ISSUES A WRITTEN STATEMENT IN HER OWN DEFENSE.

#### Asks Public Press to Refrain from Printing Wicked and Unfounded Accusations-Blames the District Attorney for the Attacks Subsequent to His Cruel Slander Before Coroner's Jury,

New York, March 24.-Mrs. Blanche C. Molineux, wife of the man who is under indictment for the murder of Mrs. Catherine Adams, to-night sent out the following written statement: "Since the terrible tragedy culminating in the death of Mrs. Adams and throughout the inexpressibly painful scenes that have followed. I have felt it to be my duty to bear in silence the cruel attacks newspapers. I have made no answer to these attacks, nor have I made any effort to set myself right before the world, under the advice of the counsel for my husband, who has been subjected to an unfounded and infamouse charge, and whose interests are, of

course, next to my heart. "But the statements in the newspapers of to-day, charging me by implication with having visited a hotel in Jersey City with Mr. Barnet, are so grossly and atrociously false, that I feel, in justice to myself, my husband and my friends, that I must make some statement. I may say in beginning that the cruel slander uttered by the district attorney in his address to the coroner's jury, is, I believe, largely responsible for the subsequent attacks upon me. His official position gave his statements a weight that they did not de-serve. The public has been slow to believe that a sworn public officer, could without a shadow of proof, villify and slander the reputation of a woman. But this was done by the district attorney

and I have suffered in consequence. "On the occasion to which the district attorney referred in making his slanderous accusations against me, I was on a yachting trip chaperoned by my married sister, and the testimony before the coroner failed to show a single instance of impropriety or indiscretion on my part, as indeed there was no such instance. During the lifetime of my parents I lived with them, as I testified before the coroner, and all my other places of residence were testified to by me. Much of the time I lived with my married sisters, and always visited them and was visited by them. There has never been any mystery about my life or movements, nor has there been anything in my life differ ent from that of any other self-respect-

ing woman.
"My acquaintance with Mr. Barnet was through the introduction of Mr. Molineux, and my associations with him were merely those of friendship. I was never in Jersey City in my life, except in passing through to take a train, At the time stated in the newspapers when Mr. Barnet first visited the ho tel, May, 1897, I had never met him. This slander is as baseless as the many others which have been published concerning me. In simple justice to myself, my family and my friends, I ask the public press to refrain from printing such wicked accusations, ers' union to-night ordered a strike of 'the slightest investigation would show

CHAPEL STREET FIRE.

Greasy Rags and Paper Tell the Story-Damage Slight.

The danger of filling a closet with rubbish of all kinds was clearly demonstrated last night and a serious fire was narrowly averted. The alarm of fire at 9:30 was caused by a blaze in a closet on the first floor of the building \$43 Chapel street, owned by W. R. Tyler. A closet on that floor under the stairway was filled to its capacity with old paper and rags, and they were of such a kind that the fire was undoubtedly caused by spontaneous combustion. Carpenters have been at work putting down a new floor in the hallway and considerable oil was used on the same. Rags were used to rub the oil into the boards and were then, it is supposed, carelessly thrown into the closet. At any rate, those first on the scene of the fire found s quantity of greasy rags there. fire department was called to the scene by an alarm from box 21, corner of Chapel and Orange streets. The firemen succeeded in quickly extinguishing flames and threw all the rubbish into the street. The fire was discovered by a number of young boys who have a \$17.59 against A. J. Winton for 34 per club room in the same building. The damage was slight.

IN AND ABOUT THE COURTS

LAWYERS WANT SUPERIOR COURT JURY RETAINED.

Many Cases Undisposed of- Judge Robinson Will be on the Bench-Libel Against Schooner Mary Adelaide Raudall Dismissed by Judge Townsend-Probate Court Matters-City Court

Lawyers who have jury cases ready for trial will make a special effort to have the jury retained in this county beyond next week.

Judge Robinson, who will be in the superior court next week, is averse to retaining the jury and wishes to have only court cases. Thirteen cases have been tried before the jury, which has been in session since January 1.

There are seventy-two cases on the jury docket undisposed of, but only about a third are ready for trial. The lawyers who have the cases ready for trial are very anxious to have their

cases disposed of. A petition signed by the lawyers who wish to have jury cases heard is to be presented to Judge Robinson, and he will be requested to retain the jury until the jury business is disposed of.

PRINCIPAL CAMP RESIGNS. Will Engage in the Publishing Business.

