Friday, April 19, 1889. THE BEEF COMBINATION. The legislature of this State did not pass he measure called "the local beef inspection

oill." But the legislature of Minnesota did, and it is believed that the governor of Minnesota will sign it. The effect of the passage of the bill in Minnesota has been rather serious. On Monday last the firms which constitute the so-called "Big Four" notified their agents all over the State of Minnesots that no more beef would be shipped them in ensequence of the passage of the bill. The neat already on hand was sold out in a few hours, and the result is that the price of neat has gone up 25 per cent., much to the disgust and discomfort of a large body of onsumers. This is a large advance, but the price may go higher before it reacts. It is certainly not so much of an advance as would be inevitable in some of the eastern States if such a bill should become a law, for they are less favorably situated for carrying out such

an arrangement than Minnesota. It is probable that this action of the "Big Four" is intended to influence the governor to veto the bill. The Providence Journal thus comments upon the matter: It is probable, moreover, that if the governor should not yield to this sentiment, but should sign the bill, the combined firms would carry the fight to the court to test its constitutionality. Meanwhile they would continue to supply the market as before. The principle of the legislation, however, is as fully and as forcibly illustrated as it would be if the firms the larger and combined concerns, are the chief supporters of this alleged sanitary neasure. They are not at all disappointed by the advance in price; indeed, they would be disappointed if it were otherwise. They

desire to take advantage of the higher prices to secure handsomer profits.

It now seems almost certain that the big beef combination will be able to fully hold its own. It has a good start and can sell

meat as cheaply as anybody. EDITORIAL NOTES.

The reporters of the Philadelphia Record have been hunting about to find prohibitionists among the Hebrews of the city, and they report that they cannot find one. Rabbi Jastrow tells them that prohibition cannot be made to really prohibit, and that, if it could be, it would, in his judgment, give rise to greater evils than those it aims to do away with. Rabbi Iliowizi tells them that its adoption would oppress every Jew faithfully obeying the precepts of his religion and conforming to its usages, that he ligion and conforming to its usages, that he

in the military service and is now totally blind. His case was investigated while Gen. Black was commissioner, the amount due fixed and the certificate made out. There was nothing irregular in the case, or unusual, except the amount of the award. But the certificate had been held in the office waiting apparently, as Commissioner Tanner says, for someone to say "I object." He saw it to be issued to the pensioner. Another charge was that he had allowed the claims of five or six hundred pensioners for an increase of their pensions from twenty-four dollars to thirty dollars a month by a wholesale order without inquiry into the facts of each case. The explanation is that these were all cases arising under an act of congress and the facts in all were alike.

The reporters of the Philadelphis Record have been hunting about to find prohibi-

A new kind of ram has appeared. It is a boat furnished in the forward part with a heavy oylinder like that of a steam engine, about 15 feet long, with a piston rod 12 inches in diameter. This piston rod, which will extend through the bow of the boat, will be the ram. It will be driven by a force of steam equal to 650 tons, sufficient to pierce the side of the heaviest ironclad with one blow. It is in fact a steam torpedo boat.

According to the investigations of two authorities in the agricultural department and the health officer for Glouester, England, the notion that skim milk is a poor sort of food is a great mistake. For children whole milk is better, but for adult people it is preferable to buy skim milk and devote the difference between its price and that of whole milk to other foods, either in the form of cream or butter. The actual nutritive value of skim milk differs very little from that of whole milk, and it sells for half the price.

Corporal Tanner does not think that he is a crank. One story was that he had awarded \$1,000 of arrears to one pensioner without sufficient examination. Commissioner Tanner says that the claimant had lost his sight in the military service and is now totally blind. His case was investigated while Gen.

MORE ABOUT THE HOUSATONIC.

