AN EXASPERATING FLUKE

WIND FAILS WITH THE RE-LIANCE WAY AHEAD.

The Shamrock but a Paint Blur on the Horizon When the Race is Declared Off-Waning Interest in the Contest Few Excursion Boats on the Course

-Wringe Bests Barr at the Start,

New York, Aug. 31.-Again to-day failed to register her third victory over perating because her ultimate triumph is now conceded, even by Sir Thomas a half astern of her when the commithimself, to be simply a formality. The tee boat signalled that the race was off. superiority of the Herreshoff boat in Both immediately took in sail and were any kind of weather is acknowledged by the yachting critics of both sides of the Atlantic and to-day's fluke only

The waning interest in the cup race was strikingly illustrated by the size of the observation fleet, if the ships which went down to the ocean race course today could be dignified by such a title. Dutside of the revenue cutters, which patrolled the course, it consisted of half sionen side wheelers with almost empty decks, a few sea-going tugs and Lipton of a memento from the Ameria score of steam yachts.

had served to knock down the sea somewhat, although it was enough during the first two hours of the race a meeting held at the Waldorf: to make the excursion boats tumble about a good deal and the yachts to outer mark. But as the day wore on the wind hauled to the north and fell to a mere zephyr, hardly strong enough to round out the enormous canvases of the sloops and the sea subsided to a smooth surface. The race was spiritless from the beginning. It was laid fifteen miles to windward up the Long Island shore and return. Its saving feature was the start, in which Captain Wringe, by a pretty piece of manoeuvering, neatly turned the tables on the Yankee skipper and captured the windward berth. Even so, the yachts crossed the line abreast like a harnesse team of horses. But within fifteen min uets the defender was showing her heels to the challenger and when the float at the outer mark was reached she rounded the mark twenty minutes and tweny-three seconds ahead of her rival, In the five times the boats have met this was by far the worst beating Shamrock III. has had in windward work. The only interest which remained after that was as to whether Reliance would be able to reach the flinsh line in time to score the race.

lightship until 10:45 when the Navigator signalled that the starting line would be shifted and the race postponed until later in the day. After running five miles south from the lightship the Navigator signalled a windward and leeward course, east northeast, from which direction a five knot wind was blowing. The easterly gale had left a long heavy sea running and as the paign in behalf of the democratic state yachts jockeyed about the starting line they lifted their long bows high out of the water on top of the swell and pounded the sea into a froth.

For the first time in the series Captain Wringe of Shamrock III. cleverly outgeneralled the redoubtable Captain Barr in the preliminary jockeying. Until five minutes before the start Captain Barr held the windward berth. Then both ran away from the line, the Shamrock leading. Two minutes before the staring gun the Shamrock headed up into the wind, tacked, forced Reliance to do the same and both ran for the line, Reliance leading. They reach- and the witty lines of the play kept ed it before the starting gun and Reliance had to run along the lee side of it to await the gun. Shamrock reached the line as the gun sounded and, not having to sheer off, secured the weather position. It was a trick which Captain Barr had worked often, but never with better finesse or more satisfactory The official starting time of both yachts was 11:45:26.

The first tack, five minutes after crossing the line, put Shamrock III. ahead, but under the lee bow of Reliance. Captain Wringe gave his boat a dent of the Russian council of minis good full and the way she began to ters, which is merely an honorary post walk away from the defender made it look as though she had found herself he is leaving, is a position of great at last. But this was for only a few power and influence. The change pracminutes. When he began to pinch her tically amounts to putting M, de into the wind it was apparent that Reliance was outpointing the challenger and altogether making better work of it. They held on one tack east southeast for nearly an hour. During that time the defender worked up to windward a good quarter of a mile. When Reliance tacked Shamrock III, refused to follow so Barr put his craft on the the charge of conspiracy to provoke port tack again. This placed Reliance riots in an endeavor to lynch a negro a mile north of Shamrock III. Fifteen murderer. Martin is alleged to have minutes later the wind suddenly shifted to the northeast and placed the American boat that distance dead to windward, not half which she had actually earned. From that time Reliance gained steadily. The yachts could head within two points of their course. They held the tack for twenty minutes and then made short hitches in which Reliance steadily got the better of it. When off Long Beach at 1:45 the defender was two miles ahead, having added the second mile by literally outpointing the challenger and at the same time maintaining equal speed. The mark was then in plain view and the wind was softening. After a long board off shore Reliance made several hitches, which the White State line steamer Celtic, brought her to the turn. The population of the islands is satisfied to remain under Danish rule. The interest of Denmark in the islands, an improvement of economic conditions and the fostering of civilizing influ-

It is believed, says the National Zeitung, that the commission will report in favor of reducing the military establishment on the islands and reorganizing the gendarmerie on modern lines. The report will also suggest that more attention be paid to public instruction, the improvement of the hospitals, the tobacco-growing industry and the raising of corn.

The commission places great weight on the necessity for communication be-tween the islands themselves and with Denmark. The belief is expressed that the exports of the islands can be developed; and in this connection hopes are based on the newly-formed West Indian Steamship and Land company.

FASHION SHOW IN NEW YORK.

Women's World Exhibited at Madison Fquare Garden.

New York, Aug. 31.-The fashion show opened to-night at Madison Square Garden for a run of two weeks, with a great crowd in attendance. IN NEW YORK HOUSE.

Dr. Eaton, of the Firm of Eaton Mains, Indiguant at the Report-Declares Attack at Los Angeles Due to Politics in the Church-Also Says There is Not a Cent of Shortage.

New York, Aug. 31. - Inquiry was made to-day at the offices of the Methodist book concern, regarding a dispatch published this morning alleging a shortage of \$634,000 in the New York office. The Book Concern is the official publishing house of the Methodist Episcopal church. The business is under the general supervision of the book committee of the Methodist church, and the firm of Eaton & Mains is the Eastern publishing agents. The present report comes from Los Angeles, Cal., but no one is named as backing up the

The Rev. Dr. Homer Eaton, the senior partner of Eaton & Mains, made the following statement to-day:

"The dispatch from Los Angeles Cal. alleging a shortage of \$634,000 in the New York Book Concern, is utterly and maliciously faise. The statement that Eaton & Mains, the New York publishing agents of the New York Book Concern, have made to the general book committee a report that does not reach the public, is also utterly and maliciously false. There is not a shortage of one cent in the Book Concern. At the end of the fiscal year of 1990, the agents of the New York Book Concern, by direction of the general book committee, cut down values of real estate, merchandise, accounts, etc., charging the same against capital stock. A large amount was thus taken off from our inventory values, since which time the real estate merchandise, electrotype plates, machinery, etc., have been carried in our inventory at less than their actual cash values. So far as keeping this matter from the public, the statement of such reduction was printed in our annual exhibit, and sent out to all the papers of our church, and presented to each annual conference for the information of all interested parties.'

