## THE UNITED NATIONS <br> Charter Signed June 26, 1945

Foundations of the United Nations were laid at the Dumbarton Oaks Converence in Washington between the United States, the United Kingdom and the Soviet Union, Aug 21 - Sep 28, 1944, and between the U.S., U.K., and the Repulbic of China (Nationalist), Sep. 29 - Oct 7, 1944. Proposals to establish an organization of nations for maintenance of world peace led to the United Nations Conference on International Organization at San Francisco, Apr 25-June 26, 1945, where the charter of the United Nations was drawn up. It was signed June 26 , by 50 nations, and by Poland, one of the original 51, on Oct. 15, 1945. The charter came into effect Oct. 25, 1945, when the requisite ratification by the 5 permanent members of the Security Council: - China, France, Soviet Union, United Kingdom and United States, and a majority of other signatories had been completed.

United Nations headquarters are located in New York, N.Y., between First Ave. and Roosevest Drive, and E. 42nd St. and E. 48th St. The General Assembly Bldg. (opened 1952), Secretariat, Conference and Library bldgs. are interconnected. The Dag Hammar skjold Library, built by a $\$ 6,200,000$ grant from the Ford Foundation, was dedicated Nov. 16, 1961. It has room for 400,000 vols. To build the headquarters the U.S. Government advanced an interest-free loan of $\$ 65,000,000$, payable in annual installments until 1982. John D. Rockefeller, Jr., contributed $\$ 8 \mathrm{mil}$. for land and the City of New York contributed an estimated $\$ 26,500,000$ for adapting the site. United Nations has a post office originating its own stamps.

The price of failure is---what? If we fail, what is the price? Not being able to do what we set out to do? There is shame attached to failure, degredation in coming in second best, humiliation in the unfulfillment of your boast? Nonsense!

There is no shame in failing, IF you have given honest effort to what you ore attempting. The shame is for those who do not, or will not try.

There can only be one person to actually win first place in any race that is not a tie, there is only one person who can be the top of his profession; does this mean that everyone who does not reach. the top is a failure? That would mean we would have a little less than 4 bililion foilures in this world!

What is the price of failure? There really is no price attached to fallure if you hove attempted to do something worthwhile and heve failed to accomplish that which you set out to do, because you really haven't falled at all. If you are set on doing something good, then to fail to accomplish it on the first try is not failure, but just an obstacle which you must find a way of avolding, or overcoming if you are to succeed.

The problem lies in the fact that so many people, when they attempt to hurdle the first barricade to success, just lie down and say "It can't be done." These are the real failures.

If you want something enough to plan on succeeding, then you should lay out your plans with the idea in mind that there are hurdles to surmount; don' + think that just because the plan is a good one with an exceptional purpose, that it will always be accepted, because the first thing the people you propose it to will always
ask about are the practical things, the most important of which is always, "How will it fit into the present, everyday scheme of things?"

Our lives and our destinies are the most important things in the world to each and every one of us. Oh, of course you will hear murmurings of "My family or my wife or my children are more important than myself," but this is not true, because their lives are determined by the way you plan yours.

Why then, do we live day-to-day never planning for tomorrow, next week, next year? You may say that you cannot possibly plan ahead if you don't know in advance what you are going to be doing; but I say that the only people who don't know what they are going to be doing, are the ones who leave their destinies up to the whims of others, to be done with as they please!

Plan YOUR life today, and stick to the plan!

To try and fail is excusable; but to fail to try is contemptable.

The books reviewed here will be available on a central table in the library on June 28, 1971. If you would like information regarding new books, on subjects of your interest, please drop a note in the Weekly Scene box located in the hallway.

HALEWAY TO 1984-Edited by Lord Gladwyn, 1966. Pages: 89

In this book, based on a series of lectures delivered under the auspices of the School of International Affairs of Columbia University, Lord Gladwyn begins with the analysis of how the West "lost the peace" after World War 11. The Author traces the developments of the Cold War as the split between East and West widened. He sees the world apparently moving toward the realization of Orwell's projected superpowers, "Oceania, "Eurosia," and "Eastasia", But the nightmare of Orwell's vision does not have to be the result of this trend. In a reasoned view of the future, Lord Gladwyn argues that a system and that peace may be maintained through akind of "World Authority of Regime."

