EDITED AND PUBLISHED BY CARRINGTON & CO., State Street, Courier Buil

SOME OF OUR ADVANTAGES Most of the dwellers in this great and rious land know that they are better off than those who live in Europe, but their idea of the difference is not a very definite one. Some comparisons made, by Edward Atkin son show how immense this difference is in Phose who read them will feel more than

ver thankful that they are so fortunate

to live in such a country as this. For the purposes of his comparison Mr. tkinson takes Europe as a whole, with the coeption of Russia and Turkey, the halfcivilized nations, and omits Alaska from the United States. The rest of Europe contains about 225,000,000 inhabitants, who occupy 1,546,802 square miles of territory. The population of this country is a little over 50,-000,000, and, besides Alaska, the United States comprise 3,034,399 mfles. That is, less than one-quarter of the population of Europe are here living on about twice the nount of land. In other words, while Eu-

ope has 145 inhabitants to the square mile, the United States have only 164. Since 1848 the debt of Europe has nearly trebled, and is still increasing, whereas ou debt is less now than it was in 1865 by over a thousand millions of dollars. We have already paid more than a third of the great cost of the war, and, therefore, now owe only about \$1,880,000,000, against \$2,997,-886, 203, the debt at the close of the contest The debt of Europe in 1880 was \$16,794, 800,000, or an average to each inhabitant o

t was \$83.35. The national expenditures of Europe were \$2,282,800,000 in 1880, or an average to every person of \$10.15. Our expenditures for the year ending June 30, 1880, were \$267,642,957, or an average of \$5.35 to each

\$74.64, while here the average on the first of

The standing armies of Europe number over 2,100,000 men, besides the still more numerous reserves who may be called into the field at any moment. More than one in every 110 of the population is a soldier in active service. Reckoning one able-bodied man to every five inhabitants, each twentytwo men sustain one soldier. Our army i only 25,000 strong, and each 2,000 inhabi tants, or each 400 men, sustain a soldier. No wonder that the people of Europe ground down by heavy taxes and forced to upport vast armies, are coming over here at rate of 12,000 or 15,000 a week. This land must seem very attractive to them.

The expected range of the gun is ten or twelve miles.

There was a scene at Lexington, Kentucky, few days ago, which reminded those who saw it of the old slavery days. Two negroes had been sentenced to a year's servitude apiece for vagrancy, and their labor for that term was offered for sale. A cattle auctioneur was the salesman, and the men were critically examined, with many pokes and pinches, just as slaves used to be. The first put up was a fat old fellow, and the bidding advanced very slowly to \$20. "Bless my soul," cried the auctioneer, "I recollect the time when he'd bring \$500—a hale, hearty old nigger like him. Twenty, twenty, any advance on twenty? dian Territory-The Arrival of 8,500 Tournament-How they were Trapped and Transported to this Market.

[From the New York Sun.] There arrived on Saturday night, at a place near Jersey City, a car containing 8,500 wild pigeons that had been shipped from Atoka, Indian Territory. They are the first installment of 20,000, which W. P. Thomas of Phillipsburg, N. Y., contracted to supply the New York State Sportsmen's associa tion. The pigeons were placed in pens, from which they will be taken as wanted. These pens are simply low, close sheds. An nclined plane of slatted framework in each pen furnishes the pigeons with a roost. They are very shy. A slight noise on the outside of a pen produces a loud whir on the inside.

When the trap door of a pen was cautiously opened yesterday to allow the reporter to oeer inside, the twitter and rustle made up a trong volume of sound. "They make a good deal of noise," said Mr. Thomas, "but it is nothing to the din at the pigeon roost where these were trapped. I have heard the cackling of the pigeons, as they were settling on their nests in the evening, fully a mile away."