Morristown, N. J., Aug. 31.-"More politics," said the Rev. Dr. Homer Eaton, when asked about the report from Lost Angeles that the Methodist Book Concern shows a loss of \$534,000 in the New York branch. Then, taking a piece of paper, he write:

"By order of Book committee we cut down values of real estate, merchandise accounts, etc., and charged the same against capital stock. There is the whole explanation of the loss. These people who are sending out such reports will kill themselves if they keep on. I know where the reports come from, and charge of the Chinese missions on the one else. This report would seem to indicate that it was so."

Dr. Eaton then took down two volumes of "Proceedings of the Book Committee" for 1901 and 1903 and proceeded to show the condition of the concern of which he is the head. The report of the New York branch of the Book committee for 1800 showed assets of \$2,025,738.22, with Habilities at \$1,656,201.08, and a total indebtedness of \$369,537.14. In the same report appeared this item: "Deducted from net capital as per instruc-

tions of Book committee, \$634,298.25," "Now," said Dr. Eaton, "that was the condition of the Book Concern three years ago, and the conditions to-day, as seen by the report of this year, show that our indebtedness is almost entirely wiped out. Last year we made a net profit of nearly \$150,000. The year before it was \$120,000, and the year before that \$85,000. Does that look as if the concern was running behind? You will observe that no direct charges of any kind are made. If I have done anything wrong the thing to do is to make specific charges and bring me to trial before my conference.'

Los Angeles, Cal., Aug. 31,-According to reports here the small shortage in the San Francisco end of the Methodis Book Concern falls into insignificance in view of further allegations of a

York. Eaton & Mains, the New York publishing agents of the Book Concern, have made to the General Book committee a report which does not reach the public. This, it is declared publicly here, shows a loss in the business of the New York Book committee amounting to \$634,298.25, in addition to a net loss at San Francisco of \$3,514.98.

An investigation goes to show that the talk of letting the facts concerning the San Francisco management become known, began with the esit to this city early in July last, of a sub-committee sent here to close up affairs in connection with the meeting of the general conference next spring. This committee was composed of O. P. Miller of Rock Rapids, Ia.; J. E. Andrews of New York; W. F. Whitlock of Delaware, O., and the Rev. Harry Spellmeyer of Newark, N. J.

Short Beach, Conn., Aug. 31.-Bishop D. A. Goodsell of the Methodist church who has his summer home here, left for New York this morning. It is believed his visit has something to do with the reported shortage in the New York end of the Methodist Book Concern. According to reports from San Francisco there are allegations of a shortage of \$634,000 in New York. Before leaving Bishop Goodsell said to a representative of the Publishers' Press:

"Those in a position to know say the story of a shortage is untrue. But those

RUSSIA AND JAPAN.

Proposal of Modus Vivendi is Making Progress.

London, Aug. 31 .- Regarding the proposals for a modus vivendi in the far east, submitted by the Japanese minister at St. Petersburg, which contemplate a formal declaration and recognition of the respective rights of Russia and Japan in Manchuria and Corea, Baron Hayashi, the Japanese minister here, said to-day that he must decline to discuss the pending negotiations; but he expressed the most hopeful view of an honorable and amicable settlement of the differences between the two countries.

"It is my belief," he said, "that any small causes of friction with Russia will be ultimately settled. In the matter of Corea it cannot be too clearly stated that Japan does not seek anything fresh there. We have interests in Cores which we shall naturally maintain, but I do not see any very se rious cause for trouble, either in regard to Codes or Manchuria. Russis has promised the United States to evacuate Manchuria in October, and there is no rom to doubt that she will do so."

At the same time regret was express ed by other members of the Japanese diplomatic corps at the promotion of M. Witte (the Russian finance minister) to be president of the council of ministers which the Japanese regard as being a victory for the Russian war party. The Japanese fear that M. IDENTITY OF BODY.

Man Washed Arbore at Shippan Point May be Boston Man.

Stamford, Aug. 31.-It is believed that the body of a man washed ashore Saturday at Shippan Point was that of C. Dunbar, a passenger on the Stonington ine steamer New Hampshire. A letter was received to-night by the undertaker in charge of the body from the superintendent of the Stonington line saying that a passenger who signed himself "C. Dunbar, Boston," was assigned to stateroom No. 9 on a recent trip of the steamer, on August 21, and that he was afterward missing. His stateroom loor was locked and it was supposed that he committed suicide by jumping overboard from the window of the oom. The letter adds that Dunbar acted queerly and appeared to fear that some one was following him. The numper of the staterooms corresponds with that on a key in the clothing of the body, marked "New Hampshire No. 9." The body was buried to-day.

Shot Girl He Loved.

Richmond, Va., Aug. 31.-Herbert B. Bates, son of Assistant City Engineer Frank T. Bates, to-day shot and killed Miss Rena Gentry at her home in this city and then killed himself with the same weapon. Mr. Bates and Miss Gentry had been keeping company since they were small children and the young man was madly infatuated with with the young lady. It is believed that she did not return his love. Bates, who was twenty-four years old, was note clerk at the First National bank. An examination of his books showed his accounts to be correct to a cent. It is believed his mind was affected.

Dan Patch Falled.

St. Paul, Minn., Aug. 31.-Sixty thousand people saw Dan Patch unsuccess fully attempt to lower his world's pacing record of 1:59 at the State Fald grounds to-day. Despite the fact that the great pacer had gone against time last Friday at Readville, Mass., and had been almost continuously on the cars until to-day, he went a mile in 2:00 flat. The day was ideal, being warm, with scarcely a breeze stirring, and the track was in first class condition. Time by quarters: 30; 59 3-41 1:30 1-2: 2:00.

Saginaw, Mich., Aug. 31.-Martin Duffy of Chicago, the welter weight champion of the world, and Gus Gardner of Philadelphia, champion at 135 pounds, fought ten rounds to a draw here tonight. Gardner was outweighed by Duffy nearly fifteen pounds, and considering the discrepancy in weight fought like a demon. Duffy tried hard to put him out but could not hit hard enough.

ENORMOUS TRAFFIC.

Great Influx of People From the Shore Resorts

This is the week of home coming for those who have spent the greater part of the summer at the various shore remorning, so that every train on the Consolidated road was filled to its capacity and in many instances it became necessary to make the train in two sections in order that the crush of people might be lessened and the traffic taken care of. All during the day yesterday of many kinds and rushing hither and thithr to get onto the right train and kept the accommodating employes of the road busy answering quieries. The crowd at the depot was almost as great as though there had been some big pub-He fime going on in the city.

