DRY GOODS BULLET

THE SIIk House of New Haven. Dress Goods.

Cur stock of Black Silks is at present unusually worthy the attention of buyers. We have just received a delivery of the line of American Black Silks which we have been using for the last two years and the quality of this lot is fully up to the standard. After a thorough examination of all the Black Silks made in this country we have come to the constitution that this is the best, the make that not only pleases best at first sight, but gives the most seaduring satisfaction to the wearer. The entire production is taken up by a few leading dry goods homes throughout the country, and to ensure a sleady supply our orders have to be given to the manufacturer about six months. Three are three grades, all equally well mate, but differing in weight of silk to the yard. We are also very fortunate in our present stock of Gut. ne's, Bellon's and Savote's celebrated Frauch Black Silks, of which we have a very liarge line, nearly eve-

are also very fortunate in our present stock of Guine's, Bellou's and Savoie's celebrated Franch Black Silks, of which we have a very llarge line, nearly every number being exceptionally well represented by the pieces now in our shelves. We have also a number of other less known makes, bought on their merits whenever we could see unusual value in them. We do not advertise the number of pieces we offer; any one can outdo us at that; but we show on our shelves and counters the largest and best stock in New Haven. Of that fact any jerson can to day be couvinced by simply looking. Neither do we say that our Black Silks are "worth 35 to 30 per cent, mare" there is not that margin in flat trade. But we do say that the fact so generally believed by New Haven people, namely that we give the best walves it Black Silks is senceptible of proof positive any day in the year, and to-day not less than year.

In colored sitts incre is more irregularity of value and "jobe" are more frequently obtainable. This week we shall give a line of the leading colors in a silk at 87% o a yard, which we believe it will be very hard to match at \$1 in any other store.

Housekeeping Goods.

The recent low prices in Cottons are unchanged. Cotton Cloth has not been cheaper since before the war (except for a short time in 1873) and prices are more likely new to advance than to recede. It is a good time for thrifty people to lay in a large supply. We have a large line of now Prints and Shirtinga.

L'Our purchassa for the Spring trade are arriving daily and we are already able to show a very handsome assortment of Cashmeres, Shoodas, Fonles, Serges, Cheviota, Flannels and Cloths in the newest shades, some of which are exceedingly greaty. We are also showing a line of French pinchees, superior to anything that was shown last season in perfection of ninish and fine clearness of affect. Care is mecasary in comparing these goods with others, as there are several lines of German goods in the market closely resembling them at first sight, but found to be far behind in texture when the two are put side by side. We show a splendid line of French double faced all twoof swills, 42 in. wide at 50c a yard. No better goods at the price can be got anywhere.

Chean Dress Goods. Cheap Dress Goods. We have excellent value in American Cashmeres, Serges, Flancels and Beiges at very low prices, and we offer a large variety of beautiful styles of Dress Pinids at 10c and 13% o yard. These goods have been sold at wholesale quite recently at 23% a yard, and retailed at 25c, and are really splendid waite at our prices. Our assortment is large. The display of New Cambries, Percales, Satines, Chambrays and Scotch Ginghams is very attractive.

Ladies' Underwear, &c. Our new line of goods in this department is meeting with hearty appreciation and our sales are larger this sesson than ever before. The second delivery of our importation of Hamburg Embroideries has now been opened and our stock thus grestly improved. Attention is directed to the very large assortment we show in white Combination Trimmings.

Our motto "keep up the quality" is found to work very well in this department, for nothing tries a lady's patience more than to find that a kid glove she has bought somes here as a great bargain turns out to be only a great fraud. We will not risk anything in that way, but we are always open to buy a real bargain when we see it, and this week we can give such a one in a very excellent Rid Monaquetaire Glove in the new shades at \$1. The assortment of our standard goods is full, and as good as usual.

New Trimming Laces and Edgings, Antique Laces, real and initation, Linen, Embroidered and Lac Collars in very attractive new styles for ladies and children, new Tidies and Pillow shams, &c., are being

Hosiery. We have ready for sale this week probably the dinest line of Ladies' and Children's Hose ever shown here. It comprises everything in plain and famoustyles that seemed destrable for the trade of New Haven, and in buying this year we gave effect to our recent experience of the fact that the trade of this city requires finer goods than seemed called for in former years. The assortment is also complete in low priced goods.

