The prohibitionists have been earnest and active and will probably poll a larger vote than many think. It s certain that a large majority of the voters do not desire or believe in prohibition, and it would be unfortunate if the amendment should be adopted because of the smallness

of the vote. Therefore all who are opposed

AN INCENIOUS SCHEME. It is high time that the English holders Confederate bonds should get over the idea that they can ultimately get them paid. But they do not, and their latest scheme is an ingenious one. They know that money is needed in the South. Southern States want money; southern cities want meney; outhern corporations and northern corpora-

It is related that he is a member of a firm who have been for many years the principal dealers in the American stock market and few extensive schemes from the other side have been floated here before they have been submitted to this particular firm.

"You said 'copyrighted' just new in talking about an article yeu saw in the paper."

"So I did."

"I should think any one with as much schooling as yeu've had would know that you ought to say 'copywritten."—Washington Capital. The syndicate represented by this man has a tremendous power in English financial circles. It holds a vast amount of bonds, most of which were bought for a song. The raling price of the bonds to-day is three-quarters of one per cent. The agent is as high priced as he is shrewd, and the few who are aware of the object of his American trip are sure that it would not be a made a vent of "Yes." said the salesman. One, sent to Mrs. Lincoln on the official paper of the executive mansion, was:

JACK (?) THE RIPPER robably a woman, in the Opinion of One of the Most Eminent of London

Surgeons-A Startling Theory and Ar-Mr. Lawson Trait, the eminent woman urgeon, having read the suggestion published in our columns on Thursday that "Jack the Ripper" might be a woman, had yesterday a chat with one of our four representa

Now, ooking at the subject as a surgeon, the first conclusion is that the whole of the murders, not only in Whitechapel, but in Battersea and Chelsea are the work of one and the same individual. They must be grouped together. econdly, the crimes are the work of a lunatic. The absolute motivelessness of the whole business shows this.

tured to the students and professors of Harvard college the other evening, marriage in India is not a failure. His subject was the philosophy of the Brahmins, and in the course of his remarks he said that in "India, with its 200,000,000 inhabitants, there never occurs a marriage of inclination. Yet there are mere happy marriages in India, more happy homes, more pure domestic relations that in any other part of the werld."

In the archives of the Warnberg railroad at Furth, which was the first line constructed in Germany, a protest against railroads has been found, drawn up by the Royal college of Bavarian doctors. In it occurs the following passage: "Travel in carriages drawn by a locomotive ought to be forbidden in the interest of public health. The rapid move-

splashing, done without method by a novlee with the knife. Having out the victim's throat from behind, the operator simply by an act of unconscious cerebration goes to work in the regular butcher fashion. Having slit the calf's neck, the next thing to be done is to make an incision at the bettom of the abdomen, and lay aside the various ergans in the very fashion reported at the inquests as having been done. The resemblance between the 'Ripper's' work and that of the butcher's is complete.

"What advice do you then give to the police!" our representative asked.
"Let them visit all the claughter houses in the district, inquire as to male or female regular assistants or occasional helps—there are not so many slaughter houses, and they are all licensed and under the health authorities—and find out what facilities there are for entrance into the houses after the work

[From the Christian Union.] Shoes are one of the expenses of a toilet that may be reduced only by care. A worn out shoe is not possible of renovation; ne amount of skill will make it pass as new. The only pessible way to save in shoe leather is to care properly for the shees while wearing them. A writer in the Brooklyn Eagle takes some very wise suggestions about the

proper care of shoes. "Particular attention should be paid in every home to the care of shoes. Where there are children there is generally an accumulation of shoes partly worn and whelly The Cream of Tartar used in Dr. Price's Cream Baking Powder is the strongest and free from all lime and other impurities.—Prof. Peter Collier, Chief Chemist for the United States Department of Agriculture, Washington, D. C. worn, and these are all thrown in the bottom of the closet together and must be assorted when wanted. When taken out they are sometimes moldy because they are thrown in when damp and dirty. Many of these are of no earthly use to the possessor, but are hoarded up with the idea that some day they will be needed; yet rarely is this true, as they are put away in such a rough condition that when taken out they are generally unfit for mee. Shoes that are worn regularly, if cared for, will last much longer than if neg-lected. A French kid shoe, if kicked around on the closet floor or under the bed, will not last as long or look as well as one inferior in quality if properly cared for. When shoes are taken off they should be wiped with a seft sloth, and, after airing a little while, eiled or polished and put in a box by them-BEDROOM. selves, or a shee bag, and when wanted for use can be taken out ready for wear. It is net advisable to use much of the dressing s fashiomable for ladies' and children's shoes as most of them crack the leather and ruin it. I have seen expensive shoes, the tops all cracked open in less than a month by the use of shoe dressing; therefore, unless yes can find one that has been well tested, it is better to use a little sweet oil colored with black ink and rubbed well in. For seme