Mr. Thomas makes a business of trapping pigeons for field sport. He will get four more car loads from the Indian Territory,

naking a total of 40,000 pigeons.
"The business will not be a profitable one his year." he said. "because we have had to go so far to get them. Heretofore the pig-eons have roosted in Pennsylvania or Michi-gan. But this year, owing to the late, cold spring, they did not come as far north as usu-al, and they make a roost in the Pottawattoal, and they make a roost in the Fottawattomie reservation of the Indian Territory, 110
miles away from the nearest railroad station.
I had to transport all my lumber and supplies from Atoka, and the pigeons had to be
hauled there for shipment. At one time I

"There has been little or no shooting, and that has been a good thing for us, as shooting makes the birds scary and harder to trap. There is plenty of deer and turkeys on the reservation, and the Pottawattomies do not care for pigeons, so they do not hunt in the roost. The Indians were very friendly, and some of them are working for a St. Louis firm that are catching squabs and shipping

They are packed in barrels with ice, and sent to all himself in a hut of boughs at one end of the net line. Pigeons are saved from one season to another for use as decoys When a flock of pigeons is seen coming, a pigeon is thrown up in the air to attract the attention of the flock, the bird being pulled down again with a string. This bird is called the flyer. Another decoy bird called the stool pigeon is made use of at the same time. He is tied to a perch on the free end of a strip of iron band about four feet long. As the flock approaches a string is pulled which makes the spring bounce him up and down, and he flaps his wings to keep his balance. He presents the appearance to the approaching flock of a bird hovering over a feeding ground, and they settle down around him.

Evaporation of the oil contained in them produces a vapor that arises and hovers above them, and becomes a perpetual attractanks against lightning is a problem that scientific men have been for years laboring scientific men have been for years laboring to solve. A fortune awaits the man who shall devise a plan to prevent or lessen the damage that is annually caused by lightning in the oil regions. The United Pipe Line company, which owns nearly all the iron tanks in the old country, is attaching to a number of its tanks an appliance by which chemical action may be instantly brought to bear on the cloud of smoke which forms between the surface of the oil and the roof of the tank when it is set on fire. This, it is claimed, will render the presence of flamimpossible, and will lessen the number of nil fires. No demonstration of the value of the extinguisher has been made, but if its action is satisfactory, it will be a God-send to the Titusville, when tank after tank was beleft

ing its volumes of flame, a spectator suggest-ed that by firing a cannon ball through the ed that by firing a cannon ball through the side of a tank, near the bottom, before the oil boiled over the top, the oil might be drawn out and the spread of the conflagration stopped. A piece of ordnance was at once procured and the experiment tried. It was successful. Several tanks were drawn off in this way, and the destruction of a great part of Titusville was prevented. Now the Pipe Line company has a large cannon ready for use at an instant's notice, fixed in ready for use at an instant's notice, fixed in position at all tanks where a fire would jeo-pardize contiguous property.

The experiment of placing lightning rods above the tanks is being tried this year. One hundred and fifty men have been putting up rods, seventy feet above the tanks. Besides the danger that threatens the oil regions every year from lightning, there are sources from which destruction may be periodically expected. There are over 10,000 oil wells in the various districts. They are nearly all flowing wells, and are constantly pouring out streams of the most inflammable material. Pipe lines conduct

the oil in all directions through the field. The ground, the buildings—highly combustible in themselves—trees, fences, and all the sur-roundings are entirely saturated with crude petroleum. The puddles in the road are pools of oil. Oil towns generally are com-pact collections of frame buildings, constructed without any regard to stability or the pro-ximity to wells. Derricks rise from the very these surroundings run railroads, along which locomotives scatter sparks and coals every hour in the day. It took a wagon about three days to make the trip from the roost to Atoka.

The acorns are so abundant that it is a splendid feeding ground for them. I went into the roost for about ten miles without finding any signs of an end. Every tree was thick with pigeons, the branches bending down with their weight. When the birds have been coming home from the feed ing grounds in the evening I have seen a stream about a mile broad flow through the sur, and making a noise like thunder. I should judge the roost to be about twenty miles long and fifteen broad.

600,000 barrels of oil, 300 from tanks, and several refineries and a large amount of other property were destroyed by fires started by lightning.

The oil regions are cut up by deep ravines or gullies, and the wells cover the sides of steep and lofty hills, as well as every available rod in the valleys. Rapid streams course through the valleys and pour down the mounable rod in the valleys. Rapid streams course through the valleys and pour down the mountain sides. These streams are conductors of burning oil. Especially is this the case where a burning tank is located close to a creek, as many of them are. The tanks are so strongly constructed that they withstand the intense heat of thousands of barrels of oil burning within them for hours. Finally the iron closes with a white heat. The heavy ton falls glows with a white heat. The heavy top falls into the cauldron of boiling petroleum. The daming liquid runs over the top of the bank. No matter what stands in its way it seeks its

By this means its further course is stayed, and thousands of dollars' worth of property saved. These bar-riers are frequently broken by the pressure of the burning flood, and its course to the creeks cannot be hindered. Then places far removed from the original conflagration are in imminent peril.