I. L. Camp, who has been principal of the Dwight school ever since it was organized, handed in his resignation yesterday, to take effect at the close of the school year, June 30. He will enter into pa.rtnership with the publishing house of Potter & Putnam Co., Fifth avenue, New York. By the death of Mr. Putnam, a place in the company was offered to Principal Camp and after some consideration, he decided to accept. He will become vice president and treasurer of the company. He will commute for a time, thereby continuing

to reside in this city. Mr. Camp was educated in the public schools and at the state normal school, intending to enter college but went to teaching instead, locating at different times in New London, Norwalk and at the state normal school. He began teaching in this city in 1860 at Parlor, Chamber, Library, Dining Room and Kitchen going to the building which was then just completed. There were 400 pupils in the building at the time and at was the superintendent. The other superintendents under which Mr. Camp has served were Horace Day, the late

Three trust that I shall not be accused of unmonths ago Florence and his second gallantry if I allude to a very common form of nuisance for which our feminine passengers are responsible, especially in wet and muddy weather. This is the dirty skirt nuisance, so common and annoying in cars, whether electric or steam. A gentleman who prides himself on his clean and shining boots or shoes, on which he has taken great pains to make presentable previous to making his trip in the cars, soon finds them sadly disfigured after a short passage in a car, especially a crowded one, by the trailing over them by dirty skirts worn by women, often well dressed and otherwise cleanly appearing, but slovenly in the matter of long and sweeping garments of this objectionable style, which might be styled the scavenger pattern, as it persistently gathers the flith of street and sidewalk.

This is rather a delicate subject to discuss, yet it leads to much "cussing." in a quiet way, by annoyed gentlemen passengers, which could be avoided if all self-respecting ladies would exercise a little thoughtfulness and care.

THE SOUND'S GATE.

of the Good Turns the War Has Done Us.

The New York Herald says: The outer line of defense of Greater New York is now really completed. Plum, Gull and Fishers Islands, until now desolate, barren stretches of rock and sand, have been made a breastwork at the The failure of salves and ointments sound approach. The government, realizing at last their important strategical position, has protected the most vulnerable entrance upon the metrop-

olls, and the war department defies an enemy, no matter how well equipped, to pass through the fire which can be trained from these three narrow strips It is generally agreed in the military world that had the United States been

at war with England or with France instead of having Spain to contend with a fleet would have swept through the narrow passage at the eastern end of Connecticut and laid under contribution all points as far surely, as Throgg's New Haven and Brigeport, where are manufactured all manner of ornance, would have been rich prey.

New York and vicinity has plenty of defenses direct from the Sandy Hook system, which beginning at the Hook, draws down to the Narrows and includes Forts Wadsworth and Hamilton But with their protection is also threatened paralysis of commerce. A blockading squadron off the coast of lower Island, and reinforced in sound, might be able to quickly dictate terms. The project which the government is carrying out at the south New England shore will make impossible such a condition of affairs, it is contended. The Connecticut coast will be secure and sound traffic undisturbed, no matter how energetic and confident foe may arise.

The defense power of the arma-ment planted on the little chain of islands is now, with the work not entirely completed, one hundred times greater than the greater fortifications at Santiago, which withstood successfully for some time the onslaughts of the army and navy of this country. Already \$4,-

000,000 has been expended. Major Smith S. Leach, Corps of Engineers, United States army, is in active charge of the extensive operations, with headquarters in this city, and with the arrival of spring and milder weather is hurrying the work to early completion.

"A glance at the map will show one how natural is the line of the defense at the eastern end of Long Island sound," he said. "The distance from the Rhode Island to the Long Island shore is twenty-one miles. Scattered the entire length are bits of lands, varying in size from pretentious Fisher's Island to Valiant Rock, which shows nine feet of surface at high tide. Politically all the ground is claimed by New York state. We found eleven miles of solid ground on which to place works. Fisher's Island rises out of the water six miles from the mouth of the Thames river. Four and a half miles distant Gull Island appears. Plum Island is but two miles further on, and then, a mile away, reaches out the sharp end of Long Island.

"There are four channels which we plan to sweep with Uncle Sam's guns. Plum Gut, the passage between Plum and Gull Islands, and the span of water which separates Fisher's Island from Watch Hill would probably not answer the purpose of a hostile visitor. The Race, a swift moving current between Fisher's and Gull Islands, would likely be an adversary's choice for a move ment into the sound. I feel positive that no foreign vessel could ever make the journey in time of war. The chanreach a velocity as high as seven knots an hour. Navigation for war vessels in the passage is often precarious with nothing worse than the elements to en-Maneouvering is extremely difficult. Nature has made the place ersy of defense."

NEW YORK STATION.

gin Shortly. Work on the new waiting room the Grand Central station at New York will be begun with the first advent of summer. The plans for the construction of the new depot are of the most costly kind and when the work is finished New York will have a station that will be equalled by none in the country.

The property of the New York sta-tion is owned by the New York Central road, although the New Haven road has its terminus in the same building The consent of the board of directors of the latter road was therefore necessary for the improvements on the station and this permission was granted a few days ago. When the work of altering the Grand Central station was begun it was believed that one large and handsome waiting room would be made out of the rooms now occupied by the New Haven road and the New York Central. There was a hitch over the cost and the plans for a new waiting room went over, although the work on the remainder of the building was con-This hitch has now been set tinued. right and the work will be commenced with the first of the summer.