years past I have used a polish that has considerable glycerine in it, and found that i preserves the shoes wonderfully, always keeping them new looking. If a lift be-gins to wear off the heel I have attended without wiping all the dust from the orevices and putting them earefully away. The result is that I have worn one pair of boots every day for one year and another year for a house shoe. I have a pair of boots that were made to order, for which boots that were made to order, for which I paid eight dollars, have worn them every day for two winters, or rather frem October to May, and shall wear them another, and perhaps two seasons more. In the spring I rub them well with oil and put them away earefully, and in the fall they look as good as new. Never wear a shoe unbuttoned if you care to have it shapely. Never put well shoes close to the fire to dry, as it hardens them and makes them difficult to put on. When taken off the foot wet, amouth into as When taken off the foot wet, smooth into as good shape as possible and rub them as dry as you can with an old soft cloth, then put them is a medium warm place to dry. If your shees get muddy wash them off with celd water and rub dry with a soft cloth. This can be done quickly, so that the leather may not get wet through, then pulled into shape and left standing until quite dry.

After this use a little good polish and the shoe will be as fresh as if quite new."

It Costs Very Little to Furnish & Hot and Make it Cheerful.

In Japan, says the artiet Wones in the September Century, woman have always held a higher posistion than in any other Asiatic countries. They go about freely wherever they please, and the seclusion of the Chinese is wholly unknown to them. The schools receive as many girls as boys, and as a result of my observations I can safely say, without tide compliment, that the former are bright.

of my observations I can safely say, without idle compliment, that the former are brighter than the latter.

"By degrees, and under the favorable conditions for general observations, some of the causes of the people's happy spirit of independence began to be revealed to me. The simplicity of their lives, in which enters no selfish rivairy to outdo one another, accounts in a large measure for this aways had result selfish rivalry to outdo one another, accounts in a large measure for this enviable result. Regarding one another very much as belonging to one family, their mode of life is more or less on the same plane, and consequently a spirit of great harmony prevails. A very small income is sufficient to supply the ordinary necessities of life, and everything else is secured with but little effort. Household effects are few and inexpensive and should everything be destroyed by fire or loss in any way, it is not an irreparable calamity. All can be replaced at a small outlay, and life go on as before.

"The tenant upon renting a house, is put

as before.

"The tenant upon renting a house, is put to little expense to furnish it; indeed, he requires absolutely no furniture at all. The clean, finely woven mats which cover the floer serve as table, chair and bed; and as it is the universal custom to remove the shoes before entering a house there is no danger of one's bringing with him the dirt from the streets.

"His bedding consists of cotton quilts, which are spread out on the floor at night, rolled together in the morning, and stored away in a closet during the day. A few pictures and specimens of beautiful script decorate the walls, a few vases contain sprays of flowers, and a number of cushions on the floor complete the furnishing of the room. Yet it does not seem empty or cheerlees, for the general arrangement of harmonious colors, the different woods employed in its visible construction, and the beauty of the finished workmanship make a most harmonious and pleasing combination."

The brotherhood has shown great strength in the United States, will be long remembered by those who attend.

The brotherhood has shown great strength and is now spread all over the country, about 350 chapters being established, having associated with them nearly 500 young men, all working with zeal and faithfulness to carry out the ends of the association. It is a strictly religious society, with no amuse ments in the background. Mr. Lines did not believe in trying to draw people to church by offering indusements bordering on amusements. He spoke at some length on the convention held in Cieveland.

PROBLEMS OF GOD'S KINGDOM Newman Smyth-Two Great Ec astical Bodies-Diversities of Gifts But Union of Christian Purpose.

Rev. Dr. Newman Smyth preached an ad

rable and comprehensive discourse yester

day forenoon at Center church from the words in first Corinthians, 12, 4, 6: "No there are diversities of gifts, but the same spirit," etc. It was a sermon breathing to the general convention of the Protestan Episcopal church, now in session in New York, and to the triennial Congregational council, which begins its sessions at Worcester next Wednesday. The diversities between these two representative bodies of large Christian communions are apparent to the casual observer. The one body meets with more imposing rite and ceremony; it is clothed with legislative authority; it represents the unity and strength of an organized Christianity, pervaded and elevated by the consciousness of organic life. The other body is also representative, but it is without authority over the churches in whose name it assembles. It has no dignity save that of its own great simplicity; without organic unity it gathers the free forces of a Christian brotherhood, which is pervaded and elevated by the common spirit of one service of man and God. The diversities which are apparent at the first glance between these bodies of men will be found to penetrate into every deliberation and to distinguish their mode of apprehending every subject which may be brought before them.