I had all these troubles intensified, and was in such a bad condition that I could not get up out of my chair except by putting my hands on my knees, and almost rolling out before I could straighten up. I tried the best doctors, and many kinds of medicine, but all failed to help me; and I experimented so long endeavoring to get cured that last spring I was in very poor shape, and in seek ing for relief my attention was directed by a friend to the remarkable cures of kidney diseases, &c., which were being accomplished by Hunt's Remedy. Thursday, March 8, 1883. STENOGRAPHY IN THE COURTS. A bill has been offered in the Legislature for the employment of stenographers in the

Superior court. This bill, if passed, will experiment. meet a want that has long been felt. The painful slowness with which our trials proeed is a matter of common remark. By far the greater portion of the time consumed by trials is spent in writing down the testiiony. The average witness would utter from one hundred to one hundred and fifty words a minute, if he were allowed to speak without interruption. Even legal penmanship rarely scrawls more than thirty words minute. So the witness is obliged to give his testimony in precemeal between long pauses while what he says is being written down. It is hard to see what good purpose this absurd and antiquated mode of taking testimony can serve, unless it be to give dishonest witness more time to make his crooked path straight. It is surprising that this state of things should have been tolerated so long. Yet bills providing for the use of stenography in the courts are no new thing in our Legislature. They have been repeatedly rejected on the plea of the inrease of expense. Exactly how that which would shorten trials by more than five fold would increase the expense it is hard to understand. In our Court of Common Pleas t takes from one to three days on an average to try a case. In the Marine court of the city of New York, (a tribunal of about the same grade) where phonography is used, ten or a dozen cases are eften heard in a day. It is entirely safe to say that no single in stance of this kind ever occurred in this

It is plain enough, from a comparison of the two systems, that thousands and thou sands of dollars will be annually saved by the adoption of this bill in lawyers' fees and court expenses. Moreover, the notorpresent mode of taking testimony. Although the press of legal business is very great in New York, there is no tribunal of its grade in this country where causes come so speedily to trial as in the Supreme court of that State. Phonography has been for years in use in the courts of New York. We hope that a little genuine economy will take ish spirit of retrenchment which has thus

There has evidently ing one thing, and that is the relations of the two departments of the company—the stock department and the participating or mutual department. This being the case it is difficult to see how This being the case it is difficult to see how the claim that the mutual policy holders will be affected by the capitalization can be fairly made. They have, as will clearly appear to anyone who will investigate the matter, no right to any share in the surplus of the stock department. Therefore all the talk about protecting the interests of the mutual policy holders by a denial of the request of the company amounts to nothing. It further appears that the mutual policy holders, as handed him a tract entitled, "The Sinner Stands on Slippery Places." The capital of the Ætna is only \$750,000, and the company is in first-class condition. The surplus on the stock side is a little over \$750,000 and the company asks for authority o capitalize any part of this and in the future to add to the capital from the surplus until the capital is \$2,000,000. The request is a legitimate one, and the directors of the fully; "I sat down on it to so honestly and well, are entitled to a fair and full hearing. A stylishly dressed woman entered a restaurant. The waiter handed her a bill of fare, and said, "Please mark off the dishes you wish to order." Could a woman in a sealskin confess that she could not read? Taking the pencil she made a few dashes, and her order read: "Dinner 50 cents," "Feb. 20, '83," "regetables," "please pay at the desk," "celery." The waiter brought her beefsteak and onions and prune sauce, and she did not dare raise a word in protest.—

COMMUNICATIONS.

Will the "Congregational Pastor" be kind "excess" in regard to card-playing and dancing? Perhaps he will preach from the pulpit on this subject. He would undoubtedly attract a large and intelligent audience, for his articles have been extremely interesting. fortunately this class of balls is too often patronized by young men from our best families, and who are not restrained, but learned to dance and play cards at home. One fact is better than a thousand theories. The judge says: "I have found, in my experience as police judge, that hundreds of the deprayed women who have been brought be-

It is certain that whoever does read this answer, however lukewarm he (or she*) may have been hitherto, will feel himself (or herself*) roused to the importance of greater educational advantages, not only for women, but for the superior sex as well.

