NOTICES

NOTES . . . FROM THE LIBRARY

On July 18, 1980 we'll be showing GEORGIA O'KEEFE at 6:15P.M. in the classroom area. The film presents O'Keefe on home ground in her New Mexico studio where she talks candidly about her life and work. Many of her serene and stunning paintings are shown. The film places the career and work of this remarkable woman into focus.

Jose Ortiz

G.E.D. Examinations are scheduled for mid-August, 1980. All interested parties should contact Mr. Harris, or Mr. Perrverio.

The deadline for signing-up to take the G.E.D. Test is Friday, August 1, 1980.

David A. Harris
Ed. Coordinator

Any inmate who is a veteran of any branch of the armed forces and would like to meet with a representative from the Veterans' Administration should sign-up with Mr. Barber in the school area. Information regarding educational benefits and upgrading of discharges will be made available as well as answers to questions from participants.

Mr. Barber

COMMISSARY NOTICE

COMMISSARY NOTICE

COMMISSARY NOTICE

Who goes first??? Group 3, then, 4-5-6-7-1-2.

Anyone going to the commissary window to shop, must have a commissary list ready to read off what you wish to purchase. Commissary list must be handed over with your ID card to the commissary personnel when arriving at the window. Failure to do so, will result in the loss of your place in the line and the next man will be served.

ALL MONEY TO BE SENT OUT MUST BE IN THE COMMISSARY BY WEDNESDAY NOON!!!

Mr. Gibeau
Comm. Supervisor

"IN THE NAME OF GOD, MOST GRACIOUS, MOST MERCIFUL. Praise be to God, the Lord. Cherisher, Sustainer, and Creator of the universe, and may He bestow Peace and Blessings upon the seal of the prophets and final Messenger, Muhammad, and all his followers".

INTRODUCTION

This is the first of a series of articles that will introduce those who are concerned with truth, and who seek the guidance of a prosperous and righteous life, to Islam (The religion of Peace) and the Holy Qur'an (A guide for the righteous); in hopes that "We" might be saved from the destruction that is assured for the disbelievers.

This translation of the meanings of the Qur'an, Gods completed message to all humanity, marks a number of firsts in the Glorious history of Islam. Since the advent of Gods final messenger, 14 centuries ago, the Arab Muslim scholars have shied away from rendering the meanings of the Qur'an into other languages. They justifiably realized the awesome responsibility associated with such an undertaking, a single error could lead to the misguidance of untold numbers of people. Hence, no English translation of the Qur'an's meaning was ever done by a Muslim Arab, this is the first such translation.

The events that accomplished this work during the last 10 years were solely responsible for the completion and publication of this rendering. In view of the great responsibility involved, and the fully recognized limitations of my ability. I turned to the Almighty, seeking His guidance and support (Qur'an 1:5).

Throughout this work, I actually sought all kinds of excuses to avoid carrying out this awesome task; I constantly dismissed many a profound sign as more imagination on my part, and I now appreciate the reluctance of the Arab Muslim scholars to translate the meanings of God's message. Undoubtedly, the outstanding Muslim scholars who rendered the meanings of the Qur'an into their mother tongues did so out of compelling necessity.

Though I am not apologizing for carrying out this task, I ask the readers indulgence in understanding the motives behind this seemingly bold attempt to present God's message to the English speaking world. After examining the available English translations. I realized that they were full of errors, inaccuracies, inconsistencies, and sometimes deliberate distortions.

-
1. This is the Book;
In it is guidance sure, without doubt,
To those who fear God;
 2. Who believe in the unseen,
Are steadfast in prayer,
And spend out of what We,
Have provided for them;
 3. And who believe in the Revelation
Sent to thee, And sent before thy time,
And (in our hearts)
Have the assurance of the
Hereafter.