In the similarity of questions which appeal to these historically opposite bodies of Christian men, the speaker saw first the tendencies towards future unity in questions of other characters. The congregationalists he also saw an unmistakable impulse to unite in happier combinations their own working forces of Christianity. Another significant piscopal church, now in session in New York, and to the triennial Congregational

sign of the working of the same spirit is to be seen in the present discussions concerning the worship of churches. Is it not deeply significant also, eatd he, of the working and diversities of gifts of the self-same Spirit that this subject of the enlargement and enrichment of public worship is now occupying to such an extent the thoughts of Christians in different communions! On our part it is a decided sign of approach towards that true Catholicity which was once lost when Rome succeeded in making one visible church, and which can only be regained upon the highest plain of Christian worship and love. And still another important sign of the working of the same spirit will be found in the fact that those two bodies of men are providentially called to face the same urgent social problems, and beyond and above all matters pertaining to these special ecclesiastical affairs, to rally and marshal the forces of Christianity and the forces of Christianity and the forces of Christianit called to face the same urgent social prob-lems, and beyond and above all matters per-taining to these special coclesiastical affairs, to rally and marshal the forces of Christiani-ty against kindred powers of darkness and

an end Saturday night. It has been the tion in Boston much of interest and importmost exciting struggle ever known in the history of the National game, and was in president, J. A. Boston played in Pittaburg and meeting congratulated the association on the successful year experienced by navigation interests and the favorable outlook for the year ensuing. The association's finances lost, 6 to 1, while New York played in Cleveland and won, 5 to 3. This is

The blame for the loss of the chamionship in that city is laid to Manager Hart. It is said that he allowed certain men to carouse and said nothing. A despatch from Boston yesterday says: "There are several men on the team who have done noble work and have played to win every time. Clarkson, Bennett, Ganzel, Smith and Richardson closed the season without a breath of suspicion against their steadiness. Nash and Brouthers are credited with one slip-up, but their magnificent play the rest of the time was sufficient atonement, if indeed they were guilty. But Kelly, Madden, Johnston, Dailey, Quinn and Radbourn have been criticised, and justly, for drinking when they knew that the success of the team depended upon their best efforts.

His policy was to let the boys do as they pleased. He cared not what or how much they drank or how late they sat up. By this utter lack of discipline he made himself solid with the carousing element of the nine and incurred the contempt of the "The bills of lading of the association for coal have been in general use during the year, though efforts have been made in Philadelphia, on the part of shippers of coal, to force into use the old form of bill of lading, which prevides for 100 tons per day for discharging, the vessel paying the stevedore. Previous to the organization of this association, vessels carrying cargoes at rates of freight 60 per cent. less than the average rate received since. Vessels were obliged to pay 20 to 25 cents per ton out of their freight for discharging coal. They were liable for any accidents that might happen to stevedores while discharging their vessels. There was no established rule in regard to discharging in turn. Consigues were obliged to receive the nine and incurred the contempt of the sober, sensible players. No fines were imposed, and especially when the boys were away from home they frequently appeared upon the field in no condition to play ball. "That is the reason why so many western games were lost; that is the reason why crippled nines succeeded in wiping up the ground with the high-priced Beaneaters. The Boston salary list was nearly \$50,000 the past season and there were but fourteen players on the list; every man was supposed to be a star, and it was everywhere admitted that as an aggregate of players they ought to walk away

The New Havens and Hartfords played a benefit game at the Howard avenue grounds Saturday afternoon and it was a tie game, 6 to 6, eight innings being played. The New Havens made about \$10 apiece. Donnelly of the Detroits played third base for the New Havens, Chadwick second base and Scally when they are ready for an instrument they will visit a first class house where they can see and hear for themselves and are not forced to take what is pushed upon them whether they like it or not, and are not the properties out of them."