#### UNION VETERANS' UNION. Entertainment by General Terry Command.

An excellent entertainment was given to a large and appreciative audience at Veterans' hall last Thursday evening, under the direction of the Townsend popular entertainment company. The programme was thoroughly enjoyed, and much praise is due Chairman Thomas Hayward and his committee for the success of the entertainment. Among the entertainers, Miss Adelina Saunders, the elocutionist, and Miss Minnle K. Guyer, the little song artist, deserve especial mention. John T. Godette made a hit in the rendition of his songs, while Edward N. Parkus was very satisfactory in his work as an accompanist. George T. DeBaptiste was very entertaining in his musical specialties in cornet, xylophone, and other musical instruments. The company is a good one. The command will muster in two recruits and two honorary members at its next meeting on Thursday evening, March 30, Announcement is made of the grand sacred concert and patriotic entertainment to be given by the command on Sunday evening, April 16, at the Hyperion. One of the patriotic features of the programme will be the interesting descriptive war lecture by Henry C. Browne, the eloquent young orator, late of Co. N. 2d Massachusetts, U. S. V.

PROBABLY A RAINY SUNDAY. At the local weather bureau it was stated last night that to-day would probably be pleasant, this forenoon at least, while this afternoon it might be cloudy. A higher temperature is expected to-day and a cloudy and stormy day is booked for to-morrow.

KELLAR, THE GREAT MAGICIAN, = Delights a Large Audience at the Hyperton.

"Kellar," the great magician, delighted a large audience last evening with his experiments of slight of hand, and his astonishing illusions. There is no one who is before the public in this line of work who can surpass Mr. Kellar, and this season he has a number of new and very clever tricks. He opens his most interesting extertainment with a number of clever tricks of slight of hand, all of them being novel and unique. During the evening he introduced seven new Illusions, each of which occupy the entire stage. In growing plants from the seed he uses no covers or coverings. The illusion is perfect. He also caused an orange tree to grow, and also from out of two empty pots he brings elegant cut flowers, and to each lady he presents a beautiful rose. Another interesting feature was the marvelous clock which answered questions beaing on the past, present and future.. The Simla seance and Fly-to, or the Princess of Karnak, were simply wonderful. He will appear again this afternoon and evening. At the matinee to-day, which is given especially for ladies and children, every lady will be presented with a beautiful The prices at the matinee will be 25c and 50c only. The perform ance which Kellar gives is a most interesting one, and judging from the sale of tickets very large audiences will be present.

THE CRESCENT ANNUAL.

Year Book of Hillhouse High School : Splendid Volume This Year.

The year book of the Hillhouse High chool, the "Crescent Annual," is just out, and although a little later in its forth-coming this year than in previous years, has evidently suffered nothing by the delay. Indeed a glance through its pages show it to be by far the most complete and best edited volume produced thus far. It is bound in handsome red-colored cloth, with lettering on the cover in gold.

It contains besides the regular full page half tone cuts of the "Crescent's" boards, those of the hockey team, the chorus club, the dramatic club, the principal of the school, along with an excellent one of Superintendent Kendall. Its reading matter has been compiled with unusual care and in this respect it is far in advance of its pre-

Its editors are John W. Armstrong '99, Arthur C. Beers 1900, Walter R. Cowles 1900, and William R. Ely 1900 The edition is limited, but the remaining copies after the pupils of the school are supplied will be on sale at Judd's book store.

#### THE SHORE LINE BLOCKED By Freight Wreck at Tin Bridge Yesterdry Morning.

A freight wreck which occurred at Tin bridge yesterday morning blocked traffic on the Shore line for four hours. In the train were three flat cars loaded with der in "Oscar's Birthday," a very good bridge iron. The first of these three cars left the tracks just after going under the Hamilton street bridge and the tracks soon after. At the junction of Bartell a the Belle dock tracks with the main Donnar. line one of the cars turned over on one side and the train was stopped just in time to prevent the bridge iron bumping into the signal tower near Tin bridge. The wreck occurred shortly hethe tracks were cleared soon after 7

OLD ANTHONY HAD NO MONEY. Search of His Hovel Showed the Sandwich Sign Man Was Not a Miser.

It was generally believed by the Koppe, the comical club swinger. neighbors of Anthony Wright, the colorh-sign man, who died a few days ago, that he had hoarded away a afternoon and evening, with a ten-cent considerable sum of money, but a search of his late home made vesterday by Clerk Rowe of the office of the superintendent of charities and correction revealed nothing of any value. Old Anthony was for many years a familiar figure on Chapel street and other business streets in the central part of the He was a tall, gaunt colored man, more than six feet in height, and as he walked up and down the street with two sign-boards, one in front of him and one at his back, hanging from his appearance. He always wore a battered old stovepipe hat, which added to his tall appearance. Towering head and shoulders above the crowd, moving slowly along, he was always gazed at curiously by thousands on the crowded

In some way the people who knew Anthony had got the idea that he was somewhat of a miser and had a living quarters on Fair street. made a thorough search vesterday and found nothing but some old rickety furniture and a battered trunk in which was a package of letters written by his son and two of his brothers, who are railroad men in Georgia. The old man had at one time a small sum of money in a local savings bank, but he frew it all out about three years ago. He will be buried at public expense uness his relatives in Georgia arrange otherwise.