The bond issue is spoken of in the minority report in the following language. Your committee are of the opinion that the company, a majority of whose directors are well

orning by the long awaited report of the allroad committee. The report is in the nature of a darkened optic for the Housatonic railroad and its lobby. It is signed by five of the nine members of the committee, enator Graham and Representatives Bacon Beardsley, Ambler and Merriman. As a report was sent in later purporting to be a minority report, the former will be referred to for convenience as the report and the latter as the minority report. The report is plumb against a parallel railroad between New York and New Haven, against the petition of the Housatonic, and recommends the passage of the following bill as a public act: Section 1. Any railroad company in the State may build branches from its main line or from any of its leased lines, provided the board of railroad commissioners shall adjudge that the construction of such branch is required by public convenience and necessity.

and necessity.

Sec. 2. For the purpose of paying the cost of building any such branch said railroad company may issue bonds secured by mortgage to the amount of one-half of said cost, to be verified in the manner now provided by law for verifying the cost of a railroad for the purpose of issuing bonds.

Sec. 3. So much of section 3,472 as relates to the construction of branches by railroad companies is hereby repealed.

does not go into the question of the validity of the Housatonic's bond issue.

It first cites the petition of the Housatonic and that the belief of the committee is that the general law was intended to affect the railroad companies and remove all restriction upon their rights to build branches. Whether well founded or not, the general law does not

well founded or not, the general law does not permit any railroad company to issue stock for the purpose of constructing branches and the committee sees no reason to grant the Housatonic special authority to increase its capital for this purpose.

The committee believes that the act of 1871 and section 2 of the bill recommended are safe and prudent both for stockholders and bondholders on the one hand and for the public on the other. The president of the Housatonic railroad company testified before your committee that ample funds are ready

or any or all legitimate purposes of the com As the petitioners laid no stress upon the part of the petition asking for stock and bond increase for improvement of existing lines the committee does not make any recmmendations on the subject.

NO PARALLEL TO BE TOLERATED.

The committee reports that the granting the Housatonic power to purchase the stock of the New York and Connecticut Air Line would be a radical departure in policy from would be a radical departure in policy from the existing general railroad law of the State. Section 3,422 of the statutes provides that "no other railroad company shall subscribe for, take or hold any stock or bonds of any railroad company established under the pro-visions of this chaptereither directly or indi-rectly, unless specially authorized by the General Assembly." The companies estab-lished under the provisions of this chapter General Assembly." The companies estab-lished under the provisions of this chapter are the companies established under the gen-eral law, so-called. This provision by your committee is believed to be a wholesome one, and any legislative act enabling a com-pany organized under the general railroad law to sell out to an existing company its franchises and stock would be an insult to he diginity of the State and would tend to

put up its most sacred delegations of power at auction to the highest bidder. Moreover the New York and Connecticut many places less than a mile away, which brings the committee to the discussion of the real purpose of the petitioners, as avowed by President Starbuck, which is, in effect, to parallel the Consolidated road. The committee are of the opinion that a parallel road is not desirable, nor is it a branch of the Monatonic.

Petititions for parallel roads have been presented to the legislature for twenty years, but the established policy of the State has been to always refuse them; and experience of the country has shown everywhere that two roads between the same termini, running through the same territory, is an injury to the unbilled by compelling the control of the country of the same territory. to the public by compelling it to suppor two roads where only one is needed, and it is ally certain that a combination will er or later occur after years of disaster The State policy is supported by the voice of experience. Every new railroad tramples on experience. Every new railroad tramples on the rights of citizens, and no such invasion

hould be sanctioned by the State unless it is clearly shown that public convenience and necessity require the sacrifice NO EXISTING NECESSITY. The proof offered before your committee of

any public necessity was unsatisfactory and trivial. There was some testimony that fric tion had existed between the Housatonic and Consolidated roads about accommodations but the complainants have slight foundation and whether important or not the statute provide ample remedy for any failure on the part of any connecting road to do its full duty to the public or any other railroad in eference to its connections The report closes as follows:

The report closes as follows:

It did not appear that the Housatonic company had ever been compelled to make any complaint to either the railroad commissioners or to the couris under these statutes. There was no other criticism offered in evidence before your committee concerning the management of the New York, New Haven and Hartford railroad. On the contrary, it is admitted that in frequency of trains, safety of travel and cheapness of transportation it was second to no road in the country, which is a matter of just pride to every citizen of our State. There can never be any serious danger of a railroad mruopoly, in the offensive sense of that term, by a road which is constructed immediately parallel to the waters of Long Island Sound and with the facilities for building under the present railroad law. For these reasons we believe that the best interests et the State do not require us to authorise the petitioners to construct a railroad from New Haven to New York, which is what the petitioners undoubtedly ask for.

