For some time there has been sub stantial evidence that by the exertion of quiet pressure from the outside upon powers that their interests might suffer in a settlement which they did not themselves arrange.

There is reason to believe now, how ever, that the great financial interests of London, Paris and Berlin, looking to their own salvation and the security of their enormous Russian loans have risen above national lines and that to the exertion of their powerful influence is due the present promise of peace in the near future.

LINEVITCH'S PLIGHT.

Everything Now Looks as if Vladivo

stok Would be Cut off. St. Petersburg, March 24.-1:45 a, m. The possibility that if the Russian army should be unable to hold the lower line of the Sungari river at Chunchiatsu it may be compelled to retreat not only to Harbin but also further westward along the railroad, abandoning to the Japanese northern Manchuria and the Russian maritime Amur provinces as well, is the latest startling news from the front.

The strategic weakness of General Linevitch's position as he falls back northwards is made clear by a Gunshu dispatch to the Associated Press in which it is pointed out that unless Chunchiatsu and the Sungari lines, a scant hundred miles below Harbin, can be held it will be difficult to maintain a position further back before Harbin, where, with the front of the army paralleling the railroad the practicability of a turning movement sever communication and isolate the army 6,000 miles from home is too semates the number of reinforcements was paid at once. needed to give General Linevitch the requaliste superiority in force at 200,- that one of the products of the compermitted to pass the censor at the acid. front is significant; and if General estimate of the situation direct to Em- investigations and his findings were reperor Nicholas it may account for his majesty's increased disposition to listen to peace counsels and open negotiations before the Japanese establish themselves on Russian soil. With Manchu- these counts. ria entirely abandoned to the Japanese and Vladivostok left as Russia's solitary sentinel on the Pacific; it is real ized that Russia will be practicaly at Japan's mercy in the matter of peace terms-

It can now be definitely stated that the decision to appoint Grand Duke Nicholas Nicholaievitch to the supreme command in the Far East was reconsidered because the outlook at the front does not risk of compromising the prestige of a member of the imperial

Military authorities here believe that unless General Linevitch is sure of his ability to hold the lower Sungari line he will risk his whole army if he fortifies and concentrates there, as if he should be defeated, his line of retreat lines to two sides of a triangle, the third side of which is open to the enemy's advance.

At the general staff the view that General Linevitch may be compelled to abandon Harbin and retire towards Lake Baikal, leaving Vladivostok to its fate, is regarded as almost unwarranted by anything that is officially known there, it being pointed out that Field Marshal Oyama will have a long and laborious task to bring up an army of 300,000 or 400,000 men.

Meanwhile Russian reinforcements are arriving at Harbin at the rate of 1.200 men per day. Nevertheless it is significant that there is now a well marked peace party at the war office.

succeeds Charles H. Darling of Vermont-Graduate of the Sheffild Scienfic School in the Class of 1885-His Career Since Leaving College-No Further Chauge in the Cabinet.

Washington, March 23 .- President

Roosevelt has tendered the office of assistant secretary of the navy to Truman H. Newberry, of Detroit, Mich., and the proffer has been accepted. Mr. Newberry is a prominent business man of Detroit. He will succeed Charles H. Darling, of Vermont, who some time ago tendered his resignation to the president to be accepted at the president's convenience. Mr. Darling will be appointed collector of the port of his wife's granite tomb in one of the of Burlington and will devote his attention to the duties of that office and to the practice of law.

The appointment of Mr. Newberry led to the rumor that he was to succeed Secretary Morton at the head of the navy department, that Mr. Morton was to succeed Judge Taft as secretary of war, and that Judge Taft was to be transferred to the department of state as the successor of Secretary Hay. There is the highest authority for the statement that no present change in the cabinet is probable.

Showing of Spring Suits

As the days lengthen the interest increases—the buying grows in volume. During the past week the Suit Room has been the busiest department in the store.

Interest has been naturally centred on the \$30.00 and \$40.00 Suits for women that we have been selling at \$19.50a bargain-chance right at the opening of the season which puts this store on a better footing with the public than anything else that we could have planned.

A few more of these Suits have just come in from Messra. Schlivek & Sons of New York--and can now be seen here.

This \$19.50 Suit offer is beyond question the best which can be found in the country to-day -- better not lose the chance to get one on Friday.