The train due to leave here at 1:35 in the afternoon for New York was filled ot its capacity when it arrived and this was despite the fact that there were fifteen cars in it. In consequence of the demand for accommodations it was necessary to run the train in two sections and although there were twenty cars available in the two trains yet there was not more than enough room and many could not find seats. It was the same during the entire day and the trainmen expect this rush to continue during the rest of the week.

Jacobs epresents the plaintiff. The case is returnable in the common pleas court on October 6.

ANSWER FILED. In the city court, civil side, White, Daggett & Tilson, counsel for Charles H. Cook, president of the Co-operative Rubber company, have filed an answer to a suit brought against the company in the city court, civil side, last June by Charles Cook. The suit was brought for Cook by Carleton E. Hoadley to re-

n the suit. Charles Cook, a minor, was engaged by Charles H. Cook to visit a rubber plantation in British Colombia, South America. The plaintiff alleges that the feet. contract for his services was made by his mother, Mrs. S. E. Cook. He was to receive expense money and a stated salary, for which he was to oversee the work of gathering rubber on the South

over balance on wages due, as alleged

American plantation, When young Cook arrived in South America he found that there were only one man and one woman there. After suffering from fever, insect bites and various vicissitudes for which his mother received no part of the salary contracted for, his mother brought suit to recover the salary overdue. Then the company discharged him. Cook left here n December, 1902, and returned the folowing May.

The defendants in their answer deny the alleged contract with the plaintiff's mother and claim that young Cook did nothing for which any salary is due. The case will be tried next month.

ENTERTAINMENTS.

Hyperion Theater.

Charley G. Grapewin, who comes to the Hyperion Friday night, September 4. is one of the latest graduates from the ranks of vaudeville, in which he has been highly successful as one of the foremost headliners during the three years past. As a character comedian he is said to shine particularly, and his work in the name part of the new play, "Mr. Pipp," it is claimed compares fav-orably with Mr. Mansfield's Baron Chevrail, Jefferson's Rip, or Denmar Thompson's Uncle Josh.

In the supporting company will be found a number of well known players, among them George Thatcher, the longtime favorite minstref comedian, who will appear as "The Man About Town," a character which has been especially written for him and in which he will be seen for the first time, sans cork.

Anna Chance, a sweet and demure ingenue, is leading lady of Mr. Grapewin's company and will enact the role erday. They will probably all be tried of Mrs. Pipp, a part in which she has scored successfully in other cities and for which she has been warmly com-

> Sallie Stembler, another vaudeville favorite, has been engaged by Manager Tuck for the principle soubrette part of Dropsey, a comedy character drawn upon somewhat novel lines. Miss Stembler is said to be possessed of a rich soprano voice of high range and will be heard to advantage in a number of new musical selections.

Al. W. Maddox, a young comedian of mise, will create the swift messenger boy, and Fred Wayne, that of a dudishly inclined young man patterned after one of the cartoon subjects in a prominent newspaper. Mr. Wayne is also a singer of now mean

Then there are Ida Van Sielen and J. Royer West, who are said to add materially to the entertainment with high class musical selections. Miss Van Siclen is also an actress of acknowledged ability and fair to look upon.

A big feature of the production is said to be the specially selected society girls, all of whom will wear gowns of the latest fashion and of stunning patterns-a number of them imported. There are sixteen of these young ladies and Manager Tuck has occupied all his time this summer in picking them out.

"Mr. Pipp" is in three acts and five scenes (all of which are carried by the company), and was written by George Totten Smith, author of "The Knicker bocker Girl," and Mr. Grapewin, and it is said to abound in numerous laughprovoking situations and climaxes running through a story of lively interest from beginning to end. Seat sale Wednesday. Prices \$1.50, \$1, 75c, 50c.

The dramatization of Dwight Tilton's widely read novel "Miss Petticoats" with Kathryn Osterman as the star, is one of this season's important theatrical offerings. Those who are familiar with the book will be interested to learn that the principal scenes and incidents n the story have been preserved in the play. "Miss Petticoats" comes to the Hyperion on Friday and Saturday, Sepember 11 and 12.

"The Silver Slipper" comes to the Hyperion on Friday and Saturday, September 18 and 19, with matinee Satur-

Klaw & Erlanger's great musical production "The Billionaire" will be held at the Hyperion on Wednesday, September 23. Jerome Sykes will be seen in the leading role.

Grand Opera House.

The popular cartoon comedy extravaganza "Alphonse and Gaston" took as exceptionally large audience by storm at the Grand opera house last night and scored an immense hit. The performance was the opening one of the season of 1903-4, and if the enthusiasm with which it was received may serve as a criterion, and New Haven audiences never flatter, the production this year will be even a much greater success than last year. It was generously received everywhere and this year it has been entirely changed bringing it up to date in every particular, and the funny Frenchmen who have a world wide reputation for frivolity are ably assisted by a clever company of actors and

The dialogue is new and original and many distinctively original sayings keep the audience convulsed with laughter. The musical selections were enthusiastically received and many encores were responded to. The \$10,000 jewel effect in the third act should be seen by all.

There is the merest semblance of a plot and for this reason the fun is perpetual. The costuming is supreb, the chorus girls shapely and the scenic and stage effects strikingly beautiful, which are which are enhanced by lime light effects.

"Alphonse and Gaston" will be seen at the Grand again to-night and to-morrow night and Wednesday matinee.

"The Factory Girl" is the title of a new comedy drama which will be the attraction at the Grand opera house Thursday, Friday and Saturday this week with matinee Saturday.

The carloads of special scenery and a ompany of over thirty people, including a bevy of pretty girls and several well known vaudeville headliners, are among the features of the production. An exchange says of the production:

The initial performance at the open-ing of the season at the Bijou theater yesterday afternoon was a pronounced success. At both the matinee and evening presentations of "The Factory Girl" every seat in the house was occupied and the audiences were especially pleased with the show. It is of the melodrama class rather above the ordinary in character and was presented by a very large and very competent company of players. Many strong scenes were presented in which the audience evinced deep interest and frequently showed appreciation by liberal applause. The scenery was particularly good, the wheel pit and its surroundings being perhaps the strongest and most exciting of the entire play. "The Factory Girl" was a decided hit.