Yet what more could we hope for? Do we not know that nine-tenths of all our pain sud suffering arises from this one prevailing complaint? Rheumatism, liver complaint and urinary troubles are nothing more nor less than symptoms of chronic nidigestion and dyspepsia. Remove the cause and the effect disappears. Clear out the ashes and the fire burns bright. Undigested food fills the blood with poison and impurity, so that we feel tired, languid, weak and feeble.

on First street. It was only a few minutes after the alarm was sounded before the flames completely enveloped the restaurant, the upper story of which was used as sleeping spartments. Nine men were sound asleep in the upper story, five of the nine escaped but four were burned to death. Ruffian Thompson, the head clerk, and Cecil mpson, another clerk, escaped by climbing down the awning in front. Jeff Kent of Carroll county, A. J. Cook and W. h. Alford f Webster county, jumped from the second tory window to the brick pavement below and were badly injured, Mr. Cook's ankle being broken so badly that amputation is thought to be necessary. Those who perished in the flames were J. A. Thomas, a merchant of Cumberland county; J. L. Lawley, Lon Crouch, both merchants of Hopelenden, Webster county; Paul Williams, a farmer of Suncrock, Octibbeha county.

For a time it seemed that the large part of the business houses of the town were doomed, but the gallantry of volunteer citi-zons averted this great disaster. As soon as possible the debris was cleared away and the bodies of the four victims, burned to a crisp and beyond recognition, were recovered. The remains will be shipped to relatives to morrow. It is supposed that the victims died from suffocation before they could make their escape. Lott's restaurant was one of the finest establishments of the kind in the State. The origin of the fire is unknown.

GREETED WITH APPLAUSE. owderly Addresses Five Thousand Persons at Chicago—He Refers to the Sianderous Beports Made Against

CHICAGO, Oct. 6 .- T. V. Powderly addressed an audience of five thousand persons here te-night. He was greeted with such a man. He began by referring to the critisms that had been launched against him from Chicago, and said that a few years ago he would not have expected such an audience or such hearing. His remarks on Sunday saloon closing were emphatic and pointed nough to elicit repeated outbreaks of apenough to elloit repeated outbreaks or appliance from even the most radical of his hearers. Mr. Powderly continued:

You have been told that the chief officer of the Knights of labor is a most villatinous character. He is not going to deny it. But I will agree that the citizens of Chicago not connected with any labor organization, may select a committee of three honest men and I will place with them the proportion of the order.

will place with them the records of the order since its organization. If that committee does not say what they have heard on the streets is slander of the order, then I will submit that it is a just verdict. If the re-spectable, decent citizens of Chicago do not care to accept this offer, I feel that they do not believe the slanders."

On the Sunday closing theme he said: I believe in Sunday rest. So do the Knights, believe the time will come when enough can be done in five days to give the laboring can be done in five days to give the laboring man two days in the week—one for God and one for humanity. What have the saloons done for humanity? How many souls have they saved? How many people have they clothed except the saloon keepers? When we have a strike the saloon keepers? When the week have a strike the saloon keepers? When the robs them of more. I never knew one of them to give a cent that he did not expect a dollar in return for. If the saloons will not do it voluntarily, let us make them do so. I

do it voluntarily, let us make them do so. I would advise you to keep up this agitation, Do not let these meetings stop. THE COMING COUNCIL. of the Congregational Churches of the The Race lesue to be the Impertant Question to be Considered. Boston, Oct. 6 .- Next Wednesday the naional council of the Congregational churches

of the country will begin its triennial session in Worcester. One of the most important questions which will come before it is the race issue, which will be presented from Money is wasted in Georgia. The Georgia Congregational association has been recognized as the Congrega-tional body of the State. This association is composed of fifteen small churches of colred people which are under the care of the American Missionary association. The Congregational Methodists conference, an older body than the Georgia Congregational assobody than the Georgia Congregational asso-ciation, is desirous of recognized relations with the Congregational churches of the country, and has elected delegates who will come to Worcester and apply for admission to the national council. The churches of the conference are white. The delicate question for the council to settle is whether it shall recognize two distinct bodies of Congrega-tional churches within the limits of one State when the reason for the two organiza-tions is nothing more nor less than the fact that they are composed of people of different races.

WASHINGTON, D. C., Oct. 6 .- The vanguard arrived here to-day of the army of Inights Templar who will be in the city this week to attend the triennial conclave, of the order. New England furnished the largest quota of to-day's advance. Rev. Sanford Martin of Windsor, Vt., supplied the pulpit of the First church yesterday, morning and evening. In his remarks yesterday he referred to his life at Yale during the rebellion and of his frequent visits to the conscript eamp at Grepevine Point. Yesterday was "rallying day" in the Sunday school, intended to rehabilitate the school after vacation. The Sanday school rooms were desorated with flowers, each class contributing a bouquet. There was a varied programme, addresses being made by Superintendent J.C.Cable, Rev. Mr. Mertin and J. B. Underwood. The opening prayer was by Rev. Mr. Shirley, and Rev. Dr. Hart gave the closing prayer. There was music by a double quartette and by the school and several recitations by papils.

