Interesting Facts In Regard To Their Peculiarities.

In Many Ways They Have More Nerve Than Men.

Strange Compound of Timidity and Courage.

Women are hervous. There is no doubt of that, but are they mere nervous than men ! The nervous system of women is much more delicate, more highly strung, more finely tensioned than that of men. This renders them ca-pable of higher pleasures and deeper sor-rows than is possible with man. Men have a greater brute bravery, more intrepidity, boldness and daring; but women, weaker physically by far, greatly excel men in moral courage, spirit, fortitude, patience, and endurance of pain and grief.