The opportunity which this answer of the trustees affords to liberal-minded people, and especially to these petitioners, to endow Columbia College with a capital that shall enable her to give diplomas to women, is one that should be kept before the mind. True, the trustees have omitted to mention the sum that would be required for such a great work, but no one need fear to exceed it. Doubtless this is one of the embarrassments with which they are now laboring. Let us with which they are now laboring. Let us hope that their excessive modesty will not restrict them within too narrow limits. For, in the first place, we should consider what incalculable benefits these diplomas will bespirit that dictated the answer, no one could question that they were the award of disinguished merit, that the examinations had been thorough in every respect, no ordeal left unapplied, and that the trustees, in their anxiety to acquit themselves of so great a responsibility, had made sure that the exam-inations should be as exhaustive as the col-

questions of the day to slip by us, trusting to the younger generation to set them right. Now this is folding our talent away in a napan object of charity or to an institution municipal suffrage for women, limited by education, and says that his 'final and supreme the itself, as in this instance, of combining

Lastly, has it occurred to Rev. Morgan Dix to take advantage of the educational revival which he has (unintent onally) promoted? The Lenten season, wherein the clergy remind their congregations of their sins, is a favorable time, if taken at its tide, for the harvest of golden sacrifice. There may be mothers who have not yet ordered the spring out fit of their charming debutantes, and who are, therefore, still open to compunctuous visitings. Let Doctor Dix by all means begin at once the good work which that conscientious, liberal minded, but alas, impecunious institution Columbia college.

The first installment of the monkeys

the world, which Prof. Henry A. Ward, of Rochester, is to furnish the American Muse-um of Natural History, arrived in this city last week, and the specimens have been placed in cases in the museum. Prof. Ward placed in cases in the museum. Prof. Ward expects that it will take him about three years to fill the contract, for which he will receive \$9,500. There are in all about three hundred specimens, less than one hundred of which he has already secured. The installment already delivered includes, however, some of the most interesting and rarest specimens of the monkey tribe. They are placed at the rear end of the first floor and occupy six or eight cases. First in interest are the

"In Abyssinia, where these came from, I saw one day a group of them by the is a builder, was communicating with the ofroad side. They were egging each other on to attack us, those behind crowding the vanguard. I wanted to shoot at them, but my comrades would not let me. If we had killed one of them the chances are that it would have been all up with us." The baboons live largely on roots and insects, other monkeys mainly on fruit. They are covered to the markets and calling me he said he could not make the other party hear him. 'Tell him,' add the whole lot of them.' I dropped the phone in consternation. I had never heard such language in my life. I refused to remark the measure and talk the measure and tal beefsteak and onions and prune sauce, and she did not dare raise a word in protest.—

"I have made ene human being happy to day," said Fred Blanks to Bob Belt, an Austin lawyer. "Did you send a barrel of flour to a poor widow?" saked Bob. "No; my means do not allow me to be so extravagant, but I told an applicant for a position in the Legislature that I knew he was going to get it." "Well, that was one of those little courtesies that casts a ray of sunshine into the troubled life of a fellow-traveller in this vale of tears, and which every group of animals," said the professor, turning to a case near the lemurs, "sends out specimens where they don't belong. The tiger, for instance, is a native of India, but it is found in Corea. Here is an example in the monkey tribe. This fellow with the thick fur I bought of a priest in a temple at Tokio. It came from Yeddo, in Japan, where the species run around in the snow where the species run around in the snow. So you see monkeys are not altogether a product of the tropics." A curious looking

The exhibit includes marmosets and ouistitis, small animals which often become pets. There is no museum in the world which has a complete collection of monkeys. Prof. Ward has been engaged in furnishing specimens to museums for the past eighteen years. At his establishment in Rochester, which is the only one of its kind in this country, he employs twenty-three men. Fif-ty collectors and correspondents in various parts of the world furnish him with speci-mens. Animals are sent to him in liquor or brine, or the skins, dried or packed in salt, are forwarded. In addition to supplying the American Museum with the monkeys of the world, he has also engaged to complete the present collection of the mammals and birds of North America, numbering in all about eight hundred specimens. For this he is to receive \$10,000. He is also furnishing specback as 1825. The people were then, as now, proze to contract coughs and colds. Our ancestors wanted to find a certain cure for these maladies. Much care, study and labor were employed, and the resulting prescription has been known and successfully used many years in the section where it was first compounded its merits being passed from mouth to mouth. A Talk With Bismarck.