"The Undeveloped Resources of the Charch" was the subject of an earnest and practical discourse by Rev. E. C. Sage at the Baptist church yesterday morning.

It should be by the vote of people themselves. It should be by the vote of people engrafted into the fundamental organic law of the commonwealth so that it cannot be repealed until we, the people, are ready to repeal it by our own votes. History has shown the danger of leaving such important matters to the fields will of changeable legislatures.

The United States Supreme court has settled the question as to whether such legislatures it ield the question as to whether such legislatures. The liquor traffic can be banished legally.

Mr. Bliss held that prohibition does prohibit whenever such a law is put into the constitution or among the statutes and entrasted to the hands of honest officials. A prohibitory law can be enforced, he held, as well as any other law. The divine prehibitions issued amid the thunders of Sinai have not wholly banished ain from the world, but every Christian believes the decree of the Almighty, embodied in the prohibitory edicts of the decalegue was right. As to Maine, the speaker held to a contrary view from many others, argaing that prehibition is fairly well enforced there. In Kansas and lows, he said, it is very thoroughly enforced.

President Ives is not very favorably impressed with the electric car now stored in the Fair Haven ear house and which proved such a failure. To run such a car would require a track specially built for the purpose. He says that electricity will undoubtedly be employed in a few years in propelling street cars and its adaptation and use might be nearer than the people really imagined; but until the right system could be solved the public would have to depend upon the horse cars for transportation about this city of such libraid distances.

THE PUREST AND BEST

Is made only of strictly pure grape cream of tartar, strictly pure bicarbonate of soda, and a small portion of flour as a preservative, nothing else whatever, and is warranted entirely free from alum, ammonia, phosphates, lime, and all the adulterants frequently found in baking powders. The character of materials used, their purity, and the nicety of their combination, render Cleveland's superior baking powder the most healthful and most economical in use, and it always affords wholesome, nutritious, and delicious food. It is recommended for purity, healthfulness and efficiency by Government and State chemists, chemists of Boards of Health, and professors in institutions of learning throughout the country. All hands want Pearline-it's handy

Enables one pair of hands to do the work of several; millions of hands use it; millions more will when they learn its value.

You can read, write, sew, wash dishes, prepare the meals, care for the baby—with your two hands, while Pearline is washing the clothes for you almost without the aid of hands. It's harmless; cannot hurt most delicate of hands or fabrics; most delightful for washing the hands. It saves your hands one-half the work in house-cleaning-in fact, when your hands have anything to wash or clean, you will find sooner or later that Pyle's Pearline is the best thing known with which to do it.

Beware Many hands are engaged in peddling imitations of Pearline—or goods which they claim to be "as good as Pearline." IT'S PALSE—Pearline is not peddled.

DR. JOHN L. LYON, NO. 49 CHURCH STREET. The well known and reliable Botanic and Eclectic Physician ROOM 11, HOADLEY BUILDING

(Opposite the Post office.) ide Entrance 123 Crown Street Office so arranged that patients see no one of the doctor.

Who has practiced medicine in this city since 185 can be consulted at his office.

Dr. Lyon's success in the treatment of all diseases has bean marvelous and his fame has spread throughout the length and breadth of the United States: Being opposed to all mineral and poisonous drugs, he has selected choice and potent remedials from the vegetable kingdom only, and with valuable roots, barks and herbe is prepared to CURE the most stubborn and intractive disease. Consumption, that bane of our eastern climate, which causes so many to succumb to its ruthless power, is CURED by Dr. Lyon, as many testimonials from minimpachable witnesses attest, Dyspepsia, the mational scourge, which dooms thousands to torture and misery, is routed and annihilated by a remedy discovered by the doctor. In no case yet has this inestimable specific failed of banishing that painful disease. All diseases of the Lungs, Liver and Kidneys, as well as Skin Diseases, and all impurities of the Blood of whatever name and name, are radically and permanently cured in a surprisingly short time by the doctor's im roved method of treatment.

TO FEMALES:

TO MALES Who are suffering from the errors of youth, los manhood, etc., and find themselves weakened and debilitated, and also those suffering from venereal diseases: Dr. Lyon will prove to you that he CAN and WILL CURE YOU. Hundreds of advertisements appear in papers with statements of marvel ous cures which TEMPT MANY TO SEED FOR SOME WORTHLESS MEDICINES WHICH DOT FAIL OF APPORDING THE RELIES DESHED, but also RUIN THE PATIENT'S CONSTITUTION. Do not trust yourself to those leeches who prey upon the unfortunate but call at once on the doctor and you will never regret it.
