fantile wonder has multiplied into a round half dozen. And if he doubles up with the colic or trials of cutting teeth or the necessa-

ry evils of mumps and messles and whooping cough and scarlet fever and rash and throat distemper, and short sleeves and bare legs and pins sticking into him and too much candy and a bad temper, why her husband tells her that he "does wish she would try and

THE ANARCHISTS. A lecture recently delivered by Profes Richard J. Ely of Johns Hopkins university oncerning the progress and purposes of an archists in this country has attracted considerable attention. Professor Ely believes that the situation is serious. If, he said in his lecture, it were known hat one thousand men like the notoriou rain robbers, the James boys, were in small groups scattered over the United States, would not every conservative and peace loving householder be filled with alarm, and easonably so! Yet here we have more than en times that number, educated to think obbery, arson and murder justifiable, nay, ven righteous; taught to believe the slaughter of the ruling classes a holy work, and prepared to follow it with all the fanaticism f religious devotion-ready to die if need be and prepared to stifle all feelings of gratitude and natural affections, and to kill with their own hands every opponent of the sacred cause....There are those who, when extensive and riotous strikes again occur, will remember the teachings which are entering into their flesh and blood, yes, into their very soul, and will take their muskets and dynamite and descend into the streets, and, thinkand bloodshed to the defenders of our instirangement of classes, incalculable destrucion of property and a shock to the social for years to come." Professor Ely has been sharply criticised for being so much afraid of the anarchists than anything else. They are few in number

and not especially courageous and influential. But while there is no good reason for by Professor Ely and others who study the ed upon to consider. 'signs of the times." The anarchists may be blatant cowards for the most part, but owards can and do use dynamite. There is no doubt that the suffering, discontent and recklessness among the laboring classes are avorable to the formation of mobs ready to lo violent work. It is not sensible to cry beace, when there is no peace. It is far petter to fairly discuss the situation and see what remedies can be suggested, as Rev.

Newman Smyth of the Centre church in this sity is so ably and clearly doing,

White pine cut in 1884 was 8,075,533,054 feet, an increase over the quantity cut in 1883 of more than 5 per cent. There was a still larger increase, over 15 per cent., in the production of shingles. From a vast low plain dense ly covered with a tropical forest the huge mass of the mountain is uplifted to a height of nearly two miles. Its sides for many hundred feet from the summit are walls of bare rock, so nearly vertical as to be quite \$\frac{1}{2}40\$, so you see 140 pounds of me are native unscalable by explorers hitherto. How much better off the laborers of this country are than those of some other countries is indicated by an account of the condition of the workers of Dundee, Scotland, published in the consular reports. In that city there are from fifty to sixty thousand women and girls employed in the mills. The time of work is fifty-six hours per week. COMMUNICATIONS.

Dull Times And The Cause. In your paper I find a communication headed "Dull times and the cause," and signed "Experience." The main cause of dull times, as stated there, is "overproduction." For my part, I cannot see anything the business up in good shape. In the first of this kind, when the necessities of the great majority are not satisfied, when we see nobody. A man may be ever so homely and warehouses loaded with food and clothing still be normar. Whiskers cover up most of on one hand, and hunger and nakedness on the other. I rather think it is "underconsumption" that causes dull times. The workingman is underpaid. After deducing the cost of raw material, machinery, etc., from the value of the products, he then enjoys for his labor only about 3g of the remainder and is therefore unable to buy all these products, lacking the other five-eighths,

That a new musical regime had been de

ided upon at Trinity church has been in the air for some time past, and has awakened such stir in musical circles in this city. That a boy choir has been decided upon in place of the present choir was one of the reliable features of the current rumors on the subject and it was likewise reported that Dr. Cutler, of Troy, N. Y., had been engaged to take charge. The fact is that Mr. W. R. Hedden, jr., an accomplished organist now of Jersey City, is engaged and has already begun training the boys for Trinity's new choir and will have charge of the organ. Mr. Hedden has been for some time past organist and director of music at Grace church, Jersey City, and also engaged in city, and was the assistant organist of Trinity under the noted Mr. Messiter. He has also been engaged as organist at the recitals to be given at Chickering Hall by Mr. Frede-rick Archer. Mr. Hedden will have a choir of thirty-five boys, of which about eighteen will be on duty each Sunday. The new regime goes into effect May I. Mr. Hedden will soon take up his residence in this city.