HOUSEKEEPERS must be watchful

For great efforts are being made in this vicinity to sell baking powders of inferior class, made from alum acids and bone phosphates, both undesirable to those who require clean and healthful food.

The official Government tests show Royal Baking Powder to be an absolutely pure and healthful grape cream of tartar baking powder, and care should be taken to prevent the substitution of any other brand in its place.

The Royal powder costs only a fair price per pound, and is cheaper and better at its price than any baking powder in the world. It makes pure, clean and healthful food.

The suit of Ralph Ives, of Wallingford, vs. Harrison B. Freeman and Burdette Loomis, of Hartford, in which \$30,000 damages are claimed for an alleged breach of contract, was returne in the superior court yesterday. Ives claims that he was authorized to place subscriptions for stock of the Wallingford Railway company, and that while he fulfilled his part of the agreement, the defendants, failing to fulfill on their part, sold out to the Consolidated Railroad company. The law firm of Newton, Church & Hewitt are counsel for the plaintiff.

SUIT FOR \$2,500.

Attorney J. P. Goodhart has brought suit in the superior court in behalf of Patrick Casey, of this city, against his daughter, Tessie Casey, and Attorney A. Maxcy Hiller. The suit is for damages of \$2,500.

FOUR SUITS AGAINST ONE MAN. Four suits have been returned to the April term of the superior court for this county in which Lyman S. Alger, a well-known citizen of Clinton, is the defendant. Two of the suits are brought by the wife of the defendant, and the other two are brought by other women. In one suit Anna L. Alger brings a suit against her husband for divorce on the ground of infidelity. An attachment of \$5,000 has been made on the property of the defendant. She alleges that the defendant is worth \$12,000 in real and personal estate, and she asks for a divorce and alimony of \$4,000. William C. Bushnell, as administrator of the estate of Emily Hull, late of Clinton, is garnisheed in the suit.

Mrs. Alger brings a second suit against her husband in which another attachment of \$5,000 is made. She says that Alger abandoned her July 18, 1902. She asks for damages of \$4,000 and a monthly allowance of \$100. Amanda Scott is the plaintiff in a

suit against Alger in which an attachment of \$300 has been made. She claims that on January 1, 1902, she loaned \$200 to the defendant.

In a fourth suit against Mr. Alger Bertha Hilton, of Boston, is the plaintiff. She has caused an attachment of \$500 to be made on the allegation that | years, 71 Prince street; Charles Reiger, she obtained in a Boston court a seventeen years, 7 Edgar street; James judgment against Mr. Alger for \$327, Galligan, twelve years, 92 Cedar street, which remains unsatisfied. A GOOD DEAL OF NONSENSE

ABOUT "BLOOD PURIFIERS" AND "TONICS!

Every drop of blood, every bone, nerve and tissue in the body can be renewed in but one way, and that is, from wholesome food properly digested. There is no other way and the idea that medicine in itself can purify the blood or supply new tissues and strong nerves is ridiculous and on a par with the fol-de-rol that dyspepsia or indigestion is a germ disease, or that other fallacy that a weak stomach which refus es to digest food can be made to do so by irritating and inflaming the bowels by pills and cathartics.

Stuart's Dyspensia Tablets cure indi gestion, sour stomach, gas and bloating after meals, because they furnish the digestive principles which weak stomachs lack, and, unless the deficiency of pepsin and diastase is supplied, it is useless to attempt to cure stomach trouble by the use of "tonics." "pills," and "cathartics." which have absolutely no digestive power, and their only effect is to give a temporary stimula-

tion. One grain of the active principle in Stuart's Dyspepsia Tablets will digest 3,000 grains of meat, eggs and similar foods, and experiments have shown that they will do this in a glass bottle at proper temperature, but of course are much more effective in the stom

There is probably no remedy so universally used as Stuart's Tablets, because it is not only the sick and ailing but well people who use them, at every meal, to insure perfect digestion and

assimilation of food. People who enjoy fair health take Stuart's Tablets as regularly as they take their meals, because they want to keep well, prevention is better than cure, and Stuart's Dyspepsia Tablets do both; they prevent indigestion and they remove it where it exists. regular use of one or two of them after meals will demonstrate their merit and efficiency better than any other argu-

Armstrong, Yale's star miler, has a condition in his studies and will not be able to run to-night. He would have started in the distance runs if he were eligible. Armstrong was entered for Yale in the two-mile relay team which went to the Eighth regiment games in New York to-morrow, but Ferry has been assigned to take his place.

