have paid is not only false, but the contrary is the truth. My body believes that the Navy Department pays bills that others ought to pay, let them ask them to do so and become convinced of the error of that idea. They decide what belongs to the Department to pay and what to individuals, and I have never heard of their erring against themselves. If any body or committee have the least desire for a detailed statement of the whole transaction, I will with pleasure give it.

My profit on the transaction paid me a small percentage only on the risk I took, and but few, I think, would have been willing to have taken my place. The story you give in relation to the building the gunboat is without truth.

For the capital involved and responsibilities incurred, my profits in Government contracts have been rather under than over a just amount.

Yours, very respectfully,  
C. S. BUSHNELL.

We append an interesting letter from the late engineer of the "Varuna," giving his opinion of the vessel. As she was a Connecticut offspring, we all must feel a degree of pride in her success.

Sir—I do not know that there is any use for me to say anything in favor of our gallant lit-

Hayden, started on Monday, the 21st, for a trip of five or six weeks among the Green Mountains. They have a wagon, drawn by a pair of mules, which carries their camp equipage, fishing tackle, guns and ammunition, which wagon also serves as a shelter at night, or a boat if needed. They will camp out, and have a rough, healthy time of it. Better take a trip to Richmond.

**The Naval Fight on the Yazoo and Mississippi Rivers.**  
On the morning of the 15th, in consequence of reports brought by refugees that the Arkansas fleet was about to attempt to run the Federal fleet, the gunboats Carondelet and Tyler, and the ram Lancaster, started up the Yazoo to reconnoiter. At eight miles from the mouth, they came suddenly upon the Arkansas, lying under the bank. As our boats rounded the bend she opened upon them with 68 pounders. Our gunboats returned the fire and for a short time a fierce engagement ensued. Finding that the channel of the river prevented successful maneuvering they gradually dropped down toward the mouth. The Arkansas followed closely. Just as the latter was passing over the bar, the Carondelet closed with her intending to board. She succeeded in throwing a grapple aboard, and getting up a plank, which the Arkansas opened her steam pipe, throwing hot water across the plank. The Carondelet replied in the same manner. While thus engaged, both vessels grounded and the shock separated them. The Arkansas succeeded in getting off, and the Carondelet remained fast for nearly an hour. The Arkansas immediately passed down the river, the Tyler preceding her, and maintaining a running fight with her greatly superior adversary. None of our gunboats with the fleet had steam up, and the entire fleet was so scattered that few could fire at the Arkansas, as she passed, without danger of hitting our own boats. As she approached, such boats as could safely do so, opened upon her, but her plating resisted most of the shots. A solid shot from Farragut's gunboat No. 6 struck her below board, passing through and under her plating, ripping it off for a considerable distance. What further damage was done is not ascertained.

The injuries to our fleet are light. The Benton received a shot near the edge of the after part of the larboard side, killing one man. The Tyler, which engaged the Arkansas for nearly an hour and a half, had seven killed and nine wounded; among the latter were the pilots, Messrs. Sebastian and Hines, and engineer D. A. The ram Lancaster received a shot under her boilers, causing the escape of hot water, scalding six men three of them fatally. The entire federal loss is 12 killed and fifteen wounded, 5 or 6 of whom will die. The rebel loss is not known, but believed to be considerable. The hot water streams of the Carondelet at the time they attempted to board were thrown directly into her.