The Episcopal Convention.

At the session of the diocesan conve of the Episcopal Church at St. Thomas hurch yesterday, one of the subjects of spe cial interest discussed was the proposition t appoint a committee to report to the dioces an convention next year as to the advisability of forming a church temperance organiza-tion, which was carried. Prof. Johnson, of Prinity College, introduced the following Resolved, That a committee of three clergymen and two laymen be appointed to aramine the plan of a church temperance society, and report to the next convention the expediency of establishing a branch in this diocess.

and rather spicy debate that followed. He opposed the resolution, and hoped that all total abstinence legislation would be left to the State. He thought the church had enough to do to attend to its own ecclesiastical functions. In case he misunderstood the object of the resolution he desired to be corrected. His idea in such matters was in

non-essentials liberty, in essentials unity and in all things charity—"but under the new revision, love." [Laughter.] Judge Sherman spoke further, exciting hand clapping, which was ruled out of order. Dr. Tatlock, of Stamford, thought it advisable to pass the

Dr. Beardsley, of this city, thought the subject of church temperance a broad one. He himself favored abstaining from intexicating drinks, but temperance might go much further than liquor. It might take in all the evils of the New Testament. Better not single out the liquor question alone, but on preaching against all intemperate evils.

Prof. Johnson thought the church had fair territory to enter on the temperance work Prof. Johnson thought the church had fair territory to enter on the temperance work just as in the mission work. There was no impropriety in such action.

Judge Sherman talked further, and Rev. Mr. McConnell, of Middletown, said that it was well for the church to be put on record as counseling temperance. Intemperance was a sin broad in its results. Rev. Mr. McCook, of Hartford, strongly endorsed the resolution.

Dr. Harwood, of this city, said that all ad-

mitted the evils of intemperance and the great need of a cure. He said he was willing great need of a cure. He said he was willing to vote for the resolution if the committee to be appointed would also be requested to suggest some potential and effective means for the suppression of this vice.

Rev. Dr. Richardson, editor of the New York Guardian, counseled wisdom in procedure, for the step was an important one, and in the step proposed many might go too far, and as is often the case a harmful excess of zeal be engendered.

Ex-Governor Minor, of Stamford, endorsed the resolution and the debate went on further, and the resolution was adopted, 71 to 15.

There are advantages and benefits accruing to members while in health and prosperity. We endeavor to improve and elevate human character, to impress upon the mind the importance to impress upon the mind the importance and utility of noble and generous action. to enlighten the understanding in reference to the needs of our common humanity, to recognize all men as brothers, in a sense that all have one common origin, and are alike all have one common origin, and are alike the responsible and accountable to Him who esponsible and accountable to Him who hath created all things. peaker of the evening, Past Grand Master Col. Samuel Tolles, whose name is on our roll of honor, as one who joined the lodge in 1841. Your attention is respectfully invited to his delivery of the historical address.

The Historical Address. Brothers of Harmony Lodge and ladies : The occasion which brings us together at this time is one of interest. Forty years have passed away since the birth of our lodge. And as we look back no record on the pages of history furnishes so many important vents as are compressed within the compa of that period of time.

Throughout the civilized world the march f progress has been onward. Science and the arts have advanced and liberal ideas have developed. The railroad then in its infancy now binds cities, States and continents toearth, flashing intelligence to the remotest counds of civilization. The progress of our ountry in agriculture, mechanical arts and inventions has placed us in the front rank of the foremost nations of the world. Our opulation has augmented from eighteen llions to fifty millions, an increase of vast areas of territory have been added to country, embracing every variety of limate, abounding in mineral wealth, capawars, one the most gigantic known in history, resulting in holding compact the Union founded by those pioneers of civil liberty and breaking the chains of three millions of human beings held in bondage, finishing in letters of golden light that declaration sent