BIBLE AND SWORD - Edited by Barbara W. Tuckman. 197t. Pages: 268.

Latter-day history has been content hitherto, to trace the origins of Great Britain's Palestine Mandate, based on, and incorporating the Balfour Declaration, to the exigencies that had to be faced at the close of the First World War.

The reformation and the translation of the Bible in English open a new epoch. Tyndale, working in secrecy abroad in a candle-lit garret, makes the translation that will set the pattern for the king James version, and goes to the stake for it.

IHE SUMMER THAT DIDN'T END. Edited by Len Holt. 1965. Pages: 351

During the summer of 1964, a severe blow was struck to American integrity in the state of Mississippi. By October, as a terrible byproduct of the Freedom Summer Project there, there had been fifteen murders, including those of the three young civil rights workers at Philadelphia. With burning conviction, such as comes only to those most intimately involved in a situation, Len Holt writes of the 1964 Mississippi Civil Rights Project. Mr. Holt is a fiery young Negro lawyer whose battle for justice in the Jim Crow courts in the South is making him famous. He investigated the killings in Neshoba County personally.

IHE OTHER SOCIETY. Edited by H. DarinDrabkin. 1963. Pages: 356

Dr. Darin-Drabkin, a noted Israeli, analyzes objectively the social, economic, political, andpsychological implications of these singular independent communities. In them, men, women, and children combine their lives perhaps more completely than in any other contemporary society. Dr. Darin-Drabkin also points out the ways in which the kibbutzin have changed, and noted the trend toward greater privacy, more family intimacy, and more individual freedom. Theirs is an experiment whose mistakes and whose triumphs can benefit human communities everywhere.

[^0]

THIS COLUMN IS BY AN INMATE WITH 23 YEARS EXPERIENCE HERE

ITEM: The government is now taking a serious look at the practice of news services of passing unverified information along to their subscribers for publication. A federal communications big-wig has publicly stated that it is criminal for any press service to pass along unverified information to the media, especially if the information might be harmful.... All I can say is: Amen! It's about time! Horrible untruths are being regularly transmitted to the media for publication; and most of those items are supplied by "reliable" newspaper reporters who make extra money supplying acceptable piecework news to the larger services. Anything for a buck.

ITEM: Volkswagen and Audi are made by the same corporation, the Audi being considered the more powerful big brother, and made just as well.

ITEM: Our hospital record library: One medical record librarian and two assistand librarians handle all the business of our hospital medical record library which, believe it or not, does a volume of business about threetimes greater than does our main prison library, though medical records are never checkedout to inmates.

ITEM: Did you read where the research arm of our Department of Correction is computerizing detailed information on us and department issues for the first time? Will save a lot of work and time formerly lost on paper work. Now maybe the ir computers will tell them that a few of us inmates seem to have become lost in the maze of whirling wheels, such as we medical record librarians and technicians who aren't properly classified yet, no such job being listed.

ITEM: The other day one of my acquaintances told me I was nuts, when 1 told him the local attorney general's office had never issued a legal ruling in favor of we prisoner underdogs. But he couldnot name one. But I'm still curious about it. Being nuts helps, I guess.

ITEM: The marijuana bugaboo: We regularly hear of groups of college students, and an occasional professor, who want federal grants in order to conduct studies of the effects of marijuana on people. I believe they have been misled, and that the spending of money in that manner would be frivolous, and that the public is being misled regarding the supposed absence of information regarding the habit of prolonged use of mari juana by people. Because--anyone who has been around this world much is well aware that millions of people use marijuana, thousands of them available for study who have regularly used it for twenty years or more, in various parts of the world. Whole tribes and towns full of people who smoke marijuana regularly are well aware of every effect the use of marijuana, or hashish, can have on the human body or mind. Their doctors are quite familiar with the subject. Their medical and psychological findings are extensive.