Aside from the Buffale games to-morrow Yale will send out three track squads to meets scheduled for that evening, the Eighth regiment meet in New York, and the Brooklyn A. C. games in Brooklyn. Shefield was assigned as one of the athletes to take part in the two mile relay at Brooklyn, but he was called away suddenly yesterday and Hil Edwards was delegated by Trainer Mike Murphy to run in his place.

White, captain of the New Haven H. S. track team, has picked the men from a squad of over twenty-five candidates, who will compete in the Naval battalion games. WELL-KNOWN RAILROAD MAN;

Death of George W. Noyes at Grace Hospital. George W. Noyes, a well-known rall-

road man, died at Grace hospital early yesterday morning from the effects of an operation for appendicitis. Mr. Noyes came here as secretary of the board of adjustment of the Brotherhood of Locomotive Engineers of the Consolidated railroad, and was one of the most valued members of the organization. He was taken to the hospital on Monday, grew worse rapidly, and on Wednesday it was decided that he was suffering from an aggravated case of appendicitis and that an operation was

The operation was performed on Wednesday afternoon and it was considered that, while his case was serious, he had a chance of recovery. He never rallied and died at 2:30 o'clock yesterday morn-

The report of the commissioners directed by the British government to investigate cotton-growing possibilities in East Africa is to the effect that the cultivation of the staple in that quarter can never be undertaken on any considerable scale owing to the intelligence of the natives. That is, the latter are not stupid enough to work in the sun when they can live comfortably in the shade without working.

A London dealer in such wares last year received from India the skins of six thousand birds of paradise to adorn the hats of the feather-wearing British women and to meet the export need. At the same time he got about half a million humming-bird skins and an equal number of those of various other tropical birds. There is an auction room in London where such things are sold, and its recent record for a third of a year was close to a million skins, all told, coming mainly from the East and West Indies and Brazil.

Simeon Ford thinks it is well to listen to the most dreary talkers, for sometimes they surprise everybody by saying good things. He was at a dinner wordy, but near the end of his long Everybody was about ready to fall asleep, when the speaker said: "And, nowfl as Lady Godiva observed when returning from her ride, 'I am nearing my clothes." The remark roused his auditors to such fits of laughter that the speaker was forced to take his seat,

In summer time the air used for ventilating the House of Commons in London passes through blocks of ice. In winter it is heated. In fog the outer air passes through layers of cotton wool six inches thick. During forty-eight hours of fog the cotton wool on one occasion was as black as the back of a chimney. Thanks to these precautions, the house has been absolutely free from mist and the atmosphere is in normal condition while a dense fog prevails outside. The normal temperature of the House of Commons is kept at the level of 62 degrees, except in sultry weather, when it is raised to 65 de-

The South Norwalk Sentinel prints letters from two persons who advocate the hot water treatment for cerebro-spinal meningitis, claiming that it not only cures, but prevents bad aftereffects. In one case a woman was saved by being sweat with hot blocks rolled in wet cloths. The writer of the other, A. R. Fuller, of Malone, New York writes that he had the disease when a lad of twelve, in 1852, and was sick ten weeks. He was placed in a bathtub, folded in a blanket, and hot water-as hot as could be borne-put in the tub, the temperature being kept even till the convulsions were quieted. He was said to be the only one in sixty cases who recovered without deformity.

He brought an action for dam-That tribunal held that dogs, while not 'cattle or live stock" within the meaning of the statute, are a species of property, and that for injuries to them the injurers are responsible in the courts. With regard to the dog which strays upon a railroad track, the court cited an opinion in the federal reports. "The dog is very sagaclous and watchquoted, "and possesses greater ability to avert injury than almost any other animal; in other words, takes better care of himself against impending dangers than any other. He can mount an embankment or escape from dangerous places where a horse or cow would be altogether helpless; hence the same care to avoid injuries to an intelligent dog on a railroad is not required of those operating the trains that is required in regard to other animals. The presumption is that such a dog has the instinct and ability to get out of the way of danger." Accepting all this as correct, the Supreme court went on to say that a state of facts which would make the railroad company responsible in damages for the killing or injuring of a man on its tracks would also make it responsible for the killing of a dog.