THE MILITARY TOURNAMENT. New York, March 24.-Madison Square Garden was taxed to its utmost capacity o-night, the fifth ninght of the military athletic carnival, by the crowd that gathered to witness the athletic tests and the military drills, but the event that probably attracted more visiters than else was the presence of Governor Roosevelt.

The governor was met by Colonel Luscombe, commandant of the troops in the garden, and escorted to the reviewing box. The governor reviewed a brigade made up of detachments of regulars and militiamen. The athletic contests resulted as follows:

220 yard hurdle, military championship -Won by P. J. Corley, Twenty-second regiment; second, F. C. Puffer, Twentysecond regiment. Time, 30 1-5 s. One mile run, military championship

Won by W. F. McLaughlin, Twentysecond regiment; second, T. McGirr Twenty-second regiment, Time, 4:54 Sack race, fifty yards-Won by F. A. Onderdonk, Twenty-second regiment:

second, R. Hutcheson, Twenty-secondregiment. Time, 8 1-5 s. Preliminary heats in a number other events were contested

> ENTERTAINMENTS. Hyperion Theater.

Charles Frohman presents Miss Annie Russell and her splendid company at the Hyperion theater next Wednesday night in "Catherine." The engagement is for one night, and the play will be given by Miss Russell and the same remarkable cast that carried it to triumph in New York for exactly 100 nights at the Garrick theater. Miss Russell in the title role exhibits all the daintiness and delicate quality of work for which her acting has been famous since the days of "Esmeralda" and "Elaine." The character is a tenderly sympathetic one, and she plays it with the sweetest and most winsome expression possible. The play is not a one part drama by any means, all the members of the company having strong opportunities to do good work and each of them taking full advantage of the opportunity. When presented down town at the Garrick theater the critics declared that the performance was perfect at every point, and that no more finished representation of the play could have been given at the Comedie Francalse or elsewhere. In the cast are Elsie DeWolfe, Sarah Cowell-Le Moyne, Clara Bloodgood Ellen Gail, Milli-James, Clara Hunter, Beatrice Maltman, Frank Worthing, Vincent Serrano, W. J. LeMoyne, J. G. Saville, Robert Hickman, Francis Sedgwick, Mor-'Radiator" board and the teachers and gan Thorpe and others. Sale of seats opens Monday. Prices \$1.50, \$1, 75c.

THE CUCKOO At the Hyperion on Good Friday, March 31, and Saturday, April 1, "The Cuckoo" will be presented by Charles rohman's company headed by Joseph Holland and Amelia Bingham. This comedy farce is now running with great success in London.

A veritable treat for lovers of good music will be the matinee recital to be given at the Hyperion on Monday aftermoon, April 3, by the famous pianist, Rafael Joseffy.

A manufacturing concern in western Pennsylvania is now prepared to make wave o'er him and his jacket to gleam glass pipes for water, gas, oil, or sewage. The effort to prepare glass properly for this purpose has been a long continued one, as its advantages are very great, it being non-corrosive and entirely uneffected by electrolysis from which pipes in cities now suffer greatly. A line of glass pipes one hundred miles long is being put down for oil in Ohio, and this will give a practical demonstration of its worth. These glass pipes are declared to be more durable and less likely to break than those made of

It appears that "spirits" can be too previous as well as human beings. The "news" of General Sherman's death reached Washington in the afternoon, and the correction did not arrive until balf past 8, when many people were housed for the evening. At a spiritualfstic meeting in a private house there that evening the "spirit" of John Sherman signified its presence, and, on being welcomed, proceeded to deliver a message on a slate and the handwriting was easily recognized as Sherman's. He announced a change of views as to the sestion but had not grown an warmer in his devotion to the leading elements in Ohio politics.

A writer in the Politische Correspondenz of Vienna, denying current reports about the Czar's health, says: The Emperor Nicholas is one of the most assiduous workers of the Russian rulers of this century, comparable in this respect only with his great-grandfather, Nicholas I., and his father, Alexander III. He is, indeed, the most laborious and exact functionary of his empire, and devotes the better part of the day to state affairs and representative duties. It is a common saying at the Russian court that the Czar takes the Emperor Francis Joseph as his model, a fact which implies the perfection of the sense of duty.