SKETCHES

By BEN BURROUGHS

'This Beautiful Night'

The sky is beautiful tonight... white clouds are hanging low... and my heart longs to say the things... that your heart yearns to know... the stars are diamond bright tonight... each one a perfect gem... your eyes are magic mirrors... reflecting all of them... the mellow moon spotlights the world... of which we are a part... just two of God's children... woven heart to heart... stardust and moonbeams interlace... forming a heavenly vale... and I hear the tender song... of a nightingale... around us nature weaves a web... a frame of pure delight... just you and I so much in love... on this beautiful night.

'Good Hearts'.

Good hearts beat with tenderness... for those who round them dwell... good hearts are compassionate... and wish all people well... steadfast and ever faithful... good hearts are all of this... they can bring the sunshine... into a dark abyss... indeed good hearts are priceless... few and far between... one good heart can shower... beauty on life's scene... it must be remembered... if your heart is good... many times its purpose... is misunderstood... then, too, some take advantage... of the hearts of gold... using them to attain things... they wish to enfold... all good hearts find true happiness... on each road of life... but hateful and jealous hearts... only encounter strife.

'It's About Time'

It's about time that we stopped to think... of our purpose in life... why were we put upon this earth... where joys are dimmed by strife... most of us are self-centered... we seldom give a break... to those who have a rocky road... or a goal to make... perhaps we are afraid that we... will lose a little ground... and that to help our fellow men... isn't very sound... yet, what have we accomplished... by reasoning this way... happiness eludes us... as we strive each day... so I write this bit of verse... hoping it will reach... those who have been guilty... in thought or deed or speech... all of us should mend our ways... oh yes it's about time... life is not forever... so I end this rhyme.

'A Pleasant Sojourn'

One of the greatest pleasures... for families to share... is a pleasant sojourn... out in the country air... once in a while we venture... to a wooded place... where we can feel the wonder... of nature's embrace... there is a sacred quiet... about a country lane... wherein dreams can blossom... to a brook's refrain... life takes on new meaning... 'neath beautiful trees... worries are forgotten... hearts are put at ease... family ties grow stronger... out in God's abode... new faith and hope are gathered... to shoulder life's great load... so when time allows us... together we proceed... to take a pleasant sojourn... away from the life we lead.

'Something Beautiful'

There's something beautiful about... each day we're blessed to live... an azure sky, a smile that acts... just like a sedative... even when it's raining... there's beauty to be found... when we stop to think of all... the good rain... does the ground... there are two sides to everything... a good side and a bad... we must seek out the brighter side... if we are to be glad... the world abounds with wonderment... life holds more bliss than harm... who can deny the marvel... of Dame Nature's charm... remember as you go along... on your toilsome way... there is something beautiful... about every day.

'In The Darkness'

In the darkness peace is present... blackness casts a magic spell... and it weaves a web of velvet... that is without parallel... tender is the word for darkness... things seem brighter at this time... faith and hope somehow grow stronger... adding reason to life's rhyme... it's as though I am protected... by a wall

of ebony... wherein I can test my being... and ready for what's to be... darkness is the time for planning... temperate zone for joy and sorrow... period for love to blossom... and the prelude for tomorrow... so I ponder in the darkness... praying silently to God... till the web tightens around me... and I reach the land of nod.

WHO NEEDS VITAMIN SUPPLEMENTS?

INFANTS AND CHILDREN

Doctors recommend a formula for the artificially fed new-born infant which usually includes 30 mg. of vitamin C and 400 U.S.P. units of vitamin D. It is also accepted practice for breast-fed babies to receive 400 U.S.P. units of Vitamin D. With this amount of vitamin D maximum retention of calcium and phosphorus are obtained. Retentions are no longer greater with larger amounts of vitamin D. Infants receiving unfortified skimmed milk formulas also need 1500 U.S.P. units of Vitamin A. Children continue to need 400 U.S.P. units of vitamin D during the growth period. An adequate units of vitamin D fortified homogenized milk or reconstituted evaporated milk (1-½ - 2 pts. daily) provides the required vitamin D.