COST OF ENGLISHMEN'S SHOOT

The extent to which the letting of moors and forests has become recognized as a regular source of income to lord and laird alike in the Highlands, may be judged from the increase in the number of deer forests now annually let. Twenty years ago there were ninety recognized forests. A recent report from the Crofter Commission, showed one hundred and nine of these forests. To-day there are one hundred and fifty. Shootings and forests which let for upwards of four or five hundred pounds s year may be counted by hundreds. In the two counties of Argyll and Inverness alone there are a dozen dorests whose rentals average twenty-five hundred pounds. Here the cost per day will dwork out at over forty pounds, exclusive of wages of attendants. The tendency of price is constantly upward. Captain Heywood Lonsdale will be interested to know that Coignafearn, the forty thousand acres of which he rented last year for two thousand pounds, was originally let by the Mackintosh of the thirties for thirty pounds, with five

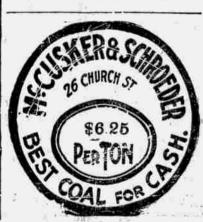

pounds returned as "luck-penny." The foregoing is typical of the rise in rents which has resulted from the eager competition for forests and moors. Invereshie, when it was good enough to afford a bag of seventy-five brace to one man and a dog, the shooter armed with only an old flintlock, fetched fifty pounds; now it is a four-figure shooting. Mr. George A. Cooper is paying fifty-five hundred pounds for his forest, forty-seven hundred pounds to Sir G Macpherson-Grant for his share of Glenfeshie, and eight hundred pounds to 375 Howard Avenue, 18 Rosette Street, Theodore Mackintosh for his portion. 155 Lloyd Street. Theodore Mackintosh for his portion. M. Achilles Fould has Invermark at £3,850; Mr. William Weir, Achnacarry for two thousand pounds; Lord Burton Glengunich for £3.022; Mr. Frank Bibby, Mamore at twents-five hundred pounds. For Invercauld, five thousand pounds for the season is asked. For three thousand pounds less Runecht is let. At about two thousand pounds many moors and forests are now being used. Then, to this must be added cost of traveling, one pound a week for each of the gillies, one pound a week for ponies, healers and drivers, of whom there may be thirty or forty, at four shillings a day. Dogs cost from five pounds to

A Remarkable Record

Chamberlain's Cough Remedy has a remarkable record. It has been in use for over thirty years, during which time many million bottles have been sold and used. It has long been the standard and main reliance in the treatment of croup in thousands of homes, yet during all this time no case has ever been reported to the manufacturers in which it failed to effect a cure. When given as .670 soon as the child becomes hoarse or even as soon as the croupy cough appears, it will prevent the attack. It is pleasant to take, many children like it. .516 It contains no opium or other harmful .489 substance and may be given as confidently to a baby as to an adult. For New Haven, graduating from there sale by all druggists.

Bridgeport, Aug. 31.-With ardor dampened by the heavy rain which has fallen for the past two days, a lack of interest was shown in the celebration of Old Home Week to-day. A parade of automobiles scheduled for the morning took place, but only fifty machines were in line, not half the number expected, while the ball game between the Bridgeports and New Havens had to be postponed on account of the poor condition of the grounds. The automobile races which were to have been held at Seaside park this afternoon were also put off, the track being covered with

mud three inches deep. While the decorations in the business section of the city are up, residents on the outskirts have as yet had no favorable opportunity to hang theirs.

This afternoon the big civic and military parade took place, with nearly nine thousand in line, under the direction of Grand Marshal R. N. Burroughs, Heading the parade were a number of the local police under command of Superintendent Birmingham, closely followed by the entire Fourth regiment, under Majors Fitch and Hurley, four sections of the Machine Gun battery, the First from Hartford, the Second from New Haven, the Third from New London, the Fourth being the local section.

Following the military section of the parade were the various societies, including societies from Norwalk, Danbury and New Britain. GREEN LICE ON SMALL TREES.

The almost universal prevalence of the green lice on apple, pear and plum trees throughout this and other States nduces me to offer the following formulas for the destruction of this pest. Dissolve one pound of whale-oll soap in five gallons of soft water and dip the affected branches, being sure to touch all the insects. If but a small colony of them is left they multiply so rapidly that you will soon be obliged to go over the trees again; in fact, it may be necessary to go over them two or three times. Another effective remedy is to ise one pound of leaf tobacco to four gallons of water, thus making a strong tea; wash the branches as in case of

This brought the thanks of the French government to the crew in general and the gallant young major

The chief justice of Delaware thus severely says; Our greatest financiers are racking their brains to circumvent the law and the people, and by lawlessness achieve wealth, being careful only to keep outside of actual violence and the common jail. Captains of industry, how much of the unrest, the mob viotence and the labor troubles of the time have been bred and fostered by your methods? We ask for an answer.

The Richmond Times-Dispatch thus complains: "Progress is an iconoclast, and obliterates 'old landmarks' without mercy. The Dismal Swamp of Virginia is one of our natural curiosities, and the Lake of the Dismal Swamp has been the subject of song. But the water from the lake has been largely drawn off for commercial purposes, and now we are told that the Ohio capitalists and farmers who recently purchased 20,000 acres of land in the heart of the Swamp are rapidly cutting the timbers away and draining the lands and putting them in arable condition."

It appears that poor old Turkey has among her "questions" a race suicide question. Fifty years ago the rule among Turks was to marry young and to espouse several wives, and as a rule families were correspondingly large. Now all this is changed. Marriages are late, and in the enormous majority of cases are monogamous, while families are becoming small to a degree which has alarmed the government. The sultan has recently promulgated an irade on the subject, abolishing much of the expensive display connected with Turkish marriages, and condemning present tendencies as threatening to depopulate the empire.

D. S. Farmer has brought a novel suit for slander in Macon county, Missouri. He asks the Circuit court to give him \$7.500 of B. F. Jenkins' money because, as he alleges, the latter told him by telephone that he (Farmer) had squandered \$300 or \$400 of the money of the Lunday & Zion Telephone company. Mestag, the eminent Dutch marine painter, has just presented to the Dutch government, for the nation, a princely collection of art objects. The famous Barbizon school of French painters is particularly well represented. There are twenty pictures by Daubignh, twelve by Corot, three by Millet, seven by Rousseau, and ten by Diaz. The most famous Dutch artists, mediaeval and modern are also well represented. ANOTHER FUTILE TRIAL.

No race vesterday, and all concerned ire sorry, because there is a general desire to have the performance over. If there had been wind enough the wellnamed and well-manned Reliance would have won, as usual. There will be another trial to-day, and if there is wind enough, and not too much, and if the Shamrock doesn't surprise everybody, he melancholy and long-drawn-out 'contest" will end

Though Sir Thomas and his supporters are discouraged they do not wail. They must, however, feel that their predicament is what a gifted reporter once described as "a sad ending of a brilliant future." They had high hope, and they did their best. But that best doesn't look great when compared with the doughty deed of the modest yet confident builders and backers of Reliance. It seems pretty plain now that the United States can beat all creation in yacht-building and yacht-sailing, but this is the time to beware of that pride which goes before a fall. Perhaps the next time will be our time to fall from the proud perch we occupy in yachting. And perhaps it wont. We can at least

AN INTERESTING QUESTION.