Yearning for Rest.

[Vienna Correspondence London News]
An intimate friend of Prince Bismarck, a member of Parliament, paid the chancellor a visit in the sick room a few days ago, and reports a long conversation, of which the prince had the larger share and the chief points of which are contained in what follows: "Is it not out of all reason that I should be ill just now? Botticher is a convalescent, Burchard is away, and I must keep to my had." We are getting old and sick to my bed! We are getting old and sick and dare not ask to be our own masters and devote our time to the cultivation of or garden or the care of our own affairs. cannot express how desirous I am to get for a few days and rest, after the con and turmoil of my every-day life. If I could have it my own way I would see no one in the first place, we should consider what incalculable benefits these diplomas will bestow on the beneficiaries of the college. If given (as doubtless they would be) in the apparent of the college. If the property of the college is the same of the college. stonishment (under the circumstances) if it should be the means of calling her to a seat among the trustees themselves.

But on account of the College the answer of the trustees should be read. Some of us are well along the vale of years and have worked hard enough to feel that we have earned our ease. We do not wish to be involved in controversy, so we allow the vexed questions of the day to slip by us, trusting hard grow old we are incessantly on the lookout for an opportunity to get away. The eternal wish for repose becomes a sort of all ment, and I for one cannot get rid of this ailment, although I have plenty of other sufferings to grumble over. If my career had to supped short of a councillor I should have left my post long ago. As it is, I am condemned to spend my days in the Wilhem strasse, the street of all others that I have hated from my vouth. I do not think I hated from my youth. I do not think shall ever set foot in the Reichstag again. see they get on splendidly without me. Why, the empire-machine is in first-rate working order, and I am so glad there is no quarrel ing just now. If some interminable dispute were going on, and I should have to grieve were going on, and I should have to grieve and feel angry about it, I do believe it would be all over with me. My present ailment is older than most people think. The doctors have always said there was not the least dan-ger, but, oh, the pain I suffer sometimes! I assure you I could run up a perpendicular wall when it comes on. But it only comes occasionally; then it suddenly leaves off and I force all about it and line is the hore that I forget all about it and live in the hope that it will never return. Just you tell them in the Reichstag to do all they can to preven seless discussions. The Emperor everything and it is our duty to spare him as much as possible. It is true he is in better health than any of us, but he is much older also, and he has deserved to experience noth ing but what makes him comfortable and happy. Messes. C. I. Hood & Co., Lowell, Mass.
Gentlemen—I was a great sufferer from Salt-Rheum on my limbs, for a dozen years previous to the summer of 1876, at which time I was cured by Hood's Sarsaparilla. The skin would become dry, chap, crack open, bleed and Itch intensely, so that I could not help scratching, which of course made them worse. At the time I commenced taking Hood's Sarsaparilla (in the summer of 1876) they were so bad that they discharged, and I was obliged to keep them bandaged with linen cloths. The skin was drawn so tight by the heat of the disease that if I stooped over they would crack open and actually bring tears into my eyes. The first bottle benefited me so much that I continued taking it till I was cured I used one box of Hood's Glive Ointment, to relieve the itching. Hoping many others may learn the value of Hood's Slive Ointment, to relieve the taking they in the same they would reach one box of Hood's Slive Ointment, to relieve the itching. The speaker believed that there was a Jesus of history, but the Christ of the Gospel was largely a picture. But, accepting this semi-mythical being as a real historic character, the question the speaker proposes to discuss, was, is this Christ of the gospel a perfect being? He answered the question in the negative. He gave as his reasons: First, that Jesus did not claim to be perfect. Seclenbeck took place yesterday afternoon. portance. Mr. North believes that the inrease of capital as proposed by the bill would tend to strengthen the company and give additional security to policy holders. Said he. "The surplus in every stock insurance company belongs to the stockholders by the charter which created the company, and dishonest men might wind up a company at will and pocket every dollar of surplus; but the moment that that surplus become incorporated as a part of the capital stock it is holden invariably as a protection to policy holders and it would be a criminal and State prison offense for the stockholders to touch it." Further Mr. North explained the risk attending every business enterprise, of which life insurance like fire insurance is one. Men put in their capital at the hazard of losing it by unfortunate events in the progress of the business, and when success attends them they are entitled to the benefits derived; and whatever surplus earnings may be de-rived as business increases and additional liabilities are incurred the stockholders are in every case permitted to capitalize surplus and thus strengthen their enterprise and make their security stronger. No one will claim, said Mr. North, that the Sargent concern of New Haven, for example, should not have the benefits of its increase of busi ness from its small beginnings to extend its sales by the addition of accumulated earnings. All great enterprises are built up by this source of strength—capitalization of profits fairly and honorably earned by success-ful business management. The Ætna ful business management. The Æina Life started, he said, with a small capital of \$150,000. It has prospered. It was a stock company exclusively, as it is to day in that original and separate department of its business. Converted into and when the whole amount of increase to \$2,000,000 is reached by gradual accumula ions-for it must take a series of years to cover the maximum amount—the company will contribute in taxes about \$40,000 more than it now pays, which is an important item of revenue. The Ætna company has paid into the State treasury in the last ten years, from 1873 to the present time, the enormous sum of about \$850,000. If the capital stock had been \$2,000,000 the amount paid in taxes would have been a million and a quarter of dollars.

