# VESUVIUS' NEW OUTBREAK

FIERY STREAM BELCHES FROM NEW OPENING.

People of Naples Witness a Remarkable Scene-Volcano Opens Like a Huge Month a Thousand Feet Below the Cone-Great Stream of Lava Felt at

Naples, Aug. 26.-The people of Naples and the environs witnessed a remarkable spectacle at noon to-day. One thousand feet below the central cone of Vesuvius the volcano opened like a huge mouth, out of which belched a flery stream of lava, which ran down the side of the mountain and which first seemed to menace the observatory. This building, however, is protected in the direction of the stream by a mound of lava 200 feet high, which was thrown out during the eruptions of 1895 and 1900. The eruption occurred without any warning whatever. There was no earthquake, detonation or rain of ashes -nothing but a clear stream of lava and red-hot stones, which were thrown to a height of 700 feet, producing an extremely beautiful effest as seen from Naples. The stream of lava, which is fifteen feet broad, at 11 o'clock to-night had covered a distance of 2,700 feet. It deviated later from the direction of the observatory, which is no longer menaced. The only danger is for the new electric tramway up the volcano, which, however, has thus far not been touched. The eruption already seems to be decreasing, and it is hoped that no damage will result from it.

The spectators far enough away not to be frightened stood entranced at the spectacle, but those nearer to the volcano were seized by panic when the eruption began and rushed down from the sides of the mountain and from the adjacent country to the villages of Portici and Resina, which are built over the ruins of Herculaneum. The alarm in these villages was somewhat quieted mayor's affixing notices declaring that there was no danger and exhorting the people to remain calm.

The chief of police of Naples has gone personally to make a tour of the vil-lages around Vesuvius in order to reassure the peasants and superintend any measures of protection which may be deemed necessary. The superstition lower classes are agitating for the expulsion of Professor Drull, of Munish who predicted the eruption, that he has the "evil eye."

York, Aug. 26.-Frank B. Webb the Marechal de Gontaut, which is night. bound for Japan. The authorities were notified and a chase for the bark com-

the bar, leaving her off the Sandy Hook lightship, said on his return to-night that Captain Lecrox assured him that the boy, said to be Frank Thompson, aged eighteen years, living in New Vork had regularly signed the ship's articles. The pilot said, however, that when he left the vessel he could hear the boy, who was locked up in the cabin, shouting for help.

A revenue cutter sent out to investigate the case, at 11:30 o'clock to-night, was lying alongside the Marechal de Gontaut, which remains at anchor four miles southeast of Sandy Hook light-

The revenue cutter left the bark anchored southeast of the Sandy Hook Hehtship at 1:10 a. m. and started towards the upper bay.

# DAUGHTERS OF LIBERTY.

#### Annual National Convention and th Election of Officers.

Detroit, Mich., Aug. 26.-An effort was made at the convention of the Daughters of Liberty here to-day to amend the constitution so as to allow any male candidate to membership even if he is not a member of the Order of American Mechanics, with which this organization is affiliated. A strong protest was raised and the amendment was defeated after prolonged discussion.

The following officers were elected: National councillor, H. McKenzie of New York; national associate councillor. Miss Susie Bateman of Pennsylvania; national vice councillor, J. B. Harvey of Pennsylvania; national associate vice councillor, Miss Jennie Hayward of New York; national secretary, W. V. Edkins, Pennsylvania; associate secretary, Lillian Irvin, New Jersey; associate treas urer, S. C. Stein, Maryland; guide, H. Stettefeld, Pennsylvania; inside guard Miss Maude Viall; outside guard, Mrs. Emma Goulden, Rhode Island; repre sentative to the order of the United American Mechanics, Frank P. Lippencott. New York.

It was voted to hold the next convention at Portland, Me., in August, 1904.

# Judge Baldwin Reads Paper.

Kruszka, Hot Springs, Va., Aug. 26 .- The Assoclation of American Law Schools held its annual session to-day in conjunction with the American Bar association. Representatives of twenty or more institutions were present. Professor Simeon E. Curtis of the St. Louis law school read a paper on "Examinations in the Law Schoool."

### FRANCE RELUCTANT.

### Does Not Wish to Make Promises Nov

Regarding Monetary Exchange. Paris, Aug. 26.-The report of the French commission appointed to confer with the United States monetary exchange commissioners has been delivered to Ambassador Porter. It contains a note from Foreign Minister Delcasse saying that France is not prepared to express binding conclusions until she has consulted with the other powers.

The report endorses the principle of a gold standard for China and other silver-using countries, but it points out that the plan is possible only with judiclous control of the coinage by the government and the creation of an adequate gold reserve. It favors a coinage ratio for the Orient, fixing the face value of silver slightly above its bullion value, similar to the American system in the Philippines. The French commission makes reservations upon the proposed regular purchases of silver on the ground that it is impossible to foresee the country's needs for subsidary and colonial coinage.

Semi-official advices from Russia indicate that the commission appointed by Finance Minister Witte has made similar conclusions.

The French and Russians considered it preferable to establish a uniform system in China by beginning on a silver hasis and afterwards raising it to a fixed gold value, than to begin on a gold standard immediately.

# LIPTON WILL DIE HARD.

#### Defeat in Will Take Spirit.

New York, Aug. 26 .- Sir Thomas Lipton said this afternoon in response to a telegram hoping that he would win to-morrow: "I have not lost hope and I shall fight

and die hard. If I cannot win, I will take defeat in the proper spirit." Sir Thomas said in response to query as to whether he had asked to have a four cornered race between Shamrock III., Reliance, Columbia and Constitution, that he had not made any such suggestion, but if such a proposition was made he would undoubtedly consider it. He did not care to have it

Bannon lost The pilot who took the ship out over control of the horse and the carriage was flung from one side of the street to the other, crashing into the curbing on either side until it was a complete wreck. For half a mile the two young people clung to their seat in the carriage. Then the girl jumped and a hundred yards further her friend followed her example. Miss Montague struck head foremost on the pavement and her neck was broken. She died an hour later. Bannon escaped with painful body bruises, but no sooner had he learned of his companion's condition he pecame violently insane and his insanity is likely to be permanent.

