PARALYSIS OR INSANITY, OFTEN ENDING IN SUICIDE,

THE RESULT of NEGLECTED NERVOUSNESS

The First Symptoms of. Nervous Weakness are the Danger Signals All Should Heed. Cure Yourself Before the Dread Disease Has Become Deep Seated and It Is Too Late.

"SHOT HIMSELF DEAD!" What is the matter! Only what is the matte What is the matter! Only what is the matter brain and nerve exhaustion from overwork, fret and worry and the cares and anxieties of the pushing and hustling age in which we live, and which finally ended in the dread paresis, insanity and sudden death.

Men without number are straining their brains and nervous systems in the mad race after fortune and fame, and exhausting their nervous and physical energies, until sleepless nights, failing powers, complete nervous exhaustion, paralysis, insanity or death must be the inevitable end unless help from some source is received. must be the inevitable end unless help from some source is received.

Thousands of women are overworked, ex-hausted, worn out in nerve force and power until they feel tired all the time. Clerks, students, mechanics and laborers, from close confinement, long hours, strain upon the nerves, dissipation or other causes, are losing

their vitality and becoming nervous and physical wrecks.

You, reader, are rushing on blindly to sure destruction. You are warned every day and every hour of your impending doom. How? By those strange sensations, that dull, dizzy and bad feeling head, that restlessness, irritability and nervousness; by those more or less sleepless nights, from which you wake tired and unrefreshed; by the weak, trembling, cold limbs, by the languor and sense of nervous and physical exhaustion which grow upon you more and more. These are danger signals, and not to heed them is the folly

If You Suffer from Nervousness, do not Neglect your Case one Moment

Read How a Prominent Business Man was Saved from Nervous Prostration and Insanity. From constant worry over business matters, I suffered from loss of sleep and became so nervous that I was entirely unfitted for my business and was compelled to give it up. In fact, I feared insanity. Seeing Dr. Greene's Nervura spoken of so highly I obtained a bottle and began its use. The effect was almost magical. I could again sleep, mental composure, appetite and strength returned. Six bottles of this remedy cured me and I have remained well to this date. I have recommended Dr. Greene's Nervura to many of my friends and neighbors, and have yet to learn of a failure to obtain good results.

NO REST FOR THE GOOD. New Haven is not yet to be left withou nething for those "interested in the welfare of the city" to talk about. The State Ionse question is almost settled, and it be gan to look as if there would be nothing to divide upon. But no one can tell what a day will bring forth, and suddenly the old Green fence question burst upon the town in full magnitude and interest. And now everybody has something to talk about again; and the fence question seems destined to go through pretty much the same course that the State House question ran. We must have a committee to find out what the original planners of the Green meant. We must have another to find out whether it will pay, from a money point of view, to pull the fence down or let it stand. A committee of those who find the fence a good place to lean against could find work to do in support of their leaning place. And we must have a committee to ascertain whether or not the people of New Haven are willing to "keep off the grass" if the fence is taken down. After these committees have done their work and ample time for discussion has been allowed (say five years), s

shall be ready to take the fence down or let We suppose that the old Green fence question will be enough to fully occupy the minds of the people of New Haven until it is settled. But if it should be inadequate somemight ask each other why the structure which adorns the Chapel street side of the old Green fence should not be given a more conspicuou

A LOOK AHEAD. It has recently been announced by a selen ific gentleman that this country would have population of over 1,000,000,000 in 1990. But now arises another scientific gentleman-Professor Silas L. Loomis—and points out some things which are likely to interfere with the growth of population here. One of the variable elements in the problem is im-

nigration. The professor looks to see this great influx of aliens gradually dwindle and at length practically cease altogether. He says: Heretofore we have enjoyed almost an exclusive monopoly of the flow of immi-grants, but more liberal laws and freedom of action showing itself among other people The Free State of Congo will be a powerful competitor against us, and indeed the whole ntinent of Africa will offer inducements that will be beyond our ability to present. It would not be an unexpected result to find the emigrants exceeding the immigrants. Another element to be considered is the birth ratio. This has been growing centinuously smaller for a century past, which shows (according to the professor) "a most wonderful decrease of vitality in the people of the United States." The decrease, he