ENGLAND'S CANAIS. Canals are not yet played out ever

in this rapid country, and in England public attention is beginning to be directed toward the improvement of the canal system. In an important paper read the other evening at the Royal United Service Institution in London a prominent engineer advocated the nationalization and electrification of the canals. He said that if the 3,500 miles of the system could be hought at twothirds of the original cost of construc not long ago when the speaker of the tion, say £2,350 per mile of length, evening was phenomenally dull and then the capital required would be £8.225.000. Calculating at £500 per mile and £2,000 per mile for the electrification of the canals, then the total amount required would be £16,975,000. Allowing £3,000.000 for working capital, he thought that a round sum of twenty millions would secure for the State a splendid transport property. He then proceeded to argue that inasmuch as more than sixty millions sterling had been expended in tramway systems in the country, and that over three hundred millions sterling had been absorbed in municipal work, the government might surely be permitted to become the owners of an efficient, electrified, navigable, inland water service. The electrification of the canal system would provide a cheap supply of electric power for transport service, as well as for pumping, irrigation, ploughing, churning, milling, and vegetable and flower growth, while the revival of the inland navigable waterway system would go far towards securing a new era of agricultural prosperity. Some of the feeder canals, he suggested, might be converted profitably into motor or car ways. Only State ownership, he maintained, could restore the canals

FORESTRY.

Forestry in this country is decidedly looking up. All the national forestry interests are now in charge of the bureau of forestry. This makes a large addition to the responsibilities of the The forest reserve service now numbers about 450 officials of various grades-superintendents, supervisors, rangers. These were recently brought into the classified civil service. The forest reserves comprise about 63,000,000 acres of the public domain. The new duties more than double the force of the bureau. It is said that in the management of the reserves the policy will be to decide all questions with a view to meeting the needs and demands of the people of each particular locality. AIR LOCOMOTIVES.

Three things are necessary before the air, independently of the earth can ever be navigated practically and successfully.

The first is strength and stability of architecture. The very strongest material in the world must be employed, and it must be arranged in the very best method to secure protection to everything within or upon it It shold be able to withstand the severest storms, and to float safely amid the roughest waves. To some extent the architecture of a bird should be imitated, but not entirely; since the air-ship is made for another purpose than to carry the vital organs of the feathered race.

I should think that it ought to b shaped somewhat like a boat-that, at all events, its prow should be pointed. But in whatever form it is built, it should be strong enough to withstand any consussion, and shaped some new leather,-always something so that it will float in water, it neces-

They should be numerous and well filled nough, so that they will hold up the ship for an indefinate time, if necessary. There should be machinery on board to generate gas in sufficient quantities to supply accidental or needful waste.

Third, concerning the wheels of the ship; these are of ultra importance, and should be many and powerful. The vessel we are guiding should be used, so far as propulsion is conceren ed, the same as a submarine boat-and the air employed as a force of resistance against which to work, the same as if it were water-which, although not so dense, is capable of furnishing enough resistance, if sufficient power

And this is where the entire usefuless or uselessness of the winged loomotive is at stake. This is the main question. Can you furnish enough power to resist and utilize the air in any phase or form that it presents? Can you overcome gales and make headway against them, the same as a powerful steamer would climb against the current of a river? Can you, by means of lateral-whirling wheels, combat successfully against the wind blowing sidewise against you? Yes; but it must be done with the

funeral of Mrs. Maria 5. Gladwin-Whist by Ladies of the Engine House -Burial of Edith C. Smith-Injuries of Mrs. Cavanaugh in New York-Visiting Day at Lloyd Street School.