Legislative Notes The Railroad committee introduced a new feature into Connecticut railroad legislation yesterday by reporting to the House a bill iving the board of railroad commissioner power to pass upon applications to build under the general railroad law. Under this bill whenever a railroad company shall have made and filed its articles of association, together with the accompanying engineer's report, as provided in article 1, part 9, chapter 2, title 17 of the revised statutes, it shall within ten days thereafter apply to the board of railroad commissioners for a hearing and determination of the question whether the railroad which such company proposes to construct is a work of public convenience and necessity to the citizens of this State. Notice of the time and place of this State. Notice of the time and place of sech hearing shall be given in two or more newspapers, to be designated by the railread commissioners, published in each county through or into which the proposed road is to pass, for two successive weeks prior to the hearing, which notice shall contain a brief description of the general location of the proposed railroad, the names of the towns through which it is to pass, and the names of land-owners whose land is to be crossed.

The bill makes provision for the machinery of filing such application and governing such hearing, and gives power to carry appeals to hearing, and gives power to carry appeals to the Superior court in the county wherein the principal office of the company is to be lo-cated; the court is to appoint a committee of three judicious and disinterested citizens of the State to revise the doings and deciion of the commi ers, the decision o his committee to be final.

The Railroad committee reported yester

day also in favor of granting the railroad commissioners power to order any railroad company to stop using for switching pur-poses tracks which cross a public highway when such delay is detrimental to public con-

The art exhibition now in progress at Cutler's gallery, and the probability that it may be but the first of a series of annual exhibitions, prompts us to suggest to our younger business men the wisdom of establishing, the practice of buying one or two fine pictures each year, and thus gradually acquiring a collection which shall give great pleasure to themselves and friends, be a constant means of cultivation and education to their families, and at the same time an investment of real value to their settle. Such platters, wheeld be said to their settle. and friends, be a constant means of cultivation and education to their families, and at the same time an investment of real value to their estate. Such pictures should be selected with deliberation, great care being taken to obtain the work of artists whose productions have a definite value by reason of their reputation already established, or the work of some of the younger artists who show unmistakable evidence of power and promise of eminence in the near future. Such works increase in value with age, besides yielding constant dividends of pleasure to their possessor. We hope that a large number of the choice pictures in Mr. Cutler's exhibition will be retained in New Haven, each one forming a nucleus about which others shall gather each year till many creditable collections shall be formed.