ADULTS

During pregnancy and lactation, 400 U.S.P. units of vitamin D are often needed if intake of vitamin D fortified milk is low. The doctor should determine whether these additional supplements are needed by the expectant mother. A doctor's evaluation of a patient's dietary habits and physical health can determine for all adults whether a supplement is necessary.

DANGERS OF TOO MANY VITAMINS

There is a danger when people think, "if a little is good, more is better" and apply it to the use of vitamins concentrates. Children and adults alike have suffered toxicity effects with over dosage of vitamins A and D.

Since vitamins A and D are fat soluble vitamins and therefore are stored in the body, they offer problems not experienced with water soluble vitamins. The body excretes the B-complex vitamins and vitamin C it doesn't need.... whereas vitamins A and D remain in the body if not used.

Excessive use of vitamin A has produced certain toxicity symptoms such as bone and joint pains, hard, tender lumps on arms and legs, fissures of the lips, loss of hair, dry skin, jaundice. Toxicity symptoms were noted when children were given 75,000 I.U. or more of vitamin A daily for 6-15 months. Naturally this was in the form of concentrated capsules or liquids. The amount represents 15 times the Recommended Dietary Allowance.

Toxic effects of excessive vitamin D are noted when 4 to 5 times the Recommended Dietary Allowances are given. Excessive concentrated dosages of as low as 1800 U.S.P. units and particularly at levels of 10,000-30,000 I.U. of vitamin D daily decrease appetite, reduce calcium and phosphorus retention, cause vomiting, diarrhea, headaches and drowsiness in children & adults. Cases of hypercalcemia with these symptoms have been noted in the United States.

Toxic effects from overdosage of vitamins A and D depend on many factors, such as the physical state of the individual; calcium and phosphorus intake and exposure to sunlight in the case of vitamin D overdosages. No one knows the long term effect of overdosages. Limiting vitamin A intakes to the Recommended Dietary Allowance or slightly more is also advised.

ARE VITAMIN PILLS NECESSARY?.....

Due to modern food science, transportation and distribution systems, we Americans have available to them a wide variety of attractive, wholesome foods from all over the world, and throughout all seasons of the year... Yet with all this variety of available food, the American public is spending some 500 million dollars a year on falsely promoted vitamin pills... and so-called "health foods." The popularity of these products is probably due to the fact that they have been so commercialized and exploited in recent years.

Studies show that most healthy people who eat a varied diet do not need vitamin pills or supplements except perhaps in times of stress, such as pregnancy and lactation or in case of illness when a doctor recommends them to us. Those using self-prescribed pills often do not get the additional vitamins they need most--if, indeed, they need additional vitamins at all. There are dangers that children, and even adults, can suffer ill effects from excessive dosages of vitamins A and D which are.... stored by the body.

WHAT IS A VITAMIN?

A vitamin occurs naturally in food and, isolated and examined under a microscope, is crystalline in nature. Each vitamin crystal has a characteristic shape, color and taste. Most of them are odorless. Vitamins have no calories themselves....Vitamins, microscopic in size, are required in very minute amounts by the body, but they are essential for life and are considered body regulators. They are necessary for growth and reproduction, formation of antibodies, coagulation of the blood, resistance to infection, formation of intercellular substances and for health of bones, teeth, skin, blood and nerves. They function also in chemical-reactions concerned with the body's use of food. Extreme vitamin deficiency diseases are almost non-existent in the United States today.

Some foods have more of certain vitamins than others. Several vitamins are often found in one food. Where one B-vitamin is found, other B-vitamins are also likely to be present. Nature often provides a team of vitamins and minerals in one food where one helps the other to be used by the body.