In the opinion of your committee no branches should be constructed for any other purpose, a waste of capital would follow for which the reneral

should be constructed by any company unless they are required by public convenience and necessity. If they are constructed for any other purpose, a waste of capital would follow for which the general public would in the end suffer.

For the foregoing reasons your committee believe that in the future the board of railroad commissioners should first be required to adjudge that the construction of any branch of any railroad is required by public convenience and necessity. The committee also recommend the passage or the accompanying bill for a public act.

THE MINORITY REPORT. Just before the House adjourned Colonel Brown, the house chairman, sent up the miority report, which was ordered to be printed in the journal with the report. It is signed by James T. Brown, Anthony Ames, W. F. Hewitt and Ephraim Mower. The minority report is a very peculiar document, and according to the statement of the majority of the committee, was never submit-ted to them, neither was it signed in the committee room. The document reports that Simeon E. Baldwin's bill submitted to ne committee asking power to buy the Olm-cead parallel and for an extension of time to build it should pass. The minority give no reasons who they think their bill should

pass, but devote the entire report to considering the bond and stock issue of the House nic. The substance of the minority repo The report opens with the statement the the Housatonic railroad has increased its capital stock from \$2,000,000 to \$3,155,000

Such an increase was authorized by the

Such an increase was authorized by that act in order to settle certain claims of preferred stockholders for guaranteed dividends amounting at the time of increase to \$3,777,000 for it was claimed before your commission that this special act of 1870 was repealed by a later general law passed in 1878 requiring applications for authority to be submitted in the first case to the railroad commissioners. On the other hand the counsel for the company claimed that the terms of the act of 1870. The Housatonic railroad company also authorizes the issue of \$3,000,000 of bonds, of which nearly \$1,200,000 were used in completing the settlement with the preferred pleting the settlement with the preferred stockholders, and the rest were in part ap

We assume that instruct-ing us rather than the judiciary to make this inquiry, the assembly wanted us to investi-gate and determine the fact rather than the law, and as we are of the opinion that the action of the company was taken in good faith, and as the company is responsible on all the bonds it would not seem to be mater-HARTFORD, April 18 .- The corridors of the apitol were convulsed with excitement this all the bonds it would not seem to be material to pass on the legal question at present.

The company did not ask for any validating act in reference to the issue, claiming that they were entirely legal. Nor has any stockholder or bondholder asked for such a measure. We, therefore, do not think that it is necessary to recommend any bill or resolution.

ANOTHER CLAUSE. The report cont ains the following interest

"If the special act of 1870 was in force at the time of stock and bend issue your committee are of opinion that it would justify such issues and make them legal. If it was not in force, but had been suspended by the general laws of 1878 and 1882, then your committee are of opinion that such issues would be unauthorized and illegal."

Since the report has been submitted and the ban of secrecy removed the strained relations existing in the committee have begun to leak out and statements were made to-day which will cause much interest before the end is reached. As was generally supposed, the committee's report has been delayed by the Housatonic members, who wanted to put it off until the Consolidated road's petition was heard. These members, it is said, would construction of branches by railroad companies is hereby repealed.

Sec. 4. This act shall be deemed to be an addition to amendment of all charters of railroad companies, and shall repeal all limitations in any charter as to the length of branches which it may build.

The above substitute if passed would be an addition to the general railroad law, the essential portion being to make all who desire to build railroads show the necessity for such undertakings to the satisfaction of the rail. fact, Mr. Merriman was one of the strongest opponents of the parallel scheme and drew up a report that was thought by the committee to be a little too radical in its opposition to the Housatonic scheme, Mr. Merriman asked the representatives of the Merriman asked the representatives of the press to say, to put him right and deny the rumor that he has ever been anything but an out and out opponent of the parallel scheme.