Outrage and Murder-A Horrible Double

WACO, March 7. - A horrible double crime was committed yesterday, near Hubbard, by Tom P. Vardell, a son of a prominent stockman of this county. Vardell induced a young girl named Landa to take a nitted a brutal outrage on her. An outcry vas raised, when Vardell shot the girl's father brough the heart. Vardell made his escape arge reward for his apprehension, and the

ous parts of Canada show that trains were blocked and much damage done by yesterday's storm. Last night a schooner was day's storm. The daughter was ill from a cold. The fire men were unable for a long time to master the flames. The coroner was notified and viewed the remains of both bodies at the morgue this afternoon. The bodies of mother and daughter presented a fearful appearance. Their hands and feet were badly burned, and their skin of a deep brown color, consequent upon exposure to the heat and smoke. The ladies were removed at the request of a married daughter of Mrs. Wakeman to the undertaker's. They were taken this evening to Sandy Hill for interment. Piercing Windon Capitol Hill—The Su-preme Court Not to Hold Sessions in Hartford Exclusively—The Metropolitan Gas Company-More Agitation of the License Law-Other Matters of In-

Special correspondence of JOURNAL AND COURSES.]
The approach to the Capitol this morning was one of the most disagreeable that has een observed since the opening day of the ession. The wind was cold and piercing and the light snow came with much force into the faces of the pedestrians as they plodded their way through the snow that filled the walk in many places. It was a great relief to get within the protecting walls of the Capitol where there are no prevailing storms xcept those that occasionally occur between embers while discussing questions of more or less importance in the halls of legislation. The business in the Senate, as usual, was disposed of promptly, but little debate follow-ing the various measures under consideration. In the House, however, there was the usual ventilation of opinions by different members. The topic of debate in the House this morning was on making the "sole capital" the place where all sessions of the Supreme court shall in the future be held. Mr. Sumner, of Hartford, led the element that favored the bill, but with all his eloquence and persuasive power he could not make the najority believe as he did himself. Mr. aw, of New Haven, made a strong speech n opposition to the bill and the rguments he advanced in opposition to the proposed change were not successfully answered. When the vote came to be taken Hartford and its representative, backed by all the legal talent of the city, were buried

out of sight, and the mourners outside of Hartford were few. There was but little committee work done this afternoon, although some of the committees were in session for the purpose of hearing a few minor cases and of deciding upon some of those cases and of deciding upon some or those that had previously been heard. It was expected that the Committee on Cities and Boroughs would hear those in favor of the bill granting permission to the Metropolitan Gas company to lay gas pipes in the streets of New Haven and furnishing gas to the citizens of the same. It will be recollected that this company tried to get a similar bill through two years ago, but they met with an inglorious defeat. Ex Judge Lynde Harrison was present to look after the in-terests of the New Haven Gas company, but his services were not needed as the friends of the Metropolitan company did not put in an appearance. It is now thought that this com-pany will not make any fight this year, but will simply ask that the bill be continued to the next General Assembly. The hearing was adjourned until to morrow, the commit-tee desiring to give the petitioners an oppor-tunity to be heard if they so desire. There was a further hearing before the Temperance committee this afternoon on

he repeal of some of the provisions of the present license law, the bills under consideration being those that were discussed on Tuesday afternoon. Among those who ap-peared to-day was Charles L. Bollman, of ew Haven, who made a strong plea in favor of the bill under consideration. Following is the business transacted in the Senate and House to-day. The Senate was called to order at 10:30 by

Lieutenant Governor Sumner. Prayer was offered by Chaplain Parker. dry petitions and committee reports from the House, the Senate concurred in the House amendments to the bill requiring teachers to annually report to the State board of education what branches of study are being taught.

The Athletic Games—A New Chemical Laboratory.

The first winter meeting of the Yale athletic association was held yesterday afternoon in the gymnasium, beginning at 2:30 o'clock. The events yesterday consisted mainly of trial hests, and the chief interest centers in the games of Saturday, which is "ladies" day."

The first event of the afternoon was the tug of war between teams of four men each from 83 and 85. The teams weighed about 600 pounds each. After the usual five minutes pulling '83 was declared the winner, as her team had pulled the rope over aix and one-half inches. The next struggle was between '84 and '86, won by '84, eleven and one-half inches. The winning teams are as follows: '83, Beede, A. Bowman, Carr and Stone, (captain.) '84, Dodge (captain.) Farwell, C. M. Walker and E. Wells. These teams will pull against each other next Saturday.

