They want to spend their money to the best advantage, and notwithstanding the cry of hard times there is a good deal of money to spend. The merchants who do the most and the best advertising will get it and will have business to do, while those who seek o save money by cutting down their advertising account will lose it in loss of trade great deal of business will have to be one even if the times grow worse instead

The total sum of our pension payments nnually is over \$150,000,000, and sine 1868 this country has paid \$1,418,348,212 to its pensioners. This is a big sum, ever for such a rich country as this, and conemplation of it leads the Hartford Courant to make a suggestion which is well worth attention. It is that congress authorize the issue of low rate gold bonds to have been chosen to look after the interests meet at least half of this enormous annual of the fair in their localities. Most of

There is much exhibit for the county each represents. Towels; also balance of to commend this suggestion to public fa wor. By adopting this plan the present generation would be relieved of what many consider a grievous burden, while at the same time justice would be done to the brave men who risked their all for the country's safety. As a financial measure it would be advantageous. The national banks would be willing to buy such bonds, and make them a basis of circulation, which has in five years been decreased to the amount of

\$67,000,000 by the calling in of the government's obligations. The existing naional banks could easily increase their circulation by at least \$400,000,000 if they ould obtain that amount in bonds upon which to base it. They have within a week shown their disposition in this respect by buying many millions of government securities from northern savings

banks and depositing them in Washington n exchange for notes. NOT ALL SELFISHNESS. In times of general distress there is al

vays a display of much unselfishness and thought for others' woes This fact speaks well for human nature and is encouraging to optimists. A particularly cheering in ident of this kind is the warm and general sympathy which has been felt with George Sould this week. He got home from Europe the other day, and was immediately surrounded by eager reporters anxious to find out how he was standing the financial racket. His remarks showed what the situation really is and what a predicament he is in. He said: "I should very much dislike to be compelled to raise \$10,000,000 by this afternoon, or by Monday, or for that matter by Tuesday. I doubt very much if

I could do it. The situation in my opinion is extremely bad." When a man reaches a point where he is in doubt about his ability to raise \$10,000,hole," as the boys say. And what a hole to be in. Those who can't raise money at a week's notice or who can't get their sympathizing with Mr. Gould. Those who feeling for him will help to dull the edge

of their own troubles. EDITORIAL NOTES.

Professor J. E. Denton thinks express trains will never go very much faster than they do now. He bases this opinion on the fact that the resistance increases more rapidly than the speed, so that at last a limit must be reached. This seems to him to have been very nearly reached. But the professor may be mistaken. The mod-

figs had been put into jars in a heated tate, an aperture left for the steam to escape, and then sealed with wax. The hint was taken and the next year fruit canning was introduced into the United States, the ocess being identical with that in vogue t Pompeii twenty centuries ago.

There has been much dispute about th

olding power of wire and cut nails. The matter was recently investigated at the Watertown arsenal, and the cut nails were shown to have a holding power about 73 per cent, greater than the other class. As the production of steel wire nails now ex eds the output of out nails, and as the annfacturers of the latter claimed for them a greater holding power, a challenge was issued and accepted, and the areena test was to decide the dispute. In 58 series of tests the cut nalls came out ahead in each, and in most cases very much shead In all 1,160 nails, ranging from 14 to 6 inches in length, were driven into spruce and pine timber, and the force required to pull them out was measured on an Emery testing machine. With floor nails from

two to four inches long, driven in apruce the resistance of the cut nails was 80 pe ent, higher than that of the wire nails with finish nails, in spruce, the cut nail was 72 per cent. shead, and when driven into pine, with the taper perpendicular to the grain of the wood, the excess resistano in favor of the cut nall was 135 per cent. Even with a taper parallel to the grain of the wood the cut nail afforded a resistance wice that of the wire nail.

The arrangements for San Francisco's midwinter fair are proceeding quite satisfactorily. The city's Park commission has granted a tract of more than sixty sores in Golden Gate park as a site for the expo dtion, besides a strip extending from the orthern to the southern boundary of the city's great pleasure ground, which would be used as the midway plaisance of the fair. The architects submit their plans to-day for the various buildings, and ompt action is to be taken towards be ginning work on the main structures The manufacturers and liberal arts build ing is to cover a ground space of 450 by 200 feet; agricultural hall, 300 by 125 with an annex almost as large, and the nechanic arts building, 275 by 175. A core of other smaller buildings are also planned for. Near the entrance to the ex-

osition grounds, it is proposed that there be established a subterranean place into which will open pretty grottoes to show the process of gold and silver mining. At the end of the cavern provision is made for an aquarium to be well stocked with fish. Commissioners from almost every one of the fifty-seven countles in the State nem have already taken action, as the plan | will naturally give as ficiaries fought to save the Union for the of organization definitely states that their what she receives.