According to the Textile World, the khaki which is to be used largely in the United States army and navy is a cotton cloth made, or, rather, finished, by a secret process. Large contracts have been given to a New York firm for its production for use in making field uniform coats and trousers. There is no difficulty in the fabrication of the cloth on the loom, the important feature of its manufacture being in the finishing, which is designed to make it more or less waterproof. The New York firm engaged in the production restricts itself to the secret process of finishing. obtaining the fabric from different

The latest in the way of arrests for insults to German officials of standing has just been decided in court. During a public meeting at Dedensen a speaker remarked that the "schoolmaster of the voting district" appeared to be much interested in the compromising candi dacy of the national liberal party. Teacher Woehler, who was present, reported that he had been insulted \$20 worth, and the court granted him that amount of damages. When taken to the higher court in Hanover the report of the lower court was sustained, for the reason that the word "schoolmaster" without any additional words was to be considered an insult when spoken in public, as it certainly injured the feelings of a teacher, who was accustomed to be characterized, not as "Schulmeister," but as "der Herr Lehrer."

It is the opinion of Dr. Henry M. Wetherill of Philadelphia, an expert on insanity and a member of the Pennsylania Board of Charities, that insanity is on the decrease. Although the hospitals for the insane in Pennsylvania ire overcrowded, the increrase in the number of insane patients last year was less by some hundreds than it was for the year previous. This improvement is ascribed by Dr. Wetherill to a change in the habits of the American people. "In ancient times," he says, insanity was practically unknown except as the result of epilepsy or bodily injury; for instance, a fracture of the skull. This was because the ancients lived a simple life and did not have o worry much about their bread and butter. In our days overwork and the excitement and high pressure of modern life are the main cause of insanity. But that a great improvement over these conditions is taking pitce nobody can deny. The Americans seem at last to have come to their senses. They rado, has enough to do. She has juris- are beginning to be reasonable in work and play alike. Good luck to the wily old chap. He has had as many ups and downs as an old-fashioned churn, and he has managed to save a head which is well worth saving. We hope he will return that for every day that a room cannot to power and not be soon upon the point of going out of power. #### A MISSOURI NOTION.

How to deal with the lynching problem is a question which is disturbing several States of this Union. The plan which has found favor with the Missouri legislature provides that when a sheriff or other officer has in custody a prisoner whose life is threatened by a mob, and the officer becomes convinced that he cannot successfully defend the prisoner, it shall be his duty to give the man a thirty-eight-calibre revolver and fifty rounds of ammunition and tell him that it is his right under the law to de fend himself, the officer affording him every opportunity to do so. Any officer falling to take such action under the circumstances described shall be punished by a fine and a forfeiture of his office. The ground taken by the advocates of this law is that every citizen's right to defend his life is sacred until after due process of law he has been found guilty of a capital offense, and even then he has a right to defend his life against every attack except by the

Of course such a law is a confession of weakness in the government and an indication of a bad and dangerous state of public opinion, though it has the merit of giving a man some show against those who would murder him. But could such a law be enforced in States where lynching is popular? Would officers obey such a law any better than they do the laws which in many cases have not had any effect in inducing them to try to protect those threatened with lynching?

TROUBLED OR ANGE-GROWERS.

They have had some weather in the South as well as in the North this winter, and the orange growers of Florida are somewhat discouraged. They look backward on an unprofitable past and forward to a doubtful future, if they stay in the business. So twisted are they that they have even appealed to the Weather bureau for information concerning what is likely to happen. Having experienced three disastrous freezes within a little over four years. they wanted to know if they had entered upon a cycle of years during which frost might be expected in Florida, or if a change in the character of the winters had been developed. To this Chief Moore correctly answered that the ability of the Weather bureau to forecast did not extend beyond twenty-four to thirty-six hours. There is no evidence, he said, that the climate is perceptibly changing, or that there is any system of compensation or a gradual progression from one extreme to the other. Periods of extreme cold weather are not a new feature in the South, the chief adds. The most severe frost recorded in Florida occurred in 1835. Thereafter the State enjoyed an immunity from freezing temperature for fifty-one years, and it was during the latter years of this period that the orange industry grew to large dimensions. Since then frost has injured the citrus fruits at least five times. The chief concludes with the advice to the growers to remain on the ground, to make the best of the situation by diversified farming, and not to concentrate efforts on orange-growing, which may

result in total failure. This might be called sensible advice but possibly it will be steadily warm again if orange growers give up.

NEWFOUNDLAND'S BLUNDER.

No wonder the people of Newfoundland are sick of their one-sided bargain with Contractor Reid. They were certainly good to Mr. Reid. He was the contractor who built the Transinsular railroad. He agreed with the government to operate the whole railroad of 650 miles, at his own expense for a term of fifty years, as from 1893, paying \$1 .-000,000 cash to the government and receiving a subsidy from the government of 2,500 acres of land per mile. At the end of the term of fifty years, and on the payment of a further \$6,000,000, the railroad was to become his own property. He also agreed to purchase St. John's dock and the government telegraph system for a cash payment of \$500,000, undertaking to improve the dock, to cheapen the rates of the telegraph system and to build eight mail steamers for the coast service, receiving a subsidy of \$100,000 for thirty years on this account. The land granted to him included large coal areas, which he bound himself to work, mining not less than 50,000 tons a year and paying to the government a royalty of ten cents a ton; also pulp and lumber mills and copper and other minerals. The contract was approved by the Newfoundland legislature by large majorities in

The British colonial secretary refuses to help the colony out of its bargain by annulling the contract, and the prospect is that Mr. Reid will be able to hold on to one of the softest "snaps" that any man has ever had. Newfoundland ought to have applied for a conservator before she made the bargain.