forth to the world 105 years ago, that all men are created free and equal. The progress of Odd Fellowship during this time has been all that its most ardent friends could wish. Its membership has inreased from 18,000, in 1841, to more than half a million, while nearly 8,000 lodges are eattered through our broad land teaching the precepts of the golden rule "That whatsoever ye would that men should do unto you, do ye even so unto them." On the 15th of June, 40 years ago this evening, Frederick Croswell, Grand Master of the State, with his associates in office met at Quinnipiae Lodge room in St. John's Hall, now known as Adelphi building, at the corner of Chapel and Union streets, and proceeded to institute the lodge. James W. Newell was elected noble grand, Joseph G. Anthony vice grand, Samuel O. Merwin secretary, and Wm. F. Beardsley treasurer. The following candidates were initiated:

Erastus R. Phelps. Andrew D. Martin, William Diksman.

The noble grand appointed as his supporters Harvey L. Kimberly and Mr. Judson: for conductor. T. C. Hollis; warden, Noah Chandler. The vice grand appointed Jonathan W. Morse and John H. Cook. Brothers Anthony, Merwin and Bradley were appointed a committee to procure a seal for the lodge. Brothers Stephen Gilbert, Noah Chandler, Mr. Dikeman, C. O'Neil and Phineas Frazier were appointed sick visiting committee. The receipts of the evening were \$199.12. This, brothers, is a summary of the doings of the lodge the first night of its existence 40 years ago.

Of the twenty-nine brothers that united that evening in laying the foundation of the lodge, only one, Brother Erastus R. Phelps, remains on the roll to-day. Twenty have passed from life's scenes to swell the great army gone before them. Two withdrew, Brothers Hollis and Ruickoldt, Brother Hollis to assist in the formation of City Lodge, and Brother Ruickoldt to assist in forming Germania Lodge, and our congratulations are extended to those brothers in having assistant

and Brother Ruickoldt to assist in forming Germania Lodge, and our congratulations are retended to those brothers in having assisted to build up two of the most prosperous lodges in the State.

In following the records of the lodge we find that at the end of the year, June 15th, 1842, the names of 117 brothers had been united with the lodge. Of that number ten only remain with the lodge to answer the roll call at its 40th anniversary. They are:

Exacts B. Pheles. Approxime Smith.

Erastus B. Pheips, Augustus Smith, John Bogart, Samuel Higby, Jonah N. Trest, Alfred W. Pheips, amuel Cleston Daniel Clark, eck Sperry. Samuel Telles. The number initiated, admitted by card an otherwise during the lodge's existence is 1,124. Of this number 113 have died, large numbers have withdrawn to form and unite with other lodges, a few have been expelled, and others dropped for non-payment of dues. The lodge has at the present time 413 members and a surplus of \$17,000 in the treasury. There have been paid out for relief during this time as follows:

ments to sick and disabled brothers.... \$46,714 meral benefits to families of deceased.... 3,865 Benerit to sick and disabled troubles.
Funeral benefits to families of deceased
For watching with sick bro-hers.
Relife of widowed families.

Painful Scene-A Wedding Party B ken Up. very unpleasant thing occurred in the adjoining town of Bloomfield last night. The laughter of a well known business man of Hartford was to be married to a New York agent of a Philadelphia dress goods house. The arrangements were all completed, the The arrangements were all completed, the time set, and the groom was to be on hand from New York. The wedding party assembled, a large and somewhat select one, and the Rev. Dr. Sage, of the First Baptist church of Hartford, was present to perform the cere-mony. The non-arrival of the groom on the 10 o'clock New York morning train at Hartford led to the providing of means for his conveyance to Bloomfield on his arrival by the 2:15 p. m. fast train; but he failed to appear on that, or on the 4:45 p. m., or even the 7 p. m. train. The wedding party was the 7 p. m. train. The wedding party was changed from one of joy to a scene of pain. The young lady and her family have the sincere sympathy of a host of friends, who appreciate the trying character of the situation in which they are placed. The conduct of the groom is such as to render it obvious that the lady is really fortunate in escaping from her intended marriage.—Hartford Times.