thinks, may be expected to continue in the coming century, and for these reasons: We must consider man as a machine supplied each day with a given amount of energy. The law of the co-relation of forces ap-plies here as well as elsewhere. A man may, then, expend his energy in various ways. He may increase his vitality or develop great physical strength, or display great inellectual power. As he has only a given stock of energy each day, and, as a general rule the intellectual forces predominate in this country in the strife for money and fame, he has no supply of energy left for the This is as true of women as of men, and is, perhaps, sooner seen in the female. The enlarged requirements of social life and the great effort of woman to do men's work in all professions of life will most certainly depress the birth ratio, because her stock of for competition. This is already seen in all

the older States of the Union, and is well known by the medical profession

A prison is not provided with all the toilet coneniences that most women like, but some of the female prisoners in the California state prison have lately shown that a little feminine ingenuity can supply the want of them sonably well. One woman whose hair was always well dressed and shone with the luster of the finest oils was a complete mystery to the other women until she revealed the fact that she skimmed the fat from her soup, and, letting it cool, applied it as hair oil, for which the attractive state of her hair showed it was admirably adapted. Another woman was no less a mystery to the prison keepers for her rosy cheeks, which unmistakably showed the presence of rouge. It was after ward discovered that this glow of youth was imparted by the coloring matter which she btained by chewing the red yarn used in

trick. Here it is. Take a spool of white basting cotton. Drog it into your inside coat pocket and threading a needle with it, pass it up through the shoulder of your coat. Leave the end an inch or so long on the outside of your coat and take off the needle. Four men out of five try to pick that whole thread off your shoul der, and will pull on the spool until it actually does seem as though your clothes are all bastings and that they were unravelling not

only your clothes, but yourself.
"I was in to see Wilson Barrett in 'Claudian' in Boston last week," said the travelling man. "It was in the most interesting was rapt. I was sitting bolt upright, and didn't know or care to know a soul around me, when suddenly I felt some one tugging at that basting cotton that I myself had clean forgotten. I didn't say a word and did not move. Foet by foot it unrelled. Half glancing around I saw a man—a total stranger—yanking at that thread. His face was scarlet. He had pulled out about ten yards and was now hauling in hand over hand. He didn't dare to step because he had decorated my back and the whole aisle with basting cotton. of a fool.

What is to be done! The answer is plain enough. You are losing your nerve force and power and running down in strength, energy and vitality. Whatever will restore this lost strength and vigor to the brain and nerves will put you again in sound health and strength. This is precisely what Dr. Greene's Nervura, the great brain and nerve invigorant, will do. As a restorer of nerve force, a builder up of nerve power, vigor and energy, this wonderful remedy has no equal in the world. You can have no idea, until you try it, of its marvelous toning, strengthening and invigorating effects, its beneficial and healthful action as a brain and nerve restorative. It is purely vegetable and perfectly harmless.

THE TWENTY-SEVENTH O. V. TRIP Reminiscenses of Gettysburg Battle

To the Editor of the JOURNAL AND COURIER Following are a few reminiscenses of our the periors of Redeliffe's last evening. It recent trip to Gettysburg with the Twentywas the sixth annual banquet of the Yale seventh C. V., which may be interesting to Andover club, and about thirty members of some of your readers: The town of Gettysburg is very much built up since the war infiabitants. There are several hotels and any number of boarding houses, for the accommodation of visitors. At the Freeman House on Baltimore street, where we stopped his experiences during that battle. He was returning from a warehouse where he had been caring for the wounded, when he was

met by a party of rebels, who took him prisoner. One of them fired at, without wounding him. They kept him prisoner a short time and then sent him home, telling him to stay in the house and keep out of the way of the bullets. He was then fifty-eight years old. Rising early one morning he discovered that he rebels had decamped during the night. In great excitement he started to inform the Union authorities, when he discovered that he had on neither hat, coat nor shoss Raturning to the house he dressed him. hoes. Returning to the house he dressed him

football team this fall. It is hardly possible that such will be the case, but if it were it would be no more than fair, seeing that Harvard and Princeton have induced several of their graduates to come back and play football.

The Gun club held a shoot at its grounds yesterday afternoon. The feature of the shoot was the breaking of 20 clay pigeons out of 20 by L. H. Burrell '92. Pike '90 was second on the list. There was possible to a Georgia regiment. There he had lain for twenty-six years. At the foot of Little Round Top stands the tree where a rebel sharpehooter was killed and hung among the branches for three days before he was discovered.