ITEM: Our hospital removes tatoos from inmates who want them removed, through a system called salabrasion. That's what those bandaged arms around the yard are all about.

ITEM: My grandmother had a 22 inch arm. She got it by lifting a dumbell every day..........me!

ON MONDAY JUNE 28 TH THERE WILL BE A CORRECTIONAL COUNSELOR AVAILABLE WITHIN THE INSTITUTION DURING THE EVENING.PLEASE BE REMINDED THAT YOU ARE ASSIGNED TO THE COUNSELORS ACCORDING TO THE LAST DIGIT IN YOUR INSTITUTIONAL NUMBER.

FOR THE WEEK OF JUNE 28TH THRU JULY $2 N D$ THE SCHEDULE WILL BE AS FOLLOWS:

| MON。 | MR. TUTTHILL | 7 \& 8 |
| :--- | :--- | :--- |
| TUES. | MR. SMITH | 3 \& 4 |
| WED. | MR. O'MEARA | 9 \& 0 |
| THUR. MR. BILLS | 5 \& 6 |  |
| FRI. | MR. REARDON | 1 \& 2 |

PLEASE CONTACT YOUR COUNSELOR BY RECUEST FOR AN EVENING APPOINTMENT. REMEMBER THEIR TIME IS VALUABLE AND IT SHOULD NOT BE WASTED ON MATTERS THAT CAN BE HANDLED DURING THE REGULAR WORK DAY HOURS.

THANK YOU

## COMMISSARY CLOSING!

Commissary will be open all day on Monday, June 28, for the sale of cards, TV's, radios, catalog orders, etc., but will be closed the balance of the week to allow the taking of a complete hearend inventory, and due to the holiday on July 5 th.

Commissary will open on Wednesday, July 7, for over the counter sales.
B. W. Deane

Business Manager
La Comisaria estara abierta todo el dia Lunes 28 de Junio, para la venta de postales, TV's, radios, ordenes de catalogos, etc., pero estara cerrada por $\in 1$ resto de la semana para que se pueda coger un inventorio completo de fin de año, y por el dia de fiesta de el 5 de Julio.

La Comisaria estara abierta $\in 1$ Miercoles 7 de Julio, para ventas regulares.
B. W. Deane

Business Manager

Any inmate wishing to use the shotput to get ready for the upcoming 4th of July and Labor Day throws may do so during recreation in the bigyard on Tuesdays, to get in shape.

I walked into my daughters room the other night and said, "What about the prayers?" She said, "I'm saying them." I said, "। don't hear you.' She said, "I'mnot talking to you."

THE
"ENCOUNTERS"
BRING A MESSAGE IN SONG
TO CCIS INMATES
Mr. Joe Haag, Director, and a group of young men and women who call themselves the "Encounters", provided an outstanding service in the Protestant Chapel last Sunday. The group, which now consists of around 30 members, was organized about two years ago and is made up of young Christians from various churches around the East Hartland, Conn. area.

Mr. Haag began the program with a brief message to the congregation and stated that the group was here, not to entertain, but to bring the Lord's message in song. And sing they did! To a silent, inspired, respectful audience. Few groups indeed, can boast of a completely satisfied and captivated audience as were seated in the chapel Sunday morning.

Miss Dianne Skelly, pianist, and Mr. Bob Ramey on drums, along with a bass and lead guitar, provided the accompaniment to a choir of 6 men and 6 women.

During the service, individuals of the group gave testimony to their own personal 'encounter' with the Lord.

One of the highlights of the program was the groups special arrangement of "This Little Light of Mine."

Pastor F. D. Cullen closed the service with a "Call to Salvation" and the Benediction.

I spoke briefly with Mr. Haag after the service and he expressed a desire to bring the group back for an evening performance whenever it can be arranged. will begin working on this immediately!

John McCauley

If you're honest with your children and don't try to put on airs; If you share in all their interests - all their happiness and cares;

If you shelter without guarding, If you guide instead of lead; Encourage without nagging, show your love in thoughts and deed;

Since 1925 we have witnessed the development of Modern Penology, an attempt to replace the old prison discipline with programs of rehabilitation, social work and smug satisfaction, pious platltudes and programs, actually a period of conflict and confusion. The result is that we again have what Samuel L. Parsons, the Quaker superintendent of prisons for Virginia, described in 1826 as a sickly and mistáken administration of the American penitentiary system.