## FASHION NOTES.

For a Swell Receiver. Applying lace ruffles to a princess gown in the manner indicated in the picture below makes less dangerous any possible deviation from exactness in its That means that a dressmaker whose charges are not the highest may be chosen for the task, but it also means the purchase or possession of the lace and there's a balance on the wrong side This dress was a beauty, and it should be a pleasure to receive in it. Of delft blue grenadine interlined with cerise silk, the lace ruffles were delicately

broidered white chiffon. Collar and bow-knot trimming of cerise silk, and grenadine elbow sleeves were other de-

tails. Here is a trick that simplifies a difficuity of hairdressing. It is in that porthe ears. All the hair that is to be used for the puffing about head and face should be a length shorter than that used for the coll. Take the long hair and arrange it either at the top of the head or half way down the back, and leave all the puff hair hanging. The latter should be separated from the coll locks by a part that runs around the head, outlining the section where the long hair grows in the shape of a ton-

sured crown. If you still incline to the central part make that and gather together all the puff hair at the back under the coil. Draw it all evenly, so that there is continuous puff all around the head. Next roll the ends under and secure the op by a back comb just under the coll. If you want the all-around pompadour then it is necessary to separate from the rest of the front hair just the central portion and puff that back, turn ing under the ends and securing them, either under the top of the coil or by a pompadour comb. Then draw back the rest, being careful that no parting shows at the sides of central or forehead puff. The glossy puff is preferred to the curly or fluffy one, and the nat ural wave produced by binding the hair at night with tapes is considered the FLORETTE.

JAMES P. EARLE, Chapel and Church Sts

AN EXTRA SYMPHONY CONCERT. Two Excellent Soloists and a Varied Progrgmme. The announcement of an extra even-

ing concert by the New Haven Symphony orchestra on the evening of April 17 at the Hyperion has been received with general satisfaction. The season of concerts has been very successful. The orchestra has made great strides during the winter and the attendance at the concerts has been larger than ever before. The out of town soloists have proved an interesting feature and Prof. Parker has given the public programmes which could not fail to attract. The last two concerts have been especially good, and it was with a decided feeling of regret that the holders of subscription tickets gave up their coupons yesterday. The decision of the management to give an evening con-cert is a wise stroke. There is no doubt that the concert will be well attended, and it is equally sure that the men deserve as large a dividend as possible and while the regular season has proved profitable the individual profits will be small. These men always sacrifice something in attending to their orchestra duties, and they ought at least to lose nothing through their devotion.

The programme for this extra con-

cert is the best Prof. Parker has ever given us. The most interesting event will be the performance of a new work just completed. It is very generous of Prof. Parker to give it to the local or-chestra for its initial hearing, when any of the large orchestras would eagerly grasp the opportunity. The rendition of this work alone would be enough to draw out a large audience of Prof. Parker's friends.

Next in interest is the engagement of that charming planist, Madame Antoinette Szumowska as soloist. As Paderewski's only pupil her appearance here several years ago with Plunkett Greene and Emil Gauret, excited very general curiosity. Curiosity turned to admiration when she was heard, and Madame Szumowska has a host of friends here in town. On this occasion she will play Schumann's lovely concerto and a group of solos. Madame Szumowska's husband, Joseph Adamowski, is the other soloist. He is a member of the Boston symphony orchestra and of the Adamowski quartet, which has played here twice this win-ter. Mr. Adamowski will play a 'brand new" work, a concerto for 'cello and orchestra by Boellman, the Parisian organist, and composer. He will also play a group of solos. The programme will conclude with the overture to

SHORT REGULAR MEETING HELD LAST NIGHT.

Residents in Vicinity of Eaton School Protest Against Use of Grounds for Summer Play Yard-Kinney Bequest Cannot be Accepted-Superintendent

A regular meeting of the board of education was held last night. Attorney J. Birney Tuttle was before the board, as a representative of a majority of the residents in the vicinity of Eaton school, to protest against the use of the playgrounds of the school this summer the same as they were last summer. was said that the noise made by the children during their play hours was very annoying to those who live in the vicinity. On motion the matter was referred to the committee on buildings.