A committee of the Prussian parliament in its consideration of a bill (which became a law) "to prevent the disfigurement of places remarkable for their natural beauty" dealt with a matter which has growing interest in several countries, including the United States. It was urged before the committee that where a small land owner who has won a scanty yield from his stony field, is enabled to get an additional rent in excess of the annua yield of the land by permitting the erection of a large advertising board he is entitled to compensation for its removal. The view that was accepted, however, was that employment of the surface of the land for a purpose so far removed from its common and ordinary use does not constitute a proper case for compensation. It was proposed only to extend accepted legal principlessuch as large restrictions long ago placed on the use of landed property, in the form especially of building regulations-so as to bring within the scope of public regulation both the protection of aesthetic taste and the preservation of landscape beauties.

MUCH LIKE US.

It appears that our English cousins, or brothers, don't get ready for war any better than we do. Perhaps it runs in the blood. The state of unpreparedness for the South African war, or any war, was such that it can only be described as appalling, says the report of the commission of inquiry. There was no clothing reserved except scarlet, though it had been known for years that khaki would be wanted in the next campaign. The Lee-Enfield rifles were wrongly sighted and would "not hit a haystack," in the words of a distinguished witness, and 66,000,000 ounds of service bullets were useless The navy, having a supply of ammunition and boots, saved the situation and prevented drawing on India. There was no reserve of saddlery, few horseshoes and no mules, while the cavalry sword, in the words of General French. was the very worst that could possibly be used, and there were only eighty in reserve. The two army corps for foreign service had neither transport nor animals. Furthermore, there was not a penny of expenditure for the most essential preparations until three weeks before the war. There was no scheme for organizing the services of the home and Colonial volunteers, no maps, no plans of campaign or scheme of defense. "Nothing had been thought of," is the constantly recurring criticism of the commissioners. And the War office disregarded its duties, refused to listen to advice, neglected repeated warnings,

OIL KNOUGH YET.

It doesn't now seem probable that the world will have to stop going for want The record of the production of petroleum in this country for 1902 has been made up. The production of crude petroleum was greater than that of any previous year; there was a slight decrease in the production of the Appalachian field, and a slight increase in the Lima-Indiana field; the general average price for crude petroleum was less than in any year since 1898; stocks held in the Appalachian and Lima-Indiana fields showed a considerable decrease, principally in the Appalachian field; the exports of petroleum in 1902 were less than in 1901; no new pools were discovered in 1902. The total production in the United States of crude petroleum in 1902 was 80,894,590 barrels as against 69,289,194 barrels in 1901, an increase of 11,605,396 barrels, or 16.5 per cent, over that of 1901, and 27 per cent. over that of 1900. The greatest portion of the increase in 1902 came from Texas and California, the gain being 5,830,994 barrels, or 132.7 per cent. for Texas, and 5,187,518 barrels, or 59 per cent. for California, as compared with their respective productions in 1901. The increase in Indiana in 1902 was 1,723,810 barrels or about 30 per cent. over that of 1901. Louisiana produced for the first time in

THE CRUISE OF MIKE WALSH. Among the exciting incidents related in Ralph D. Paine's story in Septem-Outing of fibibustering off Cuba in 1896 perhaps the most amusing is that of Mike Walsh's cruise in an opera boat. His return described as follows:

"A boat was lunging shoreward, a ow, mert lump of a craft, walloping over the climbing seas like a cow over hurdles. A rag of blue fluttered from an oar raised in the bow, and the figure of a solitary occupant seated in the stern gleamed white from the

fell on the neck of the gunner's mate. His bare chest was burned red and made a striking background for elaborate devices in tattoing, of which the most conspicuous was the legend, in a wreath, 'Home, Sweet Home.' Mike threw us off with affectionate protest: 'God bless yez, an' I'm glad to reach me happy island, but first let me deliver me cargo, and then I'll tell a few chapters of me log. I've been to the coast uv Africy and back, with a crew that made me weep continuous. An' me only shirt is blown

As 'ye may guess, the wind shifted, and I came drivin' back, and by a miracle of luck, which has served me in times past, fetched up on this key. It was the smoke of camp-fires that steered me to a landin,' and there wuz considerable rowin done to make it. I don't think me crew will be sittin up and takin' notice for some time' "

Found to be a Splendid Medicine and a Nourishing Food.

Wrapped in it somewhat uncoutly casement there is in the common ground pea a storehouse for medicinal and food products. Chemistry is un folding its value. When the Czar of all the Russias a few years ago had his armies fed on a preparation made from the pinder, or ground pea, at once 1902, the production being 548,617 bar- as an aditional point of merit, the enwholesome and palatable, with economy

rels. The increase in the production tering wedge was driven, which has of Kansas was 152,598 barrels, or about since been opening an increasing public 85 per cent. over 1901. Kentucky and appreciation of the hidden values of Tennessee increased their production in this humble farm product. Germany the manufactured endderine is derived 1992 by 47,799 barrels, or nearly 35 per saw it, and to-day the kaiser's army is from the pinder itself. ent. Indian Territory increased 27,000 served regularly with bread and porbarrels and Wyoming 850 barrels, as ridge made largely from the peanut. German chemists under the direction of the government, have been some time endeavoring to extract the active principle of the ground pea for service in concentrated, palatable liquid form.

Some time during 1901 Dr. D. H. Ramsaur, then of Rome, Ga., conceived the idea of an elixir of peanuts as a soda fountain beverage, but all of his experiments proved to be failures for the reason that while he did succeed in makgreen, I love to see her anywhere, if I the truth ing the clixir, it would not mix with water so as to form a pleasant drink. In January 1903, W. B. Nethery, Ph. G. when I gaze on her parent, who's as formerly of Canada, became associated with Dr. Ramsaur, and opened a laboratory in Anderson, S. C., and continued to pursue these experiments with the same end in view.

In what he call "penderrine," he has an elixir which contains a large percentage of the medicinal and food prop erties of the pinder, and is compatible in all proportions with carbonated or plain water, and at all temperatures, One part of elixir to seven of water affords a most delicou

The pinder contains oil starch, gluter and many other chemical compounds None of these are readily assimilated by the ystem until they have been disgusted. To aid in this process the pinders are first cooked, then digested by a chemical process similar to but slower and more thorough than that human or other animal.

The next step is to segregate the dl gestible from non-digestible portions. The digestive agents employed are peptin zyme, pancreatin diatase hydro chlorio acid and others. The excess of hydrochoric acid is removed by the use of sodium carbonate, which tends to sapponify the indigestible fats and forms with the hydroloric acid common salt, which goes to the bottom while the soapy substance which is in soluble to the top and is easily skimmed or may be removed by means of a cenrifugal machine.