The annual roll call of Live Oak council. No. 1027, Royal Arcanum, was held last evening at the lodge rooms, 25 Grand avenue. There was a large attendance and it was a very successful reunion. District Deputy Grand Regent Savage of Meriden was present and made an address that was inspiring and hopeful. He also installed the new orator of the lodge, Frank Ronald-Deputy Savage presented the cause of the hospital aid fund, and the council contributed the sum of \$5 for the same. The fund is used in sending to the hospital sick brothers who need this assistance. During the evening Elmore S. Wade, a past regent in behalf of the council presented past regents' jewels to L. L. Bradley, George S. Adams and Harry Franklin. Mr. Wade made an excellent speech and was warmly applauded. The recipients of the jewels, who have done excellent work for the council, thanked the council for the gifts. The presentation was a very pleasant incident. This was followed by the roll call, which was another pleasant incident of the reunion. The names were called by the secretary, John Kessel. During the past few weeks the council has lost by death three members-Joseph H. Snow, Edward E. Darrow and Dr. Moore. council has now 122 members and is one of the best councils in the state. A new feature was the drawing of a name from a box, the same to receive a remission of quarterly dues for one quarter. There is to be one drawing at each meeting. The successful member last evening was Robert Kidder. Elmore G. Wade made an excellent speech on the benefits of fraternal insurance This was followed by a smoker, with

The injuries to Mrs. M. J. Cavanaugh of New York, daughter of Colonel and Mrs. T. J. Callahan of Blatchley avenue, who was struck by a trolley car in Third avenue, New York, last week, Moore, Ferry, Tilson. are proving rather more series than was at first reported. Mrs. Cavanaugh Armstrong, Ferry, Lamp. Buck. Scudwas pushed along by the fender for der Piggott, Frissell, Moseley, Hayes, about seventy-five feet, and when the car stopped her body was less than a foot from the car wheels. She held Feiller. her young child in her arms, and the only injury to the little one was a cut in the lip. Mrs. Cavanaugh was terribly bruised, but there is no evidence of internal injuries. It will require

several weeks for her to recover. The Middletown avenue bridge and the Quninniplae drawbridge will be painted this spring. It is understood the work will begin in a few days. This afternoon will be visiting day for all parents who wish to see the

work their children are doing at the Lloyd street school. It is expected that many will call during the afternoon. Principal Graves is anxious that all who are interested should call and see the work done in the class room.

GOVERNOR LA FOLLETTE'S LUCK Governor La Follette is a lucky man; the failure of the senate to act on the railroad bill at the present session wil give La Follette his opportunity. He enters the senate just at the time when public attention is turning to the rail road question, with which he has been dealing for several years. In ability, in courage and in experience he will easily be the leader of the anti-monopoly element in the republican party in the senate, and he can furnish the President just what the President badly needs in that body, namely, an aggressive spokesmanship .- Commoner.

The entire matter was laid over for one week for the purpose of having some of the soldiers' committee present at the next meeting to explain for just what purposes they wish to have the money expended. It was suggested last evening that the mayor and controller were the men who should have charge of this expenditure. The voting machine question was the

next matter discussed. The board thought it somewhat strange that the two wards selected for a trial of the machines were both so-called "republican wards" and also wards inhabited by a most intelligent class of voters. Some of the members said that they thought that a fairer test of the machines could be had were they tried in wards where there were more apt to be difficulties encountered from men of Guitar Solo-"Southern Melodies." less intelligence. It was suggested that the aldermen might be given some intimaation of how the board of finance felt about this, and that they might be willing to change the designated wards | Fantasie on American Airs. at their next meeting, which would not then be too late, and if the five machines were not then enough to accommodate two wards, why, they might all be put into one of the large wards so that a fair trial might result.

Mr. Frederick said that he thought that, wherever the machines were put, the voters ought to be given the privilege of either voting by machine or by a ballot box, just as they preferred. He therefore made a motion to the effect Rev. George F. Prentiss Speaks in that the board appropriate the sum of \$250 for the rental of the machines and a like sum for the expenses incurred by their freighttage and use. It was figured that this total of \$500 would be lit-

tle enough for the experiment. The machines cost \$600 apiece, but are

rented to the city for \$50 apiece. If the city decides to buy them on or before July 1 this \$50 will be deducted from the purchase price. There are a large number of state laws which have to be complied with, and the financiers figured that these incidentals would cost at least \$250 more, as among other things suitable places for the keeping of the instructing machines must be hired for at least two weeks.