It can be stated conservatively that over half of the major prisons and reformatories in the United States are just sweet jails, institutions where prisoners dawde at their work, engage in a variety of desultory social andeducational activities, receive good medical care, and live under so-called programs of treatment which have little or no relation to the particular criminal problem of any one of them. This is called bird-shot penology. We fill the old blunderbuss full of a little work, a modicum of education, a bit of religion, some medical care if necessary, a good deal of recreation, radios, televisions, baseball, bands, and what not and call it rehabilitation. This is better than what passes for treatment in a minority of our prisons where machine-gun penology still prevails, even if the old prison discipline no longer is acknowledged, but it is not good prison discipline.

The difficulty today is that we do not know specifically for what we stand in structure, in personnel, in method, or even in our basic concepts. What is needed is not a re-statement of fundamental principles, most of which are as applicable now as they were 100 years ago, but rather a formulation of precise, operational, down to earth concept by which we can guide the course of 20th century corrections. At least it may give us a starting point toward a new discipline.

by: 1. Michael Calles
Some concepts of discipline, as we see prisoners going to prison, is punishment and it is not for punishment. The purpose of imprisonment is to keep prisoners in security, to reduce criminality through problem solving and to adjust prisoners through acculturation of the society to which they will return. These three words, security, problem-solving, acculturation, opens the doors to the new discipline.

Security must be assured and then assumed. This security becomes the primary, but not the ultimate aim of penology. Treatment should begin with restitution to the victimwhenever and so far as possible. In the reduction of criminality, problemsolving must preceed programming, and programming should be geared to the significant problems affecting criminality in each case. All else is secondary, since the crime committed is only one symptom of a basic maladjustment. Treatment for the reduction of criminality should deal with one or more major areas of maladjustment, mainly the situational, the medical, the psychological or psychiatric, the antisocial or ethical, and the elementary custodial needs of shelter, food, clothing, and well being.

Programs of work, education, medical care, religion, recreation, familywelfare geared to solving significant problems of criminality, should also be deslgned to adjust the offenders to the society to which he will return. Such a concept will revolutionize the structure and the methods of treatment in prisons as well as the personnel. We should stop erecting massive, medieval, monestic, monolithic, monkey-cage, magnificent monstrosities as prisons.

We should adopt small group, community type layouts which resemble as nearly as possible, normal living in an American community, and we should develop halfway (cont'd on page 16)

## SPORTS

IRO JANS BOMB MILTON BRADLEY 9-4:
June 14, 1971 - The Trojans had another good game tonight, even though both pitchers were off. This game wasn't as good as the last one these two teams played, but the result was the same; the Trojans came out the winners by a score of 9-4.

Midora (P) wasn't as sharp as he was the last time he was here when he and Reed had that greatpitching duel and the Trojans got him early for 3 hits and 5 runs in the very first inning.

Santos started things off for the Trojans with a single. Shannon followed with a bunt single and with no outs and two men on base, Tinsley was the next batter and he mode a long out to right field. C. Dowdy (Tho Big D) stepped up to the plate and hit a bomb to center field for a double, driving in the first two runs of the game. Chase reached first on a walk, Zajac was next and he hit one right back of the pitcher, who made a throwing error allowing Dowdy and Chase to score, and Zajac was safe at second. J. Leighton came up next and reached first on another error, this one by the SS, and Zajac scored from second. Keith hit a fly ball to short left field for the sect ond out and Reed struck out for the last out of the inning, and at the end of one it was the Trojans ahead 5-zip.