> How They Are Made and of What. It is dangerous to prophecy that the movement now being made in favor of large bonnets will be completely successful, and still more risky to predict that, if large bonnets are to be more general, the small bonnet or capita is to be totally eclipsed. Most milliners are themselves involved in paying one cent uncarned is most view of the complete to be cheated or to fight. Ten cents isn't much to fight over, but the principle involved in paying one cent uncarned is large bonnets will be completely successuncertain and refuse to hezard an opinion. It is to be hoped that the horrible doubt which sfillets him will soon pass away and that he will soon know that he can raise \$10,000,000 in the course of a day or two if he should happen to want it. It is a sad should happen to want it. It is a sad should happen to want it is a sad should happen to want it. It is a sad should happen to want it but the furors for them has passed over. Strikes in the Kitcher

The question of capital and labor is n inght out alone in workshops and rolling mills and among men. It rises to the for onstantly in our kitchens. The contest between the mistress and her maid, the er, is going on every day and all the time and firm and tactful in their managemen that their servants are not disposed to be other than willing and faithful, and there the mistress to stimulate them to fidelity and industry. Notwithstanding, the aver age employer needs to be held within lim

In the case of the woman hired by th day matters are somewhat different. Ter hours is the limit of a day's work, and for ordinary services required a dollar a day is the usual recompense. If an appearance is not put in at seven in the morning, time may be made up after six in the evening. But where this last is refused, and the employer must lose an hour of service or worth fighting over.
Some years ago a wash woman in a su

burban village near the great capital de-termined to establish the precedent, and compel all the women of her class in the villege to follow it, that one washing was worth a dollar. She went out by the day, worth a dollar. She went out by the day, and when the washing was done at twelve o'clock, or one, or two, or three, as the case might be, she got her dollar and went nome. Small families who could have had washing and ironing easily done in one day were obliged to do their own Ironing or pay a dollar more for having it done. This state of things lasted all one summer, but was finally broken up by a combinabut was finally broken up by a combina-tion among the honeskeepers, they resol-ving to insist on ten hours work from all women hired by the day, and that it should include washing, the nenst cleaning up at ter washing, and toning until the ten hours had expired.

Just over the fence, inside the grounds robbery is still rampant, though not near-ly so bad as it was in May and June. But person need take only one meal inside the grounds, and he can avoid that by carrying a luncheon. It has become really good form to do so. There is a conspicu-ous preponderance of luncheon boxes under the arms of the better-dressed people, that they ought to carry innoneous more often than otherwise patronize the restau-rants. It is strictly possible for people to see the fair in comfort for two dollars per day. The fixed charges for lodging and entrance amounting to one dollar, leaves seventy cents for food and thirty cents for incidentals, Midway Platsance, etc. These figures were furnished by a young New York clerk, who said he saw all he wanted the other hand, still pay fifteen dollars day at the down-town hotels and leave ten dollars behind them every time they visit Jackson park. With a very slight increase of mental and physical effort this sum could be raised from twenty-five to two hundred and fifty dollars per day. The fact is Chicago at the present time affords rare facilities for the feeble minded to be wrenched apart from their funds. Something is wrong with the intellect or versel-ty of a man who complains of robbery when he can get a room, rated at three dollars in May, for fifty cents, and can buy a clean, wholesome, well cooked, well-

It cannot be that this condition shall continue. Our sense of business opportunity is too acute not to become aware of these opportunities and have our cupidity and discrimination for gain not overcome and dispel our senseless apprehensions. While the premium upon currency has proved a great inconvenience and detriment to many persons, it has served an excellent purpose in awakening the people who hoard money, to the real significance of the times, and to a consciousness of the real merit of the extraordinary opportunities that now exist for investing money in excellent securities on a basis yielding a higher rate of interest than has been obtainable in legitimate business since the war. Any conservative and methodical and dispel our senseless apprehensions war. Any conservative and methodical investor can purchase the best securities to day on terms that will yield him from 8 to 18 per cent. per annum, and it is no exaggeration to say that within six months money will be a drug in this market and will not command 2 per cent. per annum.

NOW THEY ARE HOPEFUL. he Anti-Silver Committee Held Meeting and Formulated a Plan of Action-Later a Conference Was Held at the Residence of Senator Carlisle and at Its Conclusion Those in Attendance Congratulated Themselves—Will Submit a Proposition to the Silver Men To-day.

Washington, Aug. 10 .- This evening a roposition was formulated by the antisilver committee which, it is believed, will be acceptable to the free coinage committee, and it is thought that at the meeting to-morrow morning the conference will require the committee on rules to report an order to the house covering the arrangement.