Now we have the gober juice ready for incorporation into the elixir. This juice of itself is very sweet, like a syrup, and in order to be rendered palatable requires only to be combined with tasty, patable armomatics. But in this the greatest care must be observed, for there are entirely reliable. In days of synthetic chemistry one scarcely knows whether his pineaple extract came from the juice of the fruit whose name it bears or was made

RUBBER SHOP STRIKE.

Determined-Enthusiastic Meeting Last Sight.

Despite the fact that forty-nine of the rubber shop girls who went out on strike returned to work yesterday, the ardor of the other girls, nearly six hundred in number, is not in the least dampened and there are at present absolutely no prospects of their returning to work until the company has made some concessions, if their present attitude is to be maintained.

An exceptionally large and harmonious meeting was held in St. Patrick's hall last night and there were evidences on every hand of the intention to remain firm in their decision to stay out. It was arranged that pickets be posted and an effort made to have those girls leave who returned to work and thus prevent a failure of the strike. The picketing will commence this morning and the pickets will be at their posts at

At the meeting last night the entire matter was thoroughly discussed and considered, the principal address of the vening being delivered by Clarence E. Ackerstrom of Boston, secretary of the International union of Rubber Workers. Mr. Ackerstrom will remain in the city for several days. He stated that the charter for the local union was now on its way here and that it would doubtless arrive in a few days, when further details of the organization could then be arranged. He urged the girls to stand together and remain out until after there had been an amicable adjustment of the entire matter. This they resolved to do with a ringing

vote. The simple demand of the striking girls is that fourteen pairs of shoes be considered a set instead of eighteen, as the company has demanded. This number has been decreased to sixteen by the company and the girls state there has been talk of fifteen, but they are not willing to agree to this, and some of them are sorry that they ever offered to consider fourteen as a set, saying that the work is hard enough and they have to work very rapidly to make living wages when twelve pairs are con-

sidered a set. Another meeting will be held in St. Patrick's hall this evening, and it is the desire of the committee that all those interested be present. At the conclusion of the meeting last night tickets for the drawing which the girls propose having on September 21 were given out admit is certain that a large number of them will be disposed of.

Rev. Father Russll, pastor of St. Patrick's church, has reconsidered his decision and has announced to the subcommittee of the strikers that he will act as mediator. During the conference Father Russell urged the committee to advise the girl strikers to return to work for three days and give the shoes, the making of which caused the strike trial. He said that if the girls would do this as a favor to him he would see the L. Candee company officials. Father Russell's proposal is similar that mode by Superintendent Pearce at his first conference with the strikers.

It has been the talk among many of the striking girls that they ought give the new shoes a trial and find ou how much wages they could earn in making them, but they have held back owing to the outcries of some of the other girls who assume to be leaders in the strike movement.

Mr. Pearce said last night that no overtures looking to any arbitration sure had yet been made by the the new shoe was only a very small tem in the company's output. The girls who returned vesterday were not put to work on the new shoe and would not be to-day. In the opinion of Mr. Pearce the strike will not last the week out.

Knights of St. Patrick and Sacred Heart Club Take Action on the Death of Charles H. Coyle.

Special meetings were called last evening by both the Knights of St. Patick and the Sacred Heart clubs to take action on the death of Charles H. Coyle, who was a member of both these clubs.

Deep sorrow was expressed at his loss as he was one of the most popular members and was greatly loved and respected by all who knew him At the Knights of St. Patrick club

there was a large meeting last evening and appropriate action was taken on the death. President H. A. Spang presided and Charles Brennan was the sec-

retary. The following is the delegation select ed to attend the funeral from the club: Dr W. J. Sheehan, Michael Dillon, James R. Maxwell, John Kelly, Thomas I. Kinney, John F. Kennedy, R. M. Carroll, T. F. Maxwell, Edward Cannon Daniel F. Kelly, Matthew W. Lahey Thomas W. Lane, William Nugent Mark Ryder, Michael McGinn. The ommittee on resolutions is composed of Edward Cannon, James T. Kerrigan

and Michael Bergin. The Sacred Heart club also had meeting and took similar action on Mr. Coyle's death.

WOMAN'S SUDDEN COLORED DEATH.

Mrs. Annie Peirce, thirty-five years old, a colored woman who resided at 118 Hill street, died suddenly at her home

yesterday afternoon. She had been feeling ill for the last

two or three days and had been confined to her bed. Yesterday afternoon she got up and sat in a chair. A few minutes afterwards she died.

Sergeant Dennehy was sent out to in vestigate the case and brought in a colored man who had been living with the woman for about a year and a half. After questioning him he let him go. Medical Examiner Bartlett and Coroner Mix were called in on the case and made a thorough investigation. It was found that the woman had been drinking hard lately. Medical Examiner Bartlett said that he thought that the strain had been too much for her and that she had from heart failure. It was thought at first that there had been some foul play, but that thought was dispelled after Coroner Mix had concluded his investigations.

ACTION BY ST. PAUL'S CHURCH PARISH.

At a special meeting of the vestry of St. Paul's church. New Haven, held last evening, the following resolutions on the death of Judge Hollister were unaninously passed:

Whereas, It hath pleased Him whom we worship as God of Love to take from ur our friend and counsellor, John Clark Hollister, a member of this vestry since the foundation of the parish in 1845, for fifty-one years superintendent of the Sunday school and for fortyeight years senior warden of St. Paul's church; and

Whereas, In all of these offices he proved himself a tirgless and faithful worker, ever true in word and deed to the church of which he was a member and to the Master whom he served; and Whereas, We feel that in his death this parish has lost one who for over half a century has been the main bulwark of successive rectors in the up-building of St. Paul's church and in the

bearing of its burdens; and Whereas, By his devoted work for this parish, by his beautiful home life and by his dignified and successful career in the profession of the law, he has gained the gratitude and respect of the community; therefore, be it

Resolved. That the vestry extends to the family of the late Judge Hollister its sense of deep appreciation of his strikers to the company. He said that Paul's church, and its sincere sympathy with them in their affliction; and be

it further Resolved. That these resolutions be spread upon the records of the vestry and that copies be sent to the family, to the local papers and to the Churchman; and that the vestry attend the funeral

Letter That He Would Be Killed on His Birthday.

John Laudano of 50 Hill street came into police headquarters last evening and handed Sergeant Cook, who was in charge, a letter written in Italian. Now although the sergeant does some talking to the Italian prisoners in their native tongue, he has not yet advanced to that stage where he can read it, so he asked the man to translate it.