Yale News as one of the executive committee of the club, said that he was not a Methodist and therefore could not be a member of the committee. Barnes '92, Mann '92, W. Parker '91, Gilbert L. S. and Perry P. G. were added to the executive committee members published in the Yale News yesterday. Another meeting will be called in about three weeks, when Dr. Vincent is expected to deliver an address.

M. Bergeron will give a reading of Mollere in 194 O. C. at 7 this evening.

Essays in competition for the Yale Littemedal must be handed in to-morrow.

Mr. Forrest Baldwin, Yale '85, who was one of the Lit. editors of his class, is running for the Assembly in New York State.

Lispenard Stewart '76 is a candidate for State senator in New York.

Emember him say there is some truth in the story.

Everybody on reaching Gettysburg is immediately transformed into a relic-hunter. In fact, the demand for relics far exceeds the supply. We were shown a building in the vicinity where it was probably a hoax. The proprietor of a relic store informed us that he had "a fresh supply in this morning." One enterprising youth informed a lady where she could find some relics and when she had found a bullet immediately demanded ten cents. He was presented with the bullet.

GENERAL FOREIGN NEWS. Mr. Davitt's Testimony-How the League Proposals. LONDON, Oct. 30 .- Michael Davitt contined his speech before the Parnell commission to-day. He argued that the government is now adopting some of the leading proposals eriginally made by the Land league. For andlords in Ireland on a twenty years' valuation of their property. The Conservatives denounced the idea when it was first most-February 8 who were in the other camp when the report in regard to the triangle trial was given, and were therefore cognizant of the facts as to the camp in which it was given and who gave it. He explained that it was a

d, but the government is now preparing similar scheme. Mr. Davitt denounced the charge that Mr Patrick Eagan, treasurer of the Land league, paid money to assist in the Phocenix Park murders, or that Mr. Davitt advanced money belonging to the league for the committal of outrages. The Times, Mr. Davitt declared, had not produced anything to support the charges, except the evidence of the convict Delaney, who swere that charges, except the evidence of the convict Delaney, who swore that the forged letters of Carey to Egan were genuine, and the testimony of the self-confessed perjurer, Piggott, as to his interview with Eugene Davis. Boycotting, Mr. Davitt declared, was not advocated as a means of personal injury or intimidation, but as embodying the popular sense of refusing to assist those agents. The commission here adjourned.

What a Prominent New York Doctor Has to Say upon the Subject Which i Attracting so Much Attention. NEW YORK, Oct. 30.—The steamer Cleopatra of the Old Deminion line, Captain Dole, from West Point, Va., for this city, was in collision at 5:30 a. m. yesterday off the capes of Delaware with the side wheel boat Crystal Wave, from this port for Washington, D. C. The Crystal Wave was cut down to the water's edge, and the Cleopatra began to break up. As the latter vessel was sinking rapidly, her officers and crew decided to abandon her, and were taken off by the steamer Kanawha, from Newport News for New York. The Kanawha also took off the officers and crew of the Crystal Wave. The Kanawha attempted to tow the Cleopatra, but was unable to do so as she rapidly filed and was a complete wreck. The Cleopatra had no passengers. Her crew numbered twentysit men, and that of the Crystal Wave thirten men.

All the rescued men arrived at this port to-day on board of the Kanawha, which is a coal-laden vessel, commanded by Captain Sears.

PLUMBING LAWS. The Committee Gives Another Hearin on the Proposed New Laws-A Necessity to the Poorer Class of People