The proposition is that the house proseed to discuss a bill providing for the repeal of the purchasing clause of the repeal of the purchasing clause of the Sherman law; that opportunity be given to offer an amendment providing for free coinage of silver at a ratio to be agreed upon by the silver men, if that is possible, if not then votes shall be taken upon the different ratio proposed. If free coinage at any ration be rejected an amendment may be offered similar to the Bland bill of 1878 limiting the purchase of buillon and amount of coinage. This failing, the vote is to be taken upon the bill as introduced or unconditional repeal. The discussion is to last two weeks with the privilege to any members who fail to he privilege to any members who fail to

The situation was greatly simplified to-night by the action of a conference held at the residence of Secretary Carlisle, at which nearly forty gentlemen, including the leaders of the anti-silverites were present. A general discussion of the proposi-tions submitted by the anti-silver commit-tee was had and it was agreed to take the affirmative on every proposition. The conference lasted nearly two hours and at its conclusion those in attendance congratulated themselves that the action taken was the best under the circumstances. A proposition will be made to the silver men to-morrow on the different propositions regarding free columne, different ratios and unconditional

Hunt, the pastor of the Catholic hurch here, asking for his removal has een generally signed, over 200 signatures being obtained in a short time, and will be presented to Bishop McMahon early next week. The bishop has said that he would give the matter his immediate attention, and it is the general impression that Father Hunt will be removed. The affair is still

ite a town topic. THEY DID NOTHING. The Senate Finance Committee Dis

cussed the Silver Question, But Reached No Decision. Washington, Aug. 10 .- The democra in the senate do not propose being forced by the republicans into hasty action upon the silver question, and have resolved that no forward step shall be taken until they have agreed among themselves upon a plan of action that shall secure the support of the united party. So when the finance committee came together this morning for the first time this seesion Chairman Voorhees, who had issued the call, announced that the majority wished to meet and discussed acress are a line of action and cuss and agree upon a line of action, and therefore desired that the silver question should not be brought forward at the meet-

ng.
By next Tuesday's meeting he hoped th

ubject would be in order.

The republican members of the commit-ce, save Senator Jones of Nevada, who stayed in the room only a few moments after learning of his mother's death, ex-pressed their dissatisfaction at this program and announced that they were ready at once to proceed to discussion and action as the president had called attention to the need for speedy legislation. But as they realized that a simple expression of the wish of the majority was annivelent to a formal motion which would undoubtedly prevail, they made no further resistance to Mr. Voorhees' suggestion, and the silver question was relegated to next week, se far as the finance committee is concerned.

In order that time might not be altogether wasted, however, the committee took up and discussed the proposition to allow the national banks to issue circulation to the full face value of the bonds deposited in the treasury, instead of limiting it to 90 per cent. of the value of the bonds as at present. It was urged that the result of this legislation would be more immediately beneficial than any other that had been suggested, as it would add a large sum to the momey in circulation as quickly as the notes could be printed.

CHESTER, Pa., Aug 10 .- The largest teamboat in the world slid off the ways and into the Delaware river gracefully and as easily as though she were a cockle shell instead of a four thousand tonner to-day. The yards of the Delaware River Iron Ship Building and Engine company, formerly the John Roach ship yards, were crowded with people attracted by the unusual sight. The officials of the Fall River line, whose fleet the new boat will head, came on from Boston, Fall River and New York. There were about 200 people in the party, in-cluding ladies. steps Taken by the State Board to Obtain an Enumeration Secretary Frank E. Cleaveland of the board of education for the blind has recently sent the following circular letter to charged from the service. each of the 168 town boards of selectmen in the state:

It is provided by section 65 of the Gen-eral Statutes of this state as follows: "The selectmen of each town shall return to the governor on or before the first day of November, annually, the number of deaf and dumb and blind persons therein and the age, sex and pecuniary circum stances of each." This provision has undoubtedly escaped the attention of the selectmen of your town, as we find no record of any return

made to the governor during the past year according to its provisions. At the last session of the legislature a board of education of the blind was created and intrusted with the duty of ascertaining and recording the page 150. ing and recording the names of all blind persons in the state, and with the same duties pertaining to the education of the young enjoined upon the other state board of education. We must first learn from the selectmen what persons are to come under our care and supervision. We therefore ask that you will cheerfully co-operate with us in this matter. You will operate with us in this matter. You will observe that the return to be made by you must include all blind persons of whatever age. The term blind persons, by law, when applied to those of a school age, includes those who by reason of defective sight are unable to attend and study in the public schools. There is a tendency on the part of parents of young blind children to keep them out of sight of the public. This makes the most persistent inquiry necessary in order to discover them. We have, therefore, prepared blanks for the clergymen residing in your town, requesting them to bring the matter before their congregations and make return of the result to you, which, together with the blanks especially designed for your use, we request be returned to this board, of which the governor is president.