A most remarkable scene occurred last night, according to Mr. Merriman, who says he was taken by one of the Housatonic lobbyists and one of the Housatonic members of the committee into a committee room and kent there nearly two hours by the preis who the committee into a committee room and kept there nearly two hours by the pair, who tried to prevent him from signing the ma-jority report. Two entire pages of it were mysteriously spirited away from the reporters' or clerks' deak. omeone undoubtedly stole it. For what purpose it is not known, but whatever the purpose it was defeated as the newspaper nen had secured perfect copies.

REMARES OF INTERESTED PARTIES. Representatives of the Consolidated road said that the report as might be seen was of ourse pleasing to them. Colonel Stevenson, when asked what he thought of the report, said he thought it was very funny, and—at this point your correspondent suggested to the colonel that he was being interviewed.

Ammonia Injurious to Health. The highest scientific authorities in the and denounce the use of ammonia for culinary purposes, whether artfully concealed in saking powder, or in its undisguised form as it insidiously works irreparable injury to the human system. That distressing feeling in the stomach which annoys so many people who are unable to account for it, may be traced directly to adulterated baking pow ders used in the adulteration of food. It is well to bear constantly in mind that Cleve land's superior baking powder is free from all impurities, and has for a long series of years stood crucial tests for purity, efficiency

healthfulness and economy. A YOUNG MAN STABBED.

Dr. Cremin's Strange, Visitors Yester day Afternoon-Detective Reilly In-About 1 o'clock yesterday oung men, somewhat intoxicated, called on Dr. Cremin to dress a wound which one had received by a sharp steel instrument in the left breast. A part of the knife or dagger which made the wound was broken off about an inch from the surface. The men would say nothing as to who they were or how the thing had happened. The doctor told them they had better go to their home where he could properly attend to the wound, but they refused, and when Dr. Cremin stepped to the telephone one said to the other that he was about to ring for the police, and both hastily left the house. A description of the young men was given to the police. The man's outer clothing was not punctured over the wound, and it is probable that the stabbing occurred the night before, and that he had changed his clothing in the mention. changed his clothing in the meantime.

Detective Reilly was busily engaged with the case yesterday afternoon and last evening, but up to a late hour nothing had been found that offered any definite clue to the

of New York; City on "The Transfer of Monetary Securities," James M. Townsend, jr., of New York brother of Prof. William K. Townsend, delivered the first of a series of lectures to the seniors of the Law school yesterday afternoon on "The Transfer of Monetary Scourities." The lecture was well attended and Mr. Townsend very interestingly described the growth of these securities in England and this country. Quotations from the lecture are as follows: About one hundred and fifty years before the death of Alexander Poe, the father of the celebrated poet, was the time that interest was first taken on loans in England, and it was then considered the greate crime of the age next to incest, and it was not until about 1711 that monetary securities came into existence. Then came the great rush for these securities frem those who had always kept their money in strong boxes, and worthless companies were formed which nearly threw England into bankruptcy. In 1730 this rash speculation ended by the desiraction of the South Sea company, and then good and sound securities in the form of stocks, bonds, etc., were put on the market both in England and this country, and to-day over eight thousand millions consisting of private fortunes are vested in these aisting of private fortunes are vested in these monetary securities, which commercial ne-cessity demands and which this country could not get along without, being negotia-ble as they are. Mr. Townsend then de-scribed the form of some of the bonds and stocks now in use in this country, much to the interest of those present. The lecture throughout was calefully followed and abounded in much valuable information, evincing much study and research.