# KNOCKED DAVIS OFF STAND.

#### Strenuous Political Campaign in Progress in Arkansas.

Little Rock, Ark., Aug. 26,-Judge Carroll L. Wood of the Arkansas supreme court, who is opposing Governor Davis as a candidate for a third term, knocked Governor Davis off the speaking stand, four feet, to the ground, during the campaign at Bismarck yesterday. Governor Davis was not hurt and his friends prevented further trouble Judge Wood was immediately arrested on the charge of assault and battery. Governor Davis publicly asked Judge Wood questions, and before they could be fully answered interrupted with more questions, which so angered Judge Wood that he knocked Governor Davis from the platform. Later the matter was adjusted and Judge Wood returned

### ARMY AND NAVY IN DISPUTE RE-GARDING WINNER.

# s of the Attacks of the Vessels or the City of Portland-Important

Question as to Whether It Was Made

After Midnight-What Officers Say. Portland, Me., Aug. 26.-At 10 o'clock to-night the war manoeuvres had again developed into a watching and waiting game for the defending forces just as before the mimic war was declared. At

Fort McKinley, the sternmost of the

protecting fortifications.

There has arisen to-night a difference of opinion and claims between the army and navy officials as to the attack made by Admiral Barker's fleet this morning on the forts commanding the entrance to Portland harbor and in view of this there has been a vague uncertainty as to whether another attack would be made to-night or not. According to the rules laid out for the conduct of the war games, the fleet is allowed to make one day and one night attack, The question is was the attack made

after or before daybreak. The army officers say that although the vessels directly after midnight attempted to land men, yet they did no firing from the ships and after the landing parties were repulsed no regular attack was made by the ships themselves until after daybreak. It was understood to-night the navy officials claimed they nade a night attack in addition to the landing parties and that there was no response to their attack. With the difference of opinion between the two branches the time of the next attack is uncertain.

However, the army officials relying on their belief that a day attack had been made after daybreak are in readiness for a night attack at any moment, Orders were issued for the men to turn out t 11:30 in anticipation of such an

Two gunboats off Town Landing at Falmouth Foreside, three miles from the harbor, were fired upon from Fort McKinley while sending ashore landing parties.

Three torpedo boat destroyers are reported to have passed Forts Williams and Leavitt, shortly after 10:15 and attepted to countermine the harbor. They were fired upon by Fort Preble.

Portland, Me., Aug. 27.-The enemy's fleet made the second demonstration against the harbor two hours before midnight the evident purpose of which was to counter-mine the harbor. Two vessels, one of which was a torpedoboat destroyer, surrendered during the engagement. An attempt at landing was defeated. The attack concluded at 11:15, the vessels withdrawing to Half-Way Rock, where at 1 o'clock eight had gathered. All lights were shown on the

# WORK OF STATE TARS.

#### An Interesting Day in Small Boats Expected To-day. Camp Raynolds, Niantic, Conn., Aug.

26.-The officers and men of the first division, naval battalion, encamped here, are looking forward to to-morrow's duty which will be in the small boats on Niantic bay and, perhaps, Long Island sound. The coast drill will be a little more extended weather permitting.

This morning the third division participated in the rescue of a naptha launch, with a New London party on board. The launch was half filled with water and with waves knocking her about like a feather was in imminent danger of filling and sinking. The machinery had become disarranged and the people on board had begun to despair of getting on dry land again when the disabled boat was sighted by the watchful eyes on the Elfrida, which had the third division out for practice work in

the small boats. Lieutenant Commander F. S. Cornwall was in command, with Lieutenant Frederick Bartlett of the third division second in command. Putting for the small boat, knocking helplessly, the Elfrida soon ran up alongside. A line was thrown out and the imperilled party was taken on board. The Elfrida. then towed the launch into New London harbor.

The officers and men of the Elfrida were thanked profusely for their timely assistance. There was little doing in camp to-day.

The wet weather interfered somewhat with the routine work.

# Second Largest sailing Vessel.

Bath, Me., Aug. 26.-The Elizabeth Palmer, the second largest sailing vessel in the world and the largest fivemaster, was launched this afternoon from the yard of Percy & Small. vas all fitted for sea and will probably sail for a coal port the last of this week. The Palmer costs about \$135,000 all fitted, and will carry 5,000 tons of coal. Her dimensions are: Length, 300.4 feet; beam, 48.3 feet; depth of hold, 28.3 feet; gross tonnage, 3,065. # SOUND DISASTER.

#### Bady Recovered from Capsized Schoone Newton Identified.

South Norwalk, Aug. 26.-Field S. Pendleton and W. S. Pendleton, jr., of the firm of Pendleton Brothers, of New York, owners of the schooner Willie L. Newton, which turned turtle in the sound yesterday afternoon, arrived here to-night and identified the body which floated out of the cabin of the capsized vessel as that of Captain Edward Coombs, of North Islesboro, Me. Arrangements were made to ship the body by the midnight train to Captain Coombs' home. Captain Coombs had been employed for many years by Pendleton Brothers and had been master o'clock to-night the greater part of of the Willie L. Newton for twenty Admiral Barker's fleet was anchored off years. His wife survives him. He was prominent in Masonic circles in Maine, Goose island, about ten miles from being a Knight Templar.

To-night the Pendletons visited the wreck in Wilson's Cove. They will make an effort to raise the vessel and have her towed to New York for repairs. Captain Minor, of the tug Patience, who picked up the schooner and towed her into port, will remain by her to-night and will proceed to Providence with his tow of barges to-morrow.

The Newton was capsized six miles east-southeast of Green's Reef light in Long Island sound. As the craft was completely overturned while the sails were being lowered it is believed that the entire crew, numbering probably seven men, were drowned. One body, that of Captain Edward Coombs, was recovered. The wreck was sighted by Captain Walter Minor, of the ocean-going tug Patience, of New York, as his vessel was towing barges from New York to Providence. He first saw a schooner's keel above the water, and, being convinced that some craft had met disaster, he anchored his tow and steamed in to the derelict. On determining the fact that a good-sized schooner had been wrecked he attached a line to the keel and brought the vessel into Wilson's Point dock, Norwalk,

### IMPORTANT BASEBALL MEETING Every Demand of Minor Leagues Practically Acceded.

Buffalo, N. Y., Aug. 26 .- One of the most important meetings in the history of baseball ended at 9 o'clock to-night after a two days' session. Representatives of the National, American and National Association of Minor Leagues agreement drawn up by the minor league representatives before them the major league magnates drew up a carefully worded, agreement and submitted it at the final meeting to-night. This G. B. Barne..... agreement will be acted upon at a meet-Minor Leagues to be held within the next ten days. President Farrell of the New York State league, as spokesman for the minor leagues, declined to discuss the possibility of the adoption of the agreemen by the minor ingues. The National league magnates were not so

James A. Hart of Chicago, a representative of the National league, said: "We have acceded practically every demand of the minor leagues. They will have absolute control of their internal affairs. I think the members of the National Association of Minor Leagues will see the matter in the same light at their meeting to be held within the next fortnight."