He is about twenty-four years of age and single.

in the other churches will remain substan tially as they have been the past year. THE JOSEFFY CONCERT.

The Dramatic and the Concert Stage The citizens of New Haven had an oppor the freight depet at Belle dock were blown tunity last night to enjoy two entertainment of a totally diversified nature. At Carll's Opera House Mr. Edwin Booth appeared in drama, while at the Atheneum Mr. Joseffy performed on the piano. Mr. Booth achieved his success with the assistance of his fellow actors. They all represented dramatically before our view scenes and incidents of hu man life and thus succeeded in engaging the

attention of the audience. The drama in its greatest perfection is de pendent on the co-operation of all the fine arts. It requires the architectural beauty of the temple of art, the plastic art, painting, poetry and even music. The recital merely of the work of the poet without the broad stage, decorations, costumes and music be tween the acts would be a barren performance and would not excite the imagination of the listener. The greatness of the actor does not equalist in his excellent declamation only. der to personify and represent incidents which dazzle the eye and gratify the ear. Nature's rights have to give way to artificial processes, when even the actor's face is disguised. The success of the drama therefore depends on the completeness of all the other

The performance of Joseffy at the Athe neum is of an entirely different character. Here we find no broad stage on which the play is acted. Only standing room for one instrument is required, decorations are totalhimself. He must appear naturally In fact the costume of the performer is of no nence. No poem or text book is required. To the art work of Joseffy all those concomitants which are necessary to the success of a Booth would be injurious. The istener comes to the concert with one object, that is to hear the artist play on his in-strument. While it is the object of the

drama to portray on the stage the actions and deeds of men and women and to represent to us the histories of the past and present, and thereby dealing with the outer world only, Joseffy's work appeals to the highest emotions of our soul life and thus affects our inner world. This is the explanation for the devout at-This is the explanation for the devout attention with which the audience listened to the performance of Joseffy. Their mind's thoughts were absorbed into another world where they worshipped with the high priest at the shrine of his art temple. In a performance of this kind there is no necessity for any delusion or anything artificial. Nature here velores someone and no discruise can here reigns supreme and no disguise can enter the sanctum of pure and true art.

Last night's programme was arranged in hronological order. It commenced with an ld-fashioned overture by Bach, and was followed by Gluck's Arieta and a sonata by Beethoven. He tarried not long in the anti-quarian realms of the old classics, but at once attacked Schumann's poetical Warum Toccata and the popular Traunierei, until he drank at his own fresh spring and brought us to light-hearted Vienna's musician Doleful Chopin, the everlasting friend of every pianist possessing a vivid imagination,

pianist possessing a vivid inagination, was beautifully recited to us, and when Paganini's Campanella was brought forth in Master Liszt's dressing, we were reminded that both are the founders of modern virtuosity on violin and piano. The last section of the programme consisted of two compositions of the concert-giver and of the Spinning Song of tender Mendelssohn and a fantasie on his Midsummer Night's Dream.

Mr. Joseffy played with the skill of a great Mr. Joseffy played with the skill of a great pianist, with a feehnique which can hardly be attained by natural practice and in his conception of delivery he met our fullest appre-ciation. The audience were all delighted

ously expressed a wish to hear him again. The piano used by Joseffy was one of Steinray's concert grand, and much of his success s due to this magnificent instrument. Its tone rang out with clearness and its re-sonance soothed the ear. It is wonderful to conceive an action capable of producing such a powerful effect, and at the same time toning down the great power of the musical giant. The sustaining quality and the variety of tone and color which were noticeable in some of the pieces played are special qualifications of the Steinway pianoforte structure. The

The quarterly meeting of the New Haver

ing Out on St. Patrick's Day. Twenty-eight delegates from the A. O. H. Montgomery Benevolent and various of the Catholic temperance societies of this city met last evening in Clan-na-Gael hall for the purpose of deciding on the question whether or not there should be a parade on the coming St. Patrick's day. James J. Coogan presided and Nicholas Scanlan officiated as sec retary. The discussion developed a decided sentiment against the practicability of a parade this year, the opposition being based generally on the hard times and the inadvisability of spending large amounts for music and the other accessories of a public demonstration. The A. O. H. were strongly opposed to the parade, while the temperance delegates generally favored it. A vote was taken and it resulted, 20 to 8, against the parade; and as there was no provision made for any other mode of celebration, the 17th of March will not be publicly observed by the Irish citizens of New Haven this year. The delegates then re-elected James J. Coo-gan president and Nicholas Scanlan secretary, this being the seventh successive year these gentlemen have been chosen to the po-

BUNNELL'S MUSEUM. The Corinne company returned to Bunnell's Museum yesterday and gave fine performances to large audiences. The company appeared in the "Mascotte," Corinne two hundred seats will be reserved for every night this week. They can be obtained at the bex office from 10 to 12 in the forenoon and at any time in the afternoon. The price of these reserved seats will be 30 cents, and purchasers will avoid the crowd in the museum proper by being admitted directly to the hall.