They said that if there was any objection to the structure be ing placed in the rear of Center church they would not push the matter. They did not want the court of common council to dictate as to the derign of the monument. The etc., largest stock and lowest prices in the church would build one costing \$30,000, one city to day only at McIntosh's, 168 Orange which would be an ornament to the Green. The early in the afternoon and finish their Fast report was, as indicated in the Courier this morning, except a little radical. While it does not ablish the commission absolutely it does so practically by depriving it of pow-er and emolument. The most radical recom-mendation is that the present power of the commission of laying and collecting a tax on oyster grounds—shall hereafter be vested—in oyster grounds shall hereafter be vested in a clerk to be appointed by the Governor and to serve for \$1,400 a year. The commissioners may serve as a board of relief, to be paid by these interested parties and as arbitrators. When working for the State the commissioners may receive five dollars a day, but none of them are to draw more than 250 a year, including expenses. If an engineer's services are needed, he is not to receive over \$200 in any one year from the State. The report was tabled for printing. The fight for the abolition of the commission before the committee was made by Henry C. Rowe and John A. Tibbitts and Attorney Maltby appeared for its retention. It is very apparent here that officers of the army are filled with the liveliest apprehension regarding the opening of Oklahoma. The Secretary of War has authorized the statement that the government is fully aware of the situation and has arranged to take all proper steps to prevent trouble. The instructions sent to the commandant of the structions sent to the commandant or the troops in Oklahoms, as a result of the opin-ion rendered by the attorney general, were extremely guarded. They are understood to direct army officers to assist in the maintenance of law, but to carefully observe the regulations, defining their authority, and leave arrests for violations of law to the United States marshal. > A REMARKABLE STORY. Manchester, N. H., Sept. 13, 1837.

nen-For the past five years I have bee in the form of unsightly eruptions on the face, and affected my general health so badly that I was der the care, successively, of at least lozen skillful physicians, but their efforts gave me no permanent benefit. Various patent medicines were also tried, but to no effect. tn May last a friend called my attention to Dr. R. W. Lougee's Vitalizing Compound. I began to take it at once, but it was not until I had used nearly two bottles that any good results were noticeable. From that time, however, I began to gain and have continue o improve ever since. The blothes that so disfi ured my face have now largely disappeared, n strength has returned in a great measure, and my sakened nervous system is repaired. THE CONSOLIBATION ARGUMENTS. Efforts of Attorneys Case and Alling Against and for the Bill—New Haven-ers Present—Petition From the Court HARTFORD, April 19.

pecial Correspondence of the Journal and COURTER.] The arguments on the bill to consolidat he New Hayen city and town governmen were made this afternoon before the commit se on cities and boroughs. Attorney John W. Alling argued for the petitioners and Messrs. Case and Hotchkiss for the opponents of consolidation. Two hours were occupied by each side. The hall of represent tives was voted for the hearing, but as so few people were present the hearing took place in the committee room. Among those resent were Aldermen F. C. Bushnell, Wiliam J. Atwater, Nathan Easterbrook, jr., Henry C. White, Frank H. Sperry, Connoilman John W. Lane, General E. S. Greeley, Daptain Charles H. Townshend, James Granniss, Herbert E. Benton, Major T. Attwater Barnes, Lieutenant Luzerne Luddington, Captain Woodward, Judge Deming, L. W. Beecher, Town Agent Todd, L. W. Cleve-land, Selectmen Cooper, Beecher, Hughes

Before the arguments Alderman Bushnell testified that the sentiment of the aldermen was in favor of consolidation, and a petition testified that the sentiment or the aldermen was in favor of consolidation, and a petition was introduced, signed by a majority of the aldermen and councilmen, in favor of consolidation, as follows: Aldermen—Richard M. Sheridan, B. H. Douglass, jr., James D. Whitmore, Charles Kleiber, Patrick Kent, Andrew J. Clerkin, John W. Kenney, W. A. Lincoln, S. S. Thompson, C. E. Prince, James S. Hemingway, E. A. Gessner, George R. Burton, Frank C. Bushnell. Councilmen—W. E. Chandler, M. Sonnenberg, W. A. Chamberlain, James T. Moran, Harry W. Asher, Joseph Haury, A. D. Sanborn, John H. Shaw, A. J. Beers, Charles H. Wardell, D. T. McNamara, D. F. Lawler, Terrance D. Kelly, Richard M. Dixon, W. E. Sterns, James T. Momahon, William Clarkson, Thomas J. Coffey, Louis M. Ullman, R. C. Loveridge, John W. Lowe, John A. Richardson, Frank T. Lee, Samuel G. Peat, F. Kirchoff, jr., John G. Anthony, John F. Gaffey, B. Dexter Hubbard, Charles B. Dyer.