A communication was received from the Mary Clap Wooster chapter, Daughters of the American Revolution, asking permission to place a tablet on Zunder school bearing the inscription that the building was erected on the land where General Wooster's house stood. The request was granted.

opinion of Corporation Counsel Ely with reference to the bequest of \$500 from the Kinney estate was received. Mr. Ely is of the opinion that the money can neither be received by the board of education nor by the city treasurer

The Women's School association was given permission to conduct a summer school in the Wooster school. were also given permission to use the grounds at Zunder school for playgrounds the same as last summer, Superintendent Kendall's report was

I recommend the adoption of a course of study in history for the elementary schools, of which the following is an outline:

The course contemplates no changes from what we are at present doing. It plans for a certain prescribed course of reading in grades 3, 4, 5, 6 and 7. In the third grade all pupils are to read Eggleston's "Stories of Great Ameri-cans for Little Ones:" in the fourth grade all will read Eggleston's "Stories of American Life and Adventure;" the fifth all pupils will read Eggieston's "First Book in American History." It is observed from this that the reading In these grades relates to American history. The pupils are to read Guerber's "Stories of the Greeks," really a child's history of the Greeks, in the sixth grade read Guerber's "Story - " the English." In the seventh grade pupils study a text book and will cover approximately the period of discovery, of colonization and of the War of Independence. The work of this grade will treat of the national period, or of the period since the adoption of the constitution. One objects of the instruction throughout is to create an interest in history and for historical or biographi-

Superintendent of Streets Robert E. Baldwin has agreed to place cans for refuse matter near several of the larger schools. These cans will be so placed that they will be accessible not only to the pupils of the school, but to the public as well. Collections will be made by the street department. Each can will be lettered "For good citizenship and

Numerous cities like Cleveland, Detroit, Worcester, etc., make great use of the public library by means of the schools. In this way, and also by what we may be able to do our-selves, our schools in time would be supplied with effective and helpful though

modest libraries. Mr. Lambert, supervising principal of

The programme in full will be published some time next week.

#### ABATING ASSESSMENTS

Recommended Last Night by Claims Committee. The committee on claims met last night and held hearings on several netitions for abatements of assessments and taxes. Among the claims was that of St. Francis' church for abatement of sewer assessment. The committee decided to recommend that one-half of the assessment of the church for the sewer on Ferry street be abated, and also that interest and liens be abated, provided the balance of the assessment paid on or before Jonuary 1 next. Frank M. Lovejoy was given leave to withdraw his petition for abatement of the tax assessed against the estate of Daniel Lovejoy, deceased. Abatement of the lien against the estate of Hemingway Smith was recommended.

#### The Fattle of Faval.

To the Editor of the Journal and Courier: In Monday's issue of your valued paper your Fair Haven correspondent gives a history of the battle of Fayal, which would seem to be greatly at variance with my simple story in your issue of the 16th. The seeming discrepancy may be explained by the fact, as I understand it of the Armstrong being twice penned in the harbor of Fayal by phonic, telegraphic or spiritual communication with any of the actors in those scenes, I wrote from memory of tradifirst and minor encounter of the Armstrong with the British, while the later glorious finale of the little privateer and her heroic crew is graphically portrayed in the interesting communication your Fair Haven contributor, Fayal being a neutral port was the natural rendezvous of the privateer, and undoubtedly she had frequent occasion to put in there for supplies when forage became scarce on the high seas. I have said that Fayal was a neutral port, but it is well known that England in those days paid but little respect to protocols, agreements or treatles when it suited her pleasure or convenience to disregard them; but England had two great obware with the United States, and she for from that time she began to treat and although it is true that she has since that date, yet in the main she has followed these lessons taught her by the Yankees, with the result of becoming the foremost civilized nation of the world (the present company always excepted.)

Spain on the other hand, once ruler of the seas and virtually having posthe guest of her brother, Charles E. session of two-thirds of the western hemisphere, has totally failed to learn rience of other nations, and never forgetting what she didn't know, she has Borough Clerk Fraray Hale has been persistently continued (as long alof her possessions. #### WEEKLY REVIEW OF TRADE

THE STORMY WEATHER RETARDING SPRING DISTRIBUTION.

An Irregular Appearance Imparted

New York, March 24.-Bradstreet's to-morrow will say: Stormy weather, retarding spring distribution in some sections, has imparted an irregular appearance to general trade, while some few reductions in prices of leading staples, notably raw cotton and wool, copper and some few other metals, serve to break the otherwise almost unvary ing appearance of strength of staple values. The general commercial situahowever, continues to present much apparent strength. The sec-saw of wheat prices has been upward this Better weather at the south finds reflection in larger receipts of cotton, and the result is a fractional shading of prices. Coffee is slightly lower on the week, while the high price of copper seems at last to be affecting demand, with the constant drop in value of that metal, sympathized in by declines in tin and lead. The iron situation is still one of great strength, al-though the volume of business is concededly smaller than for some weeks past, and one grade of pig, Bessimer, is lower on the week. Nearly every other grade of pig iron is higher. Steel billets and rails are firmly held and nearly all classes of finished material are higher than at any time recently. The boot and shoe situation is quite encouraging. Hides, though dull, are firm and the same is true of leather. Cotton goods retain all their old strength, though somewhat quieter in demand. The talk of combination in the manufacturing branch of trade has seriously unsettled the price of raw wool, which is weak and lower. Sugar is unchanged. Lumber is higher at nearly all markets.