Who Occupy Tenements-No Actio

The committee on ordinances last night onsidered the proposed laws to regulate all plumbing that shall hereafter be done in this city in regard to drainage and sewage. The laws were presented to the Court of Comm Council some months ago and referred to the committee on ordinances, but no action has yet been taken. Dr. M. C. O'Connor, Dr Winchell, George M. Grant, Health Officer Wright of the board of health, Prof. Brewer, x-health officer, Dr. Lindsley, secretary the State board of health, and Messrs. J. M. Buckley, Alderman Clerkin and Robert M. Morgan, of the New Haven Plumbers' asso-

ciation, were present and spoke about the newly proposed laws. From what was said last night it would seem as if plumbing laws were an absolut necessity in this city. At present a landlor can put in any kind of plumbing, pipes and yale the western goal. Thayer, by a strong rush through the center, scored the first touch-down in five minutes. Thayer kicked the goal, making the score 2 to 0 in favor of Pennsylvania. Soon after Morrison segment of the ball and made the first touch-down of Pennsylvania. Soon after Morrison segment to the ball and made the first touch-down of Pennsylvania. Soon after Morrison segment to the ball and soored the third touch-down. No goal. Time, 25 minutes, After a good run around by Dewey, Gill scoured the ball and scored the third touch-down for Yale in 40 minutes. No goal. The first half ended 2 to 6 in favor of Yale.

The second half was begun with Pennsylvania facing the eastern goal, Snyder having taken Shannon's place. Gill made a touch-down for Yale in thirty-five minutes, and Hulme soon followed with one for Pennsylvania. No geal. When the referee called time the score stood 20 to 10 in favor of Yale.

The game was well contested from beginning to end. Except in falling on the ball Pennsylvania's work was fally equal to that of Yale, and it was only slowness in this direction and two phenomenal runs of Bliss that prevented her from beating Yale. The game was refereed by Mr. George, Princeton's former center rush, and umpired by Traoy Harris.

and make a parallel of those prohibition laws in Maine.

It seemed to be the general impression amongst those who were heard that a special inspecter be engaged to inspect every case of plumbing that is done. Mr. Buckley thought that permits for plumbing should be given out, and no plumber, under a penalty of fine or imprisonment, should cover up any of his work in a building before he had notified the inspector and it had been inspected. The city could license the plumbers, and anyone who failed to comply could be disqualified from doing any mere plumbing. In this way landlords could get no plumber to do his work unless it was done right. The inspector should be a practical plumber.

Dr. C. A. Lindsley said that it had come to be a question with him whether the committee intended to recommend the passing of these laws. Thirty years ago the Common Council would have taken no notice of them, as there was then no plumbing done.

Judge Fens, at Hartford, has given his decision in the contest over the Hendley legacy of \$5,000, and it was to his mind conclusively proven that the money should go to the Middlesex County Orphans' Home, which is located in Middletown. He said that all the evidence went to show that it was clearly the intention of the late Capitain Hendley to leave the money to this institution. The Temporary Home at Haddam will undoubtedly carry the case to the Supreme court.

We, two little Fair Haven girls, some to you with our grievance. It is simply this: A certain young gentleman from the West side and also one from the East side were holding conversation with our sisters and us, and during the conversation the convention of the Christian Endeavor at the armory was mentioned. They deliberately turned and asked our sisters to go without even saying one word to us in regard to it. Now, what we want to know is, do you think it was right! If they had asked us of course we should have refused, but we considered it want of manners—it might have been want of menney to pay our ear fare. Trusting that before another convention we will be provided for, we will sign ourselves. Fair Play.

Compound.

Deur Sira:—I feel it my duty to tell you what Paine's Celery Compound did for me. I can't praise it enough. About a year ago my head troubled me so that it seemed as though I should be crary. It was caused by over-study. I asked the advice of two doctors, who gave me medicine to no effect, and I did not know what I would do. I did not want to see anyone, everything seemed so strange. I had a tired, languid feeling, my kidneys troubled me, and I felt badly. I read your advertisement in a paper, and thought I would try the Compound. Before I had taken half of one bottle I felt like a new person. Four bottles cured me and I would recommend it to all that feel the way I did. Yours truly,

Mas. J. E. Wilcox, Rural P. O., Wis.

Physicians Prescribe it.

Dear Sirs:—I am much pleased with the action of Paine's Celery Compound in those cases where the nervous system was broken down from over-work of mind or body. I have seen from over-work of mind or body. I have seen particularly good results where the patient had lost all ambition, no appetite, constipated, could not sleep nights, etc. Three or four cases of weak, emaciated, hysterical females have been cured with the Compound. I have observed that it quiets excitable nerves, gives patients better rest, increases appetite, regulates bowels, and is a good remedy to build up broken-down cases generally. Yours truly,

R. C. Epgerron, M. D., Altona, Ill.