B. Dyer.

Lieutenant Ludington of the Annex testified that many people there were in favor of
consolidation. Attorney Alling then began
his argument, parts of which were as follows: The Supreme court has settled the law with reference to the rower of towns contrary to the views of Mesers. Reynolds and Sperry. Because the voters of the town of New Harden ven can make no change in the laws of themselves with reference to the care of their poor, methods of managing their finan-ces, the attention of the General Assembly is

called by this bill. We propose by the bill to accomplish three listinct results, all in the interest of good First, to bring all the expenses of the town and city of New Haven under the control of one of the two corporations and thus compel by the city system of preliminary estimates, and the levy only of a tax to meet these e

mates and the prohibition of any expendiure above these estimates. Second, to take care of the poor in our limits, nineteen-twentieths of the money for whose support comes from city taxpayers, not town, by a board serving without pay and appointed by the mayor and court of

Third, to confer upon the board of public

works the care of all the roads within the town limits to the great saving of public funds. By reports of the town agent it appears that there were spent in a year for roads and bridges in Westville and the Annex \$42,-275.87. The grand list of these districts is a Mothers, the Weak and

Debilitated.

up in this I have used Johann Hoff's Malt of bottles Extract for the past five years in only.

In the second of the sec

The selectmen's disbursements of 1888 were \$466,287.45. Generally speaking it must be admitted that there should be in any one community as few tax levying authorities as possible. Under the city system the estimates for municipal expenses become a matter of great exactness. But the trouble is that there is no law to compel the enforcement of the city methods when adopted by the selectmen. It will be seen that the estimates of the selectmen for 1888 were \$335,000, and the disbursement \$111,000 more. It is not strange that the floating debt of the town has increased from \$149,309.54 in 1884 to \$241,564.09 in 1888.

Had the city spent the same propertion of community as few tax levying authorities as

Had the city spent the same proportion of money as the annex and Westville there would have been expended 20 times as much as it has done. Everybody knows that Westville streets were paved long before most important eits at rates. most important city streets, and the annex is receiving equally liberal treatment where very expensive improvements are being

By the natural operation of things West-ville and the Annex have come to hold three of the seven positions as selectmen. The election returns have generally shown, for our friends in Westville and the Annex sleep our friends in Westville and the Annex sleep with both eyes open, that the lowest man on the ticket of the minority came from the city. But it is said why cannot the citzens of the city attend the annual town meeting and prevent the levying of taxes for the selectmen to spend. In the first place, if the debt is contracted it does no good to refuse to levy sufficient taxes to pay it. Let any member of the committee who has been a selectman in his town see the New Haven a selectman in his town see the New Haves town journal and be astonished to find n ninute there of any derilictions to the selec-

men and then step into the town agent's ffice and examine the records of the board of selectmen. He will see the selectmen ave usurped the functions of the ordinar With such vast sums to distribute with n ther than self imposed rules for their dis pursement it would be passing strange if the electmen should be unacquainted with the value of political power put in their hands.

The town agent's salary 26 years ago, \$1,200, has increased to \$2,300.

I find a regiment full 1,000 strong, mostly able-bodied men, who do little but work for

the town at \$1.50 a day, when the labor ren dered is not worth haif that sum, because the fundamental idea is not to get the job done. The labor is given out as charity, in defiance of law. Would not the vote of this regiment be solid in one direction? An able-bodied pauper receiving his living from the

gerous politician.
So completely do the selectmen come to regard themselves as armed with all the authority of the town, that in this case they thority of the town, that in this case they have, without consulting the town, employed one of the ablest lawyers in the State to defend the town government.

Instead of permitting the town to vote on the measure, we find the selectmen presenting to us for payment the bills of very expensive counsel incurred in the effort to prevent the majority from adopting the measure if they so desire. ure, if they so desire.

The views of Hou. N. D. Sperry that th

agent of a municipal corporation may disregard a statutory enactment concerning the care of the poor and follow a supposed law of humanity are stark nonsense of humanity are stark nonsense.