Laudano said that the letter had been received by his mother and that it stated that he would be killed on September 2, his birthday, by an unknown man. The letter was unsigned and was poorly written. Sergeant Cook told the man to go home and to fear no evil. Laudano is boss of a gang of Italians who are making alterations for the rail-

IN HILLY LA PAZ.

STREET SCENES IN BOLIVIA'S CAPITAL.

The "City of Peace" Has its Aristocra er of Wealth and Many Educational

(Special Correspondence of the Journal

and Courier.)

La Paz, Bolvia, July 23, 1963. The streets of La Paz winding up and down the hills, are remarkably steep and irregular, all paved with small sharp stones, many having sidewalks so narrow that two persons cannot walk abreast. Looking down the one that passes our hotel, we see that it descends a sharp hill, at the foot of which are crowds of people. Should you brave the danger of sirroche and venture down tion, and we are willing to kneel with previous crop without any further prethere, you will find all manner of commodities spread out for sale on both sides of the walk for several squares, up and down the four streets that diverge from the market-house. Sunday morning early is the best time to go, beeause in these countries everything is seen at its best on that day of the week. There are fish from Lake Titicaca, mut- they seem more numerous than ever in as an instance, the Russians in Ellis ton and beef from the Andean Plateau, fruits and vegetables from the Yungas and other distant valleys. There is Indian work of many kinds, notably knitted caps of brilliant colors, mittens that and infantry, rank and file, evoluting on over hands and arms to the shoulders and are fastened together at the back, ponchos that rival the rainbow in hues, and ready-made garments of every description, from ox-hide sandals to the big-sleeved, splendidly embroidered velvet jackets of the festive Cholos. Searching among the smaller booths, one may pick up veritable curios in the way of tiny idols from the Inca ruins, stuffed armadillas, musical instruments made by the Indianswhich it would be no sin to worship, they being not in the likeness of anything in the heavens above or the earth beneath, or the waters under the earth; strange ornaments of macaw feathers they wear at the annual religious Potato Festival at Capacadana, and tiny still-born vicunas and llamas, for use. In some of their superstitious ceremonials. There are handsome straw baskets, too, most of them bearing in letters of blood-red straw the 'Viva mi amor''-Long live my love; trunks of black and white cowhide, the hair side turned outward and lined with soft, snowy calf-skin; tiger, vicuna and guanaca furs are especially desirable for rugs or carriage robes. They sell here for from ten to twenty dollars apiece, according to size and

A little way from the market, on the other side of the president's casa, is the National Museum of Bolivia, contained n one rather large apartment on the est floor. There are some fine idols in other relics and curiosities of note jumbled together without much attempt at classification. Evidently the taxidermist is not abroad in Bolivia. Among a fair collection of birds, from condors of the upper heights to picaflores (humming-birds), of the valleys, it is funny to see many sick-looking specimens with drooping wings and bedraggled tails, each hung up by a string tied around the neck. The river Chiquiapo runs through the middle of La Paz-a noble stream fed from the surrounding mountains and spanned by a number of fine old bridges. Most of the uses are built of stone, instead of the usual adobe, the facades of many being ornamented with carving or stucco work. There are fifteen churches, all of considerable size, and some of them picturesque in the extreme, besides a number of old monasteries and convents, most of the latter being now used for schools, military barracks and silliar purposes. There is a free school system here and a rather celebrated university sustained by the government. Iversity sustained by the government.

The big cathedral, built entirely of cavalry make the finest display, the ofcavalry make the finest display, the ofstone, has a beautifully carved front and a nitche over its main entrance stands a colossal figure of the Virgin, which was presented to the city by Carlos V. of Spain, and was brought to La Paz from the seaboard over the mountains at enormous cost. It is said that more than forty years were required to build the church, several hundred men being constantly employed. We do not wonder at that if the account of a recent historian is true. He says: "No derricks or other machinery were used in its construction, but the walls were erected in a curious way. As fast as a tier of stone was laid, earth was banked up against it, inside and out, and from this inclined plane the stones for the next tier were rolled into their places. Then more earth was thrown on and the process repeated, until, when the walls were finished, the whole building was immersed in a mountain of

quality, but in New York and other dis-

tant places would readily bring from

to one hundred dollars,

This was allowed to remain until the roof was laid, when the earth was carried away on the backs of llamas and man. It is said to have taken thirteen years to clear out the inside of the building, as the earth could only be car-

ried out through the narrow doors.' Although one sees so many ragged and wretched specimens of the genus homo upon the streets, and business, edneation and every thing else are at so low an ebb, there is considerable wealth in La Paz among the numerically small "upper class." Upper tendom cannot drive around in carriages, on account of the steep and stony streets, but one may see its representatives out on horseback every morning early, or sauntering in the beautiful Alamedo from four to six o'clock p. m. On Sunday afternoon that fashionable resort is crowded with all classes, sitting on adobe benches under its rows of fine old trees, listening to the music of military bands or Others besides Mr. Leigh received back drinking cervassa (native beer) from a near-by fondita. There is a beautiful alabasta fountain in the Alameda, a tall phia, the next from Havre de Grace and stone idol from the region of Lake Titi- the next from Manassas, Va. caca and other objects of interest; but Monday the club will give a fly or 300 or nothing more interesting than the ever- 400 birds from the Branford fair to their changing panorama of human beings home coops here. At stated intervals during every day a company of soldiers comes sweeping down the hill from one barrack, or up the hill to another, marching behind a brass band in full toot and halting before the president's casa, where they render a selection or two for the delectation of the populace. It is only the ceremony of guard-mounting and although it occurs every few hours, year in and year out, it is invariably attended by the same flourish of music and musketry. Besides all this, it has been the custom from time immemorial to have military music in front of the Palacio two nights in every week, and on the evenings of all slesta days, when three bands stationed in a row, play alternately, each musician with a stooping soldier before him whose back serves as a rack for the score; while gaily caparisoned officers off duty swarm like mosquitoes and crowds of people promenade around and

TWENTIETH CENTURY HOMING CLUB.

The Twentieth Century Homing club, of this city, held a fly yesterday. They sent last Saturday night 101 birds to New Brunswick, N. J. The birds were liberated yesterday at 8:43 a. m. by the Adams Express agent there. Harry Leigh sent twenty-one of the birds and thirteen of them had returned, up to 4 o'clock yesterday afternoon, to their home coop at Mr. Leigh's place on Quinnipiac avenue, Fair Haven. His first bird got in at 12:53, which was remarkable time for a lowery, cloudy day and with the wind dead against them. Mr. Leigh has a pigeon in his coop that flew back here from Atlanta, Ga. KANSAS IN HARVEST TIME.

When Every Farmer Wants to Kidnap Five Men.