To show what small amounts are needed in the body vitamins are measured in milligram, micrograms and International Units. A microgram is 1/1000 of a milligram; a milligram is 1/1000 a gram and a gram is 1/28.4 of an ounce. International Units are concentrations of strengths of vitamins-A and D. For vitamin A the International Unit is .3 microgram of vitamin A or .6 microgram on beta carotenes (which is converted to vitamin A by the body). For vitamin D, the International Unit is .025 microgram. U.S.P. (United States Pharmaceutical) units is a term used interchangeably with I.U. (Note the use of these terms on the chart).

Because of their chemical composition the vitamins are fat soluble and.. some are water soluble. Fat-soluble vitamins are stored in the body and excesses of water-soluble vitamins are excreted.

OUR VITAMIN NEEDS

In addition to vitamins, our bodies need many other nutrients. These are minerals, proteins, carbohydrates, starches and sugars and fats. Most of these nutrients are present in varying amounts in almost all foods.

Next week, "Vitaminized Food".

Submitted by; Michael Kozak

1. ALIMENTOS NUTRITIVOS

El cuerpo convierte en energía parte de los alimentos que se ingieren. Esa energía imprescindible para que el organismo mantenga todas sus funciones, se mide en calorías. Las calorías proceden de estos cinco grupos:

- A- CARBOHIDRATOS: Constituyen la principal fuente de energía. Aquí están incluidos los Almidones y azúcares. El pan, los cereales, las harinas y las papas contienen gran cantidad de carbohidratos. Ellos producen el 45 por ciento de las calorías en una dieta.
- B- GRASAS: También producen energía. Una dieta balanceada debe incluir grasas ya que proporcionan el 40 por ciento de las calorías que el cuerpo necesita. Desde luego, no debe abusar de ellas por que al aumentar el colesterol, puede causar infartos. Las dietas bajas en grasas ayudan en el tratamiento de ciertas enfermedades de la piel, especialmente el acné.
- C- PROTEINAS: Esenciales para el crecimiento. Los huesos, los músculos, la piel y otras partes sólidas del cuerpo están compuesta por proteínas. La mejor fuente de proteínas es la leche y sus derivados (como el queso). También las proporcionan la carne de res, el pescado, el pollo, los huevos, los guisantes, las nueces y algunos vegetales.
- D- MINERALES: Son imprescindibles para el crecimiento y para el mantenimiento de la estructura del cuerpo. Los más importantes son: calcio, fósforo, sodio, hierro, cobre, cloro y yodo. En conjunto, los minerales representan el 5 por ciento del peso total del cuerpo.
- E- VITAMINAS: Indispensables para una buena salud. El organismo no las produce y, por lo tanto, se suple de ellas a través de los alimentos o de las tabletas. Sin las vitaminas, el cuerpo no podría producir las enzimas necesarias para convertir la comida en energía. Cada una de las vitaminas desempeña un papel distinto. No obstante, como ellas trabajan juntas, es indispensable mantener un buen balance. En total son 13 vitaminas, y para ayudarle a conocer para qué sirve cada una de ellas y en qué alimentos se encuentran, hemos preparado un cuadro sumamente explicativo.

2. GRUPOS BÁSICOS DE ALIMENTOS

Los dietistas clasifican los alimentos en cuatro grupos básicos:

- A- LECHE Y SUS DERIVADOS: Contienen gran cantidad de calcio y de proteínas. Entre los derivados se encuentra el yogur, alimento fermentado naturalmente que lucha contra los gérmenes de nuestro sistema.
- B- CARNES: Aquí entran las carnes de res, pollo, pescado, los huevos, los frijoles (caraotas, habichuelas), los guisantes y las nueces. Contienen mucha proteína, vitamina B1, hierro, fósforo y almidones.
- C- PANES: Incluye los cereales y las galletas. Alimentos ricos en vitaminas y minerales.
- D- VEGETALES Y FRUTAS: Espárragos, zanahorias, papas, tomates, lechugas... Contienen vitaminas, A, B y C, hierro y calcio. Frutas cítricas: Toronjas, naranjas y limones, que contienen vitaminas A y C. Frutas no cítricas: Manzanas, bananas, uvas. Contienen carbohidratos y minerales.