Milton Bradley came right back at the Trojans and picked up 3 runs in the top of the second inning on one hit and an error. Amanta (SS) got things rolling for his team by getting on first with a walk. Cobb (C) followed and got hit by a pitched ball; Pelogin (CF) was next and he reached first on a walk and with the bases loaded and no outs, the Trojans seemed to be in a bit of trouble. Hayes (|st) hit a single, driving in Amanta and on the same play the Milton Bradley players seemed to get their signals crossed as they endedup with two men on the same base. Tinsley wisely stopped the man trying to score, and with one out Midora $(P)$ hit a long fly ball to center field, and Shannon and Keith collided, and the boll went by both of them. Two more runs
came in and at the end of two the Trojans were ahead $5-3$. Things were quiet until the 5th inning. Midor.a got robbed of a base hit when J. Leighton made a pretty play at 3rd going into the hole and taking away a sure base hit from Midora. In the botton of the 5th the Trojans came up with another run. Dowdy got his second hit of the night and Chase followed and laid down one of the prettiest bunts you ever want to see. Zajac was next and he Tinsley got picked off on 3rd. J. Leighton got a single driving in Dowdy and at the end of 5 it was the Trojans 6, Milton Bradley 3. Leclois (2nd) hit a home run for M.B. for their last run of the gam. The Trojans got 3 more runs in the 6 th when B. Shannon gothis second hit of the night, this one a home run with two men on base and the final score: Trojans 9, Milton Bradley 4.

IROJANS OUT HIT COMBUSTION AND HOLD ON IO WIN 3-1:
June 16, 1971 - The Trojans out hit Combustion tonight getting two more hits and two more runs. This was another fine game on the part of the Trojans and I'd like to take this time to congratulate B. Davis on a well pitched game. I didn't want to tell Davis during the game but up until the last inning he had a shutout going, which had he pulled it off, would have been a season first. But Combustion's Fairly (RF) got to first on a throwing error by Chase (3rd), Jary (LF) was the next batter and Davis walked him and with two on, Reiver (SS) hit a single driving in Fairly, thus robbing Davis of his shut out.

Combustion came to bat first and Davis got the side out in order. The first two batters for the Trojans struck our and B. Shannon hit a hard shot to left field for a double. Tinsley made the last out groundingout to the short-stop. Davis came out from under a tough inning in the second and $\mathrm{didn}^{1}+$ allow Combustion to score until the 7th inning. In the second, the first batter for Combustion struck out and the next two hit singles,
grounded out to the pitcher and Davis walked the next hitter. So, with the bases loaded and two outs, the Trojans seemed to be in a little trouble, and I think the only thing that saved the Trojans was that the next hitter for combustion was the pitcher. Davis got him to ground out to second for the last out. Neither team was able to do anything un$+i l$ the third inning and the Trojans managed to pick up the first two runs of the game. Zajac was the second batter up (Davis had popped up to the short-stop) and reached first on a hot-shot right at the short stop. Saritos foll owed and got on on a fielders choice as Zajac was picked off trying to reach second. B. Shannon came up with his second hit of the night getting on with a single, pushing Santos to second and with two outs and two on. Tinsely hit a triple to deep center field (for anyone else this would have been a sure home- -run, but Tinsley's not the fastest runner on the Trojans) driving in both Santos and Shannon. D. Chase flyed out to left field for the last out.

In the 4th inning the Big D (Dowdy) hit his second home-run of the season with a blast to center field and this was to be the last run of the game for the Trojans, because Maloney (P) really tightened up after that home-run by the Big D and didn't allow another Trojan to reach first base for the rest of the game.

This game was the first time the Trojans were able to execute their doubleplay and they pulled it off pretty nice if I must say so muself. Here's how it went. It was one out and a runner on second and third. Young (2nd) came to bat and hit one right at Tinsley who tagged him out on the run and then fired the ball down to Red O'Neill for the third and final out of the game, and once again it was the Trojans 3 and Combustion 1.

MA MANNING SHUT TROJANS OUT 8-ZIP: June 18, 1971 - The Trojans were beaten tonight in one of their worst games of the season, as they couldn't seem to do anything right. This was one of those games where the Trojans should have stayed in the locker room. It wasn't so much that Ma Manning beat the Trojans, it was how they did it, because Ma Manning only got one more hit than the Trojans. The Trojans got beat on the field where they made 7 key errors. This game started out like it was going to be another good one between these two teams, but the Trojans started falling apart in the last innings.