The new agreement is signed by President Pulliam of the National league and President Ban Johnson of the American. They with August Herrmann of Cincinnati as chairman will form a national commission to adjust such matters as may come up for settlement between the major and minor

# RUBBER SHOP STRIKE.

#### Bootmakers Organize and Strike May Become General.

The prospects for the strike of the shoemaking girls at the L. Candee rubber shop becoming general and extending to all parts of the big factory are

An enthusiastic and determined meeting of the boot makers and cutters, the male help of the shop, was held last night in St. Patrick's hall and preliminary arrangements looking to the organization of a local auxiliary to the Amalgamated Association of Rubber Workers were completed. Another meeting of these workers will be held in St. Patrick's hall, 731 Grand avenue, at 8 o'clock to-night, when the details of the organization will be completed and the union will make application for a charter.

It can be stated on good authority that if the demands of the girls are not acceded to within a day or two there will be a general strike of the boot makers and cutters, which means about 1,400 experienced men. This numbe with the 700 girls now on strike brings the number out up to nearly 2,000. Thus far 378 of the striking girls have joined the union and it is expected that the rest of them will be on the list by to-

At a conference between the officials of the company and a committee from the girls it is stated that the girls decided to accept fourteen pairs of shoes as a set but not sixteen as the company offered. If this number is agreed upon there will be a cessation of hostilities and all will return to work, but the girls assert they will never agree to call sixteen pair a set.

# ENGLISH GOLFERS WIN AGAIN

### UNINTERRUPTED SUCCESS OF OXFORD-CAMBRIDGE MEN.

Capture International Team Match a Southampton, N. Y., by Score of Eight to Three-New Amateur Record for the Course Made by One of the Visiting

Southampton, N. Y., Aug. 26.-The grand golf over the Shinnecock links this afternoon and won the international team match in a dashing manner by eight points to three, winning five of the individual matches and losing but three. The team match was preceded in the morning by an eighteen-hole medal play scratch competition for a cup presented by R. H. Williams, on which depended the selection of members of the team in the match with the English players. In this competition Walter J. Travis and F. J. O. Alsop tied at 74. Ellis leading the Englishmen with 76.

A new amateur record for the course of 71 was made by H. W. Beveridge and equalled by Walter J. Travis. This is the greatest golf that has ever been seen upon the course. A very large gallery of society people followed the Travis match over the course. Travis had Norman F. Hunter as an opponent and they both played good golf, Hunter doing the course in 76. The tie of the morning for the Williams cup at 74 between Travis and Alsop was decided by their scores of the afternoon. Alsop did a 77 and Travis a 71, thereby capturing the handsomest trophy of the tournament.

The Shinnecock Hills Golf club gave a dinner to the two teams and a few invited guests in the club house in the evening. The English team will go to

New York to-morrow.

#### English Tennis Crack Will Now Challenge American Champton.

Newport, R. I., Aug. 26.-H. L. Doherty, the English lawn tennis champion, to-day defeated W. J. Clothier of Philadelphia in the finals of the national tournament here to-day, 6-3, 6-2, 6-3. The victory was an easy one for the English player, who was much more steady, though at times less brilliant than his opponent. The American player made many costly faults and though he showed better all around form to-day than he has recently, he did not at any time come within reach

of victory. Doherty, by to-day's success, challenges W. A. Larned, the American champion, whom he will meet in a match for the title here to-morrow.

# CIRCLE OF THE GLOBE.

### Made in Fifty-four Days, Seven Hour and Twenty Minutes.

New York, Aug. 26.-Henry Frederick, who left New York city on July 2 on the steamer Deutschland for a tour around the world with the hope of breaking the record for the shortest time consumed in circling the globe, arturned to New York to-night on the New York Central railroad. Mr. Frederick had been successful in his endeavor, having made the circuit in fifty-Oxford and Cambridge golfers played four days, seven hours and twenty minutes. In speaking of his Mr. Frederick

said. "My object in making the trip was to ee the quickest time a man could go around the world comfortably. train ride from Paris to Dainy, China, consumed eighteen days. Two days were spent crossing the Yellow Sea and two more by rail across Japan. At Yokohama I missed my steamer by ten hours and lost seven days, as I was ompelled to take a slow boat two days later which spent sixteen days on the Pacific. I landed at Victoria and crossed the continent in a little over four days. This, with the Deutschland's fast time of six days across the Atlantic, made my record of fifty-four days."

Mr. Frederick said that he found the line of the trans-Siberian railroad swarming with Russian troops, who were being poured into Manchuria at the rate of 1,000 a day. At Port Arthur were concentrated thirty-seven ships of all classes. In Japan he found the feeling for war with Russia running very high and active preparations being nade for hostilities.

### A NEW MOVE.

#### Heads in Government Printing Office Must Take Oath of Allegiance.

Washington, Aug. 26.-An order from Public Printer Palmer was issued to the heads of divisions in the government printing office just before the hour of closing to-day to appear before ctary public in the office and take the oath of allegiance to the United States dorsed for United States senator. as subscribed to by clerks under the ivil service law.

Mr. Palmer said to-night that he had ssued the order at the suggestion of a prominent attorney at Youngstown for government official whose name he declined to give. He said that its object was to place the per diem employes in the same attitude toward the government as that of the clerks on annual salaries, who have subscribed to the order. He said that every employe of the office would be affected by the orconfusion, the chiefs of divisions were asked to take it to-day and that gradually the entire force would have the na for joint debates during the camoath administered,

The issuance of the order created considerable surprise among the employes.

Adams Must Stay. New York, Aug. 26.-Justice Bartlett, sitting in Brooklyn to-day, denied an application of "Al" Adams, the policy king, for a certificate of reasonable doubt. Justice Scott recently denied a ing a decision of the court of appeals on his conviction.

The main contention on the part of counsel for the policy king was that he was convicted on testimony that was really furnished by himself, his private papers having been taken from a trunk and used against him.

Justice Bartlett devotes almost his entire opinion to this point and declares that the use of the evidence thus obtained was perfectly proper. He points out that even if the search warrant "did not justify the seizure of the defendant's papers, that fact did not render them inadmissible as evidence against him. This view is absolutely sustained by authority and will be found supported by a score of decisions in courts of last resort."