3. AGUA

BEBA MUCHA AGUA Y...; Y ELIMINARA LA CELULITIS!

Líquido esencial para la vida, presente en todos los tejidos del cuerpo. Además, la humedad es indispensable para mantener la piel tersa y suave. Constantemente, a través de la transpiración, estamos perdiendo agua del cuerpo. Aproximadamente un litro. Por eso debemos beber mucha agua. Ocho vasos al día constituyen una buena medida. No sólo estará devolviendo a la piel la humedad perdida, sino que podrá eliminar la celulitis... CONT.

Es también sumamente importante que use humectantes. Sólo así podrá evitar que la piel se agriete y entonces, envejezca más rápidamente.

4. VALORES NUTRITIVOS

COMA ALIMENTOS FRESCOS.

Para conservar los valores nutritivos de los alimentos es necesario no recocinarlos mucho porque se estarán aminorando sus efectos. Y, de ser posible, debe tratar de comerlos siempre muy frescos. Por supuesto, es imprescindible que no se ingieran productos que contengan sustancias químicas.

CUADRO EXPLICATIVO

	VITAMINAS Funciones	ALIMENTOS
VITAMINA A	Es fabulosa para la piel, la vista y los sistemas digestivo, respiratorio y nervioso.	Papas dulces, leche, hígado pescado, huevos, mantequilla y vegetales
B1	Ayuda al corazón y al sistema nervioso. Además, regula el metabolismo.	Carne, cereales, nueces, guisantes, papas, vegetales.
B2	Es indispensable para la buena oxigenación de las células. Por lo tanto, ayuda a tener una piel regia.	Leche, queso, hígado, pescado, pollo, vegetales verdes.
ACIDO PANTOTENICO	Ayuda al organismo a convertir carbohidratos grasa y proteínas en energía.	Huevos, carnes, nueces, cereales.
B12	Para incrementar los glóbulos rojos. Fabulosa para el sistema nervioso.	Huevos, carne leche
BIOTÍN	Es buena para el sistema circulatorio. Ayuda a tener buena piel.	Huevos, nueces, hígado, riñones.
ACIDO FOLICO	Incrementa la producción de glóbulos rojos.	Carnes, pescado, pollo, vegetales verdes.
C	Es buena para los huesos y para los dientes. Ayuda a regular el metabolismo y fortalece los vasos capilares.	Frutas cítricas, pescado, papas, fresas, cerezas.
D	Produce grandes cantidades de calcio y fosforo	Pescado, leche, huevos.... y el Sol.
E	Es fabulosa para el corazón, los músculos y los órganos reproductores. Esencial para mejorar la piel.	Cereales, lechugas, aceites, vegetales.
K	Para la coagulación de la sangre.	Vegetales verdes.
NIACINA	Para la absorción de los carbohidratos y por consiguiente, esencial para tener una piel saludable.	Hígado, pan, cereales.
B6	Magnífica para los dientes y para los vasos sanguíneos.	Cereales, carnes, pollo, pescado.

PARDON BOARD

FALL SESSION

APPLICATIONS: All inmates who are planning an appearance at the next sessions are encouraged to submit their requests to SUPERVISOR OF RECORDS, at their respective institutions. Your request should be submitted immediately, if possible, and inmates are reminded that the last day for submitting requests is August 8, 1980.

After having submitted your request, you will be sent (3) three copies of the Board of Pardon Petitions. You must fill these petitions out completely and return (2) two copies as soon as possible to your Record Office for scheduling of your appearance. Retain (1) one copy for your records.