Henry T. Blake, president of the park commission, sent a communication to the board in explanation of his substitute bill, which he presented to the board at the last meeting, concerning the park board's taking possession of from the park board, and that they had ever, willing to assume the responsibilis acceptable; otherwise they prefer and and unless the park board were allowdit.on of affairs it would be an injustice to ask them to take charge of it.

headaches. The doctor prescribed for me, but finding that I did not get any better he examined me and, to my surprise, declared I had a tumor in the uterus.

"I felt sure that it meant my death warrant, and was very disheartened. I spent hundreds of dollars in doctoring, but the tumor kept growing, till the doctor said that nothing but an operation would save me. Fortunately I corresponded with my aunt in the New Engand States, who advised me to try Lydia E. Pinkham's Vegetable Compound before submitting to an operation, and I at once started taking a regular treatment, finding to my great relief that my general health began to improve, and after three months I noticed that the tumor had reduced in size. I kept on taking the Compound, and in ten months it had entirely disappeared without an operation, and using no medicine but Lydia E. Pinkham's Vegetable Compound, and words fail to express how grateful I am for the good it has done me."—Miss Luella Adams, Colonnade Hotel, Seattle, Wash.

Bears Still in Power-But Tight Money Not Looked For-Exchange's Drop--Weak Stocks Were U. P. and S. P .-Bears Gunning for Lower Prices but

The market is temporarily given over to the bearish sentiment, and bearish operations. All the months that stocks were flopping upward, bear talk and untoward development,-which were few, however,-had little or no effectwere in fact practically ignored. Yesterday, on the other hand, favorable developments were practically ignored-Money didn't harden any, in fact was tolerably easy, and foreign exchange fell while the Venezuelan shadow disappeared, yet the bears had the upper hand. The close yesterday was quite street, Branford, yesterday afternoon strong, but selling orders were weight- at 2:30 o'clock. Dr. T. D. Devitt offi ed with buying orders, showing that sentiment was mixed and uncertain. Liquidation appeared to be over for the time being.

The bottom prices yesterday were made in some-cases in the morning when Union Pacific ingloriously sold down to 127, about ten points below the high record of the year, and Southern Pacific slid down gracefully to 65 3-8. It was against these two pivotal stocks that the brunt of the operations was directed. After the pressure was removed the stocks rebounded. It was apparently liquidation that carried the stocks down in the early trading.

The effort of the bear clique has been to get Union Pacific to 125, St. Paul to 175, New York Central to 155, Reading to 90. Pennsylvania to 125 and Steel preferred to 90.

Europe has been buying liberally of American bonds in the last few weeks, and it is against their purchase that the biberal drawings of exchange are made in some-cases in the morning yesterday morning in Bridgeport, a

American bonds in the last few weeks, and it is against their purchase that the liberal drawings of exchange are being made. This partly accounts for the interesting exchange situation. The Bank of England's rise in the proportion of revenue to Hability, above 55 per cent—the highest percentage since 1897—indicates that should money rates here reach a 4 per cent level for all fixed date periods New York could rely upon London for a good supply of funds.

The selling in Pennsylvania looked like pool offerings. There was in addition an obvious effort to get the stock down to 140 and reach stop loss orders.

Very little outside buying appeared to have ventured in at the low figures,

principals concerned decline to furnish details until the full terms are settled upon. The amount of the loan is variously estimated up to \$150,000,000, and as special security the revenue of the tobacco monoply, amounting to \$15,000,-000, is suggested. It is understood that the loan will be largely Anglo-American, with minor participation on the part of Continental houses.

The heaviest selling came from Chicago, evidently from small pools which trailed after the big fellows, who sold out heavily at prices from 3 to 6 points higher than a week ago.

In outside securities there was sold yesterday 1.100 shares of International Silver between 49 and 49 3-4, a net improvement of 1 1-4.

NICHOLOSO NOT HELD.

Admits He Struck Carlson but Death Assigned to Asphyxiation.

Oscar Nicholoso, of 96 Hill street, in an interview with Chief Wrinn and Captain Cowles at police headquarters, stated that it was he who struck Carl Carlson last Saturday night.

Nicholoso says he and his brother were in the chop-sucy house at Meadow street and Congress avenue, and upon leaving met Carlson and two friends at the bottom of the stairs. Carlson was apparently much under the influence of liquor and in a quarrelsome He struck Oscar's brother John his younger brother's rescue.