# Lake Superior Reorganization.

New York, Aug. 26 .- The finance comnittee of the Consolidated Lake Superfor company, consisting of President Cornelius Shields, E. J. Berwind, Samuel Res and Henry K. McHarg, met today and will announce a plan of reorganization shortly. There seems to be ittle doubt but that the stockholders will be assessed probably as much as \$8 share. The attempt to raise \$12,000,000 bonds

has proven a failure. There seems to be considerable question as to whether holders of stock selling at present figures will submit to an assessment larger than the value of their securities. The capital stock of the concern is \$100,000,000 and the market value \$2,250, 000. Under the reorganization the cap ital, it is said, will be reduced to \$10,-

THE ADVICE OF SETH GREEN. Yes ago, before that good fellow, practical angler and acute stream-observer Seth Green passed away, it was my privilege to spend many days with him on the stream, particularly Caledonla creek, on which the New York State Hatchery then stood and now stands. The value of an angling commission with such a man is beyond estimate. A quotation from a letter he once wrote me will better and more tersely answer the query I recently re-

to know "how to fish for trout," than

any words of mine can possibly do. "In the first place when I go a-fishing, I go fishing. I don't hear the babble of hits and striking out eight batters. He the brook; I don't see the fluttering was finely supported by the men behind bird, nor the silvery leaves, nor the beautiful sky. Neither do I fish any- the work of the pitchers were running body else's line. I fish my own and I catches by Larkin, Weisbecker and don't watch my companion, if I have Ladd and stops by Hoffman and Dowone. I don't care whether he gets a ney. The score by innings: bite or not. I am attending to my business and looking for a good place to cast, I am looking for the fly that is on the water and to see if there is a rise. If I see one, no matter if it is ten rods away, I mark the place and make for it. I don't run, but go quietly along and keep fishing; and when I get within casting distance I drop my fly a little short and if I don't get a rise the next cast is made directly on the spot on which the trout rose. My fly does not go with a thud as though I wanted to the water as lightly as a fond mother's hand touches the brow of a loving child she loves better than I can find words freely. Score by innings: to express. I am just as sure of a rise too, as the fond mother is that the child will roll its loving eyes to her face with an expression that says to her, 'I am your,'. I feel that when my fly drops so gently on the water withou making a ripple, that the fish is mine.

TRUMBULL, A NEW PITCHER DID EXCELLENT WORK.

Blues Played With Snap-Manager Reilly Was Stient Yesterday-Blues in

Pitcher Trumbull, from Litchfield,

was in the box for the New Haven team yesterday and he won the game from Hartford. But for a slight degree of nervousness, he showed up as well as any pitcher on the New Haven team this season. His curves were wide ones and good twisters. He had speed and good control with the exception of two brief intervals in the game. Trumbull resembles very closely Walter Clarkson, Harvard's great pitcher. He struck out seven men and with three men on bases in the ninth saved the day for the Blues by catching a red-hot liner and completing a double play with the assistance of Golden.

The game was the best played conest in some respects seen on the Savin Rock diamond in three weeks. Hartford made two errors and New Haven three, but these did not materially mar the game.

Two passes to first, a single by Hanifin and a double by Jope in the fourth netted the Blues two runs after the Hartford team had obtained a lead of one run in the first inning. In the seventh, New Haven, on a base on an error, and singles by Jope, Bone and Connell, scored three runs, making their total five. Hartford had scored three in the sixth, two bases on balls, a hit by pitched ball and a double, making the trio. The final score stood to 4 in the Blues' favor. In three innings, Trumbull struck out six men, two each inning. The other players on the team put some snap into their work and the fans were guite enthusiastic.

Manager Reilly of the Hartford team, who was mixed up in a wrangle, recently, on the Savin Rock grounds, was conspicuous yesterday by his silence. The umpire was not obliged to "call" him for his talk from the visitors' bench. It was reported that an officer was to serve notice of a suit for damages, brought by the parents of William Pfeiffer, against Reilly, but the action has not yet been instituted. The summary of the game:

Meriden scored the winning run in the ninth inning after Gustropski dropped Burke's fly, Theisen sending him over the plate by ceived from a young angler who wants bitting out a two bagger to deep left. TO-DAY'S EVENT. Come, let us reef the topsall And luff the fib abaft; Oh, let us splice to starboard And keel haul fore and aft.

Cast off the leeward scuppers And house the mizzentop; Haul in the gaff and foresheets And let the spanker drop.

Ho, every gallant sailor That ever saw the sea; Come, let us talk it over And tell how it will be.

The Yankee boat forever! Oh, may her jumper guys Be luffed so that Sir Thomas May not haul in the prize.

So let them keel to leeward And dress the starboard beam; We all know all about it-And don't think that's a dream. -Chicago Record.

SON REBUKES FATHER.

Instance of the Power of Navy Etiquette Nowadays.

It has been said of the American navy that the officers are more exacting in the observance of etiquette and the proper courtessles than those of other navies and that the minute distinctions of puntiliousness are more marked among the officers of the navy than among the officers of the army. However true this may be, it is not to be demied that officers of the military and naval service are apt to be more scrupulous and exacting in etiquette than are civilians, and there have been some

humorous incidents related of this practice of naval officers. It would seem perhaps that the smaller the vessel of the navy of half a century ago the more emphatic or exacting the officers in command in what they considered was due to their rank and station. An incident of this character, related by one of the older officers a couple of evenings ago "at the club," was that during the Mexican war the fleet in front of Vera Cruz was joined

by several gunboats of the most diminu tive type-improved affairs. An officer of one of the larger vessels had occasion to visit one of the little fellows in his official capacity, and ranging up alongside in his barge (which, by the way, was nearly as large as the vessel he was officially visiting.) he stepped over the port quarter, when the lieutenant in command, in a tone of offended dignity, informed the visitors, who was his superfor by two grades, that his vessel had' a gangway on the starboard side, and that it was not only proper, but that the navy regulations prescribed, that officers of and above a certain rank should

board by that gangway.

