ANOTHER BIG RAILROAD DEAL

Vanderbilts Acquiring Competing Lines to Maintain Ratio. Philadelphia, Jan. 15.—The Evening Telegraph to-day says: "The apparently real meaning of the new \$10,000,000 Pennsylvania Railroad stock issue does not seem to be to abolish grade crossings and the erection of a new station at Pittsburg to cost \$1,500,000, together with betterments elsewhere over the great system, but in meeting payments of purchases of stock of the Chesapeake and Ohio said to amount to 100,000 shares."

Several hundred invitations were sent to the clergy and Mr. Woodcock is also in receipt of the regrets of several of the church dignitaries as well as the ordinary clergy. The church dignitaries will be present in force to aid in making it one of the grandest and most impressive occasions that Christ's parish has ever known.

The present generation in India has seen no less than four famines there besides the one that is now prevailing. There was one in 1865-6, when, according to the famine commission, a population of 47,500,000 was affected.

Last year's figures show that the population of London is 4,484,717. For every 1,000 inhabitants there were 30 births and 17 deaths. The number of infants who died in their first year was 158 for every 1,000 births.

An extraordinary floor has been laid in the London Coal exchange. It is constructed of inlaid wood, and the pieces are arranged so as to represent the mariner's compass.

An illustration of what circumstantial evidence may be shown in the release, in St. Louis, of two men convicted of murdering a wealthy stockman. These two men were convicted on purely circumstantial evidence.

The year 1899 witnessed the achievement of United States supremacy in the world's coal output. Before that year Great Britain had the lead, and while the latter country, as well as France and Germany, had big increases last year, the growth of the coal production in the United States was so enormous as to reach an aggregate of 245,000,000 tons.

The Royal Society for the Prevention of Cruelty to Animals asked the British war department to provide some means for putting out of their misery horses wounded in battle.

The other day the commissioner of the poor in St. Joseph, Missouri, discovered a touching state of affairs in which Matilda Mansfield and a very old white woman figured.

kept her twenty years, and when the poor commissioner offered to send her to the county farm the dying negro woman objected. Mrs. Mansfield said she had sent for her daughter from Iowa, and that her daughter would take the aged white woman home with her.

Yesterday Senator McComas introduced in the Senate a joint resolution tendering the thanks of congress to Rear Admiral Sampson and Commodore Schley and the officers and men of the fleet for services during the Spanish war.

Late, but reasonable and safe. It is certain that all those mentioned and indicated in the resolution were in the Spanish war and had more or less to do with the destruction of the Spanish fleet off Santiago.

In 1896 the Massachusetts legislature passed a law permitting any town that chose to do so to elect a paid tree warden, whose duty it should be to see that such trees as his town possessed were protected and such additions to their number made as were practicable and desirable.

Perhaps his wisdom is so deep that into silence he must sink. And then perhaps he goes to sleep. Because he has no thoughts to think. But what's the reason for it.

Perhaps Connecticut could learn something from Massachusetts in this matter. New Haven needs a tree warden, and doubtless other places in the State have the same need.

The tobacco-growers of New England think they know what they are about when they protest against free trade with Puerto Rico, and their opinion will not be altered by anything the Tobacco Plant may say.

Ingenious, but there is safety and comfort in being protected, and the well-being of the tobacco manufacturers and of the smokers in Puerto Rico is not the chief concern of the tobacco growers of New England.

THE GOLD STANDARD IN JAPAN. The 16 to 1 men will not find much comfort in the experience of Japan, as told by Mr. Uchida, the Japanese consul at New York.

Then followed an experiment with a national bank currency, similar to ours, but as the bank notes were made redeemable in the depreciated "green-

backs," the bank notes, of course, suffered the same discount. Silver was next tried. Silver was admitted to free coinage and made full legal tender. Nominally Japan had at this period a "double standard," but in practice there was no such thing, as the depreciated paper "money" drove silver, as well as gold, out of circulation.

Y. M. C. A. ANNUAL MEETING

OFFICERS AND DIRECTORS ELECTED FOR ENSUING YEAR.

Reports of Officers and Various Committees Read and Accepted—Appeal for Aid in the Building Project by General Secretary Lotze—Says Full Amount Required Will be Realized by June if Conditions Attending the Budget of \$10,000 Can be Fulfilled.

The annual meeting of the Young Men's Christian association was held last evening. Officers and directors for the ensuing year were elected, and the reports of the general secretary and the chairman of the various committees were read and accepted.

President Pierce N. Welch presided at the meeting, which opened shortly after 7 o'clock. The reports of the various committees were presented by their chairmen as follows:

- Social work committee—Chairman W. R. Downs.
Physical department committee—Chairman J. Y. McDermott.
Religious work committee—Chairman L. T. Snow.
Membership committee—Chairman Eli Manchester.
Women's auxiliary—Mrs. W. R. Downs, chairman.
The report of the general secretary, William G. Lotze, which was of unusual interest, is printed in full below.

The Young Men's Christian association of New Haven has passed the experimental stage of its existence. It is now recognized by clergy and laymen as an important factor in the development of the young manhood of our city.

The touch merged into collision many times, but we were all the better for it. This was followed by two handball tournaments, one last year and one this. Twenty men took part in each tournament and one thousand games were played.

Several outings have been enjoyed in the form of ramble, cross-country runs and wheeling tours. The business men's class has been well sustained. Probably the best field for sociological study in the association is the class which meets Tuesday and Thursday afternoons.

The following statistics represent as nearly as possible the work, as far as the figures can, but the greatest part of the work can no more be tabulated than many other phases of the association's activity.

Developing the strong, cultivating the weak and watching the growth of all cannot be reduced to mathematics. As nearly as possible the work, as far as the figures can, but the greatest part of the work can no more be tabulated than many other phases of the association's activity.
