\*\*\*\*\*\*\*\*\*\*\*\*

This is a subject that should be carefully studied by every person who is a telephone user whether large or small. Every subscriber should ask himself if he is obtaining maximum results from his existing grade of service. A "Busy" wire may mean a "Lost" call; a "Lost" call may mean lost business and lost business does not contribute to success.

# MAXIMUM EFFICIENCY

in every adjunct is e-sential to business success. It is doubly necessary in telephone service if the subscriber is to use his service to the most economical end. It is not indeterminate but attainable as ha been clearly proven by thousands of truly conomic telephone users.

THE MORNING JOURNAL-COURIER, FRIDAY, DECEMBER 20, 1907.

Leather and kid belts, intended for every day useful wear, are chosen in colors to harmonize with the costume, but their decoration accords with the collar and hat pins. With steel headed pins the correct thing is a square medallion-shaped buckle of cut steel of more or less ornate design and at the back a spray of flowers and follage may be worked out by means of steel bends.

Black hoslery continues to be resarded as most appropriate for ordinary uses. For evening wear slippers and hosiery match the gown with which they are worn, but some latitude is allowed in this. Bronze satin or bronze leather embroidered with gilt thread or beads may be substituted in many instances for the strictly matching shoe. To go with these slippers there is bronzed yellow open-work or embroldered hosiery in all qualities and at all prices.