For the feather weight sparring two men appeared, R. A. Sosdick '83, and H. C. McDowell '84. Won by the latter. The contestants for the middle weight sparring were in the gime and sone half inches. The next event was the feather weight wrestling. Two freshmen, Peet and Bidwell, entered the ring. Their antics were very amusing to the crowd. Six times Peet fell face downward in the sawdust and Bidwell was unable to turn him. Finally Bidwell got two falls and was declared the winner. For the light weight wrestling Holmes '84 and Mallon '85 were the contestants. Mallon wong in two straight falls. Bigelow '85 and Flowers '85 next wrestled as middle weights. Bigelow won. This event closed the meeting. The events for ladies' day will be much more varied and extensive. The referee was W. C. Camp. Judges, H. W. Calhoun and Charles Halsey '83. Timer, C. W. Harkness '83.

public. It consists of two parts—a frame, not unlike a common bedstead, having soft, 57 59 & 61 Orange St. flexible bands extending from side to side on which the patient rests with ease and comfort. These bands are adjustable and are readily removed. The other part is a sort of novable car or trundle bed frame on which the bed is made and is so arranged as to be raised or lowered by crank, being elevaed to the bands and supporting the patient, or depressed and removed as the occasion may require. Simple in construction, never getting out of order with fair usage, giving comfort to patients prostrated by exhaustion resulting from disease or broken limbs, admitting of changing from one bed to another without discomfort; permits a change of bed clothes, taking out and cooling or airing the mattress, and any service on the part of the nurse without pain or even discomfort to the patient. These facts make it beneficia in cases of extreme weakness; and in every kind of disease which requires the patient to maintain a quiet state this bed will be found invaluable. bopeless. After being restored to sound health by Dr. Lyon else sant the following letter, earnestly requesting that it should be published in the hope that it might reach others similarly affilted:

To all who may be afflicted with that common disease, consumption, or any weakness of the lungs. I would appeal to them to immediately consuit Dr. John L. Lyon, of New Haven, Conn., feeling sura that by so doing they may be restored to health. For several years I was troubled with a cough, hemorrhage of the lungs and the usual symptoms of consumption. I consulted and was treated by some of the mest eminent physicians the count y afforded without deriving any permanent benefit whatever. In the spring of 1863 the disease made such rapid progress that my attending physician and friends gave up all hopes of my recovery. On the 16th of May, 1853, I consulted the above named doctor. I was at that time reduced to a perfect wreck of my former self, coughing incessantly, and it would seem just on the varge of the grave. After the usual essamination he aindig but plainly informed me as others had done, that my disease was incurable; that I had but a few months to live. Having great considers in his skill, I insisted upon his treating my case. He did so and with attonishing success. In twenty days from the time I commonced the use of his medicines my cough was less frequent, I suffered no more from hemorrhage of the lungs, and day by day found the terrifying symptoms of consumption disappearing, and was gradually regaining health. It is now March, 1865, and no symptoms of the disease are felt. I have reason to feel sure that I shall suffer no return of the disease, and it is not only a pleasure to me, but a duty I feel that I owe to hundreds of sufferers who are being daily carried to the grave by consumption, to arge upon them the necessity of seaking relief where it may be found.

Very respectfully,

D. M. S.

The following is an extract from a letter received from a patient treated and cured of semisal weak-ness: I have just anished the medicine you put up for me and can trathfully s-y that I feel a different being. My appetite is very regular and I am not troubled with that dull headache that I once had, and sleep nevar was so refreshile, ss I am not disturbed with that dull headache that I once had, and sleep nevar was so refreshile, ss I am not disturbed with dreams. Before I came to you it was difficult for me to confine my thoughts for any length of time to any subject, undoubledly owing to that complaint, and the contrast is quite noticeable. If I ever know one troubled with that complaint I shall immediately direct them to you as an effectual means of sours curse, for it seems to me that I almost owe my life to you, for it is that been allowed to grow upon me the time could not have been far distant when that incurable disease (consumption) would have been deeply scated in my system. Piesse accept my sincers thanks for your treatment thus far. I remain yours truly.