Carlson and Nicholoso adjourned their fight to the street. In the fight which followed Oscar Nicholoso knocked Carlson down once and Carlson fell a second time on account of slipping on the ice. In the fall Carlson struck his head against a car track and received the cut which has been spoken of as a possible cause of his death.

When it was seen that Carlson was cut the Nicholoso brothers took him to the Commercial and Arlington hotels, but at these places the proprietors would not let him stay, as he was drunk and uglyf. After that Carlson went away with his two friends and the Nicholoso brothers know nothing further of his actions.

After listening to the story of the Nicholoso brothers Captain Cowles sent them to Coroner Mix to tell their story. Both the coroner and medical examiner have said positively that Carlson's death was due to gas asphyxiation, and that the blow which he had received had nothing to do with his death other than it might have added to his dazed condition and make him careless about the way in which he manipulated the

Nicholoso was not held by the coroner because there was nothing about the affair which in any way warranted the charge that Nicholoso was responsible for the death of Carlson.

The Messrs, Cheney on the list of incorporators are identified with the Cheney silk works in South Manchester. The Hon. John S. Cheney, who is one of the incorporators, has served in the senate and is the father of Lieutenant Sherwood Chency of the regular army, who won such distinction in the Spanish-American war.

The bill authorizing the city of New Haven to issue sewage bonds amounting to \$250,000 and the city of Waterbury to issue water bonds to the amount of \$75,000 were calendared this morning in the house.

The Hon, Samuel Fessenden, who has been occupied with the superior court session in Fairfield county as state's attorney, during the past three weeks, was present at the opening of the session this morning, and in the absence of Lieutenant Governor Woodruff predded through the forenoon. Senator before a word had passed between the Fessenden, who has been the speaker two parties. Oscar thereupen went to of the house, is one of the ablest par-Hamentarians in the state, and presides over a legislative body with consummate affability. His return to the senate this forenoon was an occasion of

special satisfaction and pleasure.

Governor Roberts sent the nomination of John Herbert White of Hartford, Josiah M. Hubbard of Middletown and Hiram F. Fox of New Haven to be members of the state board of mediation to the senate this morning. Morris C. Webster of New Britain was nominated as commissioner on building and loan associations for two years from July 1, and James F. Walsh of Greenwich was nominated for judge of the criminal court of common pleas for Fairfield county for four years from July 1. The resignation of Edward W. Higgins as deputy judge of the city court of Norwich was submitted to the senate by Governor Roberts.

On motion of Senator Whitney of the report relative to fire proofing the cap- startled theater goers. Upon arriving itol, making necessary improvements, and the purchase of a new site for a so convulsed in laughter as almost to building for state officials, amounting in all to \$230,000 was referred to the committee on appropriations.

Senator Hammer, chairman of the educational committee, called two bills from the table relating to the transportation of school children, and the payment of tuition for High school pupils, and moved their rejection. So ordered-The bill appropriating \$1,440,000 in bulk for the educational departments

of the state was explained at length by Senator Pattison of the appropriations committee and was adopted.

There was a long and spirited debate in the senate in regard to the appropriation of \$40,000 in the educational appropriation bill for the transportation of high school pupils. Senators Judson. McGovern, Atwood of New Britain. Peck and Phelan of Waterbury, Bradstreet of Thomaston, Hammer of Branford and Pattison of Simsbury, taking principal part. Senator Peck thought the amount was too much to be used for the 800 high school pupils who would alone be covered by the act. Senator Bradstreet took the occasion to say in the debate that if he had known what he does now he would have had his daughter educated at a parochial school. There her training would have been attended with culture and maners, gentleness and intelligence, was for giving the best results of education to all. Senator McGovern was

in favor of the appropriation. After the hour's debate the educational bill, which contains the provision for the transportation of high school pupils, was placed at the foot of the calendar on motion of Senator Pattison. In the house Representative Smith

of Hartford called up the bill relating to dangers on the third rail, which was tabled Wednesday, and on motion of Judge Pearns of Middletown the measure was recommitted. stated that the people of New Britain feel that they have been neglected in the matter and desired to be heard. Speaker Holcomb made a ruling in rerequest of Judge Pearne that recommittal by the house does not require concurrent action by the senate.