While actual advances in wages are as yet confined to the cotton manufacturing and iron and steel industries, the number of operatives who have gained some advantage from the activity in all industrial lines totals easily

OBITUARY.

Death of Captain Levi Smith, a Noted Shipmaster, East Haven Born.

Captain Levi Smith, for many years commander in the European Packet and East India service, died at his late residence, No. 557 Halsey street, Brooklyn, L. I., at 4 s. m., March 23, of conmption. He was born at South End, East Haven, Conn., about the year 1840 on a property that his ancestors had enfor several generations. His grandfather, Levi Smith, was a much respected farmer of that vicinity and his father, Captain Samuel Smith, for many years commanded sailing packets plying between the ports of New York and New Haven. The deceased was respected by all who knew him for his energy, integrity and kind heartedness and for his ability and knowledge of marine affairs connected with the profession, which was of the highest rank.

Captain Smith in early life made many coasting voyages. He sailed several years on pacekt ships of the Whit-From service in the forecastle he became in the space of five years commander William Nelson. He afterward became commander successively of the Bayaria and the Carolus Magnus. He was part owner of the latter ship and on her made a number of prosperous voyages to the Pacific. He afterwards ade several voyages as commander of Messrs, Snow & Burgess' clipper ship Richard Robinson to Japan and China. He retired from the sea a few years ago. Possessed of a competency but not willing to "rust out" he chose a local position of trust and confidence that was in keeping with his profession, which he held until about two months ago, when he was stricken with disease which had for years been lurking in his system and which ended his

NEW HAVEN MAN DROWNED. James Reilly, the contractor of Bradey street, received a telegram yesterday afternoon announcing that his nephew James A. Rellly, had been drowned at Palm Beach, Fla., yesterday morning and asking him to break the news to the young man's folks. James Reilly, a son of the late Philip Reilly, for many years a police sergeant, went to Florida some months ago for his health. His brother, John S. Reilly, is mayor of Miami, and the young man was stopping with him. Details of the accident will come by mail. The dead man was very popular in this city, and had many friends. The news will be a shock to many.

#### FAIR HAVEN NEWS.

Work was pushed ahead rapidly yeserday on the curved tracks connecting the Fair Haven and Westville road with the Ferry street line. The tracks are being put in so that the cars running on the former New Haven Street railroad can be transferred at that point. At present these cars are transferred at Broadway. The curved tracks, frogs, etc., cost about \$5,000. It is a fine plece of steel track construction and was made specially for this job. The switches are of harveyized steel and are expected to last many years. Twentyfive men are at work on the job under the direction of J. K. Punderford.

day evening and also every evening of the week at the City Mission hall, corner of Court and State streets. other Sunday services are at 9 o'clock a. m., (Sunday school), and at 3 o'clock and 4 o'clock p. m. The service to-morrow evening will be conducted by the Christian Endeavor society of the Unit-

lyn Rapid Transit, which lifted it 5%, and People's Gas, which gained nearly a point, had a sentimental influence be cause of the prominence of the parties concerning in recent opening for a rise. The railways were not as active as yes terday in the dealings, but the grangers improved fractionally and the Pacifics were a trifle higher. Consolidated Gas lost 8% and Third Avenue 6 points on the fear that they would not secure desired legislation, There were frac- D. tional losses in Metropolitan Railway and Continental Tobacco, while in Su-

gar the loss was 1%. Among the conlers Lackawanna and Jersey Central rose over a point each; the Readings were practically unchanged. Among the rallways Southern preferred, Louisville and Atchison improved over a point each. The activity in Louisville started in London and aroused a brisk local demand. The explana tions that the Westinghouse suits against the General Electric company were of a friendly nature continued to day to benefit General Electric, which rose a point. Rubber and Chicago Terminal were also gainers of over a point

A good business was transacted in bonds to-day, the aggregate being \$3,-935,000. Prices moved up pretty generally, with decided strength in incomes, United States new fours and the old fours advanced 14 in the bid price.

Fire Insurance Can be Curnished on al Desirable Property to Every One, by Charles Wilson & Co., No. 43 Church

There are about 40 fire insurance agents in New Haven, representing about 125 fire insurance companies, clamoring for business. We are agents for over 40, or about one-third of the entire number; enough to do all the insurance in New Haven. Many of them are the very oldest and strongest of any doing business, having more money to pay their obligations than any others Examine the ratio of assets to liabilities of all the millionaire companies and satisfy yourselves. Please give us call and see what we can do for you. CHAS. WILSON & CO.

# THE SERVICE SERVICE

Sometimes by combining differ-ent patterns we are enabled to reduce the expense, and yet produce a good effect. It takes more than mere Wall Paper knowledge to do it-it requires taste.