Pheater last evening Billy Williams, the faorite comedian, made his bow in "Sophie's Supper" after an absence of several months, and the warmth of the greeting awarded him testified to the hold he has on the patrons of the audience were not kept long between laughs. The Big Four, Smith, Waldron, Cronin and Martin, in their specialty, "Early Someone judging from his observations on in the Morning," made a tremendous hit and were recalled several times. Their afterpiece, "A Bunch of Key Wests," was very funny and gave wide scope for some very brilliant merry making. Miss Alice Gleason, the serio-comic singer, made a big hit, and her fine singing warranted it. Booker and Leigh are a fine comedy team and their "Assurance" caught on with the audience Altogether the entertainment last evening was up to the high standard maintained at the American, and Manager Eldridge should be sustained for his enterprise houses at every performance. about 8 o'clock last evening, and though it yet continued threatening, Carll's was crowded to hear Booth in "Ruy Blas" and "Don Cæsar de Bazan." After the sketch of the plays which appeared in our columns vester day we may but mention the delineation of some of the characters and their reception Mr. Booth draws "Ruy Blas" in full accord with Victor Hugo's ideal, He is a dreamer but no visionary, a fiery, impassioned youth, one "who wears the valet's garb," but is none in spirit, who respects his poor countryman's rights and wishes to protect them. He is ambitious, but it is for his country and Queen-in love but not so much so of subject. You can see this proud, free spirit chafing under its servantship. As Don Cæsar, he is reckless, indulgent and determined, yet always humorous. To spend ry, his name alone can typify it. As Don Salluste in the tragedy and Don Jose comedy Mr. Charles Kent courtier villain who understands the trickery of state. You hate him almost before you know it. Thus you praise his acting. Mr. Alfred Hudson, who is ever masing. Mr. Alfred Hudson, who is ever mas-ter of his part, was excellent and well sec-onded by Miss Kate Ryan. Miss Anuis Clarke, the leading lady of the Boston Mu-Clarke, the leading lady of the Boston Mu-seum, where she is a great favorite, imper-sonated the role of Queen with dig-nity, grace, beauty and tenderness. Miss Blanche Thompson, who was chief support in the comedy, made a most delightful gyp-sy maiden and her speech to Don Jose as being a woman and beautiful was well de-livered. Possibly she did not rise to the de-mands of the character in other parts of the wlay. The plays were excellently well proplay. The plays were excellently well produced, and after every set but one Booth

No strong smealing essence of the connection with Borazel to conceal obnoxious ingredients, because there are no such ingredients used in its preparation. Its use has given great satisfaction where some things claiming to be the only sure cure have failed. Borazel is as harmless as it is efficient. Doubtless there are many other things which are to a degree useful in caturhal affections. Many trials seem to justify the claim made for Borazel that it is the "True Remedy for Nasal Catarrh." It has also proved corrective of bad breath and has speedily healed cold sores. Try a bottle and judge for yourself of its merit.

To the Honorable Court, of Common Council of the City of New Haven: The Board of Conspensation, to whom was re-ferred the petition of Charles Shannahan for dam-age to property, by order of said Court, bearing date the 25th day of December, A. D. 1884, hereby

pear, with legal counsel, and and full opportunity to make a complete statement of his claims against the city.

We visite the intersection of Clay and Monros arrests with Blatchley aveaue, and carefully examined the boundary lives of the same, and the street lines contiguous careto.

We have examined the records and maps on file in the Town Clerk's office, the maps and layouts in the office of the City Engineer and Board of Public Works, and have referred to the secords of the Board of Compensation in reference to the assessments upon property owner, for the layouts of the widening, straightening and extension of the three several streets which enclose and bound the said piece of layd on all sides. And as a result of our investigations we find:

18t. That the petitioner has received no damage from the City of New Haven for which he is entitled to receive compensation.