The young offcer added that while his vessel might not be much bigger. than the visitor's barge, so long as it was in commission and he was in command he did not proppose to have any of the usual rules of etiquette disregarded. The visitor fully comprehended the intent of the rebuke, and he at once returned to his barge and went around to the starboard gangway and was received by the "piping of the boat-

It happened that the same lieutenant was subsequently rebuked by his own son, soon after the latter received his first commission. The son was on duty at the New York navy yard, and father was in command of a vessel that had just been put into commission, and he was anxious to get his provisions and stores on board that he might get away on his cruise. Going through the navy yard to call on the commandant of the station the captain saw his son in uniwalking toward his headquarters in the storehouse, and he shouted "Henry!" two or three times, without getting any response. Finally the son getting any response. Finally the son turned about and said in a dignified tone; "Are you addressing

me, sir?"
"Yes," replied the father; "I sent in a requisition for my stores, and I wish you would hurry it through, so that I can have the things delivered as promptly as possible, for I anxious to

"Very well," replied the young officer, "I will look into the matter; but please bear in mind when I am on duty I am to be addressed as Mister or by my military title; when I am at home or at ome official affair I am Henry, or anything you-

That the father recognized the propriety of the rebuke to his son was shown by his often telling the story afterward, at his own expense. "Henry or anything you—please" is still alive, and is yet in the navy.-New York

SOME OF THE MANY IMPROVE-MENTS AT THE HYPERION.

Splendid Attenttions Coming for the Season of '03 and '04-Mr. Bunnell Begins His Eighteenth Scason as Manager of the Hyperion.

The eighteenth season of the Hyperion under the management of G. B. Bunnell opens this evening when John C. Fisher's production of the latest English comic opera success from the Savoy theater, London, "A Princess of Kensington" with James T. Powers and a company of 125 people will hold the boards until Saturday.

During the summer the house has een in the hands of the carpenters, decorators and painters. The smoking nd waiting room has been refitted and painted throughout. The box office and obby have also been repainted. woodwork in the interior of the house has been finished in cherry stain, which gives a very pleasing effect. An improvement in the parquet is the placing of blue plush curtains on the back rail so that parties sitting in the rear seats will not experience any unpleasantness from the draught. Floors of both parquet and dyess circle have been painted dark brown.

The ladies room in the lobby has been entirely refitted. For the "Ben Hur" engagement at this house last season the old stage had to be taken out and a special stage built for that stupendous production. When the time came to take out the temporary stage Mr. Bunnell determined to put in a brand new stage with all the latest improvements, making it available for presenting the biggest spectacular and other productions. This has been successfully carried out, and in conjunction with these improvements the rigging loft has been entirely

The dress circle foyer has had new carpet laid and handsome lace curtains placed at the windows. The walls have been repainted and new aisle carpets have been put in the dress circle. New comfortable chairs have been

placed in all the boxes. These are only few of the improvements that have been carried out. In fact, this well known "Temple of Art" has been thoroughly overhauled from top to bottom. Some of the greatest metropolitan productions will be seen at this house during the coming season, which promses to be a most brilliant one. Among the attractions booked may be mentioned "The Silver Slipper," Joseph Jefferson, Julia Marlowe, N. C. Goodwin as Puck" in Klaw & Erlanger's magnifiproduction of "A Midsummer Night's Dream;" Jerome Sykes in "The Billionaire," Marie Tempest and her company in "The Marriage of Kitty;" Ziegfield Opera company with Grace Van Studdeford in "The Red Feather," "The Princess of Pilsen," The Rogers Bros., Charles Hawtrey, "The Wizard of Oz." Ethel Barrymore, "The Sultan of Sulu," Sir Henry Irving in his mas-sive production of "Dante."

The above is only a partial list, Many other big events yet to be announced.

IRA HART PALMER.

He Was One of the Best Known Residents of Eastern Connecticut. Ira Hart Palmer, whose serious illness has been reported in the Day, died at his home in Wadawanuck Square

The end came peacefully after several days unconsciousness. He was taken down about two weeks ago with a shock and from this he pever rallied.

Mr. Palmer was born in Mystic April 18, 1836. He was the son of Benjamin Franklin Palmer and Eliza Sherman (Hart) Palmer. On his father's side he was a direct lineal descendant of Walter Palmer, one of the original settlers of Stonington, and on his mother's side he was great great grandson of Roger Sherman, one of the signers of the declaration of independence. Mr. Palmer came to the borough to reside when he was twelve years old and for several years lived with his grandmother, Mrs. Maria Hart. Early in life he began to display business abilities which were soon recognized by his promotion to important propositions. Early in the history of the republican party he was one of its most prominent members in this section and in 1856, when he was but twenty years of age, he was the first man ever sent from Stonington to rep-

resent the party in convention.

He established the first steamboat line ever run between this port and Watch Hill. In 1862 he bought the Wadawanuck Hotel, located on what is now Wadawanuck park in the borough. This was then the most prominent summer hotel on the New England coast and he conducted it in a most successfu manner for three years. It was mainly through the efforts of Mr. Palmer that the steamboat line was re-established here after the boats had been takel to Groton and that port made the eastern terminus of what was before and has ince been the Stonington line. He also drafted the first plan of the present local steamboat wharves and land approaches thereto.

During his early business life Mr Palmer was local agent of Harndens and afterward the Adams Express Company. He was also in the drug business in the borough and local agent of the telegraph company and was probably the oldest telegrapher in the United States. He was connected with the Stonington bank, secretary of the New York, Providence and Boston railroad Company, and treasurer of the steambomat company for several years. He was also manager of the Rhode Island Granite Company in Westerly for several years and built the branch railroad from the quarries to the main line, in cluding the longest and highest bridge in the state. At one time he was correspondent of the Day in Stonington. He was a member of the Ecclesiastica society of the Second Congregationa church and alsa of Asylum Lodge, No 57, F. and A. M. He was married November 5, 1861, to Harriet Trumbull daughter of Hon John F. Trumbull Three sons resulted from the union, Colmel Arthur Trumbull Palmer (deceased 1901), Henry Robinson Palmer, editor of the Providence Sunday Journal, and Frank Trumbull Palmer.—New London

There is also figure of a seal upon a rock and under It the words "Sealcraig," the original of Selkirk's name.

Bacillus fragi is the name given to a microbe discovered by a Paris chemist, M. Eichholtz, It possesses a very peculiar property, that of imparting to the medium in which it thrives and multiplies a strong flavor of strawberries. M. Eichholtz first isolated and developed his bacillus in milk. The microbe was found to "peptonize" and render soluble the albuminois contained in the milk. At the same time the liquid, which the chemist was courageous enough to taste, had acquired a decided strawberry flavor. The bacillus fragi conveys, it was ascertained. its peculiar property to several other liquids and some solids, beef tea being among the former.