There was a large gathering at the resi dence of Mr. and Mrs. Enos Dickerman o Winthrop avenue yesterday afternoon to wit-Miss Hattie L., to Mr. Clarence M. Parker, of Orriskany Falls, New York, Rev. Mr gether, while the electric wire encircles the Porter, of the M. E. church, Hamden, officiating. Miss Edith Pinney, of New Haven was bridesmaid, and Mr. Parker, of Meriden was groomsman. Nearly a hundred of the relatives and friends were present, including a number from out of town. After the cer smony congratulations and good wishes for the future happiness and prosperity of the bride and bridegroom poured in upon the happy pair, and a very pleasant social time was enjoyed. The wedding presents wer both very numerous, beautiful and useful, and claimed their share of attention. Th company partook of an elegent wedding banquet, served under a large canvas pavilion erected for the occasion, and there was beautiful display of flowers. Mr. and Mrs Parker left on the 8 p. m. train for Niagar

The lightning struck the liberty pole in Windsor Locks Tuesday, and followed the supporting wires to the Mather House and tton mill. No one was injured and no se rious damage was done to the building. The house of Nelson Gallup, in Norwich, was struck by lightning Tuesday afternoon, and Mrs. George Friestly and her daughter Annie, occupants of a part, were thrown insensible. Mrs. Priestly was severely bruised. The French roof of the house was completely described the ceiling and lath

bruised. The French roof of the house was completely demolished, the ceiling and lath of two rooms were torn off, and several windows were broken.

The old theory that lightning does not strike twice in the same place was dispreved during the thunder shower at noon Tuesday. While that cloud was passing a bolt descended, struck the same chimney in the house of E. B. Platt that was struck last season, in the same place, and did about the same amount of damage. Mrs. Platt, who was in the attic at the time hanging out clothes, was thrown violently across the room, and though somewhat stunned was not seriously hurt.—Ansonia Sentinel.

ing to His Original Statements-Denystation-The Stalwarts Employing Detral Railroad Men to Be Watched. nvention to-day one ballot was taken, which showed but slight variation from yeserday's vote, the principal candidates for the short term scoring as follows: Conkling 31, Jacobs 49, Wheeler 25, Rogers 18, Cornell 10, Lapham 10, and several scattering votes being cast. Mr. Reitz, of the Seventh Kings county district, in voting sent to the clerk's desk a resolution adopted by the Brooklyn Sixteenth Ward Republican assocition declaring that Conkling and Platt cannot be re-elected, and requesting Mr. Reitz to vote for such candidates as can succeed and will represent the Republican party. He erefore voted for Richard Crowley instead of Conkling. The vote for Platt's term showed for Depew 54, Kernan 50, Platt 27, Cornell 10, and ten votes being scattered.

After the ballot the joint convention ad-The continuation of the cross-examination of Senator Sessions occupied the entire time of the investigating committee this morning. The answers brought out by counsel for the ommittee related mostly to Mr. Sessions' exrience as a lobbyist in former years and to his relations with lobbyists now. Very little reference was made to the Bradley case, except as to the motives that led to the interview in Mr. Bradley's room rather than in Mr. Sessions' room. There are no material discrepancies between Mr. Sessions' statenents of this morning and those formerly fiven by him. Mr. Bangs, counsel for the mmittee, wished to put in evidence two ar- tor and one of the most prominent citizens icles which appeared in the New York Tri- of Rockingham county, N. C. Their denune of May and June, 1879, relative to Mr. mands being unheeded they, by means of essions' course in the Legislature. Counsel sledges and other implements, quickly forced for Mr. Sessions objected. Pending discussion of the admissibility of the papers as evidence, the hour of 11 o'clock arriving, the mmittee took a recess until 3 o'clock. The committee resumed its sessions at 3 o'clock, with Sessions on the stand. He repeated the statements heretofore published about the incidents of the evening of June 8 peated the statements heretofore published about the incidents of the evening of June 8 at the Kenmore. He said that at neither of the visits he made to Woodin's or Barber's room was there any talk or allusion to influ room was there any talk or allusion to influer's inquest as to the manner of his taking