2d. That the petitioner has a title to a small triangular piece of land, which is bounded northerly on Clay st, not more than eight feet; easterly o Blatchley and southerly by Monroe street, not exceeding seventeen feet, and contains in quantity not more than sixty-four square feet.

In view of the foregoing, it appears to this Board that the small triangular piece of land woner, but would be of some value to the public, as a part of the highway.

In order to facilitate such disposal of the mater, we respectfully recommend the adoption of the accompanying order.

Respectfully submitted the 28th day of January, A. D. 1885.

JOHN E. EARLE, No. 868 Chapel Street,

Captain Doherty has been the captain of Company A of Waterbury for some time and is exceedingly popular among his acquaintances. He joined the company twelve years ago and hasserved in all the various offices of it. He is a young man of pleasing address, modest, capable and energetic and military to the core. As major he will undoubtedly endeavor to advance the interests of the regiment. Of course there is a feeling of general regret among the New Haven companies that the office could not have come here, but it is hoped and expected that good feeling will prevail. THRILLING STORY

s Told by a Merchant in Troy, N. Y. —A Surgical Operation Avoided— How a Father, Wife and Daughter Escaped an Awful Doom.

Of the hundreds of accounts of remarkable cures wrought by DR. to all our readers.—Eb.

Dr. Kennedy, Rondout, N. Y.:

Dram Sin: My daughter was afflicted with a severe growth of Fingus. To remove it we had resorted to almost every remedy and consulted the most prominent surgeons and physicians. Dr. ——, of Troy, said that a surgical operation would be necessary, but fearing fatal results I hesitated. Some of the physicians claimed that it was caused by one thing and some by another. The Fungus was prominent and disfigured her looks. Having heard of Dr. Kennedy's FAVORITE REMEDY working so thoroughly on the blood I determined to try it, to see if this medicine could do what doctors had failed to do and surgeons had hardly dared to undertake. I can say in truth that the result of this trial was the complete cure of my daughter of

not enjoyed for years. She had gained in hesh and strength, and thus secured perfect health, and this is DUE ENTIRELY TO DR KENNEDY'S FAVORITE REMEDY. As for myself, being engaged in the grocery and commission business, which makes it necessary for me to test the quality of different articles, like butter, etc., my sense of taste and my stomach were seriously injured. Everything seemed to nauscate me, and fearful of dyspepsia in its most severe form, I tried DR. KENNEDY'S FAVORITE REMEDY. The first bottle afforded immediate relief, and from that day to this I can say that Favorite remedy has restored me to perfect health. These are facts which I claim prove that Dr. Kennedy's Favorite Remedy has restored me to perfect health. These are facts which I claim prove that Dr. Kennedy's Favorite remedy has restored me to perfect health. These are facts which I claim prove that Dr. Kennedy's Favorite remedy has restored me to perfect health. These are facts which I claim prove that Dr. Kennedy's Favorite remedy has recommended to the city of Troy doubts the truth of these statements let him come to me and I will prove them. I have recommen led Favorite Remedy to hundreds and with the same good results.

nesettle Advance And Close a Trifle Higher

New York, Feb. 16.

The market was more active but very unsettled this morning, though on the whole a bearish feeling predominated and prices were lower. Up to 12:30 o'clock Union Pacific, New York Central, St. Paul, Louisville and Nashville, and Pacific Mail were the only stocks that touched as high prices as their closing figures on Saturday, while all of the active stocks sold at lower prices this forenoon than at any time during the latter part of last week, and at 19:30 were all ¼ to 1 below the lowest of several days. One of the prominent causes of depression is the provalent stormy weather throughout the West, which it is expected will show its effects in the diminished earnings of nearly all the railroads in

Accurate, Durable Legible. Give a new method of determining the tempera ure, and have the high merit of great a curacy. The dial, with its distinct graduation and plain nu perals, is as legible as any clock dial of the sam size.
Constructed of material not affected by dust or dampness, they are thoroughly durable.
They admit of a variety of treatment in size and style of mounting, and the most simple is ornamental as well as substantial.
They are carefully tested before they are allowed to leave the hands of the manufacturers, and are warranted to indicate the temperature with accura cy, and sustain their claim as the Standard Thermometers. SOLD BY E. L. WASHBURN,

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocca, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maindies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.