APPLICATIONS RESULTING IN A STARRED (*) CASE: Under the established rules of the Pardon Board, cases are rarely heard if the petitioner has: 1) Appeared within the year. 2) Served less than one year. This one year cannot include jail time. 3) Appeared or was eligible for parole. A starred case in one of these categories is very rarely heard, therefore, by waiting for a regular session, not only are inmates saved the labor of preparing required letters, but friends, lawyers, prison staff, State's Attorney and Board members are spared the effort which should be given the regular petitioners. It is suggested that before undertaking the task of a starred petition, an inmate should seek the advice of the prison staff which is readily given.

Neither the Department of Correction nor the Pardon Board will assign Attorneys. Each inmate must retain his own council.

JUNTA DE PERDON

LA SESION DE OTONO

PETICIONES: Todo preso que piense presentarse en las proximas sesiones deben someter sus solicitudes al SUPERVISOR DE ARCHIVOS, en sus respectivas instituciones. Debe someter su solicitud inmediatamente, si es posible, y se les recuerda a los presos que el ultimo dia para someter las solicitudes es el de 8 Agosto de 1980.

Despues de haber sometido su solicitud, usted recibira (3) tres copias de la Peticion de Junta de Perdon. Tiene que llenar estas peticiones completamente y devolverlas lo mas pronto posible a su Oficina de Archivos para fijar la fecha de su audiencia. Retenga una copia como referencia personal.

SOLICITUDES QUE RESULTAN EN UN CASO MARCADO (*): Bajo las reglas establecidas de la Junta de Perdon, rara vez se oyen los casos si el solicitante, haya: 1) Aparecido dentro del año. 2) Servido menos de un año. Esto no puede incluir tiempo de carcel. 3) Aparecido o sido elegible para libertad bajo palabra. Un caso marcado en una de estas categorias muy rara vez llega a ser oido, y por eso, al esperar la sesion regular, el preso evitara el trabajo innecesario de preparar el papeleo; y las amistades, los abogados, personal de la prision, la oficina del fiscal, y los miembros de la Junta podran dar mejor atencion a los solicitantes regulares. Por lo mismo, se sugiere que antes de someter una peticion en un caso marcado, el preso debe pedir consejo de algun miembro del personal.

Ni el Departamento de Correccion ni las Junta de Perdon asignara abogados. Cada preso tiene que conseguir su propio abogado.

***** THE TRAP PROGRAM *****

IF YOU ARE INTERESTED IN:

1. A guaranteed parole release date.
2. A guaranteed Community release, where possible.
3. A seven day job assignment and good time credit.
4. Behavior studies classes(which can be applied for college credits.)

AND YOU:

1. Have a drug abuse history
2. Are within 6-18 month of your release date.
3. Do not have (2) parole violations or a felony conviction while on parole.
4. Have no pattern of sexual offenses, violent or assaultive behavior, Escapes or serious psychological problems.

THEN YOU MAY MEET THE TRAP PROGRAM ADMISSION CRITERIOR.

Those inmates that have had misconduct reports or unsatisfactory work reports within the past (4) month will not normally be considered for admission into the trap program, but check and be sure.

Don't rule yourself out. If you are interested, contact addiction services today and find out for sure. Send a request to Guy Prairie and tell him you want more information about the Trap Program.

HE WILL CONTACT YOU.

"Dear Folks: Mr. Gimmie insists we write a two-page letter to our parents. I imagine that! A two-page letter! Two pages - not one. One, plus me: TWO pages. Two entire pages. Two full, whole pages. Two...."

PUZZLE

UP FROM THE DEPTHS

(75)..... R..... June '79
Horror-Suspense. The calm atmosphere at a Hawaiian resort turns to terror when a giant sea beast is discovered on the loose. A beach bum, also an expert scuba diver, tries to find a way to combat the giant killer fish. He teams up with a hotel's public relations woman to kill the beast. Sam Bottoms, Kedric Wolfe, Virgil Frye. Producer: Cirio H. Santiago. Director: Charles B. Griffith.