Ma Manning picked up their first two runs in the 4 th inning. O'Neill (CF) was the first batter up for Ma Manning in the bottom of the 4th inning and he got a walk. Then he tried to steal second and Santos made a perfect throw down to second but Woods (SS) dropped the ball for his second error of the game. The next hitter was Hutamaki (C), he got on with (cont'd on page 18)

## "ORDER IN THE COURT"

After New York's Mayor, John Lindsay urged a general shape-up in the city's courts last fall, criminal judge lrving Lang decided to set an example by opening his court at the relatively early hour of 9:30 A.M. When he climbed to the bench, there was nobody in the court but a few minor clerks, so he retired to his chambers. At 9:45 A.M. he re-appeared; there was still no one in the court.

He returned at 10: 10:15; 10:30, and $10: 45$. Finally lang re-emerged and said:
"Let the record show that 1 took the bench at 9:30. It is now 10:50 and there is no legal aid, no private coun'sel, no prosecuter, no police, no defendants."

Then the judge looked down..... there was no court stenographer either!

Just finishedreading Krist vs Smith, a very unique and different petition brought to the court by a Georgia state prisoner. Everyone probably remembers the well publicized trial of Gary Stevens Krist, the lad who abducted Miss Barbara Jane Mackle for ransom and buried her alive for eighty hours in a wooden boxequipped with such amenities of living as an air pump, a battery powered light and some food and water. It seems the Georgia State Prison authorities have now "buried" Steven alive as he complains to the court "his cell is a $9 \times 5$ concrete garbage can. There is no window in his cell at Reidsville Jail and he cannot look, even with a 'wistful eye' at that little tent of blue which prisoners call the sky." A gregarious person, or so he characterizes himself to the court, "the only cellmates he has are roaches." Anyone here for transfer to Georgia?

Throughout the history of the Conn. Prison Association, the group's achlevements have effected this state's court system as follows: In 1901 it helped establish the indeterminate sentence; in 1903 it drew up the state's probation officers for the state; in 1921 it helped culminate efforts to separate juvenile probation work fromadult probation work; and in 1965 the association helped promote the establishment of the first half-
way house in this state. On behalf of the entire inmate population I would now ask the Connecticut Prison Association to help amend the recent bill which provides 120 days sentence reduction to inmates who have shown outstanding meritorious performance. Instead of the award being presented to only $5 \%$ of the inmates, the bill should read "To (all) the inmates who can perform the requirements."

A childwho thinks he or she is "cute" is a brat. No woman is beautiful if she is conscious of being beautiful. He who is conscious of his superiority is already a bore. A man who knows he is learned, has more knowledge in his head than he has digested. He wears learning like a man might wear a two-pants suit; its excess shows. The difference between intellectuals and the intelligentsia is this; the intelligentsia are always out of touch with the common man, the intellectuals are not. The intelligentsia, seek to impress, the intellectuals seek to help. It seems to me that becoming unconscious of any good quality we possess is the condition of keeping that quality and making it effective with others.

Learning that has not become part of oneself, is like a woman walking the streets at noon in evening clothes. Poor men who seek to convince others that they are rich, must put on the trappings of luxury. The rich man, however, need not do so. I never cease to be amazed at apparent need of man to impress those who are in the same position as themselves. I can't help but think that if they spent as much time and energy as they do trying to convince us of their "superior ity" on actually trying to obtain this superiority, they couldn't help but to acheive it. All men have, on one occasion or another, the tendency to stretch the truth a wee bit in their favor. Unfortunately, some stretch it to the breaking point.

Bill Reid

## A TIME TO ACT (cont'd)

houses and residential centers for offenders who can live and work satisfactorily under careful supervision in the community.

Treatment through problem-solving and acculturation must proceed whether or not causation can be established or dealt with. While it is helpful to know and understand causation, it is not necessary for treatment. However, causation could be explored as far as possible in environmental, physical, psychological, and characterological areas.