Witness fully and explicitly denied that at the time he left Bradley at the elevator to go up stairs he said, "Bradley, if you vote for Depew I have \$1,000 for you to put in your vest pocket," and, as Bradley testified, when rest pocket," and, as Bradley testified, when iradley refused, he (Sessions) said, "I will go up and see what is the best that can be ione." Witness gave a detailed statement of his connection with the passage of the post-office bill in 1861. Witness saw many regislators and committeemen and urged the passage of the bill by argument, out never gave or offered any financial consideration. It was not necessary. The bill passed unanimously. Witness never in all the nine or ten years in which he followed the business of lobbying in Albany pursued any other course. Never in his life had he given or offered or promised any financial consideration to any member for the support of a bill in which he was interested. No man that ever lived or that now lived could say he had ever attempted to influence legis.

man that ever lived or that now lived could say he had ever attempted to influence legis. Intion by the improper use of money, for he never had done so. While witness was loboying he was not a member of the Legislature. His brother, Walter L. Sessions, was a member in 1854 and 1855, Senator from 1861 to 1867, Congressman from 1871 to 1875. At this point Mr. Sessions was allowed to rest, and R. H. Pruyn of Albany, president of the National Commercial bank, was sworn. He knew a man called Charley Edwards: saw him at his bank June 4. Edwards came into nim at his bank June 4. Edwards came into witness' room and presented a check for ron will be strengthened at once. The police \$2,000. The check was one of A. D. Barber's of Liverpool have found in possession of Mc-

He corroborated the testimony of Pruyn. Witness gave a statement of Edwards' standing with the bank. Edwards made a proposition to witness that he (witness) should cash a check for \$2,000 on the Utica bank. The check was signed by A. D. Barber. Edwards objected to the rate of exchange, took the check and went away. He was sure the day was June 10. day was June 10.
Sessions was recalled and said Barber's room was resorted to by men of all shades of politics, both members and Senators. Witness never to his recollection saw Tillinghast,

of the New York Central railroad, in Barber's T. Coe Young, Assemblyman, was next sworn. He voted for Tremaine and Lapham sworn. He voted for Tremaine and Lapham all the time. Knew Edwards; had been in-formed that Edwards was a lobbyist; Edwards had several times talked to witness about the Senatorial candidates. Edwards had said to witness that his preference was Edwards had made suggestions that that if witness would vote for Depew he would be treated as well as the others; Edwards had never said just how the others would be treated and so witness did not know how well Edwards meant. Knew Surveyor Graham of the port of New York; he had two or three times asked witness to vote for Depew. Once witness asked Graham to give General Chryster the same place he formerly held in the custom house. Graham after asking witness to vote for Depew said he regarded the General as efficient and he should have his old cieneral as efficient and he should have his old place in the custom house if he (Graham) could secure it for him. Witness could not swear that what Graham said about the Gen-eral was in connection with his request that witness should vote for Depew. Witness was a Grand Army man and was looking out after its interests when he voted for Tremaine, who belonged to it.

Speaker Sharpe was recalled. He said he was not in his room at the Delavan the night Bradley came there with the money by any arrangement. Did not expect Bradley and had no understanding of any kind with him previous to that evening. Could not remember who were present during the evening or what conversation if any took place. Witness mentioned several who called, but was alone for a few minutes when Bradley and Jones called. Witness thought that those who called previously to the visit of Bradley and Jones did not sit down and talk to witness. Bradley and Jones did sit down as men who came with a purpose and to talk did did not sit down and talk to witness. Bradley and Jones did sit down as men who came with a purpose and to talk did not sit down and talk to witness. to witness. Bradley and Jones did sit down as men who came with a purpose and to talk about something specific. Witness thought it took him a minute to count the money. The witness if he had been engaged in a conspirately would have certainly remembered every detail of the conspiracy, but witness was not engaged in anything of the kind. Was not in his room to receive Bradley; did not expect him when he came; did not know he came to come or was coming the came for; had no knowledge directly or indirectly by word, rumor, hint or any other known means of the what Bradley had been doing or engaged in the before he himself told it. The balance of Speaker Sharpe's testimony was unimportant, peaker Sharpe's testimony was unimportant, stating chiefly to the difficulty of his not re-

-Restitution Going on at a Lively Washington, June 15 .- In regard to the umored appointment of new commiss of pensions and of the land office the Pres lent said to day that he had reached no dec sion. Secretary Kirkwood said to-day that the President and he discussed last night the subject of commissioners of pensions and of ALBANY, June 15.—In the voting in joint the land office, and that the President evidently did not desire to make any change in the pension office at present. Mr. Dudley, of Indiana, stands ahead for the land office