### SAD, BUT REMEDIABLE.

It appears that the figure of Genius on the dome of the capitol at Hartford is in even worse condition than was suspected. Investigation shows that the beauty of the statue is marred by cents several inches in length and about three-fourths of an inch wide in the bust and back of the figure. The statue itself is porous and is honeycombed in number of places. A piece of the material was taken into the comptroller's office and examined by Comptroller Seeley. It is shown to be in an advanced state of decay and crumbles easily under light pressure from the fingers. The rents in the figure were evidently caused by the action of frost on the water that has found its way through the porous places. There is at present a small amount of water inside the folds of the figure as a result of recent rains. The inside of the statue is said to show. plainly that it is corroded by the snow and rain it retains following a storm, and this decay shows signs of eating to the outer surface. The foundations of the statue are also said to be in need of

### A DETHRONED KING.

The dethronement of "Al" Adams New York, the Policy King, seems to be complete. He has much money, but he is in prison, and is likely to stay there Vesterday Justice Bartlett of the Appellate division of the Supreme court handed down an adverse decision on the application of Adams' counsel for a cersentenced on April 21, after having been onvicted of having policy slips in his possession. He appealed to the Appelaround the leg to stop the flow of blood late division of the First department, and then carried him to the rear. It which affirmed his conviction, and then the Court of Appeals. The purpose cure a certificate that would act as a Statesman. stay and upon which Adams could be brought from Sing Sing and admitted to ball, pending the decision of the Court contention of counsel for Adams was that he had been illegally convicted by the seizure of his private papers, and the introduction of the same as evidence at the trial-which he claimed was equivalent to compelling the witness to

testify against himself. There isn't much sympathy with the dethroned Policy King. It is generally understood that the game he played so profitably to himself is about the meanest "skin game" there is. Reform in New York is entitled to a large credit mark for putting him where he belongs.

SOME IMPORTANT DIFFERENCES The Railroad Gazette says that the reason why American shipbuilding and shipowning cannot be satisfactory to American investors is that the cost of building and the cost of sailing an American ship are such that it cannot compete on even terms with the foreigners on the open sea where no tarfor example, employs 380 men at a cost Wilhelm der Grosse employs 500 men at a cost of \$7,715 a month. The American man, while the German ship pays but \$15.43. A like discrepancy exists in the matter of construction. In 1901 Mr. B. N. Baker, then president of the Atlantic Transport Line, wrote to the commissioner of navigation that his company was having two ships built by Harland New York Shipbuilding company, at Camden. The cost of the British ships was to be approximately \$1,419,120 each. The cost of the American ships, identical in size and speed, was to be approximately \$1,846,800 each. The result is that the foreign ship can make a profit at lower rates for freight than the American ship can. Americans can money ashore. They also expect a larger return than the 2 or 3 per cent.

It is painful to read of the decay and the ownership instead of with the conwould be accomplished by this would be of slight consequence except from a sentimental point of view. The Norwegian concern is a good deal better investment

On Sunday no alarm shock
"To Work!" beats on the tired brain;
What bliss to wake, to scorn the clock strums,
And care worn brows forget to frown,
When Sunday comes.

On Sunday there's no breathless haste
To mill or mart on tireless legs;
And oh, how beautiful the taste,
Of leisure in the ham and eggs!
To munch your breakfast at your ease,
To jeer at time and snap your thumbs.
You only get such joys as these
When Sunday comes.

When Sunday comes the little girls,
Before the glass with huge delight,
Take out of jail the little curls
That they have had in rins all night.
The little boys don "Sunday best,"
Which Freedom's ardent spirit numbs; And by clean collars they're oppressed When Sunday comes.

When Sunday comes how grand to sit,
(When you have dined among your kin)
To read a bit, and doze a bit,
Unit) they bring the supper in,
With music of the jingling spoon
And saucer, while the kettle hums
An extra pleasing Sabbath tune
When Sunday comes.

When Sunday comes with what a glow
A man may puff his pipe and say
(As Horace said some time ago)—
"Lord of myself I live to-day."
So here's to Sunday, three times three;
With glad heart's inward fifes and drums;
And—keep a corner please, for me,
When Sunday comes. When Sunday comes.

# THE ORGIN OF COFEE.

As to the history of coffee, the legend runs that it was first found growing wild in Arabia. Hadji Omar, a đervish, discovered it in 1225, six hundred and seventeen years ago. He was dying of hunger in the wilderness, when, finding some small round berries, he tried to eat them, but they were bitter. He tried roasting them, and these he finally teeped in some water held in the hollow of his hand, and found the decoration as refreshing as if he had partaken of solid food. He hurried back to Mocha, from which he had been banished, and, inviting the wise men to partake of his discovery, they were so well pleased with it that they made him

The story is told that coffee was introducted into the West Indies, in 1723, by Chirac, a French physician, who gave a Norman gentleman by the name of De Clieux, a captain of infantry on his way to Martinique, a single plant. The sea voyage was a stormy one, the vessel was driven out of her course, and drinking water became so scarce that it was disturbed in rations. De Clieux. with an affection for his coffee plant divided his portion of water with it, and succeeded in bringing it to Martinique although weak, not in a hopleless con dition. There he planted it in his garden, protected it with a fence of thorns, and watched it daily until the end of the year, when he gathered two pounds of coffee, which he distributed among the inhabitants of the island to be planted by thefa. From Martinique coffee trees in turn were sent to Santo Domingo, Guadaloupe, and other

neighboring islands. The coffee tree is an evergreen shrub growing, in its natural state, to a height of fourteen to eighteen feet. It is usuomic way in which an American deep ally kept trimmed, however, for consea fleet could be established except by venience in picking the berries, which

permitting the American flag to go with grow along the branches close to the leaves and resemble in shape and color ordinary cherries. The tree cannot be grown above the frost line, neither can it be successfully grown in the tropics. The most successful climate for pro duction is that found at an altitude of about four thousand feet. Anything much above this is in danger of frost which is fatal to the tree; and when coffee is grown much below this, it requires artificial shade, which materially increases the cost of production and does not produce as marketable berries. It is owing to this particular requirement that coffee has never been successfully produced in the United States .-Thomas R. Dawley, Jr, in the September "Success,"

gaged to Miss Pullen for some time,

but their intention to marry did not

meet with the approval of the parents

of either. . The question was

thoroughly debated in joint parental

councils and always with the same

verdict, that both were too young to

think of matrimony. Moore is about 22

years old and did not think this a

reasonable excuse. He persisted in his attentions to Miss Pullen in spite of

parental opposition but met with only a

kind yet firm discouragement of his

hopes and desires. Finally Moore con-

ceived the idea of an elopment, but was

at a loss to arrange the details so that

Miss Pullen's parents would not suspect

anything. In some way they got an

inking of what was intended and kept a

close watch upon the young woman. . Almost in despair at the prospect of

carrying out an ordinary elopement

successfully, Moore hit upon the unique

idea of an elopment on a funeral car. He was to conduct a funeral at Wood-

land cemetery on August 6, and told Miss Pullen to arrange to go to the

cemetry with him in the car. In the

meantime Moore obtained a license for the marriage and instructed Rev.