The function of the prison could be limited to safe keeping, observation, diagnosis, planning, and training or treatment. Rehabilitation or readjustment could be conducted in the normal community under normal conditions with all the attendant problems, influences, and responsibilities. This will inevitable lead to the following basic concept:

The establishment between the prison and parole of a programof partial or semirelease could function similar to the work release program now in vogue in more than 18 states. This alone, could reduce the present population of American prisons by perhaps 50 percent, remove the necessity for great expansion in prison buildings, help solve the prison labor problem, reduce the cost of keeping prisoners bymillions of dollars, and insure realistic proof of satisfactory adjustment to community $l l f e$, this insuring a satisfactory parole program.

## NATIONAL PRISON TRACK \& FIEL MEET

This institution will participate in the national Prison Track \& Field Meet which is to be held before Labor Day.

There will be eight events:

| 100 | YARD DASH | HIGH JUMP |
| :--- | :--- | :--- |
| 220 | YARD DASH | BROAD JUMP |
| 440 YARD DASH | SHOT PUT |  |
| 880 | YARD DASH | MILE RUN |

These events will be held on the th of July and will be considered as eliminations for the Labor Day Meet.

Trophies will be awarded to the winners of the National Meet.

Those interested must enter these events on July 4 th, per request.

## SPORTS - cont'd

a single driving in $0^{\prime} N e l l l$. Reed struck the next batter out. Best (1st) was next and he reached first on a throwing error by Chase (3rd). Figuraro (2nd) popped up to Santos for the second out and Burgett (3rd) hit a single driving in Hutamaki. Best went to third on the play, then Burgett stole second the should have been out, but Santos' brain locked up on him). Reed got the pitcher to ground out for the last out of the inning and at the end of $4, ~ i t$ was Ma Manning 2 and Trojans zip. The closest the Trojans came to scoring was in the 5 th inning when Reed was on third and tried to steal home and the catcher tagged himout on a nice play.

Ma Manning picked up three more runs in the bottom of the 5th. Venette (SS) reached first on an error by Chase (3RD) then he stole second. Hutamaki (C) got on with a walk and Mosher (LF) hit a homerun to deep center field, driving the three runs in for that inning and at the end of 5 it was Ma Manning way out ahead 5-0. If, by this time, some of you are wondering why 1 haven't said too much about the Trojans, well, 1 don't feel that there is too much 1 cen say because they only had about three bright spots in the whole game. Santos got two singles back to back. Tinsley mit a long triple and Reed got put out trying to steal home. Reed struck out 7 of Ma Mannings hitters and the pitcher for Ma Manning struck out 9 of the Trojans. Mo Manning managed to pick up the last of their three runs in the bottom of the 6th. Burgett (3rd) got things going for Ma Manning in the 6th getting on with a double. The pitcher was the next batter and he hit one right down the line to Tinsley who made an error and the runners were safe all around. Venette (SS) also hit a double allowing Burgett to score and Rattelle (P) went to third, so with no outs and runners on second and third, Reed put Hadley (RF) on first. O'Neill was the next hitter and he hit a long ball to center field and both of the runners scored. Now this was the play that everyone was wondering if Reed hedn't cut the ball off, could the Big D (Dowdy) had gotten the second
runner out at home? Well, I asked the Big D about this after the game and he told me quite honestly that he didn't know and that it would have been a close call. But in my opinion 1 think that the Big D would have got the runner, but that is neither herenor there and the Trojans got smashed tonight in one of their sloppiets games of the season. And once again, the final score of the game was Ma Manning 8 and the Trojans ZIP.

| TROJANS: | $A B$ | $H$ | $R$ | RBI | ERS |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Santos (C) | 3 | 2 | 0 | 0 | 0 |
| Shannon (LF) | 3 | 0 | 0 | 0 | 0 |
| Dowdy (CF) | 3 | 1 | 0 | 0 | 0 |
| Tinsley (Ist) | 3 | 1 | 0 | 0 | 2 |
| Keith (RF) | 2 | 0 | 0 | 0 | 0 |
| Chase (3rd) | 3 | 0 | 0 | 0 | 2 |
