Progress toward the stars is always slow and painful, and it is not to be expected that Woman can at once free herself from the tyranny which has bound her and take her rightful and predestined place in creation. She will get there with both her pretty feet, but while she is getting there there will be occasional occurrences that will indicate that she has not an adequate

conception of what is due her. She has the effects of long centuries of subservience to overcome. She has the meanness and the recalcitrancy of Tyrant Man to conall, she has the gentleness, the kindness and the spirit of self-sacrifice which are in her own pature to fight against. Therefore we must be patient and bear with her while she slowly and painfully works out of all that has hampered her and will con-

tinue to hamper her until she has put it under her feet and taken her stand triamphant on it. Kansas is just now the storm center curiously enough it is also the scene of an event which is calculated to completely liscourage Susan Anthony, Lillie Blake, and the others who are leading Woman out of slavery, darkness and weakness into freedom, light and strength. It appears that a rascally Kansas man named O. J. This week, 37 1/2 C. Burwell took it into his head to rob a safe. He succeeded in his plan, but he did not succeed in making it appear that he didn't do the job. So he was sent to the State prison. But he isn't there now, because didn't understand justice as well as she ought to. So she got five hundred Special price, \$1.69 signatures to a petition for her Same with double ruffle, \$1.89 | father's pardon, and then worked at washing and sorubbing until she earned father's pardon, and then worked money enough to pay her fare on the railroad from her home in Norton county to Topeks. There she saw the governor and La Tosca Collars. made such an impression on him that she got her father pardoned and took him home

with her. It is said that the father thinks so much of this daughter that he is going to try to live honestly hereafter. If woman is going to have her rights and is going to make this world the abode of equal and exact justice she can't do such things as this Kansas woman has done. And yet the hearts of the women who are not fully emancipated and the hearts of the en who are mean and weak enough not to want to see Woman fully emancipated will go out toward this loving, loyal, self sacrificing Kansas woman, who is willing to give her sinful father all the rights she can get for him with the labor of her mind and her hands and the power of her warm and

The mines lie in ledges which cross at right angles the walls of ons, the Cochiti, the Pino and the Peralta. Some of the ores already taken out here are very rich, and if the claims as to their abundance are verified in the coninued working, Cochiti will prove one of the great gold-bearing districts of the United States. At the mouth of the Pino the central canon of the three, the humming, brand-new town of Allerton is situated. Two smaller town sites, Kent City and Eagle, have been laid off, about six miles to the east and to the west respectively. A few frame and more log houses are interspersed among the tents which constitute the greater part of the residence and business structures of the camp, in which about 2,000 people abide. Saloons and gambling and dance houses are plentiful and busy, and even the "old-timer," with memories of Deadwood, and Leadville, admits that the Cochiti has generally

This man, who lead the Homestead

"I have only two sentiments in regard to the movement. One is of pity for the poor deluded devils who have been induced to join it, and the other of contempt for Browne and Coxey, the men who led them into it, for it is the greatest piece of folly ever perpetrated in this country. In the first piace, it is a fool's errand to expect congress to be influenced in this way, and in the second place the men who are leading the movement are neither of them sincere in the promises they hold out to their followers or the position they assume before the public. Coxey is a horse jockey and Browne is a mountebank of the worst description. Coxey is not the sort of a man to lead any movement, and, though the good roads proposition as far as the good roads themselves are concerned, probably have the good wishes of all the intelligent people in the country, the method by which Coxey proposes to obtain them is calidials enough to win the ridicule of any thinking man. the capitol, said about Coxey, as follows

Chairman McGann told Coxey that he received the petition with the understanding that it would be referred to Coxey bills for construction of good roads and the issue of non-interest-bearing bonds. Chairman McGann told Coxey that he received the petition with the understanding that it would be referred to the committee mentioned in the resolution should the latter be adopted. Coxey followed the reading of the petition with a brief statement of his already exploited theories and the answared questions put to him by members of the committee.

Mr. Ryan, dem., of New York, pressed
the question upon Coxey as to what war

"Yes," said Coxey, "but as a rule they are misrepresented instead of represented."

"Well," asked Mr. Ryan, "have you any showing to make, any proof to offer that you represent 99 per cent. of the people?"

"No," said Coxey after thinking a moment, "I don't claim that."

This closed Coxey's hearing, and he withment, "I don't claim that."

And let us see what is the differ ence between a statesman and a politician. A politician is a man who labors day and night to see what the people will do for him. A statesman is a man who labore equally hard to do what he can for the people. He was by nature a diplomat and had as much shrewdness as is consistent with honesty. The effect of all this, said Mr. Grosvenor, had a very direct bearing upon the question of where the money will come from to meet the expenditures authorized by the naval appropriation bill. In conclusion he said: "I appeal to the committee on naval affairs to readjust its bill in accordance with the suggestions I have of-

out being compelled to bow down in hu miliation and to take up even the badge of protection. We have had to surrender

of protection. We have had to surrender
at discretion at every point, until it is now
a question between the McKinley protection set and the pending bill with a very
little margin of difference between the two

I will vote against these amendments, but when they are incorporated in the bill l vote for the bill if it has five cents of re-

inction in it, as a choice between the two.
"The democratic party said to the peo-ple in 1892 that protection is a fraud and

that the party was in favor of taxation for revenue alone. I want to make an

honest effort to redeem that pledge. I would rather vote to reduce the duties imposed by the Wilson bill. I would have put more articles on the free list. I would

put more articles on the free list. I would have reduced the cost of production, so that our manufactures could take the markets of the world and give employment to the people, instead of having them come here to tell the government of their distress—a distress which the protective tar-

tress—a distress which the protective tariff has put upon them. You may plie up
duties to any extent you please and if it
is any better than the McKinley act I will
vote for it. But do not try to make it just
as bad as it can be made before I vote for
it. I went the gentlemen to stand out and
take the responsibility for the amendments
which they have forced upon this bill."

There was some applause in the galleries
at the close of the speech.
Mr. Gorman was in the chamber, but he
simply smiled and made no reply. Mr.
Brice was abeent.

The amendment was then agreed to without further discussion and without a division.

Then Mr. Lodge, of Massachusetts, of fered the amendment of which he had previously given notice of as follows:

"Except that, when not in any contra-ention of any existing treaty, any article hade dutiable in the following sections

shall, if it is the product or manufacture of Great Britain or any of the colonies of

Great Britain, pay a duty double that here in imposed, and any article upon

the free list in the preceding section shall, if the product or manufacture of Great Britain or of any countries pay a duty of 35 per centum ad valorem, and such additional and discriminating duties

would not be worthy of notice but the following veritable history makes it an eel of cels.

The cel was caught by C. Oliver Harris of Truman street fifty years ago, in Mr. Harris' boyhood days, and with the instinct for mischief that has distinguished all boys good for anything from time immemorial, he put it in the family well. In 1870 the well was cleaned and the cel found to be alive and in good health, but he had not grown perceptibly. He was put back in the well and left undisturbed until Monday, when the well was again cleaned.