> The effect of the Treasury investigation The effect of the Treasury investigation is apparent outside the department even though the Secretary refuses to make public the report. The sum of \$100 was to day turned into the Treasury by an outsider who had bought horses of Pitney, manager of the Treasury contingent fund. This restoration was made because of the warmth of the scent. The city bookseller yesterday turned into the Treasury \$650 for overpayment for file-holders. The city dealer has returned a lot of carpeting which the committee were looking up. A hardware firm has made restitution to the amount of \$300. All of this was on account of the investigation of the committee. This straightening up of such committee. This straightening up of suc matters is considered well enough, but it is certain several resignations must be request ed bye and bye inasmuch as the nature of report demands them.

DR. J. L. LYON

DR. J. L. LYON,

The old reliable physician, located in New Haven since May, 1834, (27 years), has removed his office from 195 Chapel street to 39 Church street, Room 11, Hoedley Building, opposite Possoffice, up one flight of stairs; entrace either at 49 Church street or 67 Crown street. Dr. Lyon will continue as hereoforce to treat all diseases of every name and nature, with that marvelous success which long years of experience has given him. Thousands of testimonials from grateful patients smatched from the brink of the grave now rejecting in the perfection of health attest the unerring skill of Dr. Lyon. He especially invites those whose diseases under other methods of treatment have remained intractive, to call upon him. Visit him and he will at once describe your condition. Perhaps you would have been cured if your physician had understood your case.

If you have tried for health and failed, it is no reason why you should not try again. Health is precious to all, and if he cannot relieve your case he will tell you so. He can refer you to many, perhaps worse than you are, that were given up by their physicians and friends, who now enjoy good health. He will describe your case so clearly that you will know he perfectly understands your disease. It is something of great importance to you, although very easily accomplished by him, though no more wonderful than true. It is only the starting point to health for the physician to understand your disease, and then administer the simple remesty to remove that disease. Come, he will do you good. You may be faithliess, he will give you faith by his perfect knowledge of your disease, Come, he will cure that cough, pain in the head, side and back, remove that cold, sinking or burning at the stomach, stiff joints, rheumatism, gout, fever sores, cancers, salt rheum, crystpelas, seald head and all bad humors, with his vegetable medicines. Appended are a few testimonials, want of space forbids the publishing of more. Their names will be cheerfully given to those desiring them by calling at the Doctor's office. Case I is that of a lady who was pronounced by three of the most prominent physicians of her native city to be in the last stage of consumption, and told that her case was helpless and hopeless. After being restored to sound health by Dr. Lyon she sent the following letter, earnestly requesting that it should be published in the hope that it might reach others similarly afflicied:

To all who may be afflicted with that common disease, Consumption, or any weakness of the lungs, I would appeal to them to immediately consult Dr. John L. Lyon, of New Haven, Conn., feeling sure that by so doing they may be restored to health. For several years I was troubled with a cough, hemorrhage of the lungs and the usual symptoms of Consumption. I consulted and was treated by some of the most eminent physicians the country afforded, without deriving any pernament benefit whatever. In the spring of 1853 the disease made such rapid progress that my attending physician and friends gave up all hopes of my recovery. On the 16th of May, 1863, I consulted the above mamed Doctor. I was at that time reduced to a perfect wreck of my former self, coughing increasanty, and it would seem instend to the verse of the Express, arriving in Chicago at the p.m.

I was at that time reduced to a perfect wreck of my former self, coughing incessantly, and it would seem just on the verge of the grave. After the usual examination, he kindly but plainly informed me as others had done, that my disease was incurable; that I had but a few mouths to live. Having great confidence in his skill, I insisted upon his treating my case. He did so, and with astonishing success. In twenty days from the time I commenced the use of his medicines, my cough was less frequent, I suffered no more from hamorrhage of the lungs, and day by day found the terrifying symptoms of Consumption disappearing, and was gradually regalning health. I was treated by him one year—at the end of that time I can truly say I was restored to perfect health. It is now March, 1865, and no symptoms of the disease are felt. I have reason to feel sure that I shall suffer no return of the disease and it is not only a pleasure to me, but a duty I feel 12:00 p. m., Sundays excepted.
