BARNBROS BROKEN INTO.

Operations of Horse Thieves in Southington - Other Southington News.

There was a gang of horse thieves operating here Sunday night. Early in the night an attempt was made to take Martin De Patri's valuable colt from his barn in the eastern part of the town. The next place visited was the barn of Superintendent H. W. Loomis of the Southington Cattle company, a few rods west of the barn. The doors of the barn were broken into, but the horse was securely fastened in a box stall and the thieves were frightened away. The last place visited was the barn of Deacon Frank Hayes, who lives in the northern part of the town. His horse, buggy, harness and blankets were taken. The horse is twenty-eight years of age and a wind broken. The buggy was valued at \$40.

Old Yale.

Yale has 4,292 living graduates of its Academic department. The oldest living graduate is the Rev. E. L. Hump, of Hartford, of the class of 1812. He is now 84 years of age. Three others are survivors of their classes: the Rev. Joseph D. Wickham of Manchester, N. H., class of 1815; the Rev. Thomas L. Shipman of Jewett City, class of 1817 (father of Judge Shipman of Hartford); and the Rev. W. W. Turner of Hartford, of the class of 1819. It is to be noticed that these are long-lived men, in a measure. Judge Shipman of Lyme, class of 1817, is one of only two left, and Dr. Woolsey is one of the four remaining of the class of 1820.

A Valuable and Useful Invention.

A valuable and decidedly useful invention is that of the patent bread mixer which is run by a gas engine of four horse power. George Root & Son, the well known and enterprising bakers of 809 Grand street, have found it necessary, in order to supply the demand for bread, to purchase a gas engine for the purpose of running "a bread mixer." With the new apparatus flour is mixed finer and the bread is obviously cleaner and better. So exceptionally does the "little engine" work, that six barrels of flour is mixed up into as much of ready to be shaped into loaves as would be made by hand. The immense amount of labor saved by this "new process," yet the same number of hands are required.

The benefit accrued to the workmen as their labor is much reduced, while the bread is made in a more healthful manner by the new method. Each day, from three until four in the afternoon and from nine until eleven in the evening, the "little engine" generates the power and the bread mixer "gets in its thorough and useful work."