It is said that the press of the city is not unanimous in favor of the bill. It is true that the eminently respectable Rip Van Winkle of the Courien, disturbed by the agitation, has woke up, seen the morning sunlight breaking over the hills and has said, "Boys, your cause is good, but it is too early. Let us all go to sleep again."

But the Palladium, News and Register are enthraisatio in favor of the hill. The only

nthusiastic in favor of the bill. The only ther paper, the Union, favored the bill until mistakenly thought it saw a political cal n the mesl.

If the residents within the city limits pay
he whole in these limits and nineteen-twenseths of the cost of the roads in the outlying istricts, with what sense do these outlying listricts demand to put a veto power upon the methods which nineteen-twentieths wish

the methods which hineteen-twentieths wish to adopt to transact that business? But it is said that the Hon. N. D. Sperry also pledged his East Haven friends that if ever an attempt should be made to annex the nnex to the city, he would oppose it with Annex to the city, he would oppose it with all his might.

The Hon. N. D. Sperry is nothing if not interesting. In this matter he is deliciously interesting. He says he pledged his East Haven friends. He does not claim to have represented anybody but himself.

It sufficed that he should have given the

We have always supposed that when the history of Sperry's time should be written up he could claim to write quarum pars magna fut. His argument was "towns are indestructible;" so is matter. The agitation will never subside until the General Assembly give the people of New Haven a chance to improve their local government in some such manner as the present bill proposes.

So that hereafter it shall be one thing at home another thing abroad; a town when it comes here to participate in the government of the whole people of the State, and something far different and less than a town in the matter of local self government at home.

ent and less than a town in the matter of local self government at home.

The democratic feature of its government is to be absolutely wiped out and no town meetings for any purpose or any subject are evermore to be held.

It is manifest that so great a change, so radical a departure, demands two things:

First, a great, not to say unanimous, demand of the people to be affected;

Second, clear and cogent reasons why that demand should be complied with, and the burden of proof is on the petitioners.

Who asks for it? Where is the evidence of that great uprising of the people which you are entitled to ask for? New Haven is a city of eighty thousand inhabitants, sufficient in intelligence, thrift and the practical wisdom which enables a people to choose well its own form of government. How many of them can with any show of fairness be said to ask this change?

Convelidation has been egitated for twenty

You might well stop here and say: "Gen-tlemen, in this matter of local self-government you have failed to satisfy us that there is any popular demand for this chauge. At some time you may take the sense of the people on this subject, and it is your duty to do it before you ask us to take your duty to do it before you ask us to take action. We are not interested except to do the will of the people, and you leave us in the dark as to what the will of the people is.

Nor is it our duty to send this question to an indifferent community to decide upon. It is not Providence nor the policy of ligislation to tempt the people with a gift for which they have not saked.

On account of the threatening aspect the weather yesterday afternoon only about two hundred persons witnessed the New nearly fifty of them graced the center section of the grand stand and applauded the fine plays. Several school teachers were present and saw a real professional game for the first

It was an easy victory for the New Havers, who won by the score of 12 to 0. The work of the home team's batteries was so good that their opponents made but one safe hit. The Acme pitcher was severely punished in the fourth inning, but after that the New Havens did not get a run.

Manager Spence tried three batteries. Sworback and Cahill constituted the first. Sworback and Cahill constituted the first.

Sworback did not have good command of the ball. In the three innings he pitched he sent three men to bases on balls and hit one. Cahill has not caught Swarback before and he had two passed balls. But isn't he an accurate thrower to bases? The ball went straight as a string to second, and it was the first good throw Spence has had this season.

The game started with the New Havens at the bat, and on singles by Walsh and Dillon, a wild pitch and a passed ball two runs came in. In the second Brady got first on passed balls. Spence was hit in the stomach. Cahill made a nice two-bagger, and in order to get home Brady made a beautiful slide to the plate and got hit on the head by the ball.

plate and got hit on the head by the ball. Spence also scored. In the third Brady hit Spence also scored. In the third Brady hit safely and on two clean steals and a wild pitch scored. It was in the fourth inning that Cahill led off with a single, followed by a three-bagger by Walsh, a base on balls, an error and singles by Dillon, Sullivan and Brady. Seven runs were scored.