There are no bonanza farmers in ever he may be or what doing. The continual call for hep from the wheat country is easy to understand when one knows that when it comes to harvesting wheat is now or never, A header crew will take care of no more than 300 acres. In other words, during the harvest season a header crew is required on every farm. The farmer who raises 300 acres of wheat cannot, as a rule, furnish more than two members of the crew from his own farm. He cannot secure these men from among his neighbors, who also raise wheat. The result is that five of the seven men required some come from outside the community. So long as there is no urban population from which to draw, the wheat raiser must bring his help from the outside. And so long as there are big crops of wheat there will be a demand for harvest hands beyond the available local supply.

Wages paid in harvest fields this year have ranged from 2.25 to \$3 per day But the man who goes to the harvest field with the idea of earning his money easily is always disilliusioned. During harvest the farmer's day begins at o'clock in the morning. It ends when it is so dark that it is no longer possible to drive the machine, or in other words never earlier than 8 o'clock. There is an hour for dinner, another hour for supper and lunch, and fourteen hours of the hardest kind of toil under a blazing sun for the harvest hand. He is up by 3.30 o'clock in the morning. He cannot, under the most favorable conditions, get to bed before 9 o'clock the same evening. The harvest hand is well fed. On most farms he gets five meals a day-breakfast at 3:30 to 4 o'clock lunch at 9, dinner at 12, supper at 5 or 6

DON'T GET IN A SWEAT

Perspiration-"sweat" is what the Bible and we common people call it-is a way nature has of driving out of the body refuse that has no business there. We sweat more in summer, because, in the overheated bowels, undigested food ferments more quickly than in winter and produces irritating acids and gases. The bowels, overworked, try to relieve themselves by violent convulsions, causing terrible gripes and colics, and diarrhoeal discharges so acid as to make you sore, and leaving the intestines weak and worn out. Nature assists body-cleaning by sending the filth out through the pores of the skin. It is not safe to stop perspiring altogether but most of the impure matter should be sent out by natural movements of the bowels, and the offensive, ill-smelling, linen-staining sweat done away with. Keep your bowels strong all summer with the pleasant, candy cathartic CASCARETS, that clean the system and don't allow the excrement to be sweated out through the pores. Take a tablet every night, before going to bed. They work while you sleep and make you feel fine and cool all day.

CHILD ATE BOX OF QUININE Yale avenue 150 feet. PILLS.

Milford, Aug. 31 .- Paul De Leon, the three-year-old son of Mr. and Mrs. Daniel DeLeon of Seaside avenue, died very suddenly yesterday. The child had been playing with a pill box containing a quantity of quinine pills, and believing them to be candy, took a handful. Soon after taking the fatal dose, he began to feel ill, and Mrs. DeLeon upon learning what the child had done, gave it an emetic and sent for Dr. A. L. Tuttle. When the physician arrived the child was dead.

The funeral services will take place to-morrow forenoon, and will be conducted by the Rev. Howard Meserve, of Plymouth Congregationa church. Daniel DeLeon, the father of the dead child, is editor of the Daily People, a socialist organ, published in

THE SILVER ROBBERIES.

Joseph Pinsker Held for Superior Court.

Wallingford, Aug. 31 .- One of the cases arising from the investigation of thefts of silver from the shops of the International Silver company was disposed of in the local court late this afternoon, when Joseph Pinsker was held for the superior court in bonds of \$400 on the charge of receiving stolen goods. Pinsker pleaded not guilty to two counts and a long hearing was held. The first count involved the purchase of 106 ounces of silver valued at \$55.12 asked one of the spectators, "No," an on August 10, and on this Pinsker was swered the inventor of the flying ma held. The second count, which alleged the purchase of ninety-six ounces of I have decided to send one of my a silver worth \$49.92, was nolled. Judge W. C. Northrop of the probate court became surety for Pinsker.

The cases of the boys, James Doyle, Jr., Eugene Partridge and George Lacoursiere, charged with selling silver to Tribune. Pinsker, went over until Saturday morning.

Remains Laid Beside Those of His

Wife at Hatfield. London, Aug. 31 .- The remains of Lord Salisbury, who died August 23, were interred this afternoon beside those of his wife in the burial ground of the Cecils at Hatfield. The arrangements were of the most private and simple character, All the children of the deceased were present, as were Premier Balfour, Lord Selborne and a few intimate neighbors. Otherwise the mourners were made up of the dead statesman's tenants, retain ers and the inhabitants of Hatfield. The coffin was carried to and from the parish church by old retainers. Simultaneously a memorial service was held in Westminster Abbey, which was attended by representatives of King Edward Emperor Williar and other members of royal and imperial families, cabinet ministers, former cabinet ministers, including Ambassado diplomats. Choate, who was accompanied by Mrs. Choate, and members of the other em bassies, and a host of peers, members of parliament and others.

EXCURSION TO NEW YORK.

In former seasons to enjoy the "deep olue sea" meant much planning, much preparation and usually a full pocketbook. Not so these days: Walk down these hot, sultry mornings, take one of the New Haven day line steamers, and with only a dollar bill find yourself transplanted to all the joys and exhilerating influences that the deep sea brings. Mind and body refreshed you return to your home a better and happier man.

EASTERN STAR OUTING.

Two Hundred Members Gather Mansfield's Grove. Nearly two hundred members of the Order of the Eastern Star, coming from all sections of Connecticut, gathered at Mansfield's Grove yesterday. The occasion was the twenty-second anniversary outing of the state members and was held on this date to commen the birthday of Robert Morris, the founder of the order.

In the morning a business meeting was held, after which dinner was servto the dock of your own town one of ed at the Mansfield Grove hotel. The afternoon was devoted to outdoor speeches upon the life and work of the patriot Morris, and to having a good time generally.

The affair was a most pleasant one and all enjoyed the day's outing to the

fullest extent. Associate Grand Patron Edgar N. Baldwin, of Wallingford, was chairman and Past Grand Matron Annie L. Wolcott, of this city, secretary of "Hortense," murmured the fond

youth, "would you give me a penny for my thoughts?" "Wilmot," she replied, with an arch look, "I fear such a proceeding would be contrary to the law. Remember! To-day is the last day You know it is held illegal to control on which to pay your taxes, and save the entire output of any industry."-

School-Supply Money Goes Farthest Malley's

In School Supplies, as in everything else, we like to do things in price-cutting that have never been done before, and let people wonder how we do it.

The biggest single item in a sale of this kind is the tab. let that the Board of Education requires each pupil to possess in some quantity. We sell such tablets with 100 leaves of the size required, and in a better quality of paper than is generally used, at 5c. This is the lowest price for which this tablet is now or has ever been sold in this city. Tablets that claim to be cheaper have fewer leaves -count them and see.

As with tablets, so with pencils, ink, penholders, rulers, composition books and everything else. Real values and honest count in everything.