Miss Pullen arranged to attend the uneral without exciting the suspicion o

her parents and rode with the mourners

and friends to Woodland cemetary,

where the interment took place. Rev. Mr. Hart lives at No. 188 Taylor street, and the couple had to return to the

West side with the car. They allighted on Detriot street and walked to the

home of Mr. Hart, where they were united in marriage. The bride returned

at No. 383 Lawn street, and the mar-

riage was not announced until a few

were forgiven and received the parental blessings. They are now residing at No. 667 Detroit street.—Cleveland-

Hyperion Theater "A PRINCESS OF KENSINGTON" TO-NIGHT.

The "special" train of ten cars bearing John C. Fisher's "A Princess of Kensington" company will arrive from New York at the Union station at 11:15 this morning, the first production in America occurring to-night. It is safe to say, judging from all indications, that the opening performance will be greeted by one of the largest audiences that has ever assembled in the Hyperion theater so early in the season, and that the engagement, which is for three nights and Saturday matinee, will witness a series of large houses goes with-

out saying. Few productions in recent years that have been presented in New Haven come with any stronger endorsement. The opera had its birth at the Savoy theater, London, last season, where it ran for over two hundred nights, and at which theater was given the long series of the Gilbert and Sullivan operas. James T. Powers, who will play the leading comedy role, that of "William Jelf," a sailor on the H. M. S. Albion, was highly elated with the opportunities which the character affords him, and it is safe to assume that Mr. Powers will be seen at his very best, while unusual opportunities will be afforded the English members of Mr. Fisher's company before New Haven audiences. orchestra of thirty-seven pieces will be conducted by J. Sebastian Hiller. K. S. R. A. M., while the stage production itself will be under the immediate supervision of Cyril Scott. In the second act will be seen the military brass band, which plays a spirited English

affliation with labor unions. But practice does not always accord with abstract conceptions of right and wrong, It would be easy to show, for instance that a dozen average citizens, who, as consumers, are interested in securing a low tariff or the abolition of all tariff tuties would not have the same status before the senate finance committee as dozen manufacturers interested in retaining high tariff duties and willing to contribute handsome ly to political campaign funds. Government by party, while best adapted to the genius of the American people, has its weak points, not the least of which is that statesmen n power, in order to retain control, will ometimes ignore a fundamental principle for party advantage. It is assumed that President Roosevelt, in ordering an investigation to ascertain whether, in respect to Federal employment, nonunion labor is discriminated against, is actuated by disinterested motive-by a sincere desire to protect every American citizen in his right to obtain government employment if he possesses the necessary qualifications and the government employment employment if he possesses the necessary qualifications and the government has need of his ser-Organized labor can present no valid \*\*\*\*\*\*\*\*\*\*\*\*\*\*

As an abstract proposition, not even the most ardent and aggressive champion of trades unionism will deny that the government has no moral right, in distributing its favors, to make a distinction between any classes of its citizens. The government ought to be ported by Prince & Whitely, Bankers and interested, of course, in everything Brokers, 62 Broadway, New York; 15 Center which makes for the welfare of the people. Those tollers who believe that combination improves the condition of the vast army of labor are entitled to hold this opinion and to put it into practice. The government should not and will not interfere with them in the exercise of their right so long as this right is exercised without detriment to other classes of citizens. Those who do not acquire membership in labor organizations have the same status. In such matters every man has the right to shap his own course. It is not for the government to say that because a man is or is not a member of a trades union therefore he has a stronger claim upon its consideration than the person who does not possess one or the other of these qualifications. So when President Roosevelt asserts the principle, as he is reported to have done recently, that, all things being equal, no distinction must be made between the trades unionist and the non-unionist, he prescribes a sound rule of action, and one to which organized labor should give ready and

cheerful assent. If organized labor will heed the advice of its best and most disinterested friends, it will pursue a conservative policy in this as in all other matters. It will not be led astray by extremists or idealists, who seem at times to for-, get that the American people are eminently sensible and practical. A Washington dispatch published in the Sun yesterday stated that there is a movement in progress to organize the negro workingmen in the south. It is well known that the most far-seeing and discriminating labor leaders do not approve this plan, and for reasons which must be obvious to ny intelligent perthe nick of time, at the foot of the son. It would be a grievous mistake for church altar. The scene in Grace trades unions to take any step which would demoralize labor conditions in the south. Such a policy would cause labor organizations to be regarded with sussnow storm on the heights of the Jersey picion and resentment in a quarter Mr. and Mrs. J. H. Platt of 1194 Palisades, a wonderfully executed stage where there is now little hostility toward them. Such progress as trades unionists make in this country. which they constitute, relatively to the whole population, only a small proportion of American citizenship, must be achieved by the exercise of common sense, by the avoidance of friction as far as possible with other classes of citizens, and by a liberal and intelligent recognition of the right of Il men to equal treatment. If organized labor pursues this course it will gratify its friends and disappoint its enemies.

# The Low nat and Courter "SAM" PARKS SENTENCED.

NOT LESS THAN TWO AND ONE-HALF YEARS IN PRISON.

The Maximum Limit of Walking Delegate's Punishment Three and One-Half Years in Sing Sing.

New York, Aug. 26 .- Samuel J. Parks, the walking delegate of the Housesmiths' and Bridgemen's union, was sentenced by Recorder Goff to-day to not less than two years and six months nor more than three years and six months in Sing Sing prison.

Parks was convicted of extortion, in having taken a check from Josephus Plenty, a Hoboken contractor, "to call off a strike." On Monday Assistant District Attorney Rand asked the court that sentence be deferred until several other indictments, charging extortion, might be tried. David C. Robinson, seeking to save Parks from a longer term in prison, asked that sentence be passed at once. This was an unusual motion for counsel for the defence to

make in behalf of his client. Timothy J. McCarthy, a fellow walking delegate of Parks, was in court. McCarthy is now under indictment on charges similar to those on which Parks was convicted.