Horner and Warner went into the points in the forth. The first one Maloner hit was a seven that the forth of the points in the forth. the fourth. The first one Maloney hit was a terrific liner, which looked like a safe hit, but Spence managed to stop it with one hand and the play was heartly applauded; he could not recover in time to get it to first. Two men were sent to bases on balls and one went out en a fly; the bases were full. Then Hor-ner settled down and did splendid work by striking out the next two men.

In the sixth and seventh innings each team had but six men to the bat, both pitchers doing good work. Herner is not yet in con-dition as it hurts him every time he curves the ball.

In the last three innings Carsey and Smith were the battery for the New Havens. Carsey did phenomenal work; he put the ball sey did phenomenal work, he put the bain squarely over the plate, but the Acmes could not hit it. Out of nine men who came to the bat seven struck out. One man got to first on balls, but Smith threw him out at second. His arm is getting in condition.

The Acmes are good players, and if they could have only hit the ball a little bit the

game would have been an exciting one. Dillon, Walsh and Cahill hit the ball very hard. Dillon is one of the hardest hitters on the nine and is a splendid catcher. His specialty is catching speedy pitchers. The score. NEW HAVENS. Totals......42 12 10 27 21 0 12 8 4 2 4 Totals......31 0 1 27 17 0 1 18 6 0 2

Attorney Case then closed the argument for the opponents of the bill. As ever he was interesting and forcible. Stripped of the humor and individuality which the noted orator infuses into his efforts, his argument was substantially as follows:

The bill is confessedly to extinguish the town of New Haven, which is a corporation that antedates the legislature which creates the constitution itself.

Its existence preceds all other government, and is independent of all others and cannot be destroyed by legislative enactment. It elects the general essembly and makes and changes the organic law of the State. The government of our fathers and the State itself is but an aggregation of towns organized the feather for the father in the country has better control of the ball than Carsey.

Worcester is trying an amateur named Myers at hort.

Sam Wise has signed with the Washing-tons.

Negotiations are now pending between Manager Hussey of the Flushings and Oneida (N. Y.) people which, if satisfactory, will result in Manager Hussey's taking his team permanently to Oneida. He has a strong team and one that would be likely to win the New York State league championship.

Manager Spence was severely injured by being hit by the ball in yesterday's game.

Carsey and Horner did splendid work yesterday. There is no doubt that they will be the star pitchers of the team. No pitcher in the country has better control of the ball than Carsey.

> Court Notes. Patrick McKeon, charged with manslaughter and having accomplished the death of E. C. Gobeir, a carpenter on the Yale memorial recitation hall, was defended by Axtorney T. J. Fox before Judge Pickett yesterday. Attorney Fox, when the case was called, moved for a continuance until was called, moved for a continuance until Wednesday, April 24. The motion was objected to by Mr. Dailey, but Judge Pickett said that in a case of this magnitude the prisoner's counsel should have time in which to prepare his defense. He also granted Attorney Fox's request that witnesses for the defense might me subposned by the State. He ordered drawings of the building presented in court on Wednesday, April 24. McKeon is out on bonds.

> Bertha and Della in Trouble. Bertha and Delia Leonard were in the City court yesterday. Delia stood ac-oused of the theft of two sheets valued at \$1, one table cloth, \$2, and \$28 in United States money. Mrs. Cohn, the first witness, said she was a buyer of old clothes. She placed the above articles in a drawer, but placed the above articles in a drawer, but later found they were gone. She straightway went to Delia's house, situated in the rear, and accused her of the theft. Mrs. Leonard denied it. Sarah Cohn was another witness. Mrs. Leonard told a straightforward story. A number of witnesses were examined and she was discharged by his honor, the evidence which was introduced not being sufficient to convict her. She now intends to bring suit against Mr. Cohn through her attorney, T. J. Fez, for slander. Mrs. Casey Was Hit. James Brady, a teamster, became unman-ageable in the Oak street hotel Wednesday