Parks will be arraigned in the court of special sessions on September 15 to receive another sentence. Two weeks ago he was convicted on a charge of assaulting Peter O'Neil, a member of he Plasterers' union, on the night of July 17, at a saloon at Fortyeighth street and Third avenue. It is probable that when the assault case is called on September 15 it will be marked off indefinitely at the request of the district attorney's office.

### TWO AUTOMOBILISTS ARRESTED.

One Machine Was Going Too Fast and the Other Didn't Have License Number.

The crusade against automibilists who persist in exceeding the speed limit or in riding without any license number, now being waged by the local police, resulted in two more arrests yesterday morning. One man arrested is R. Allen Moore, ir., of Kensington, a prsperious manufacturer; who was through this city last Saturday.

Bicycle Policeman Roach caught him going at the rate of twenty-two and one-half miles an hour and also got his number. He notified him to appear at the local police station and Mr. Moore showed up yesterday morning. He will appear before Judge Dow to-day.

Ives M. Allen, who claims to be a salesman for the "Stevens-Duryea" machine, was arrested yesterday morning on a charge of driving a machine without any license number. He maintailed that, being a salesman and not the owner of a private machine, he was not required to carry a license number. A. N. Kendall furnished bonds for him and he will appear before the city court this morning. It is possible that a test will be made of the law in this matter.

### HARMONIE CLUB OUTING.

Successful Affair Was Held Yesterday Afternoon.

The Harmonic club held its one-postponed outing and clambake at Mansfield's Grove yesterday afternoon and evening. There were about 100 in the party and they went to the grove in special trolley cars. One car left Savin Rock, where a number of the members of the club are spending the summer, at 3:30 o'clock, reaching the clubhonse on Elm street at 4 o'clock. Two carloads of celebrators were ready when the first car narrived, and the trip to the grove was made in good time.

Shortly after 5 o'clock the bake, which had been in preparation for some time previous, was ready and all partook of the excellent sea food and other substantials heartily. The remainder of the evening was spent in dancing at the pavilion overlooking the harbor, and a fine time is reported by all. The party returned to the city late at night. BROKE FINE MIRROR. While workmen were engaged in putting the fine large mirror in place in the west window of the Besse-Richey company last night one of the supports slipped and the mirror was smashed. Its breaking made considerable no ise and attracted much attention.

COLUMBIA REBEKAH OUTING The ladies of Columbia ledge, Daughters of Rebekah, spent yesterday at Smith's South End. There were about sixty present and the entire day was spent most informally. A fine shore dinner was served by Landlord Smith.

# OBITUARY NOTES.

William Button.

William Button, at one time a well-known figure in New Haven and the owner of considerable real estate, died Tuesday at his

siderable real estate, died Tuesday at his home, 31 Davenport avenue, at the advanced age of ninety-one years and sixteen days. It was after Mr. Button that the city street of that name was called.

Mr. Button saw New Haven grow from what was practically a village to its present size. He knew all the old families and could talk interestingly of the development and growth of the city.

Arrangements for the funeral are not yet completed, but the services will very likely be held to-day.

RALPH LINSLEY. Ralph Linsley, aged forty-nine years, old-est son of the late Deacon William Linsley, died at his home, "Lynwood," in Branford, Tuesday evening after a long and lingering

The decensed was born in Branford and had lived there nearly all his life, assisting his father on the farm. After the death of his father he continued to conduct the afhis father he continued to conduct the af-fairs of the farm as well as falling health would enable him to. He is survived by a widow and two daughters, Harriet and Ger-trude; an invalid mother, one sister and one brother, John Linsley, of New York. The functal services will be held to-mor-row afternoon at 2 o'clock at the late rest-dence.

ALMA KORTE. Funeral services over the remains of the late Alma Korte, who died in New York city, were held Tuesday afternoon at the Evergreen cemetery chapel, Rev. Mr. Thum officiating.

CANNON ASCENSION TO-DAY.

Opening of Three Days of Ballooning at Rock To-day.

The festival of ballooning at Savin Rock opens this afternoon with a cannon ascension. This feature is one of the most sensational mid-air acts known to aeronauts of the present day and will be accomplished by a daring performer. To-morrow afternoon there will be a single ascension and on Saturday a double.

The evening flights will all be accomanied by fireworks and splendid spectacular aerial scenes will be afforded. The ascents will be made from the baseball grounds after the theater both afternoon and evening and will be well worth seeing. The American Balloon company has arranged to have a wagon and a launch ready to recover the balloon after each ascent and in this way both land and water will be covered in case of an emergency.

### FIREWORKS.

To-morrow night in addition to the extra attraction of the balloon ascenion the usual elaborate display of fireworks will be given.

### THE THEATER.

"Too Much Married" is having a most successful run. Its corps of fine enteralners, its funny situations and fine specialties afford a rich two-hour amusement.

### THE OLD MILL.

This always-to-be-remembered at-traction is still doing a rushing busi-ness. Don't let the season pass without going through. You will feel rathe cheap at the whist table this winter if you have not been through when your companions begin to discuss its pleasares and mysteries.

ATWATER'S ORCHESTRA. The enjoyable afternoon and evening concerts in the park which have been such an enjoyable feature at the Rock continue to be heavily patronized.

Mrs. Mollie Allen of South Fork, Ky., says she has prevented attacks of cholera morbus by taking Chamberlain's Stomach and Liver Tablets when she felt an attack coming on. Such at-tacks are usually caused by indigestion, and these tablets are just what is needed to cleanse the stomach and ward off the approaching ottack. Attacks of billous colic may be prevented in the same way. For sale by all druggists.

HOME FROM SUMMER OUTING. Master Willie Schnefer of the Commercial house has spent his summer yacation at Warren, Ct., and on Saturday last his mother, Mrs. Schaefer went to Warren and returned with hin

### Not Over-Wise.

There is an old allegorical picture girl scared at a grasshopper, but in the act of heedlessly treading on a snake. This is paralleled by the man who spends a large sum of money building a cyclone cellar, but neglects to provide his family with a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy as a safeguard against bowel complaints, whose victims outnumber those of the cyclone a hundred to one. This remedy is everywhere recognized as the most prompt and reliable medicine in use for these diseases. For sale by all druggists.
